PREFACE.

From a political standpoint the year 1896 has been the most remarkable in our history. It has witnessed the partial disruption of one of the great parties, the formation of the free-silver party, the union of one wing of the democratic with the people's party and the harmonious action of the other with the republicans to compass the defeat of the regular nominee of the democratic party. How permanent any one of these changes may be no one can tell, but the election in November, 1896, will always be one of those points of departure from which political reckonings must in the future be taken. The election tables this year have been prepared with great care to show what has been the effect of the action of the various political factions, and are as full and complete as it has been possible to make them. As there is likely to be a good deal of discussion growing out of proposed tariff legislation, a large amount of space is devoted to agriculture and to our trade and commercial relations. The statistics bearing on the financial question are such as to enable any one to understand the volume and kinds of money in circulation. In this connection are given the debts of all the states and cities, with the rate of taxation in each, and a history of our national debt from 1776 to 1896. The Cuban war and the Venezuelan dispute are continued from the Almanac of last year and brought down to date. A concise history of all our financial panics, with their causes, is also given. Besides these important matters the volume contains nearly everything that could reasonably be expected to be found in a complete political yearbook, even in so eventful a year as the one that has just closed.

January 1, 1897.

Chicago Daily News Almanac 1897.

NOTE.—The time given in this Almanac is local mean time, except when otherwise indicated.

ECLIPSES.

In the year 1897 there will be two eclipses, both of the Sun.

I.—An Annular Eclipse of the Sun, February 1. Visible to North America south of a line drawn through Boston, Memphis and La Paz, Lower California; to South America with the exception of Patagonia; to the eastern edge of Australia, and the South Pacific Ocean. The Path of Annulus averaging 40 miles wide, extending from the northern point of New Zealand across the Pacific Ocean and through the north-western corner of South America. Occurring generally as a Partial Eclipse as follows:

	STANDARD	BEGINS	ENDS	DIGITS ECLIPSED
New York.....	Eastern	4 h. 50 m. A.	Mid. bef. Sunset	Slight
Philadelphia.....	Eastern	4 h. 50 m. A.	At Sunset	Slight
Washington.....	Eastern	4 h. 49 m. A.	5 h. 20 m. A.	Small
Charleston.....	Eastern	4 h. 34 m. A.	5 h. 46 m. A.	2
New Orleans.....	Central	3 h. 37 m. A.	4 h. 42 m. A.	2
Galveston.....	Central	3 h. 38 m. A.	4 h. 33 m. A.	1

II. An Annular Eclipse of the Sun, July 29. Visible to North America south of the 56th parallel of latitude, to the northern half of South America, the western edge of Africa, and to portions of the Pacific and Atlantic Oceans. The Path of Annulus averaging 25 miles wide, passing through Mexico, the West Indies and Cape St. Roque, Brazil. Occurring generally as a Partial Eclipse as follows:

	STANDARD	BEGINS	ENDS	DIGITS ECLIPSED
Boston.....	Eastern	8 h. 54 m. M.	11 h. 11 m. M.	4
New York.....	Eastern	8 h. 46 m. M.	11 h. 11 m. M.	5
Philadelphia.....	Eastern	8 h. 43 m. M.	11 h. 11 m. M.	5
Pittsburgh.....	Eastern	8 h. 38 m. M.	11 h. 3 m. M.	5
Washington.....	Eastern	8 h. 39 m. M.	11 h. 11 m. M.	5
Charleston.....	Eastern	8 h. 26 m. M.	11 h. 18 m. M.	8
Chicago.....	Central	7 h. 35 m. M.	9 h. 48 m. M.	5
Cincinnati.....	Central	7 h. 31 m. M.	9 h. 57 m. M.	6
New Orleans.....	Central	7 h. 14 m. M.	10 h. 1 m. M.	9
Denver.....	Mountain	6 h. 22 m. M.	8 h. 27 m. M.	6
Galveston.....	Central	7 h. 11 m. M.	9 h. 53 m. M.	9

THE FOUR SEASONS.

SEASON.	Begins.	Lasts.
Winter.....	December 21, 1896, 1:29 A.M.	D. H. M. 88 0 04
Spring.....	March 20, 1897, 2:16 A.M.	 92 19 58
Summer.....	June 20, 1897, 10:23 P.M.	 92 14 36
Autumn.....	September 22, 1897, 0:49 P.M.	 89 18 31
Winter.....	December 21, 1897, 7:12 A.M.	Common Year, 365 5 09

EMBER DAYS.

March.....	10, 12, 13	September.....	15, 17, 18

NOTE.—To ascertain any day of the week first look in the table for the year required and under the months are figures which refer to the corresponding figures at the head of the columns of days below. For Example: To know on what day of the week July 4 was in the year 1895, in the table of years look for 1895, and in a parallel line, under July, is figure 1, which directs to column 1, in which it will be seen that July 4 falls on Thursday.

*1752 same as 1772 from Jan. 1 to Sept. 2. From Sept. 14 to Dec. 31 same as 1780 (figure 3-13 were omitted).—This Calendar is from Whitaker's London Almanack, with some revisions.

IMPORTS OF MERCHANDISE, WITH RATE OF DUTY,

For the fiscal year ended June 30, 1896, compared with the corresponding period of 1895.
[Abbreviation: n. e. s., not elsewhere specified.]

NOTE.—The new arrangement, combining free and dutiable, is made to conform to the tariff classification which took effect August 28, 1894.

STATISTICS OF AGRICULTURE.

THE WHEAT CROP OF THE WORLD.

[Prepared by Henry A. Robinson, Statistician, Department of Agriculture.]

The following is an estimate of the world's wheat crop, by countries, for the year 1895, as compared with the preceding four years, exclusive of countries for which neither official returns nor commercial estimates are to be had, such as China, Morocco, Ceylon, etc. Wherever available, official figures, either preliminary or final, have been used. It is unfortunate that in some important wheat-growing countries official returns of wheat production are not made. In such cases commercial estimates have been used.

In the countries of the southern hemisphere the wheat harvest takes place from November to February, and the estimates given for these countries are for the twelve months

ended Oct. 31 of the years indicated at the head of each column. The unit of measure used is the Winchester bushel, which has a capacity of 2,150.42 cubic inches. Where the original quantities are stated by weight they have been reduced to bushels on the somewhat arbitrary standard of 60 pounds of wheat to the bushel.

An analysis of the table reveals the fact that the total world's product increased from 2,432,322,000 bushels in 1891 to 2,672,341,000 bushels in 1894, falling to 2,552,677,000 bushels in 1895.

Five countries—Montenegro, Central Siberia and Central Asia, Western Siberia, Transcaucasia, and Finland—have not heretofore appeared in similar tabulated statements.

1892-3.....	3,583	4,576	3,189	1,147	12,495
1893-4.....	4,040	4,784	2,830	1,199	12,853
1894-5.....	4,080	5,096	3,219	1,342	13,737

This table (compiled by Messrs. Ellison & Co., Liverpool) includes the cotton actually consumed by all the leading countries of the world engaged in its manufacture with modern machinery, except Brazil, Canada, China, Japan and Mexico.

The world's cotton production by countries.—In 400-pound bales.

COUNTRY.	1834.	1892.	COUNTRY.	1834.	1892.
Fiji Islands.....		550	Africa.....	\$5,000	125,000
Italy.....		570	Brazil.....	75,000	281,000
Tahiti.....		1,150	Asiatic Russia.....		375,000
Malta.....		4,600	Korea.....		500,000
Java.....		6,500	Egypt.....	63,700	1,398,000
Greece.....		9,700	China.....		1,500,000
Persia.....		41,000	India.....	462,500	2,902,000
Peru and West Indies.....	20,000	58,000	United States.....	1,150,000	10,688,000
Mexico.....	87,500	80,000	Elsewhere.....	32,500	
Japan.....		91,500			
Turkey.....	275,000	117,000	Total world's crop.....	2,251,200	18,179,570

The above table is intended as an approximate estimate of the world's cotton crop at the present time, as compared with 1834, a considerable proportion of which is home consumption; hence the greater magnitude of the crop here shown as compared with that in the first table. The figures for the latter year were compiled by Levi Woodbury, secretary of the treasury (Doc. No. 146, 1836). The figures under the column for 1892 were compiled from the latest reports of United States consuls for that and subsequent years, and from other reliable authorities.

THE WORLD'S COTTON CROP—1865 TO 1895.

In thousands of bales, except imports into the United States.

COMMERCIAL YEAR.	UNITED STATES.			IMPORTS INTO EUROPE FROM ALL OTHER COUNTRIES. IN 400-LB. BALES.						Total crop of the world.	PROPORTION.	
	Total crops United States.*	Imports into United States (400-lb. bales).	Price mid-ling upland, New York.	Brazil.	Egypt.	Turkey, etc.	Peru, West Indies, etc.	East Indies and China.	Total.		United States.	Other countries.

*In commercial bales.

†Estimated.

‡Includes countries other than Brazil.

This table does not give the actual cotton production of the world, but only so far as shown by the United States crops and the imports into Europe from all other cotton-producing countries. There is comparatively little home consumption of raw cotton in Peru, the West Indies, Turkey and Egypt. On the contrary, East India in recent years has consumed large quantities of her own growth. The crops of China and Japan are unknown, but that of the former is estimated at 1,500,000 bales, and the latter (including Java) at about 100,000 bales of 400 pounds, all of which are consumed at home. A small amount of cotton was exported from China to Europe during the cotton famine from 1861 to 1866, which is included in the above table. To arrive at the world's crop in uniform bales of 400 pounds the United States crops were reduced from commercial bales to bales of 400 pounds and added to total imports into Europe.

1895	17½	20	19	16½	20	18	18	21	19	18	21	19

NOTE.—This table exhibits, in a concise form, the prices of the three grades of a standard domestic fleece wool in the seaboard markets at the beginning of each quarter. In its present shape it is deemed to be intelligible to all interested in wool. In the special features of character and condition, "washed Ohio fleeced wool" is less subject to variation than any other description, and thus is more a basis of value than any other class. Wool, owing to its wide variety, difference in character and condition, and liability to shrink in cleaning, is precluded from speculative operations which apply to products which may be dealt in as "futures." For these reasons the prices of wool are not liable to the same changes as cotton, wheat, etc.

FARM ANIMALS.

The department of agriculture has prepared an elaborate statement of the number and value of farm animals in the United States for the years 1890-6, as follows:

HORSES—			MILCH COWS—		
<i>Jan. 1.</i>	<i>Number.</i>	<i>Value.</i>	<i>Jan. 1.</i>	<i>Number.</i>	<i>Value.</i>
1890	14,213,837	\$978,516,562	1890	15,952,883	352,152,133
1891	14,056,750	941,823,222	1891	16,019,591	346,397,900
1892	15,498,140	1,007,593,636	1892	16,416,351	351,378,132

THE METRIC SYSTEM.

ELEMENTS OF THE SYSTEM.

Length.	Surface.	Capacity.	Weight.	Notation.
Myriameter.....			Metric ton.....	1,000,000
Kilometer.....			Quintal.....	100,000
Hectometer.....	Hectare.....	Kiloliter.....	Myriagram.....	10,000
Decameter.....	Decare.....	Hectoliter.....	Kilogram.....	1,000
		Decaliter.....	Hectogram.....	100
			Decagram.....	10
METER.	ARE.	LITER.	GRAM.	1
Decimeter.....		Decaliter.....	Decigram.....	0.1
Centimeter.....	Centiare.....	Centiliter.....	Centigram.....	0.01
Millimeter.....		Milliliter.....	Milligram.....	0.001

EQUIVALENTS OF CUSTOMARY AND METRIC WEIGHTS AND MEASURES.

1 kilometer =	0.62137 mile.	1 mile =	1.60935 kilometers.
1 meter =	3.28083 feet.	1 yard =	0.91402 meter.
1 centimeter =	0.3937 inch.	1 foot =	0.304801 meter.
1 hectare =	2.471 acres.	1 inch =	25.4001 millimeters.
1 are =	119.6 square yards.	1 square mile =	2.59 square kilometers.
1 metric ton =	2,204.62 pounds.	1 acre =	0.4047 hectare.
1 kilogram =	2.20462 pounds.	1 square foot =	9.29 square decimeters.
1 gram =	15.43236 grains.	1 pound =	0.45359 kilogram.
1 hectoliter =	2.8377 bushels.	1 grain =	64.7989 milligrams.
1 hectoliter =	26.417 gallons.	1 bushel =	0.35239 hectoliter.
1 liter =	1.0567 quarts.	1 gallon =	3.78543 liters.
1 stere =	1.308 cubic yards.	1 cubic foot =	0.02832 cubic meter.

DIFFERENCE BETWEEN UNITED STATES AND BRITISH MEASURES.

1 imperial bushel equals 2,218.192 cubic inches.

1 Winchester bushel (used in United States) equals 2,150.42 cubic inches.

1 imperial gallon equals 277.274 cubic inches.

1 wine gallon (as used in United States) equals 231 cubic inches.

RULES.

1. To reduce Imperial bushels to Winchester bushels, multiply the number of imperial bushels by 1.03152.

2. To reduce Winchester bushels to Imperial bushels, multiply the number of Winchester bushels by .96947.

3. To reduce imperial gallons to United States wine gallons, multiply the number of imperial gallons by 1.20032.

4. To reduce United States wine gallons to imperial gallons, multiply the number of wine gallons by .83311.

* Approximately. † In 1889-90. ‡ In 1893-4. § In 1892-3. || In 1891-2.

STATISTICS OF EDUCATION.—CONTINUED.

Total Number of Pupils and Students of All Grades in Both Public and Private Schools, 1894-5.

NOTE.—The classification of states made use of in the following table is the same as that adopted by the United States census, and is as follows: North Atlantic Division—Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey and Pennsylvania. South Atlantic Division—Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia and

Florida. South Central Division—Kentucky, Tennessee, Alabama, Mississippi, Louisiana, Texas, Arkansas and Oklahoma. North Central Division—Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska and Kansas. Western Division—Montana, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Idaho, Washington, Oregon and California.

DIVISION.	PUPILS RECEIVING ELEMENTARY INSTRUCTION ("PRIMARY" AND "GRAMMAR" GRADES).		PUPILS RECEIVING SECONDARY INSTRUCTION (HIGH SCHOOL GRADE).*	
	Public.	Private (largely estimated).	Public.†	Private (in preparatory schools, academies, seminaries, etc.).
The United States	13,851,653	1,092,873	361,370	178,342
North Atlantic Division	3,302,271	466,002	112,921	51,518
South Atlantic Division	1,960,057	83,750	21,635	27,743
South Central Division	2,691,192	134,428	29,584	37,213
North Central Division	5,235,770	364,026	176,677	52,378
Western Division.....	662,363	44,667	20,553	9,490

DIVISION.	STUDENTS RECEIVING HIGHER INSTRUCTION.								
	In universities and colleges.‡			In schools of medicine, law and theology.¶			In normal schools.**		
	Public.§	Private.	Total.	Public.¶	Private.	Total.	Public.	Private.††	Total.
The United States	24,524	68,105	92,629	6,247	47,305	53,552	36,276	21,927	‡58,203
North Atlantic Division ..	4,469	24,678	29,147	189	19,664	19,853	14,003	2,583	16,586
South Atlantic Division ..	3,322	9,919	13,241	763	5,754	6,517	3,097	1,640	4,737
South Central Division ..	2,576	11,269	13,845	701	3,766	4,467	3,059	2,742	5,801
North Central Division ..	11,268	19,397	30,665	3,807	17,133	20,940	13,710	14,288	27,998
Western Division.....	2,889	2,842	5,731	787	988	1,775	2,407	674	3,081

*Including pupils in preparatory or academic departments of higher institutions, public and private, and excluding elementary pupils, who are classed in columns 2 and 3.

†This is made up chiefly from the returns of individual high schools to the bureau and is considerably too small, as there are a great many secondary pupils outside the completely organized high schools whom there are no means of enumerating.

‡Including colleges for women, agricultural and mechanical (land grant) colleges and scientific schools. Students in law, theological and medical departments are excluded, being tabulated in columns 9-11; students in academic and preparatory departments are

also excluded, being tabulated in columns 4 and 5.

§Mainly state universities and agricultural and mechanical colleges.

¶Including veterinary and nurses' training schools.

¶Mainly in schools or departments of medicine and law attached to state universities.

**Non-professional pupils in normal schools are included in columns 4 and 5.

††Private normal schools are, with few exceptions, scarcely superior to the ordinary secondary schools.

‡‡There are in addition to this number 22,335 students taking normal courses in universities, colleges and high schools.

RECAPITULATION.

Gold and Silver.

OUR COINAGE LAWS.

SYNOPSIS OF THE SEVERAL UNITED STATES STATUTES FIXING RATIOS AND STANDARDS.

THE FIRST COINAGE ACT—GOLD AND SILVER
AT A RATIO OF 15 TO 1.

1791-2. Chap. xvi. An act establishing a mint, and regulating the coins of the United States.

Sec. 9. And be it further enacted, that there shall be from time to time struck and coined at the said mint coins of gold, silver and copper of the following denominations, values and descriptions, viz.: Eagles—Each to be of the value of \$10 or units, and to contain 247 grains and four-eighths of a grain of pure, or 270 grains of standard gold. Dollars or units—Each to be of the value of a Spanish milled dollar, as the same is now current, and to contain 371 grains and four-sixteenths parts of a grain of pure, or 416 grains of standard silver.

Sec. 11. And be it further enacted, that the proportional value of gold to silver in all coins which shall by law be current as money within the United States shall be as fifteen to one, according to quantity in weight, of pure gold or pure silver; that is to say, every fifteen pounds' weight of pure silver shall be of equal value in all payments with one pound weight of pure gold, and so in proportion as to any greater or less quantities of the respective metals.

Sec. 12. And be it further enacted, that the standard for all gold coins of the United States shall be eleven parts fine to one part alloy; and accordingly that eleven parts in twelve of the entire weight of each of the said coins shall consist of pure gold and the remaining one-twelfth part of alloy; and the said alloy shall be composed of silver and copper, in such proportions not exceeding one-half silver as shall be found convenient, to be regulated by the director of the mint, for the time being, with the approbation of the president of the United States until further provision shall be made by law.

Sec. 13. And be it further enacted, that the standard for all silver coins of the United States shall be 1,485 parts fine to 179 parts alloy; and accordingly that 1,485 parts in 1,664 parts of the entire weight of each of said coins shall consist of pure silver and the remaining 179 parts of alloy; which alloy shall be wholly of copper.

Sec. 14. And be it further enacted, that it shall be lawful for any person or persons to bring to the said mint gold and bullion in order to their being coined; and that the bullion so brought shall be there assayed and coined as speedily as may be after the receipt thereof, and that free of expense to the person or persons by whom the same shall have been brought. And as soon as the said bullion shall have been coined, the person or persons by whom the same shall have been delivered, shall, upon demand, receive in lieu thereof coins of the same species of bullion which shall have been so delivered, weight for weight, of the pure gold or pure silver therein contained; provided, nevertheless, that it shall be at the mutual option of the party or parties bringing such bullion, and of the director of said mint, to make an immediate exchange of coins for standard bullion, with a deduction of $\frac{1}{2}$ per cent from the weight of the pure gold or pure silver

contained in the said bullion, as an indemnification to the mint for the time which will necessarily be required for coining said bullion, and for the advance which shall have been so made in coins.

Sec. 16. And be it further enacted, that all the gold and silver coins which shall have been struck at and issued from the said mint shall be a lawful tender in all payments whatsoever, those of full weight according to the respective values hereinbefore declared and those of less than full weight at values proportional to their respective weights.

Sec. 20. And be it further enacted, that the money of account of the United States shall be expressed in dollars or units, dimes or tenths, cents or hundredths, and mills or thousandths, a dime being the tenth part of a dollar, a cent the hundredth part of a dollar, a mill the thousandth part of a dollar, and that all accounts in the public offices and all proceedings in the courts of the United States shall be kept and had in conformity to this regulation.

LAW OF 1834—STANDARD ESTABLISHED FOR
THE LARGER GOLD COINS.

1833-4. Chapter xcv. An act concerning the gold coins of the United States, and for other purposes.

Be it enacted, that the gold coins of the United States shall contain the following quantities of metal, that is to say: Each eagle shall contain 232 grains of pure gold and 258 grains of standard gold; each half-eagle 116 grains of pure gold and 129 grains of standard gold; each quarter-eagle shall contain 58 grains of pure gold and 64½ grains of standard; every such eagle shall be of the value of \$10; every such half-eagle shall be of the value of \$5 and every such quarter-eagle shall be of the value of \$2.50; and the said gold coins shall be receivable in all payments when of full weight, according to their respective values; and when of less than full weight at less values, proportioned to their respective actual weights.

Sec. 2. And be it further enacted, that all standard gold or silver deposited for coinage after the 31st day of July next shall be paid for in coin under the direction of the secretary of the treasury, within five days from the making of such deposit, deducting from the amount of said deposit of gold and silver $\frac{1}{2}$ of 1 per centum; provided, that no deduction shall be made unless said advance be required by such depositor within forty days.

Sec. 3. And be it further enacted, that all gold coins of the United States minted anterior to the 31st day of July next shall be receivable in all payments at the rate of 94.8 of a cent per pennyweight.

LAW OF 1837—NEW STANDARD FOR GOLD
AND SILVER COIN—SILVER A LEGAL
TENDER.

1836-7. Chapter iii. An act supplementary to the act entitled, "An act establishing a mint and regulating the coins of the United States."

Sec. 8. And be it further enacted, that the standard for both gold and silver coins of the United States shall hereafter be such that of 1,000 parts by weight 900 shall be

of pure metal and 100 of alloy; and the alloy of the silver coins shall be of copper and the alloy of the gold coins shall be of copper and silver, provided that the silver do not exceed one-half of the whole alloy.

Sec. 9. And be it further enacted, that of the silver coins the dollar shall be of the weight of 412½ grains, the half-dollar of the weight of 206¼ grains, the quarter-dollar of the weight of 103½ grains, the dime, or tenth part of a dollar, of the weight of 41¼ grains, and the half-dime, or twentieth part of a dollar, of the weight of 20½ grains; and that dollars, half-dollars and quarter-dollars, dimes and half-dimes shall be legal tenders of payment, according to their nominal value, for any sums whatever.

Sec. 10. And be it further enacted, that of the gold coins the weight of the eagle shall be 258 grains and that of the half-eagle 129 grains, and that of the quarter-eagle 64½ grains. And that, for all sums whatever, the eagle shall be a legal tender of payment for \$10, the half-eagle for \$5 and the quarter-eagle for \$2.50.

Sec. 11. And be it further enacted, that the silver coins heretofore issued at the mint of the United States and the gold coins issued since the 31st day of July, 1834, shall continue to be legal tenders of payment for their nominal values, on the same terms as if they were of the coinage provided for by this act.

(Sections 14-19 provide that gold and silver bullion brought to the mint shall be received and coined for the benefit of the depositor, and that the only subjects of charge to him shall be for refining, toughening and separating, and for metal used as alloy, the rate of charge being fixed from time to time so as not to exceed the actual expenses incurred. For the net amount of the deposit a certificate shall be given, payable in coins of the same metal as the deposit. Sections 30 and 31 require that when the coins which are the equivalent to any deposit of bullion are ready for delivery they shall be paid over, payment being made to depositors in the order of priority of deposit. And, to enable the mint to make returns to depositors with as little delay as possible, it is made the duty of the secretary of the treasury to keep in the mint, when practicable, a deposit not exceeding \$1,000,000, out of which the value of bullion brought to the mint may be paid as soon as ascertained; but no discount or interest is to be charged on moneys so advanced.)

THE GOLD DOLLAR.

The law of March 3, 1849, authorized the coinage of gold dollars and double eagles, "conformable in all respects to the standard for gold coins now established by law," and to be a legal tender in payment for all sums.

LAW OF 1853—SILVER A LEGAL TENDER TO THE AMOUNT OF \$5.

1852-3. Chapter lxxix. An act amending of existing laws relative to the half-dollar, quarter-dollar, dime and half-dime.

Be it enacted, that from and after the 1st day of June, 1852(3), the weight of the half-dollar, or piece of 50 cents, shall be 192 grains, and the quarter-dollar, dime and half-dime shall be, respectively, one-half, one-fifth and one-tenth of said half-dollar.

Sec. 2. And be it further enacted, that the silver coins issued in conformity with the above section shall be legal tenders in payment of debts for all sums not exceeding \$5.

Sec. 3. And be it further enacted, that in order to procure bullion for the requisite

coinage of the subdivisions of the dollar authorized by this act, the treasurer of the mint shall, with the approval of the director, purchase such bullion with the bullion fund of the mint. He shall charge himself with the gain arising from the coinage of such bullion into coins of a nominal value exceeding the intrinsic value thereof, and shall be credited with the difference between such intrinsic value and the price paid for said bullion, and with the expense of distributing said coins as hereinafter provided. The balances to his credit, or the profit of said coinage, shall be, from time to time, on a warrant of the directory of the mint, transferred to the account of the treasury of the United States.

Sec. 4. And be it further enacted, that such coins shall be paid out at the mint, in exchange for gold coins at par, in sums not less than \$100; and it shall be lawful also to transmit parcels of the same from time to time to the assistant treasurers, depositaries and other officers of the United States, under general regulations, proposed by the directory of the mint and approved by the secretary of the treasury; provided, however, that the amount coined into quarter-dollars, dimes and half-dimes shall be regulated by the secretary of the treasury.

Sec. 5. And be it further enacted, that no deposits for coinage into the half-dollar, quarter-dollar, dime and half-dime shall hereafter be received, other than those made by the treasurer of the mint, as herein authorized, and upon account of the United States.

(Sec. 6 provides that when gold and silver is deposited for coinage there shall be a charge to the depositor in addition to the charge for refining or parting the metals of ½ of 1 per centum, this provision not applying to silver coined into the subdivisions of the dollar.)

Sec. 7. And be it further enacted, that from time to time there shall be struck and coined at the mint of the United States and the branches thereof, conformable in all respects to law, and conformable in all respects to the standard of gold coins now established by law, a coin of gold of the value of \$3 or three units. Approved Feb. 21, 1853, 10 Statutes at Large, 160.

LAW OF 1873—DEMONETIZATION OF SILVER AND CHANGE OF UNIT VALUE.

1872-3. Chap. cxxxi. An act revising and amending the laws relative to the mints, assay offices and coinage of the United States.

Sec. 13. That the standard for both gold and silver coins of the United States shall be such that of 1,000 parts by weight 900 shall be of pure metal and 100 of alloy, and the alloy of the silver coins shall be of copper, and the alloy of the gold coins shall be of copper, or of copper and silver; but the silver shall in no case exceed one-tenth of the whole alloy.

Sec. 14. That the gold coins of the United States shall be a \$1 piece, which, at the standard weight of 25.8 grains, shall be the unit of value; a quarter-eagle, or \$2½ piece; a \$3 piece; a half-eagle, or \$5 piece; an eagle, or \$10 piece, and a double eagle, or \$20 piece; and the standard weight of the gold dollar shall be 25.8 grains; of the quarter-eagle, or \$2½ piece, 64½ grains; of the \$3 piece, 77.4 grains; of the half-eagle, or \$5 piece, 129 grains; of the eagle, or \$10 piece, 258 grains; of the double eagle, or \$20 piece, 516 grains, which coins shall be a legal tender in all payments, at their nominal value,

when not below the standard weight and limit of tolerance provided in this act for the single piece, and when reduced in weight below said standard and tolerance shall be a legal tender at valuation in proportion to their actual weight; and any gold coin of the United States, if reduced in weight by natural abrasion for more than $\frac{1}{2}$ of 1 per centum below the standard weight prescribed by law after a circulation of twenty years, as shown by its date of coinage, and at a ratable proportion for any period less than twenty years, shall be received at their nominal value by the United States treasury and its offices, under such regulations as the secretary of the treasury may prescribe for the protection of the government against fraudulent abrasion or other practices; and any gold coins in the treasury of the United States reduced in weight below this limit of abrasion shall be recoined.

Sec. 15. That the silver coins of the United States shall be a trade dollar, a half-dollar, or 50-cent piece; a quarter-dollar, or 25-cent piece; a dime, or 10-cent piece, and the weight of the trade dollar shall be 420 grains troy; the weight of the half-dollar shall be $12\frac{1}{2}$ grams, the quarter-dollar and the dime shall be respectively one-half and one-fifth of the weight of said half-dollar; and said coins shall be a legal tender at their nominal value for any amount not exceeding \$5 in any one payment.

Sec. 16. That the minor coins of the United States shall be a 5-cent piece, a 3-cent piece and a 1-cent piece, and the alloy for the 5 and 3 cent pieces shall be of copper and nickel, to be composed of three-fourths copper and one-fourth nickel, and the alloy of the 1-cent piece shall be 1 per centum of tin and zinc, in such proportion as shall be determined by the director of the mint. The weight of the piece of 5 cents shall be 77.16 grains troy; of the 3-cent piece 48 grains, which coins shall be a legal tender at their nominal value for any amount not exceeding 25 cents in any one payment.

Sec. 17. That no coins, either of gold, silver or minor coinage, shall hereafter be issued from the mint other than those of the denominations, standards and weights herein set forth.

Sec. 21. That any owner of silver bullion may deposit the same at any mint, to be formed into bars or into dollars of the weight of 420 grains troy, designated in this act as trade dollars; and no deposit of silver for other coinage shall be received; but silver bullion contained in gold deposits, and separated therefrom, may be paid for in silver coin, at such valuation as may be from time to time established by the director of the mint.

Sec. 25. That the charge for converting standard gold bullion into coin shall be one-fifth of 1 per centum, and the charges for converting standard silver into trade dollars, for melting and refining when bullion is below standard, for toughening when metals are contained in it which render it unfit for coinage, for copper used for alloy when the bullion is above standard, for separating the gold and silver when these metals exist together in the bullion, and for the preparation of bars, shall be fixed from time to time by the director, with the concurrence of the secretary of the treasury, so as to equal, but not exceed, in their judgment, the actual average cost to each mint and assay office of the material, labor, wastage and use of machinery employed in each of the cases aforementioned.

LAW OF 1874—SILVER A LEGAL TENDER ONLY TO THE AMOUNT OF \$5.

1873-4. Revised Statutes of the United States; title xxxix, legal tender.

Sec. 3584. No foreign gold or silver coins shall be legal tender in payment of debts.

Sec. 3585. The gold coins of the United States shall be a legal tender in all payments at their nominal value when not below the standard weight and limit of tolerance provided by law for the single piece, and when reduced in weight below such standard and tolerance shall be a legal tender at valuation in proportion to their actual weight.

Sec. 3586. The silver coins of the United States shall be a legal tender at their nominal value for any amount not exceeding \$5 in any one payment.

Sec. 3587. The minor coins of the United States shall be a legal tender at their nominal value for any amount not exceeding 25 cents in any one payment.

Approved June 22, 1874. Revised Statutes, 712.

Note.—An act of June 22, 1874, authorizes the secretary of the treasury to exchange gold mint bars for coin certificates or gold coins at not less than par nor less than market value. 18 Statutes at Large, part 3202.

LAW OF 1875—TO PROVIDE FOR THE RESUMPTION OF SPECIE PAYMENTS.

1874-5. Chapter xv. An act to provide for the resumption of specie payments.

Sec. 1. Be it enacted, that the secretary of the treasury is hereby authorized and required, as rapidly as practicable, to cause to be coined at the mints of the United States silver coins of the denomination of 10, 25 and 50 cents, of standard value, and to issue them in redemption of an equal number and amount of fractional currency of similar denominations, or, at his discretion, he may issue such silver coins through the mints, the sub-treasuries, public depositories and postoffices of the United States; and, upon such issue he is hereby authorized and required to redeem an equal amount of such fractional currency until the whole amount of such fractional currency outstanding shall be redeemed.

Sec. 2. That so much of section 3524 of the revised statutes of the United States as provides for a charge of 1-5 of 1 per centum for converting standard gold bullion into coin is hereby repealed, and hereafter no charge shall be made for that service.

Sec. 3. That section 5177 of the Revised Statutes of the United States, limiting the aggregate amount of circulating notes of national banking associations, be, and is hereby, repealed; and each existing banking association may increase its circulating notes in accordance with existing law without respect to said aggregate limit; and new banking associations may be organized in accordance with existing law without respect to said aggregate limit; and the provisions of law for the withdrawal and redistribution of national bank currency among the several states and territories are hereby repealed. And whenever and so often as circulating notes shall be issued to any such banking association, so increasing its capital or circulating notes, or so newly organized as aforesaid, it shall be the duty of the secretary of the treasury to redeem the legal-tender United States notes in excess only of \$300,000,000, to the amount of 80 per centum of the sum of national bank notes so issued to any such banking association as aforesaid, and to continue such redemption as such circulating notes are issued until there

shall be outstanding the sum of \$300,000,000 of such legal-tender United States notes, and no more. And on and after the 1st day of January, A. D. 1879, the secretary of the treasury shall redeem, in coin, the United States legal-tender notes then outstanding on their presentation for redemption, at the office of the assistant treasurer of the United States in the city of New York, in sums of not less than \$50. And to enable the secretary of the treasury to prepare and provide for the redemption in this act authorized or required, he is authorized to use any surplus revenues from time to time, in the treasury not otherwise appropriated, and to issue, sell and dispose of, at not less than par, in coin, either of the descriptions of bonds of the United States described in the act of congress approved July 14, 1870, entitled "An act to authorize the refunding of the national debt," with like qualities, privileges and exemptions, to the extent necessary to carry this act into full effect, and to use the proceeds thereof for the purposes aforesaid. And all provisions of law inconsistent with the provisions of this act are hereby repealed.

LAW OF 1878—SILVER DOLLARS MADE A LEGAL TENDER TO ANY AMOUNT—THE BLAND BILL.

1877-8. Chapter xx. An act to authorize the coinage of the standard silver dollar and to restore its legal-tender character.

Be it enacted, that there shall be coined at the several mints of the United States silver dollars of the weight of 412½ grains troy of standard silver, as provided in the act of Jan. 18, 1837, on which shall be the devices and superscriptions provided by said act; which coins, together with all silver dollars heretofore coined by the United States, of like weight and fineness, shall be a legal tender, at their nominal value, for all debts and dues, public and private, except where otherwise stipulated in the contract. And the secretary of the treasury is authorized and directed to purchase from time to time silver bullion, at the market price thereof, not less than \$2,000,000 worth a month, nor more than \$4,000,000 worth a month, and cause the same to be coined monthly, as fast as so purchased, into such dollars; and a sum sufficient to carry out the foregoing provision of this act is hereby appropriated out of any money in the treasury not otherwise appropriated. And any gain or seigniorage arising from this coinage shall be accounted for and paid into the treasury, as provided under existing laws relative to the subsidiary coinage; provided, that the amount of money at any one time invested in such silver bullion, exclusive of such resulting coin, shall not exceed \$5,000,000. And, provided further, that nothing in this act shall be construed to authorize the payment in silver of certificates of deposit issued under the provisions of section 254 of the Revised Statutes.

Sec. 2. That immediately after the passage of this act the president shall invite the governments of the countries composing the Latin union, so called, and of such other European nations as he may deem advisable, to join the United States in a conference to adopt a common ratio between gold and silver, for the purpose of establishing internationally the use of bimetallic money, and securing fixity of relative value between those metals; such conference to be held at such place, in Europe or in the United States, at such time within six months as may be mutually agreed upon by the executives of the governments joining in the same, when-

ever the governments so invited, or any three of them, shall have signified their willingness to unite in the same.

The president shall, by and with the advice and consent of the senate, appoint three commissioners, who shall attend such conference on behalf of the United States and shall report the doings thereof to the president, who shall transmit the same to congress.

Said commissioners shall each receive the sum of \$2,500 and their reasonable expenses, to be approved by the secretary of state; and the amount necessary to pay such compensation and expenses is hereby appropriated out of any money in the treasury not otherwise appropriated.

Sec. 3. That any holder of the coin authorized by this act may deposit the same with the treasurer, or any assistant treasurer of the United States, in sums not less than \$10, and receive therefor certificates of not less than \$10 each, corresponding with the denominations of the United States notes. The coin deposited for or representing the certificates shall be retained in the treasury for the payment of the same on demand. Such certificates shall be receivable for customs, taxes, and all public dues, and when so received may be reissued.

Sec. 4. All acts and parts of acts inconsistent with the provisions of this act are hereby repealed.

Note.—The above act having been returned by the president of the United States, with his objections, to the house of representatives, Feb. 28, 1878, was passed over his veto by both houses and became a law on the same day.

THE LAW OF 1890—THE SHERMAN ACT AND THE PURCHASE OF SILVER BULLION.

1889-90. Chapter decviii. An act directing the purchase of silver bullion and the issue of treasury notes thereon and for other purposes.

Be it enacted, that the secretary of the treasury is hereby directed to purchase from time to time silver bullion to the aggregate amount of 4,500,000 ounces, or so much thereof as may be offered in each month at the market price thereof, not exceeding \$1 for 371.25 grains of pure silver, and to issue in payment for such purchases of silver bullion treasury notes of the United States, to be prepared by the secretary of the treasury, in such form and of such denominations, not less than \$1 nor more than \$1,000, as he may prescribe, and a sum sufficient to carry into effect the provisions of this act is hereby appropriated out of any money in the treasury not otherwise appropriated.

Sec. 2. That the treasury notes issued in accordance with the provisions of this act shall be redeemable on demand, in coin, at the treasury of the United States, and when so redeemed may be reissued, but no greater or less amount of such notes shall be outstanding at any time than the cost of the silver bullion and the standard silver dollars coined therefrom then held in the treasury purchased by such notes, and such treasury notes shall be a legal tender in payment of all debts, public and private, except where otherwise expressly stipulated in the contract, and shall be receivable for customs, taxes and all public dues, and when so received may be reissued; and such notes, when held by any national banking association, may be counted as a part of its lawful reserve. That upon demand of the holder of any of the treasury notes herein provided for the secretary of the treasury shall, under such regulations as he may prescribe, re-

deem such notes in gold or silver coin, at his discretion, it being the established policy of the United States to maintain the two metals on a parity with each other upon the present legal ratio, or such ratio as may be provided by law.

Sec. 3. That the secretary of the treasury shall each month coin 2,000,000 ounces of the silver bullion purchased under the provisions of this act into standard silver dollars until July 1, 1891, and after that time he shall coin of the silver bullion purchased under the provisions of this act as much as may be necessary to provide for the redemption of the treasury notes herein provided for, and any gain or seigniorage arising from such coinage shall be accounted for and paid into the treasury.

Sec. 4. That the silver bullion purchased under the provisions of this act shall be subject to the requirements of existing law and the regulations of the mint service governing the methods of determining the amount of pure silver contained and the amount of charges and deductions, if any, to be made.

Sec. 5. That so much of the act of Feb. 28, 1878, entitled "An act to authorize the coinage of the standard silver dollar and to restore its legal-tender character," as requires the monthly purchase and coinage of the same into silver dollars of not less than \$2,000,000 nor more than \$4,000,000 worth of silver bullion is hereby repealed.

Sec. 6. That upon the passage of this act the balances standing with the treasury of the United States to the respective credits of national banks for deposits made to redeem the circulating notes of such banks, and all deposits thereafter received for like purpose, shall be covered into the treasury as a miscellaneous receipt, and the treasurer of the United States shall redeem from the general cash in the treasury the circulating notes of said banks which may come into his possession subject to redemption; and upon the certificate of the comptroller of the currency that such notes have been received by him and that they have been destroyed, and that no new notes will be issued in their place, reimbursement of their amount shall be made to the treasurer, under such regulations as the secretary of the treasury may prescribe, from an appropriation hereby created, to be known as national bank notes redemption account, but the provisions of this act shall not apply to the deposits received under section 3 of the act of June 20, 1874, requiring every national bank to keep in lawful money with the treasurer of the United States a sum equal to 5 per centum of its circulation, to be held and used for the redemption of its circulating notes; and the balance remaining of the deposits so covered shall at the close of each month be reported on the monthly public debt statement as debt of the United States bearing no interest.

Sec. 7. That this act shall take effect thirty days from and after its passage.

(Approved July 14, 1890.)

An act approved Sept. 26, 1890, discontinued the coinage of the \$3 and \$1 gold pieces and 3-cent nickel piece.

THE LAW OF 1893—REPEAL OF THE PURCHASE CLAUSE—DECLARATION OF BIMETALLIC POLICY.

Nov. 1, 1893.—An act to repeal part of an act approved July 14, 1890.

Be it enacted, That so much of the act approved July 14, 1890, entitled "An act

directing the purchase of silver bullion and issue of treasury notes thereon and for other purposes," as directs the secretary of the treasury to purchase from time to time silver bullion to the aggregate amount of 4,500,000 ounces, or so much thereof as may be offered in each month at the market price thereof, not exceeding \$1 for 371.25 grains of pure silver, and to issue in payment for such purchase treasury notes of the United States, be and the same is hereby repealed.

And it is hereby declared to be the policy of the United States to continue the use of both gold and silver as standard money and to coin both gold and silver into money of equal intrinsic and exchangeable value, such equality to be secured through international agreement, or by such safeguards of legislation as will insure the maintenance of the parity of value of the coins of the two metals and the equal power of every dollar at all times in the markets and in the payment of debts. And it is hereby further declared that the efforts of the government should be steadily directed to the establishment of such a safe system of bimetallism as will maintain at all times the equal power of every dollar coined or issued by the United States in the markets and in the payment of debts.

SUMMARY OF MONETARY EVENTS SINCE 1786.

[From Ottomar Haupt's *Arbitrages et Parities*, eighth edition, 1894.]

1786.—Establishment of the double standard in the United States with a ratio of 1 to 15.25; that is, on the basis of a dollar of 375.64 grains of fine silver and 123.134 grains of fine gold for the half-eagle, or \$5 piece, without any actual coinage.

1791.—Adoption of the ratio of 1 to 15 and establishment of a mint with free and gratuitous coinage in the United States; the silver dollar equal to 371¼ grains fine, the half-eagle to 123.75 grains fine.

1803.—Establishment of the double standard in France on the basis of the ratio of 1 to 15½, notwithstanding the fact that the market ratio was then about 1 to 15.

1810.—Introduction of the silver standard in Russia on the basis of the ruble of 17.99 grams of fine silver, followed in 1871 by the coinage of imperials or gold pieces of 5 rubles, of 5.998 grams; therefore, with a ratio of 1 to 15. This ratio was changed by the increase of the imperial to 5 rubles 15 copecks, and later to 1 to 15.45.

1815.—Great depreciation of paper money in England, reaching 26½ per cent in May. Course of gold, £5 6s. and of silver, 71½d per ounce standard. In December the loss was only 6 per cent; gold at this period was quoted at £4 3s and silver at 64d.

1816.—Abolition of the double standard in England, which had had as its basis the ratio of 1 to 15.21, and adoption of the gold standard on the basis of the pound sterling of 7.322 grams fine in weight.

Coinage of divisional money at the rate of 66d per ounce. Extreme prices £4 2s for gold and 64d for silver; in January, £3 18s 6d and 59¼d in December.

1816.—Substitution for the ratio of 1 to 15.5 in Holland, established by a rather confused coinage, of the ratio of 1 to 15½.

1819.—Abolition of forced currency in England. Price of gold, £3 17s 10½d, and

of silver, *62d per ounce in October, against 44 1s 6d and 67d in February.

1832.—Introduction of the monetary system of France in Belgium, with a decree providing for the coinage of pieces of 20 and 40 francs, which, however, were not stamped. Silver, 59 $\frac{3}{4}$ d.

1834.—Substitution of the ratio of 1 to 15 for that of 1 to 16 in the United States by the creation of a gold piece—the eagle—weighing 258 grains, and of a silver dollar of 412 $\frac{1}{2}$ grains. In 1837 the fineness of these coins was raised to .900. Silver, 59 15-16d.

1835.—Introduction of the company rupee, a piece of silver weighing 165 grains fine, in India, in place of the sicca rupee. Creation of a trade coin—the mohur, or piece of 15 rupees—containing 165 grains of fine gold. Silver, 59 11-16d.

1844.—Introduction of the double standard in Turkey, with the ratio of 1 to 15.10. Silver, 59 $\frac{1}{2}$ d.

1847.—Abolition of the double standard in Holland by the introduction of the silver standard on the basis of a 1-florin piece .945 grams fine, the coinage of which had already been decreed in 1839. Silver, 59 11-16d.

1847.—Discovery of the gold mines of California.

1848.—Coinage in Belgium of pieces of 10 and 25 francs in gold, a shade too light. These pieces were demonetized and withdrawn from circulation in 1884. Silver, 59 $\frac{1}{2}$ d.

1848.—Replacing the ratio of 1 to 16 in Spain, which had been in force since 1786, by that of 1 to 15.77.

1850.—Introduction of the French monetary system in Switzerland without any actual coinage of gold pieces. Silver, 60 1-16d.

1851.—Discovery of the gold mines of Australia.

1853.—Lowering of the weight of silver pieces of less value than \$1 to the extent of 8 $\frac{1}{2}$ per cent in the United States and limitation of their legal-tender power to \$5. Silver, 61 $\frac{1}{2}$ d.

1853.—Maximum of the production of gold reached in California, when it amounted to \$65,000,000.

1854.—Introduction of the gold standard in Portugal on the basis of the crown of 16.257 grams fine. Before this period the country had the silver standard, with a rather large circulation of gold coins stamped on the basis of 1 to 15 $\frac{1}{2}$ in 1835 and 1 to 16 $\frac{1}{2}$ in 1847. Silver, 61 $\frac{1}{2}$ d.

1854.—Modification of the ratio of 1 to 15.77 in Spain by raising it to 1 to 15.48 and by lowering the piaster from 23.49 grams to 23.36 grams fine.

1854.—Introduction of the silver standard, as it existed in the mother country, in Java, in place of the ideal Javanese money, and coinage of colonial silver pieces.

1857.—Conclusion of a monetary treaty between Austria and the German states, in accordance with which one pound of fine sil-

ver (one-half a kilogram) was stamped into 30 thalers, or 52 $\frac{1}{2}$ florins of South Germany, or 45 Austrian florins, resulting in 1 thaler equaling 1 $\frac{1}{4}$ German florins or 1 $\frac{1}{2}$ Austrian florins. Silver, 61 $\frac{1}{4}$ d.

1861.—Law decreeing the coinage of gold pieces of 10 and 20 francs exactly equal to French coins of the same denomination in Belgium. Silver, 61 $\frac{1}{4}$ d.

1862.—Adoption of the French monetary system by Italy. Silver, 61 7-16d.

1865.—Formation of the Latin union between France, Belgium, Switzerland and Italy on the basis of a ratio of 1 to 15 $\frac{1}{2}$. Silver, 61 1-16d.

1868.—Adoption of the French monetary system by Roumania, with the exclusion of the 5-franc silver piece, which was, however, stamped in 1881 and 1883. Silver, 60 $\frac{1}{2}$ d.

1868.—Admission of Greece into the Latin union. The definitive and universal introduction of the French monetary system into the country was effected only in 1883.

1868.—Adoption of the French monetary system, with the peseta or franc as the unit, by Spain. The coinage of gold alphonsoes d'or of 25 pesetas was made only in 1876.

1871.—Replacing of the silver standard in Germany by the gold standard. Coinage in 1873 of gold pieces of 5, 10 and 20 mark pieces, the latter weighing 7.168 grams fine. Silver, 60 $\frac{1}{2}$ d.

1871.—Establishment of the double standard in Japan, with the ratio of 1 to 16.17 by the coinage of the gold yen of 1.667 grams and of the silver yen of 26.956 grams, both with a fineness of .900.

1873.—Increase of the intrinsic value of the divisional coins of the United States. Replacing of the double standard by the gold standard; limitation of the legal-tender power of silver dollars to \$5. Reduction of the cost of coinage of gold to one-fifth per cent, the total abolition of which charge was decreed in 1875. Creation of a trade dollar of 420 grains with a fineness of .900. Silver, 59 $\frac{1}{4}$ d.

1873.—Suspension of the coinage of 5-franc pieces in Belgium.

1873.—Limitation of the coinage of 5 francs on individual account in France.

1873.—Suspension of the coinage of silver in Holland.

1873.—Formation of the Scandinavian Monetary union. Replacing of the silver standard in Denmark, Sweden and Norway by that of gold on the basis of the krona. Coinage of pieces of 10 and 20 kroner, the latter weighing 8.961 grams, with a fineness of .900.

1874.—Introduction of the system of contingents for the coinage of 5-franc silver pieces in the Latin union. Silver, 58 5-16d.

1875.—Suspension of the coinage of silver on individual account in Italy. Silver, 56 $\frac{1}{2}$ d.

1875.—Suspension of the coinage of silver on account of the Dutch colonies.

1875.—Introduction of the double standard in Holland on the basis of the ratio of 1 to 15.62 by the creation of a gold piece of 10 florins, weighing 5.048 grams fine, with the maintenance of the suspension of the coinage of silver.

*The price of silver given hereafter represents the average rate per ounce standard—that is, the mean between the highest price and the lowest price quoted during the year.

1876.—Great fluctuations in the price of silver, which declined to 46½d., representing the ratio of 1 to 20.172, in July. Recovery in December to 58½d. Average price 52½d.

1877.—Coinage of 5-franc silver pieces by Spain continued later, notwithstanding the decline of silver in the market. Silver, 54½d.

1877.—Replacing of the double standard in Finland by that of gold on the basis of the mark or franc.

1878.—Return of the United States to the double standard by the coinage of the old dollar of 412½ grains, the amount of which, however, was limited to \$2,000,000 per month as a minimum and to \$4,000,000 as a maximum. The coinage of silver on private account prohibited. Silver, 52 9-16d.

1878.—Meeting of the first international monetary conference in Paris. Prolongation of the Latin union to Jan. 1, 1886.

1879.—Suspension of the sales of silver by Germany. Silver, 51½d.

1881.—Second international monetary conference in Paris. Silver, 51 11-16d.

1885.—Introduction of the double standard in Egypt. Silver, 48½d.

1885.—Prolongation of the Latin union to Jan. 1, 1891.

1886.—Great decline in the price of silver, which fell in August to 42d., representing a ratio of 1 to 22.5, and recovery in December to 46d. Modification of the coinage of gold and silver pieces in Russia. Silver, 45½d.

1887.—Retirement of the trade dollars by the government of the United States in March. Demonetization of the Spanish piasters, known as Ferdinand Carolus, whose reimbursement at the rate of 5 pesetas ended on March 11. New decline of silver in March to 44d., representing the ratio of 1 to 21.43. Silver, 44½d.

1890.—Extension of the Bland law in the United States and purchase of 4,500,000 ounces of silver per month against the issue of certificates. Demonetization of 25,000,000 lei in pieces of 5 lei in Roumania in consequence of the introduction of the gold standard by the law of Oct. 27. Silver, 47 11-16d.

1891.—Introduction of the French monetary system in Tunis on the basis of the gold standard. Coinage of national gold coins and bullion. Silver, 45 1-16d.

1892.—Replacing of the silver standard in Austria-Hungary by that of gold by the law of Aug. 2. Coinage of pieces of 20 crowns, containing 6.098 grams fine. The crown equals ½ florin. Meeting of the third international monetary conference at Brussels. Production of gold reaches its maximum, varying between 675,000,000 and 734,000,000 francs. Silver, 39 13-16d.

1893.—Suspension of the coinage of silver in British India and of French trade dollars on individual account. Panic in the silver market in July in London, when the price fell below 30d., representing the ratio of 1 to 31.43. Repeal of the purchasing clause of the act of July 14, 1890, by the congress of the United States.

PRODUCT OF GOLD AND SILVER IN THE UNITED STATES FROM 1792 TO 1895.

The Estimate for 1792-1873 is by R. W. Raymond, Commissioner, and since by the Director of the Mint.

YEARS.	Gold.	Silver.	Total.	YEARS.	Gold.	Silver.	Total.
April 2, 1792- July 31, 1834	\$14,000,000	Insignifi- cant	\$14,000,000	1869.....	\$49,500,000	\$12,000,000	\$61,500,000

SILVER WITH GOLD.

The following table exhibits the value of the pure silver in the silver dollar, reckoned at the commercial price of silver bullion, from 60 cents to \$1.2329 (parity of our coining rate) per fine ounce. [From report on precious metals in the United States, 1892, and subsequent additional reports by the director of the mint.]

<i>Price of Silver Per Fine Ounce</i>	<i>Value of the Pure Silver in a Silver Dollar.</i>	<i>Price of Silver Per Fine Ounce</i>	<i>Value of the Pure Silver in a Silver Dollar.</i>	<i>Price of Silver Per Fine Ounce</i>	<i>Value of the Pure Silver in a Silver Dollar.</i>	<i>Price of Silver Per Fine Ounce</i>	<i>Value of the Pure Silver in a Silver Dollar.</i>

COMMERCIAL RATIO OF SILVER TO GOLD EACH YEAR SINCE 1687.

From 1687 to 1832 the ratios are taken from Dr. A. Soetbeer; from 1833 to 1878 from Pixley and Abell's tables; and from 1879 to 1894 from daily cablegrams from London to the bureau of the mint:

YEAR.	Ratio.	YEAR.	Ratio.	YEAR.	Ratio.	YEAR.	Ratio.	YEAR.	Ratio.	YEAR.	Ratio.
1687.....	14.94	1722....	15.17	1757....	14.87	1792....	15.17	1827....	15.74	1862....	15.35

GOLD AND SILVER IN CIRCULATION IN THE UNITED STATES.

The total gold and silver in circulation in the United States is given below. The treasury notes of 1890 are not included in the total for silver, although presented in the table, as they are based upon silver:

JUNE 30.	Gold coin.	Gold certificates.	Total gold.	Silver dollars.	Silver certificates.	Treasur'y notes of 1890.	Subsidiary silver.	Total silver.	Ratio silver to gold. Per cent.
1878.....	\$84,739,774	\$24,897,680	\$109,637,454	\$855,143	\$7,080		\$64,918,322	\$65,780,545	60.0

IMPORTS AND EXPORTS OF GOLD AND SILVER.

From 1843 to 1863 the United States exported net about \$450,000,000 of coin and bullion. During that period the exports of domestic gold and silver were not separately stated, but those were included under the head of silver. Nearly \$520,000,000 of domestic silver appears thus to have been exported, although considerably less than \$20,000,000 represented the total product of the silver mines of the country. The total net exports of \$450,000,000 may therefore be safely assumed to have been gold. The net movement of gold and silver to and from the United States each year since 1863 was as follows:

June 30.	Gold.	Silver.	June 30.	Gold.	Silver.
1864.....	Exports, \$89,484,865	Exports, \$2,796,064	1881.....	Imports, \$97,466,127	Exports, \$6,297,477

FOREIGN COINS.—Before the United States mint could supply the demand for money the gold coins of Great Britain, France, Spain and Portugal and the silver coins of France and Spain were by several acts of congress made legal-tender. All such laws were repealed by the act of 1857, Feb. 21.

*Section 11 of the act of 1792, April 2, provides "that in all coins which shall be current as money in the United States * * * every fifteen pounds weight of pure silver shall be of equal value in all payments with one pound of pure gold." Ratio 15 to 1.

+The act of 1834, June 28, reduced the weight of pure gold in the gold coins so that the proportion of gold to alloy should be as 899.225 to 100, or nearly .900 fine.

‡The act of 1837, Jan. 18, reduced the weight of the alloy in the silver dollar so that the weight of that coin should be 412.5 grains instead of 416 grains; but the weight of pure silver in that coin has always been the same—namely, 371.25 grains. This act also increased a very little the fineness of the gold coin and so fixed the ratio between gold and silver at 16 to 1.

§Section 14 of the act of 1873, Feb. 12, provides "that the gold coins of the United States shall be a \$1 piece, which at the standard weight, 25.8 grains, shall be the unit of value." The act of 1890, Sep. 26, expressly prohibits the coinage of "the \$1 gold piece."

GOLD AND SILVER COINAGE OF THE UNITED STATES.—CONTINUED.

NON-LEGAL-TENDER TREASURY NOTE ISSUES, 1812-61.

Various issues of treasury notes were authorized by acts of congress, down to 1861, but in every case they were merely temporary loans, usually bearing interest and payable only to such persons "as chose to receive them." The various issues of non-legal-tender treasury notes are shown as follows:

AUTHORIZING ACT.	Amount issued.	Length of loan.	Sold at.	Rate of interest.	Remarks.
June 30, 1812..	\$5,000,000	1 year.	Par.	5 2-5 %

LEGAL-TENDER NOTES.

For nearly fifty years, from 1812 to 1861, at various times congress had authorized the issue of treasury notes, but not until the latter year was it ever proposed to make such notes a legal tender. A bankrupt treasury, an impaired credit and a civil war of unparalleled proportions made desperate measures necessary, and there was scarcely a financier in 1861 who did not consider the proposed issue of legal-tender notes a desperate undertaking, justified only, if at all, by the law of self-preservation, which operates in behalf of nations as well as individuals. The first "legal-tender" act was approved Feb. 25, 1862. It authorized the issue of \$150,000,000 non-interest-bearing notes, payable to bearer, in denomi-

nations of not less than \$5 and legal tender in payment of all debts, public and private, except duties on imports and interest on the public debt. These notes were made exchangeable for 6 per cent bonds and receivable for loans that might thereafter be made by the government. Supplementary acts of July 11, 1862, and Jan. 17, 1863, authorized additional issues of \$150,000,000 each, in denominations of not less than \$1, and the time in which to exchange the notes for bonds was limited to July 1, 1863. It was under these acts that the legal-tender notes known as "greenbacks," now outstanding, were issued. The legal-tender issues during the war period were:

AUTHORIZING ACT.	Amount authorized.	Amount issued.	Length of loan.	Sold at.	Rate of interest.
Feb. 25, 1862.....	\$150,000,000	\$447,300,203*	Indefinite.	Par.	None.
July 11, 1862.....	150,000,000				
March 3, 1863.....	150,000,000

*Highest amount outstanding at any one time, June 30, 1864. †Includes reissues.

POSTAL AND FRACTIONAL CURRENCY.

The scarcity of "small change" during the war, caused by the disappearance of fractional silver, led to the use of postage stamps and of metallic tokens, issued by individuals. Congress took the hint, and provided for the issue of a paper currency in denominations less than \$1, known first as postal currency and afterward as fractional currency. The different issues were as follows:

ACT OF CONGRESS.	Series.	Amount issued.	Issue began.	Issue ceased.	Denominations, cents.
July 17, 1862..	First.....	\$20,215,635.00	Aug. 21, 1862..	Sept. 21, 1866..	5, 10, 25, 50
Mar. 3, 1863..	Second.....	23,164,483.65	Oct. 10, 1863..	Feb. 23, 1867..	5, 10, 25, 50
June 30, 1864..	Third.....	86,115,028.80	Dec. 5, 1864..	April 16, 1869..	3, 5, 10, 15, 25, 50
June 30, 1864..	Fourth.....	176,567,032.00	July 14, 1869..	Feb. 16, 1875..	10, 15, 25, 50
June 30, 1864..	Fifth.....	62,661,900.00	Feb. 25, 1874..	Feb. 15, 1876..	10, 25, 50
Total issue.....		\$368,724,079.45			

The act of June 30, 1864, was amended by acts of March 3, 1865, April 7 and May 16, 1866. Some \$15,000,000 of fractional currency has never been redeemed.

TOTAL PAPER CURRENCY AND METALLIC RESERVES.

The total issue of government paper money, including all certificates, but excluding national bank notes, with the gross amount of gold and silver in the treasury, and the ratio of reserves to currency outstanding, are shown as follows:

JUNE 30.	*Paper cur- rency in cir- culation.	SECURED BY COIN AND BULLION IN UNITED STATES TREASURY.		RATIO TO PAPER CURREN- CY IN CIRCULATION.

*National bank notes not included.

†June 1.

GOLD AND SILVER IN THE UNITED STATES TREASURY.

The total holdings of gold and silver by the government at the close of each fiscal year since 1878 are shown in the table below. First is given the gross gold, including coin and bullion, and then the net gold, after deducting the amount of gold certificates in circulation. The gross amount of silver dollars and bullion in the treasury is next shown, and then the net, after deducting the silver certi-

cates outstanding. The treasury notes issued since Aug. 13, 1890, for the purchase of silver bullion are not deducted from the silver in the treasury, as the notes are not certificates of deposit redeemable in silver, the same as the silver certificates, but are treasury notes, the same as the old legal tenders. To the net silver dollars and bullion is added the subsidiary silver in the treasury, which gives the total net silver.

TREASURY HOLDINGS OF GOLD AND SILVER.

JUNE 30.	Total gold coin and bullion.	Gold less certificates outstand- ing.	Total silver dol- lars and bullion.	Silver dol- lars and bullion less certi- ficates out- standing.	Subsidi- ary silver.	Total net silver.	Ratio silver to gold. Per cent.

COINS OF THE UNITED STATES.

Authority for coining and changes in weight and fineness, total amount coined, legal-tender quality.

GOLD COINS.

Double Eagles—Authorized to be coined, act of March 3, 1849; weight, 516 grains; fineness, .900. Total amount coined to June 30, 1896, \$1,277,693,220. Full legal tender.

Eagles—Authorized to be coined, act of April 2, 1792; weight, 270 grains; fineness, .916 $\frac{2}{3}$; weight changed, act of June 28, 1834, to 258 grains; fineness changed, act of June 28, 1834, to .899 $\frac{2}{25}$; fineness changed, act of Jan. 18, 1837, to .900. Total amount coined to June 30, 1896, \$226,538,270. Full legal tender.

Half-Eagles—Authorized to be coined, act of April 2, 1792; weight, 135 grains; fineness, .916 $\frac{2}{3}$; weight changed, act of June 28, 1834, to 129 grains; fineness changed, act of June 28, 1834, to .899 $\frac{2}{25}$; fineness changed, act of Jan. 18, 1837, to .900. Total amount coined to June 30, 1896, \$220,631,035. Full legal tender.

Quarter-Eagle—Authorized to be coined, act of April 2, 1792; weight, 67.5 grains; fineness, .916 $\frac{2}{3}$; weight changed, act of June 28, 1834, to 64.5 grains; fineness changed, act of June 28, 1834, to .899 $\frac{2}{25}$; fineness changed, act of Jan. 18, 1837, to .900. Total amount coined to June 30, 1896, \$28,711,015. Full legal tender.

Three-Dollar Piece—Authorized to be coined, act of Feb. 21, 1853; weight, 77.4 grains; fineness, .900; coinage discontinued, act of Sept. 26, 1890. Total amount coined, \$1,619,376. Full legal tender.

One Dollar—Authorized to be coined, act of March 3, 1849; weight, 25.8 grains; fineness, .900; coinage discontinued, act of Sept. 26, 1890. Total amount coined, \$19,499,337. Full legal tender.

SILVER COINS.

Dollar—Authorized to be coined, act of April 2, 1792; weight, 416 grains; fineness, .892.4; weight changed, act of Jan. 18, 1837, to 412.6 grains; fineness changed, act of Jan. 18, 1837, to .900; coinage discontinued, act of Feb. 12, 1873. Total amount coined to Feb. 12, 1873, \$8,031,238. Coinage reauthorized, act of Feb. 28, 1878. Coinage discontinued after July 1, 1891, except for certain purposes, act July 14, 1890. Amount coined to June 30, 1896, \$458,821,279. Full legal tender except when otherwise provided in the contract.

Trade Dollar—Authorized to be coined, act of Feb. 12, 1873; weight, 420 grains; fineness, .900; legal tender limited to \$5, act of June 22, 1874 (rev. stat.); coinage limited to export demand and legal-tender quality repealed, joint resolution, July 22, 1876; coinage discontinued, act Feb. 19, 1887. Total amount coined, \$35,965,924.

Half-Dollar—Authorized to be coined, act of April 2, 1792; weight, 208 grains; fineness, .892.4; weight changed, act of Jan. 18, 1837, to 206.4 grains; fineness changed, act of Jan. 18, 1837, to .900; weight changed, act of Feb. 21, 1853, to 192 grains; weight changed, act of Feb. 12, 1873, to 124.6 grams, or 192.9 grains. Total amount coined to June 30, 1896, \$132,662,308. Legal tender, \$10.

Columbian Half-Dollar—Authorized to be coined, act of Aug. 5, 1892; weight, 192.9 grains; fineness, .900. Total amount coined, \$2,501,052.50. Legal tender, \$10.

Quarter-Dollar—Authorized to be coined, act of April 2, 1792; weight, 104 grains; fineness, .892.4; weight changed, act of Jan. 18, 1837, to 103.6 grains; fineness changed, act of Jan. 18, 1837, to .900; weight changed, act of Feb. 21, 1853, to 96 grains; weight changed, act of Feb. 12, 1873, to 64.6 grams, or 96.45 grains. Total amount coined to June 30, 1896, \$51,166,166.75. Legal tender, \$10.

Columbian Quarter-Dollar—Authorized to be

coined, act of March 3, 1893; weight, 96.45 grains; fineness, .900. Total amount coined, \$10,005.75. Legal tender, \$10.

Twenty-Cent Piece—Authorized to be coined, act of March 3, 1875; weight, 5 grams, or 77.16 grains; fineness, .900; coinage prohibited, act of May 2, 1878. Total amount coined, \$271,000.

Dime—Authorized to be coined, act of April 2, 1792; weight, 41.6 grains; fineness, .892.4; weight changed, act of Jan. 18, 1837, to 41.4 grains; fineness changed, act of Jan. 18, 1837, to .900; weight changed, act of Feb. 21, 1853, to 38.4 grains; weight changed, act of Feb. 12, 1873, to 24.6 grams, or 38.58 grains. Total amount coined to June 30, 1896, \$28,904,300.50. Legal tender, \$10.

Half-Dime—Authorized to be coined, act of April 2, 1792; weight, 20.8 grains; fineness, .892.4; weight changed, act of Jan. 18, 1837, to 20.6 grains; fineness changed, act of Jan. 18, 1837, to .900; weight changed, act of Feb. 21, 1853, to 19.2 grains; coinage discontinued, act of Feb. 12, 1873. Total amount coined, \$4,880,219.40.

Three-Cent Piece—Authorized to be coined, act of March 3, 1851; weight, 12.6 grains; fineness, .750; weight changed, act of March 3, 1853, to 11.52 grains; fineness changed, act of March 3, 1853, to .900; coinage discontinued, act of Feb. 12, 1873. Total amount coined, \$1,232,087.20.

MINOR COINS.

Five-Cent (nickel)—Authorized to be coined, act of May 16, 1866; weight, 77.16 grains, composed of 75 per cent copper and 25 per cent nickel. Total amount coined to June 30, 1896, \$14,292,235.30. Legal tender for \$1, but reduced to 25 cents by act of Feb. 12, 1873.

Three-Cent (nickel)—Authorized to be coined, act of March 3, 1865; weight, 30 grains, composed of 75 per cent copper and 25 per cent nickel. Total amount coined, \$941,349.48. Legal tender for 60 cents, but reduced to 25 cents by act Feb. 12, 1873. Coinage discontinued, act of Sept. 26, 1890.

Two-Cent (bronze)—Authorized to be coined, act of April 22, 1864; weight, 96 grains, composed of 95 per cent copper and 5 per cent tin and zinc. Coinage discontinued, act of Feb. 12, 1873. Total amount coined, \$912,020.

Cent (copper)—Authorized to be coined, act of April 2, 1792; weight, 264 grains; weight changed, act of Jan. 14, 1793, to 208 grains; weight changed by proclamation of the president, Jan. 26, 1796, in conformity with act of March 3, 1795, to 168 grains; coinage discontinued, act of Feb. 21, 1857. Total amount coined, \$1,562,887.44.

Cent (nickel)—Authorized to be coined, act of Feb. 21, 1857; weight, 72 grains, composed of 88 per cent copper and 12 per cent nickel. Coinage discontinued, act of April 22, 1864. Total amount coined, \$2,007,720.

Cent (bronze)—Coinage authorized, act of April 22, 1864; weight, 48 grains, composed of 95 per cent copper and 5 per cent tin and zinc. Total amount coined to June 30, 1896, \$8,073,910.34. Legal tender, 25 cents.

Half-Cent (copper)—Authorized to be coined, act of April 2, 1792; weight, 132 grains; weight changed, act of Jan. 14, 1793, to 104 grains; weight changed by proclamation of the president, Jan. 26, 1796, in conformity with act of March 3, 1795, to 84 grains; coinage discontinued, act of Feb. 21, 1857. Total amount coined, \$39,926.11.

Total gold coinage	\$1,814,692,253.00
Total silver coinage	696,464,343.10
Total minor coinage	27,830,048.67

Grand total..... 2,538,986,644.77

CIRCULATION OF MONEY IN THE UNITED STATES.

The difference between the amount of money in the country and the amount in circulation represents the money in the treasury.

Currency certificates, act of June 8, 1872, are included in the amount of United States notes in circulation in tables for years 1873 to 1891, inclusive; since 1891 they are reported separately.

MONEY OF THE WORLD.

Monetary systems and approximate stocks of money in the principal countries of the world as reported by the treasury department's bureau of mint.

Utterances of State Conventions

UPON COINAGE, THE FINANCES, THE TARIFF, CUBAN AND FOREIGN AFFAIRS.

The following are extracts from the platforms adopted by the state conventions of all the parties, held prior to the nominating conventions, upon the leading questions before the country. The extracts give the complete declaration of the platform upon the issue.

FINANCE AND THE COINAGE.

[Where parties are omitted no declaration was made.]

ALABAMA.

REPUBLICAN (M'KINLEY WING).

We are unalterably opposed to any scheme that will give to this country a depreciated and debased currency. We favor the use of silver as currency, but to the extent only that its parity with gold can be maintained, and in consequence are opposed to a free and unlimited and independent coinage of silver at the ratio of 16 to 1. We believe that every American dollar should be an honest 100-cent dollar, always and everywhere, whether gold, silver or paper.

The Reed wing adopted no platform, but resolved on fusion with the people's party.

DEMOCRATIC.

We, the democrats of the state of Alabama, in convention assembled, declare our continued faith in the old time-honored principles of the democratic party, and among these principles are the following:

The free and unlimited coinage of silver and gold at 16 to 1 as the standard money of the country, without any discrimination against either metal, and without the consent of foreign nations, as the United States coined silver and gold before the republican party obtained control of the government and changed the coinage laws of the country for the benefit of a class and to the injury of a great mass of the people.

PEOPLE'S PARTY.

We believe in the free and unlimited coinage of both gold and silver at the ratio of 16 to 1, independent of international agreement.

ARKANSAS.

REPUBLICAN.

We favor true bimetalism, with such restrictions and under such provisions to be determined by legislation as will secure the maintenance of the parity of values of the two metals, so that the purchasing and debt-paying power of the dollar, whether of silver, gold or paper, shall be at all times equal.

DEMOCRATIC.

The democratic party of Arkansas, in convention assembled, renews its allegiance to the time-honored principles of the party and declares as follows:

We favor bimetalism, and to that end we insist upon the free and unlimited coinage of both silver and gold at the ratio of 16 to 1, as money of final redemption, with equal legal-tender powers, independent of the action of any other nation.

"We are opposed to the issuing of interest-bearing bonds for any purpose in time of peace.

We demand that the government shall not surrender, but shall always exercise, its lawful option to redeem its obligations in either gold or silver, as may be most convenient.

We demand the repeal of the present laws discrediting the silver money of the nation and legalizing private contracts payable in gold alone.

We are opposed to the national banking system and favor only the money of the constitution; and we believe that the power and duty of the government to furnish a circulating medium should not be delegated to any private corporation.

We favor the collection of an income tax as a part of the revenue of the general government, and we demand the adoption of such constitutional amendments as may be necessary to authorize the same.

PROHIBITION.

The money of the country should be issued by the general government only, direct to the people in sufficient quantities for the transaction of business, and be a legal tender for all debts, public and private, regardless of future special contract. The money should consist of treasury notes based on the credit of the country, and of silver and gold coined free and unlimited at the ratio of 16 to 1, regardless of the attitude of other nations.

CALIFORNIA.

REPUBLICAN.

We favor the free and unlimited coinage of silver at the ratio of 16 to 1, and the making of silver, as well as gold, a legal tender in payment of all debts, both public and private.

DEMOCRATIC.

The democratic party of the state of California is unalterably in favor of the free and unlimited coinage of both gold and silver at the ratio of 16 to 1, without waiting for or depending on the action of any other nation; it demands the use of silver, as well as gold, as a full legal tender in payment of all debts, both public and private.

POPULIST.

We denounce the policy of the democratic and republican parties in maintaining the gold standard and in issuing bonds to purchase gold to pay national obligations which are on their face by law payable in either gold or silver coin. And we condemn the hypocrisy of the republican party for denouncing Grover Cleveland for so issuing bonds while it has, by its representatives in congress, upheld that policy and has refused to vote for bills presented by populist senators to restrain the issue of such bonds without the consent of congress.

We renew and emphasize our demand for the free and unlimited coinage of silver, as well as gold, at the ratio of 16 to 1, as a full legal tender, and without reference to any other nation.

PROHIBITION.

We declare that money should consist of gold, silver and paper, and be issued by the government directly to the people, without

the intervention of any private individual or corporation, sufficient in amount to transact the business of the country, and to be full legal tender for all debts, public and private. To this end we favor the free and unlimited coinage of silver at the ratio of 16 to 1.

We oppose the issue of government bonds in times of peace, and in the payment of its bonds the government should exercise its option as to the coin in which such bonds are paid.

COLORADO.

REPUBLICAN.

1. That the two cardinal principles of bimetalism and protection, so long adhered to by the republican party, are vital and necessary to the continued existence and usefulness of the party, as well as to the prosperity of the country. That the wonderful advance in manufacturing interests in China and the far east, upon the basis of a bimetallic financial system, will render our policy of protection, if associated with the single or gold standard, powerless to compete with them, and we believe that the logic of events will sooner or later convince the party and the country of the truth of this proposition.

2. That the attempt to foist upon the country the free-trade system and the gold standard has cost during the last three years a destruction of one-half the property values in the whole country, and in addition has loaded the people in time of peace with a bonded indebtedness of \$260,000,000, for which the country and the people of the country have received no commercial equivalent or valuable consideration whatsoever, and thus the experiment of putting the country upon a gold basis has caused, and will cause, disaster, suffering and a monetary loss to the people of the country greater by three-fold than resulted from the late civil war.

3. That the everlasting shame and discredit of attempting to establish free trade in and to fix a gold standard upon this country, destroy values, build up mountains of debt, decrease the volume of currency that such gold standard might be maintained, belongs to the democratic party, under the leadership and control of President Cleveland, though, with sorrow we confess it, many recreant republicans in both houses of congress have hastened to become partakers in the folly.

4. We therefore declare that the free coinage of gold and silver at the ratio of 16 to 1 is, for the time now being, of paramount and controlling importance, and the most pressing question connected with our political duty and action. The doctrine of bimetalism has never been denied by any national republican convention, but often asserted, and they who now deny it are false to the party, and not we who still maintain it. International bimetalism can only be achieved through national bimetalism, adopted by the United States. To the maintenance of this principle, as well as to the restoration of silver as a money metal to the full standard of the constitution, we, as republicans, pledge our most arduous and persistent effort.

DEMOCRATIC.

The democratic party of Colorado pledges its unwavering devotion to all the principles of the democratic faith, as laid down by Thomas Jefferson and Andrew Jackson. Believing that the evils that now oppress

the people are the direct result of a departure from the true principles of democracy; that the policy inaugurated by the republican party for the contraction of the currency, and for many years continued by it, to the gradual and certain impoverishment of the people, in the face of steadfast opposition from the democratic party, but adopted and approved by the present administration, has resulted in the creation of an enormous bonded debt in a period of profound peace, visiting a deadly blight on every industry and carrying discouragement and dismay into the household of every wealth-producer in the land; that there never can be a condition of general welfare until the volume of a sound and stable currency is equal to the demand of industrial and commercial pursuits; that the first step in this direction should be the immediate restoration of silver to the place it occupied in the currency of the world for centuries previous to 1873; we therefore favor the immediate restoration of the free and unlimited coinage of gold and silver at the present legal ratio of 16 to 1, as such coinage existed prior to 1873, without waiting for the aid or consent of other nations, such gold and silver to be a full legal tender for all debts, public and private.

NATIONAL SILVER PARTY.

Your committee on resolutions would respectfully report as follows: That the paramount issue at this time in the United States is indisputably the money question. It is between the gold standard, gold bonds and bank currency on the one side, and the bimetallic standard, no bonds and government currency on the other. That on this issue we declare ourselves to be in favor of a distinctly American financial system. We are unalterably opposed to the single gold standard, and demand immediate return to the constitutional standard of gold and silver by the restoration by the government, independently of any foreign power, of the unrestricted coinage of both gold and silver into standard money at the ratio of 16 to 1, and upon terms of exact equality as they existed prior to 1873; the silver coin be a full legal tender equally with gold for all debts and dues, private and public.

CONNECTICUT.

REPUBLICAN.

We are unalterably opposed to the issue of unsecured paper currency, either by the government or the banks, the free coinage of silver at any ratio, and favor a single standard of value, and that standard gold. We believe that this policy, with a sound and stable currency upon a gold basis, will furnish sufficient revenue to meet all requirements of the government and properly support it.

DEMOCRATIC.

As a necessary consequence, the honest payment of public debts and the preservation of the public credit require that the gold standard of money as a necessary measure of value shall be maintained. While we favor the most liberal use of silver consistent with the enforcement of a gold standard, we are unalterably opposed to the free coinage of silver, deeming it a device for the debasement of our currency and compulsory purchase of silver by the government. Under existing circumstances, to pay public debts in silver coin is repudiation; to pay private debts in silver coin is to rob the wage-earners, and to provide for

the free coinage of silver means the destruction of legitimate business and great suffering among the laboring classes. We believe the safety of our national finances requires a system of sound banking by which a bank-note currency ample to supply the needs of the whole country shall be created, safely secured, and always and everywhere redeemable in gold.

POPULIST.

Resolved, That the delegates from this convention to the people's party national convention at St. Louis July next be and hereby are requested to oppose any party fusion or political union that does not embrace and state the following fundamental principles, viz.:

The free and unlimited coinage of gold and silver at the ratio of 16 to 1, independent of the action of other nations.

The withdrawal of national bank notes and the substitution thereof of government notes as full legal tender.

An annual increase of \$5 per capita to the circulating medium until said increase shall amount to \$50 per capita.

The immediate issue of \$100,000,000 of fractional currency.

Opposition to the issue of interest-bearing bonds.

DELAWARE.

REPUBLICAN.

We are opposed to the free and unlimited coinage of silver, except after international agreement can be obtained; we believe that the existing standard should be firmly maintained; the credit of the United States must be kept unquestioned at home and abroad; the reserve of the treasury must be scrupulously maintained, and every coin obligation must be paid in gold or in whatever coin the creditor chooses to demand.

DEMOCRATIC.

We are in favor of maintaining the present monetary standard, and are opposed to the free coinage of silver or to the compulsory purchase of silver bullion by the government.

We believe that the true interests of the people require that the earnings of agriculture and trade and the wages of labor should be paid in money that is intrinsically worth, in all the markets of the world, what it purports to be worth, and that the government should keep all its obligations at all times redeemable and payable in money of the standard adopted and in use by ourselves and by the most advanced and civilized nations of the world.

As the party of the plain people of this country, who for the most part depend upon the wages they receive, we are opposed to experiments in finance which will lessen the purchasing power of the money they earn.

We believe that a fluctuating currency or a falsified money would be fatal to the interests of agriculture and labor, and would only inure to the benefit of the speculator and gold gambler; and we uphold the democratic administration in its efforts to maintain the credit and integrity of the government. We believe that the federal government should be divorced from the business of banking, which should be left to the commercial activities of the people.

PROHIBITION.

With all progressive nations we believe that gold should be the standard of value for our monetary system; but we also believe that silver and national bank notes

should be used as mediums of exchange, and recognized as equal in value to gold in payment of all obligations, national as well as private debts included.

FLORIDA.

REPUBLICAN.

See tariff plank.

DEMOCRATIC.

We, the democratic party of the state of Florida, in convention assembled, do adopt the following as its platform and declaration:

Whereas, Questions of coinage and finance are matters prescribed by the constitution for national legislation, and we recognize that it is the proper function of the democratic national convention to assemble at Chicago at an early date to prescribe the policy of the party on such questions, as well as all other national issues; therefore, be it

Resolved, That all such questions are properly referred for determination to the national democratic convention, and we pledge our support to the policy of the party which may be so enunciated.

GEORGIA.

REPUBLICAN.

The state convention split. The "regulars" adopted no platform, but the "seceders" adopted the following:

It is the sense of this convention that, financially speaking, our country is in a deplorable condition, and that its only redemption from its present thralldom is the return of the republican party into power, with ex-Gov. McKinley as its standard-bearer, and the adoption of a sound-money plank in the platform and a protective tariff on American institutions and protection to American ship-owners.

DEMOCRATIC.

Resolved, That congress has no power to discriminate at the mints against either gold or silver as metals for the coinage of primary money or against gold or silver coin of the United States as to their debt-paying functions, such discriminations depriving the citizens of the use of one kind of standard money provided by the constitution for the payment of debt, and we demand the repeal of all laws or parts of laws making such discriminations, and the restoration of the standard silver dollar to the rank of primary money which it held prior to 1873, by opening the mints to the coinage of silver on a perfect equality with gold at the ratio of 16 to 1.

Resolved, That we condemn a financial policy which necessitates the increase of the bonded debt of the country in time of peace to maintain an unnecessary gold reserve or to pay the current expenses of the government. We also condemn a policy which seeks to retire the United States and treasury notes, as they constitute an absolutely safe circulating medium, based on gold and silver coin and backed by the entire wealth of the country. Such a policy would not only intensify the present evil of contraction but place the exclusive right to issue a circulating medium in the control of a concentrated money power and above the laws and will of the people, and foster the federal doctrine of centralization and class government through financial control, a doctrine which is a standing menace to our republican institutions and the liberties of the people; and we demand the repeal of laws which clothe a secretary of the treasury

with the more than imperial power to issue bonds and increase the public debt at his will and pleasure without specific authority from congress.

Resolved, That we favor the payment of the public debt as rapidly as practicable; all moneys drawn from the people by taxation, except so much as is requisite for the necessities of the government economically administered, should be honestly applied to such payment, and when the obligations of the government expressly state on their face or the law under which they were issued provides that they are payable in coin, or in dollars, such obligations should be paid in gold or silver coin, at the convenience of the government and not at the option of the holder of the obligation.

ILLINOIS.

REPUBLICAN.

We are unyielding and emphatic in our demands for honest money. We are opposed, as we ever have been, to any and every scheme that will give to this country a currency in any way depreciated or debased, or in any respect inferior to the money of the most advanced and intelligent nations of the earth. We favor the use of silver as currency to the extent only and under such restrictions that its parity with gold can be maintained.

DEMOCRATIC.

We favor the soundest and safest money known to man, and as experience has shown that this consists of both gold and silver, with equal rights of coinage and full legal-tender power, we demand the repeal of that republican and plutocratic legislation which demonetized silver and reduced it to the basis of token money, destroying by one-half the stock of real money, and by doubling the work to be done by gold doubled its purchasing power so that the farmers and producers had to give twice as much work to get a dollar as they formerly had, and found it hard to meet the debts, interest, taxes and fixed charges, which were not lowered. In this way the market for those things which the mechanic and laborer made was destroyed and the factories had to shut down.

But by thus taking out of the commercial world one-half of its blood, industry and trade have been paralyzed and idleness and misery have been spread over the civilized world. With the richest natural resources, with a most industrious, frugal and enterprising population, and with the most abundant harvests, our people are in distress. Three per cent of our population own over one-half the wealth of this republic, and almost the only men who prosper are the bond sharks and the men who fatten off the misery of their country. These are conditions under which republican institutions cannot long endure.

We believe in the greatness and patriotism of the American people, in their energy, industry and thrift, and that such people, with the unlimited resources of our land, are strong enough to sustain a monetary system without the aid of foreign governments.

We believe that the benefit of the independence which we gained 100 years ago—the war for which was initiated upon a matter of tribute—should not be lost by yielding vassalage to a monetary system preferred by other governments.

We believe that the bimetalism which has done the work of the world since the dawn of civilization, and which was made the basis of the monetary system by Hamil-

ton and Jefferson, is absolutely necessary at present to the prosperity of mankind; that its re-establishment will check the present business paralysis, will give to the country a safe and honest currency of adequate volume, will restore prices of agricultural commodities, will encourage enterprise and give our people steady and profitable employment. Having learned through bitter experience that Wall street has controlled the financial legislation at Washington, and knowing that every effort will be made to defeat the will of the people, we deem it proper to be explicit in our declarations.

Actuated by the foregoing principles and desiring the prosperity of the people, we demand the immediate restoration of the free and unlimited coinage of both gold and silver as standard money at the rate of sixteen ounces of silver to one ounce of gold of equal fineness, with full legal-tender power to each metal, without waiting for or depending on any other nation on earth; and the delegates from this convention to the national democratic convention are instructed to use all honorable means to secure a similar declaration by said national convention, and to support only such men for the presidency as are in full and pronounced sympathy with these principles.

We are also opposed to the contraction of the currency by the retirement of any part of the outstanding treasury notes.

PROHIBITION.

We declare that money should consist of gold, silver and paper, and be issued by the government directly to the people without the intervention of any private individual or corporation, and to be a full legal tender for all debts, both public and private. The government should not discriminate in favor of gold as against silver, and its mints should be open upon equal terms to both at the ratio now established by law. We oppose the issuing of government bonds in times of peace.

INDIANA.

REPUBLICAN.

We are firm and emphatic in our demand for honest money. We believe that our money should not be inferior to the money of the most enlightened nations of the earth. We are unalterably opposed to every scheme that threatens to debase or depreciate our currency. We favor the use of silver as currency, but to the extent only and under such regulations that its parity with gold can be maintained, and in consequence are opposed to the free, unlimited and independent coinage of silver at a ratio of 16 to 1.

DEMOCRATIC.

We reaffirm our adherence to the democratic doctrine of bimetalism, and therefore we demand the immediate restoration of bimetalism by the free and unrestricted coinage of both silver and gold as primary money at the ratio of 16 to 1, without waiting the co-operation of Great Britain or any other foreign power, all such coinage to be full legal tender in payment of all debts, public and private.

Resolved, That we believe the existing tariff laws will be fully equal to all demands for needed revenue for the expenses of government economically administered under the conditions which will arise from the restoration of bimetalism.

We are opposed to the redemption and final cancellation of United States notes (greenbacks), or any other notes or certifi-

cates issued by the United States to circulate as money, such redemption and cancellation necessarily involving an increase of the public debt by the issue of bonds and the reduction of the currency. We demand a sufficient, stable volume of money—gold, silver and paper—to meet the requirements of our ever-growing population and the constant increase of our productive industries.

We protest against the increase of the public debt by the issue of interest-bearing bonds, or otherwise, in a time of peace, and if the redemption clause of the so-called Sherman resumption act of 1875 authorizes, as it is claimed, the right of the treasury department to issue interest-bearing bonds without limit, without the express and definite authority of congress as to each issue of such bonds, we demand that the provisions of such act be unconditionally repealed. The democratic party has never believed that the public debt was a public blessing.

We demand that obligations of the government of every form be paid and be redeemed in conformity with the laws under which they were issued, in coin, gold and silver, at the option of the government of the United States, and not at the option of the creditor.

PROHIBITION.

The money of the country should be issued by the general government only direct to the people in sufficient quantities for the transaction of business, and be a legal tender for all debts, both public and private, regardless of future special contract. The money should consist of treasury notes based on the credit of the country and of silver and gold coined free and unlimited at the ratio of 16 to 1, regardless of the attitude of other nations, and any seigniorage to revert to the government.

IOWA.

REPUBLICAN.

If the dominant issue is to be finance, then no man in the nation has a greater reputation for financial resourcefulness and constructiveness and soundness than Allison—a fact conspicuously recognized by the pressure of Presidents Garfield and Harrison upon him to take the portfolio of the treasury in their respective administrations. He has been favorable to a true bimetalism, and he has at all times labored to maintain an abundant currency of gold, silver and paper, made interconvertible and equal to the best currency of the commercial world. He has demanded for the business of the nation a currency equitable and stable, free from the oscillations so dangerous to business interests and so unjust to the wage-earners of the nation, whose thousands of millions of annual wages and many thousand millions of credit in savings banks and other forms constitute them the great creditor class of the nation.

DEMOCRATIC.

The democracy of Iowa, in convention assembled, hereby reaffirms its allegiance to the time-honored democratic doctrine of bimetalism; to the use of both gold and silver as primary money, and the coinage of both at a ratio without charge or limit.

1. We hold to the use of both gold and silver as the standard money of the country and to the coinage of both gold and silver without discrimination against either metal or charge for mintage. In the judgment of this convention the explicit pledge of the

national democratic party, if fairly and honorably kept, requires the constant effort of every loyal democrat to accomplish the repeal of all laws heretofore enacted through the instrumentality of the republican party which do in letter and spirit alike discriminate against silver and in favor of gold, and the substitution thereof of affirmative legislation which shall upon some terms or other restore silver to equal rights with gold in the mints and coinage of the country.

2. We hereby affirm as a deliberate conviction of this convention that the act of 1873, in so far as it demonetized silver and established gold as the single unit of value, is a flagrant violation of one of the most important provisions of the constitution of the United States, a violation which every political party ought to condemn and every good citizen assist in expunging from the statutes of the republic. We, therefore, favor the immediate repeal of all laws by which silver was demonetized, and demand its unqualified restoration to the right of free and unlimited coinage in the mints of the United States as money of final redemption at the old ratio of 16 to 1.

3. We recognize the fact that upon this question the country has reached a crisis that can be no longer evaded or postponed. We know that the result of the conflict must be a return to the money of the constitution or the substitution thereof for all time to come of a standard of values, born of British aristocratic greed, that doubles the purchasing power of money, and in behalf of the toiling millions of this republic we welcome the conflict and pledge the democratic party of Iowa to stand by the constitution, to defend the right, to beat back with all its strength every aggression of the money power of the old and new world alike, and to aid to the utmost limit of its ability in restoring to ourselves and our posterity the sacred heritage of the financial system bequeathed to the American people by the fathers of the republic, and which was equally fair and just to all citizens, and in this effort we cordially invite the co-operation of all good citizens, without reference to political affiliations in the past.

4. We hereby enter our most earnest protest against all schemes for the retirement of our non-interest-bearing national paper currency, and the substitution thereof of \$500,000,000 of interest-bearing bonds to become an additional burden upon the producing classes, that national banks may be supplied with interest-bearing capital on which to transact their individual business. And we also protest against the further issuance and sale of government bonds to acquire gold with which to redeem the same which should be redeemed by the government with the coin of either metal it may possess in strict accord with both the spirit and the letter of the law.

5. We denounce as a transparent fallacy the claim that labor can be benefited by the maintenance of a single gold standard as the basis of our financial system. The experience of all ages and of every country alike clearly demonstrates that a contracted currency invariably compels a contraction of business; the lessening of industrial enterprises; the enforced idleness of great numbers of the working classes, and nothing of which the human mind can conceive is more clearly self-evident than the naked truth that the wages of labor must always be adjusted to and correspond with the

prices of labor's products in the markets in which they are sold.

PEOPLE'S.

Resolved, That the delegates to the St. Louis convention be instructed to do all in their power to secure a union of all the reform forces on a common ticket, and a platform embodying the fundamental principles of the Omaha platform, with a further resolution favoring the initiative and referendum.

PROHIBITION.

We believe in the gold and silver coinage of the constitution, and a national currency issued by the general government only. We demand the return of the free coinage of both silver and gold, without discrimination against either, at a ratio of 16 to 1, and at once, independent of the action of any other nation.

KANSAS.

DEMOCRATIC.

We demand the free and unlimited coinage of both silver and gold at the ratio of 16 to 1, without waiting the action of any other government or people, as we believe this country is large enough to establish and maintain its own financial system.

KENTUCKY.

REPUBLICAN.

We are opposed to the free and unlimited coinage of silver, believing that it would involve the country in financial ruin. The gold dollar is the best dollar and least liable to fluctuations, and for these reasons, and in order to conform our standard to that of other great commercial nations, we favor it as the standard money of the United States, and the maintaining on a parity with it every other dollar, whether of silver or paper.

DEMOCRATIC.

We are in favor of an honest dollar—a dollar worth neither more nor less than 100 cents. We favor bimetalism, and to that end we demand free and unlimited coinage of both gold and silver at the ratio of 16 to 1 as standard money, with equal legal-tender power, independent of the advice of any other nation.

We hold that the secretary of the treasury should exercise his legal right to redeem all coin obligations in gold or silver, as may be more convenient, and are opposed to the issue of bonds in time of peace for the maintenance of the gold reserve or for any other purpose.

We are opposed to the national banking system and to any enlargement of its powers, and opposed to any contraction of the currency by the retirement of greenbacks or otherwise.

PROHIBITION.

The money of the country should consist of gold, silver and paper money, to be issued by the general government only, and in sufficient quantities to meet the demands of business and give full opportunity for the employment of labor. To this end an increase in the volume of money is demanded. No individual or corporation should be allowed to make any profit through its issue. It should be made a legal tender for payment of all debts, public and private. Its volume should be fixed at a definite sum per capita, and made to increase with our increase in population. Silver should be remonetized to its position as money prior to its demonetization in 1873.

LOUISIANA.

DEMOCRATIC.

We are in favor of the soundest and best money the ingenuity of man can invent. And that as experience has demonstrated that this money consists of both gold and silver, with equal rights of coinage and full equal legal-tender power on the basis of sixteen ounces of silver to one of gold, the delegates from this convention to the Chicago convention are hereby instructed to support a plank in the national platform declaring for the free and unlimited coinage of silver at said ratio, with full legal-tender power and without reference to the action of the other nations, and to support the candidacy before said convention of such men only as are in full and pronounced sympathy with said plank, and in order that our views may be more effectually enforced the said delegates are hereby instructed to vote as a unit.

MAINE.

REPUBLICAN.

He [Thomas B. Reed] is opposed to the free and unlimited coinage of silver, except by international agreement, and until such agreement can be obtained believes the present gold standard should be maintained. He has always been uncompromisingly for the maintenance of the highest national credit, the utmost good faith toward the public credits, not for the creditor's sake but for the nation's sake; for the sound reason that the most valuable possession of any nation in time of war or distress, next to the courage of its people, is an honorable reputation.

DEMOCRATIC.

We oppose the free coinage of silver and favor the single gold standard, unless a different standard is adopted through international agreement.

PROHIBITION.

We arraign the republican and democratic parties for the class legislation by which monopolies and usurers plunder the wealth-producers and spread distress among the people. We charge these parties with responsibility for the growing influence of rapacious trusts and corporations, for the present chaotic condition of business and finance, for the unjustifiable depletion of the United States treasury, and for the unprecedented increase of bonded indebtedness in a time of peace and bountiful production. We claim that the prohibition party is the party of progress, the party of the people, and we pledge ourselves, when given the power, to enact such legislation upon the questions of currency, taxation, monopoly, transportation and suffrage as may be needed to establish justice and insure a government by and for the people.

MARYLAND.

REPUBLICAN.

We believe in the gold standard upon which to base our circulating medium, and are opposed to the free and unlimited coinage of silver until an international agreement of the important commercial countries of the world shall give silver a larger use.

DEMOCRATIC.

Believing that the true interests of the people require that the earnings of agriculture and trade and the wages of labor should be paid in money that is intrinsically worth in all the markets of the world what it purports to be worth, we demand the mainte-

nance of the existing gold standard of value; and, further, that the government shall keep all its obligations at all times redeemable and payable in money of the greatest intrinsic value and of the highest standard adopted by the civilized nations of the world, and we, therefore, resolutely oppose the free and unlimited coinage of silver at the ratio of 16 to 1.

The safety of the masses of the people can only be found in a sound and honest currency, and it is because we perceive that the hope of relief held out to them by the advocates of free and unlimited coinage of silver at a ratio of nearly, if not quite, twice the real value of silver bullion will assuredly prove delusive, that, true to the history and traditions of our party, we declare our hostility to a policy so fatal in the absence of an enlightened international agreement regulating the whole subject, to the early establishment of which agreement we believe the efforts of the government should be steadily directed.

MASSACHUSETTS.

REPUBLICAN.

We regard the silver agitation as hurtful to business and destructive of confidence, and, as has recently been shown, hostile to all tariff legislation designed to give protection to our industries and revenue to our treasury. We are entirely opposed to the free and unlimited coinage of silver, and to any change in the existing gold standard, except by international agreement. Each dollar must be kept as good as every other dollar. The credit of the United States must be maintained at the highest point, so that it cannot be questioned anywhere, either at home or abroad. Every promise must be rigidly kept and every obligation redeemable in coin must be paid in gold. We are opposed to the unsound and dangerous system of state banks. We support the national banking system, and believe that it should be so amended as to give it room for expansion and opportunity to meet the demands of the growing business and population of the country.

DEMOCRATIC.

Believing that the true interests of the people require that the earnings of trade and the wages of labor be paid in money that is intrinsically worth, in all the markets of the world, what it purports to be worth, we demand the maintenance of the existing gold standard of value, and that the government shall keep all its obligations at all times redeemable and payable in gold, and we oppose the free coinage of silver and any further purchases of silver bullion or the coinage thereof on government account.

MICHIGAN.

REPUBLICAN.

Adopted the financial plank in the national republican platform of 1892.

DEMOCRATIC.

On the finance question we recognize that this administration stands upon, and has consistently carried out, the platform of the national democratic convention of 1892, on which it was elected by the people, which declared that the parity of the metals of our currency should be maintained. The platform of the national convention on this question, which has carried the country overwhelmingly for our party, should be the doctrine of democrats until a new platform is formed by another national convention.

PROHIBITION.

We favor the free and unlimited coinage of both gold and silver at a ratio of 16 to 1, without waiting for the co-operation of any other nation on earth. All money shall be issued directly by the general government, no one dollar to be any better than any other dollar before the law when so issued, and all to be a full legal tender for all purposes.

MINNESOTA.

REPUBLICAN.

We favor the use of both gold and silver to the extent to which they can be maintained in circulation at a parity in purchasing and debt-paying power; that we are earnestly opposed, under the present conditions, to the free and unlimited coinage of silver, for the manifest reason that it would destroy such parity, enormously contract the volume of our currency by forcing gold out of circulation and immediately place us on a silver basis. Believing, also, that it is a self-evident fact that the effect of the international demonetization of silver can be overcome only by the international remonetization of that metal, the republican party of Minnesota most heartily favors an international conference for that purpose.

DEMOCRATIC.

We are unqualifiedly in favor of the present gold standard of value. We favor the use of both gold and silver as money, and believe that our government should coin and keep in circulation as a part of the circulating medium as large an amount of silver as can be employed without destroying or threatening to destroy the existing parity of value between the unit in gold and the unit in silver. We are opposed to a descent to monometallism, and particularly to a silver monometallism, with its depreciated and depreciating standard of value. We are firmly convinced that the free and unlimited coinage of silver by our government at the ratio of 16 to 1—without co-operation on the part of the other great commercial nations of the world—would reduce this country to a condition of silver monometallism, entailing upon us a financial panic and commercial and industrial disaster. We are utterly and irrevocably opposed to the adoption of any such policy.

PROHIBITION.

We favor the demonetization of both gold and silver, and for the purposes of international exchange the purchase by the government of gold and silver bullion, upon which, for convenience, certificates shall be issued.

MISSISSIPPI.

REPUBLICAN.

We believe in an honest dollar, whether it be of gold or silver or paper; a dollar that is equal in debt-paying and in purchasing power to any dollar in the United States or in the world; a dollar that will cheat neither the rich nor the poor, and will give confidence to all branches of labor and trade. We favor the full and free use of both gold and silver as money, without distinction, except that they shall be equal in the hands of debtor and creditor.

DEMOCRATIC.

We favor the free and unlimited coinage of silver and gold at the ratio of 16 to 1, without waiting for the action or co-operation of any other nation, and we hereby instruct our delegates to the national democratic convention to be held in Chicago in

July next in favor of a platform embodying these principles. And we further instruct said delegates to vote for no man for president or vice-president who is not fully and unequivocally in favor of the principles above expressed.

PROHIBITION.

The money of the country should consist of gold, silver and paper, and be issued by the general government only, and in sufficient quantity to meet the demands of business and give full opportunity for the employment of labor. To this end an increase in the volume of money is demanded. No individual or corporation should be allowed to make any profit through its issue. It should be made a legal tender for the payment of all debts, public and private, no discrimination being allowed by contract or otherwise. Its volume should be fixed at a definite sum per capita, and should be made to increase with our increase in population.

MISSOURI.

REPUBLICAN.

We are firm and emphatic in our demand for honest money. We believe that our money should not be inferior to the money of the most enlightened nations of the earth. We are unalterably opposed to any scheme that threatens to debase or depreciate our currency. We favor the use of silver as currency, but to the extent only and under such regulations that its parity with the present gold standard can be maintained, and in consequence we are opposed to the free, unlimited and independent coinage of silver at a ratio of 16 to 1.

DEMOCRATIC.

We hold that the paramount issue now before the people of the United States relates to the monetary system to be adopted by this country, and upon that issue we declare that the federal constitution names silver and gold, together, as the money metals of the United States. The first coinage law passed by congress under the constitution made the silver dollar the unit of value and admitted gold to free coinage at a ratio measured by the silver dollar unit.

From the beginning of the government, following a policy formulated by Thomas Jefferson and firmly established by Jackson the democratic party has been the party of bimetalism, favoring the free coinage of both silver and gold at the national mints, and opposed to farming out to banking corporations the government's sovereign power of issuing and controlling the money of the people. The act of 1873 demonetizing silver was surreptitiously passed, without the approval or knowledge of the American people, and from the time when the effects of this act in fastening upon this country the single gold standard were understood the democratic party has consistently and persistently urged that the grievous wrong be righted.

The demonetization of silver resulted in the steady appreciation of gold and a corresponding fall in the price of commodities produced by the people, a heavy increase in the burden of all debts, public and private, the enrichment of the money-lending class, paralysis of industry and impoverishment of the people and unexampled distress in all gold-standard countries. Experience has shown that while under the single gold standard there may be an occasional revival of business activity, accompanied by an advance in price of a limited number of

commodities, such revival is due to artificial and temporary causes, and cannot permanently alleviate the sufferings due to falling of prices brought about by the appreciation of the gold and an inadequate supply of primary, or redemption, money. Duty to the people requires that the party of the people continue the battle for bimetalism until its efforts are crowned with success. Therefore, be it

Resolved, That we demand the free and unlimited coinage of silver and gold into primary or redemption money at the ratio of 16 to 1, without waiting for the action or approval of any other government.

PEOPLE'S.

We believe that the power to issue a paper currency is inseparable from the power to coin, and that all currency intended to circulate as money should be issued and its volume controlled by the general government, and should be a legal tender; and in the free coinage of gold and silver at the ratio of 16 to 1. We therefore demand:

1. The free coinage of gold and silver at the ratio of 16 to 1, without consulting any other nation.
2. The abolition of all banks of issue of currency to circulate as money.
3. The issue of United States notes based on the credit of the nation, redeemable in debts and revenues to the government, to make a volume of coin and currency to do the business of the country on a cash basis.
4. That no more interest bonds or obligations of the United States be issued.

PROHIBITION.

The money of the country, whether of gold, silver or paper, should be issued by the general government only, and in sufficient quantities to meet the demands of business, and no individual or corporation should be allowed to make any profit through its issue; and all money should be a legal tender for the payment of all debts, public or private.

MONTANA.

REPUBLICAN.

We reiterate our faith in and devotion to the great republican principles of bimetalism, protection and reciprocity, announcing as our understanding of bimetalism the free and unlimited coinage of both gold and silver at the ratio of 16 to 1, independently by the United States. We maintain that these three cardinal principles of republican faith should be the first consideration of the congress of the United States, and that ample legislation be enacted upon these subjects.

We call the attention of reflecting men to the recent development of productive and manufacturing enterprises in China, India and other silver-using countries, and submit that the competition with which we are thus menaced imperatively demands the restoration of silver to its ancient money function as a means of equalizing the difference in exchange, and the establishment of a protective-tariff policy as a necessary measure of equalizing the difference in wages and cost of living.

We condemn as un-republican and un-statesmanlike the action of those republicans in congress who, in defiance of republican traditions, rushed to the aid of a democratic administration and a democratic majority in congress in securing the unconditional repeal of the Sherman law,

and we assert that the repeal of that law has utterly failed to accomplish a single beneficent result predicted by the enemies of silver.

DEMOCRATIC.

As a question overshadowing all others which to-day engages the thoughts and affects the welfare of the people of the United States, we are in favor of restoration of silver as money as it existed prior to its covert demonetization in 1873. For this purpose we demand that the mints of the United States be opened to the free coinage of silver as well as gold at the ratio of 16 to 1, without waiting the action of other nations. We declare it our belief that the demonetization of silver is the prime cause of its depreciation, and also of the general stagnation that exists in all branches of industry and trade throughout the United States, and that permanent prosperity can be restored only by the restoration of silver to its former place of money equality with gold. We believe the free coinage of silver will not only revive the drooping industries of the country, but the natural and inevitable result of free coinage will be to enlarge and extend the foreign commerce of the country, particularly with all nations having a like system of currency as our own. We believe that the use of both gold and silver as money will put it beyond the power of any combination of capitalists, whether at home or abroad, to so concentrate money as to be able to raise or depress at will the products of labor throughout the world, a condition not only possible but probable if gold is the only money by which values are measured. We are unalterably opposed to the issuance by the government of the United States of interest-bearing bonds in time of peace, whether the cause or excuse for their issuance be to maintain the gold reserve in the treasury or to defray the current expenses of the government, and we believe this affords an additional reason for the free coinage of silver, as it would do away with the necessity of keeping any fixed amount in reserve for the redemption in coin of treasury notes or other money issued by the United States.

NEBRASKA.

REPUBLICAN.

We pledge ourselves in advance to the platform of the forthcoming republican national convention, believing that it will declare against the free and unlimited coinage of silver, and for a currency of gold, silver and paper "as sound as the government and as untarnished as its honor," and for that American system of protection and reciprocity of which William McKinley is the best living exponent, and under which our people attained the greatest national and individual prosperity.

DEMOCRATIC (FREE SILVER).

We indorse the language used by John G. Carlisle in 1878, when he denounced the conspiracy to destroy silver as a standard money as "the most gigantic crime of this or any other age," and we agree with him in the declaration then made that "the consummation of such a scheme would ultimately entail more misery upon the human race than all the wars, pestilence and famines that have ever occurred in the history of the world."

We are not willing to be parties to such a crime, and in order to undo the wrong already done and to prevent a further rise

in the purchasing power of the dollar we favor the immediate restoration of the free and unlimited coinage of gold and silver at the present legal ratio of 16 to 1, as such coinage existed prior to 1873, without waiting for the aid or consent of any other nation, such gold and silver to be a full legal tender for all debts, public and private.

We are opposed to the retirement of the greenback, and demand that the secretary of the treasury, instead of issuing interest-bearing bonds for the purchase of gold, shall recognize silver as money of redemption and exercise the right to redeem greenbacks, treasury notes and all other coin obligations in silver when silver is more convenient.

DEMOCRATIC (ADMINISTRATION).

We adhere to the time-honored principles of the party as enunciated by Jefferson, expounded by Jackson, Tilden and Cleveland. We believe, with Thomas Jefferson, that the market value of bullion regulates the value of coin, and not its coin value; we accept the teachings of economic science, that under free coinage the cheaper money will always drive out the better money, leaving nothing but the poorer in circulation, and that under unvarying law the adoption of free coinage of silver at 16 to 1 would expel from circulation all the gold and paper money redeemable in gold, and leave the country on a silver basis, with a poorer currency, and much less of it. We believe that common honesty and a just regard for the rights of our creditors, as well as the rights of the wage-earners, require us to use all honorable means to prevent the insertion of a free-coinage plank in the national platform.

We adhere to our previous declaration on this subject, and declare ourselves unequivocally and unreservedly for the metallic money as the standard unit the bullion and mint value of which are approximately the same and the purchasing power of which, regardless of government mintage, is the least fluctuating in all the markets of the world.

We insist upon this policy as especially necessary for the protection of the farmers, laborers and property-owning debtors, the most defenseless victims of unstable and fluctuating currency.

We are in favor of the retirement of the forced loans of the United States government, made in the exigencies of war, and of the government going out of the banking business at the earliest practicable moment, and the establishment of our currency and banking upon some basis that will give stability to our paper money and security to depositors.

POPULIST.

We demand a national currency, safe, sound and flexible, issued by the general government only, a full legal tender for all debts, public and private, and that without the use of corporations; that a just, equitable and efficient means of distribution direct to the people, at a tax not to exceed 2 per cent per annum, to be provided as set forth in the sub-treasury plan of the Farmers' alliance, or some better system; also by payments in discharge of its obligations for public improvements.

We demand the free and unlimited coinage of silver and gold at the present legal ratio of 16 to 1.

We demand that the amount of circula-

ting medium be speedily increased to not less than \$50 per capita.

PROHIBITION.

The money of the country should be issued by the general government only, through government banks of loan and deposit, directly to the people, upon adequate security and at a uniform rate of interest. It should be full legal tender for the payment of all debts, public and private, without exception in favor of contract stipulation.

We favor money composed of legal-tender treasury notes, based upon the credit of the nation, and the free and unlimited coinage of silver at the ratio of 16 to 1, in which the bonded indebtedness of the country shall be paid.

NEVADA.

REPUBLICAN.

We again reiterate our steadfast devotion to the cause of the free and unlimited coinage of silver, and declare that in our judgment the restoration of the true bimetallic standard of value as it existed previous to the year 1873—namely, at the ratio of 16 to 1—is an absolute and indispensable requirement before the financial system of our government will afford the people a volume of stable circulating money sufficient to place the business of the country on a permanently prosperous basis.

DEMOCRATIC.

We most emphatically declare for the free and unlimited coinage and use of silver and gold as money at the established ratio of 16 to 1, without asking permission or waiting for the co-operation of any foreign government, each to be receivable for all public dues and to be a full legal tender in payment for all debts, public and private. This result, we are confident, can only be secured through the direct instrumentality of the national democratic party. Metallic money has ever been a cardinal principle of the democracy, and with the democracy rests the only hope for the restoration of silver to its former position in the currency volume of the nation, from which it was displaced by a republican congress and president in 1873.

NEW HAMPSHIRE.

REPUBLICAN.

After congratulating the country "upon the near approach of an opportunity for release from democratic misrule," the platform demands, among other things, "the enactment of currency laws that will provide a circulating medium in gold, silver and paper which will always be interchangeable at its face value, because each and every dollar of it is of the same purchasing power as a gold dollar."

DEMOCRATIC.

Under present conditions there can be but one standard of value, and every kind of currency should rest upon a gold basis, so long as gold is the standard recognized by the great commercial nations of the world; and we heartily commend the action of President Cleveland in so firmly maintaining our public credit and faith in the face of formidable opposition.

NEW JERSEY.

REPUBLICAN.

The standard of value in this country and in the other principal commercial nations of the world is gold. Wages and prices

have been made and fixed in accordance with this standard, and the welfare of the people demands that it shall be maintained.

We regard the agitation of the free coinage of silver as a serious obstacle to our country's prosperity.

DEMOCRATIC.

We are in favor of a firm, unvarying maintenance of the present gold standard. We are opposed to the free coinage of silver at any ratio and to the compulsory purchase of silver bullion by the government.

We believe that the interests of the people demand that the earnings of trade, agriculture, manufacture and commerce, and especially the wages of labor, should be paid in money of the greatest intrinsic value and of the highest standard adopted by the civilized nations of the world. We are, therefore, unalterably opposed to all devices and schemes for the debasement of our currency.

We believe that the federal government should be divorced from the business of banking. We, therefore, demand the repeal of all laws authorizing the issue or reissue of legal-tender or treasury notes by the government. They should form no part of the currency of the people. We favor the enactment by congress of such legislation as will insure a banking currency ample in volume for all the needs of business, absolutely secure in every contingency and at all times redeemable in gold.

POPULIST.

The people's party of New Jersey, in convention assembled at Trenton, Memorial day, 1896, relying upon the common sense of the people, the justice of its principles and the imperative necessity for their adoption, hereby reaffirms its allegiance to the principles of the party as set forth in the second declaration of independence—the platform adopted at Omaha July 4, 1892.

[This favors the free coinage of silver at the ratio of 16 to 1.]

NEW YORK.

REPUBLICAN.

The agitation for the free coinage of silver at the ratio of 16 to 1 seriously disturbs all industrial interests and calls for a clear statement of the republican party's attitude upon this question, to the end that the trade of this country, at home and abroad, may again be placed upon a sound and stable foundation.

We recognize in the movement for the free coinage of silver an attempt to degrade the long-established standard of our monetary system, and hence a blow to public and private credit, at once costly to the national government and harmful to our domestic and foreign commerce.

Until there is a prospect of international agreement as to silver coinage, and while gold remains the standard of the United States and of the civilized world, the republican party of New York declares itself in favor of the firm and honorable maintenance of that standard.

DEMOCRATIC.

Gold and silver, the money of the constitution and of our fathers, each at a parity with the other in purchasing power, has been the platform of principles proclaimed by every national democratic convention, which has thus adopted and reaffirmed in each declaration of party faith for a century the wisdom of Thomas Jefferson, who said: "The monetary unit must stand on both metals."

The action of a republican congress and a republican president deprived silver of its equality with gold for the money and currency of the nation. From this act, for which the democratic party was in nowise responsible, and from the action of other nations following in the same course, it has resulted that silver has greatly declined in commercial value and there now exists a wide departure of the two metals from the coinage standard of value, bringing disturbance to the financial system of European countries as well as to our own, and awakening there, as here, the earnest apprehension of statesmen and financiers. The restoration of the equilibrium of the two metals thus disturbed is a problem the solution of which is of the greatest consequence to the prosperity of both this country and of Europe, but is wholly beyond our power without the co-operation of other nations. Such co-operation by the united efforts of statesmen and wage-earners here and elsewhere is believed to be near at hand and to be possible to secure by earnest and well-directed efforts.

Free coinage of silver by the United States alone can have no other effect than to change our present standard to one of silver—now a depreciated coin—and to retard, perhaps destroy forever, the success of the movement, now general throughout civilized countries, for the restoration of free bimetallic coinage in the principal mints of the world. The proposition to separate ourselves from the great nations of the world and adopt the monetary standard of Mexico and China does not comport with the pride and financial dignity of the state of New York or the United States. It should be resisted with the fervor of both partisanship and patriotism by democrats everywhere when the adoption of such a course threatens, as it does, untold evils to our nation's commerce and industry.

For these reasons and with these convictions the democrats of New York, in convention assembled, make the following declaration of their principles and appeal to the democrats of other states to join with them in incorporating these principles in the party platform to be adopted at Chicago.

1. We favor gold and silver as the standard money of the country. We are opposed as a permanent financial policy to gold monometallism on one hand or to silver monometallism on the other hand. The pledge contained in the repeal of the Sherman act, which repeal was passed by a democratic congress and approved by a democratic president, should be faithfully carried out, wherein it was declared that "the efforts of the government should be steadily directed to the establishment of such a safe system of bimetalism as will maintain at all times the equal power of every dollar coined or issued by the United States in the markets and in the payment of debts." We believe that such bimetalism, to which the nation is solemnly pledged, can only be secured and permanently maintained through the concurrent action of the leading nations of the world. Neither this country nor any other country, independent and alone, is able to maintain it, and it would be folly to attempt it. Being so convinced, we are opposed to the free and unlimited coinage of silver in the absence of the co-operation of other great nations. We declare our belief that any attempt on the part of the United States alone to enter upon the experiment of free silver coinage would not only prove disastrous to our finances but would retard or entirely pre-

vent the establishment of international bimetalism. Until international co-operation for bimetalism can be secured, to which end all our efforts as a government and as a people should be in good faith directed, we favor the rigid maintenance of the present gold standard as essential to the preservation of our national credit, the redemption of our public pledges and the keeping inviolate of our country's honor. We insist that all our paper and silver currency shall be kept absolutely at a parity with gold.

2. The democratic party has ever been and still is the hard-money party, and it will preserve that record. It is opposed to legal-tender paper money as a part of our permanent financial system, and it refuses to sanction any paper currency inconvertible with coin. The United States notes and treasury notes, being in fact debts of the government, should be gradually paid off, retired and canceled. This should and must be done in such a manner as to cause no contraction of the circulating money of the country. So long as they exist, however, and are permitted to circulate as money they should be redeemable at all times upon demand in the standard money of the country. The democratic party is pledged to the resolute maintenance of the public credit at all times and under all circumstances, and it is therefore opposed to the repeal of any existing statute which enables the secretary of the treasury, by the issue of bonds or otherwise, to provide an adequate fund for the redemption in gold of our paper obligations whenever necessary.

NORTH CAROLINA.

REPUBLICAN.

We favor the use of gold and silver as standard money and the restoration of silver to its functions and dignity as a money metal. We are opposed to the retiring of the greenbacks, the money of the people, the money favored by Lincoln. We are opposed to the issue of interest-bearing bonds in the time of peace and we condemn the policy of President Cleveland and Secretary Carlisle in secretly making the sale of government bonds to a foreign syndicate on such terms as to enable it to realize the enormous profit of \$10,000,000 at the expense of the people.

DEMOCRATIC.

The constitution of the United States recognizes both gold and silver as the primary or redemption money of these states, and in the words of the national democratic platform of 1884, "we believe in honest money, the gold and silver coinage of the constitution and a circulating medium convertible into such money without loss."

We favor, independently of other nations, the free and unlimited coinage of silver and gold, without discriminating against either, at the present legal ratio of 16 to 1, and we condemn the system which in a time of peace, with millions of silver bullion lying idle in the treasury, has forced the government within the short space of two years to issue \$262,000,000 of bonds, entailing this enormous debt upon the people, in order to maintain its credit upon a single standard and a gold basis.

NORTH DAKOTA.

REPUBLICAN.

The republicans of North Dakota are unwilling in their demand for honest money. We are unalterably opposed to any scheme that will give to the country a depreciated

or debased currency. We favor the use of silver as currency, but to the extent only and under such restrictions that its parity with gold can be maintained. We are therefore opposed to the free and unlimited coinage of silver until it can be arranged by international agreement.

DEMOCRATIC.

The constant decline in the prices of all commodities as measured by a single gold standard is conclusive evidence of the fallacy of the republican doctrine of monometallism. We denounce the demonetization of silver in the year 1873 by a republican congress as a political crime unequalled in the history of this nation, and we demand such legislation as shall restore silver to its time-honored place as a money metal, admitting both gold and silver to free and unlimited coinage upon the ratio of 16 to 1.

PEOPLE'S.

Resolved, That we firmly believe in the principles of the people's party adopted in our national platform of 1892.

2. In view of the present depressed condition of the business interests of this country and the absolute necessity of immediate relief for the people, that the issue involved in this campaign is not a contest for party supremacy but an issue thrust upon us by the money power looking to the further enslavement of the people.

Resolved, That we concentrate all our energies on the restoration of silver to its constitutional position as a money metal and urge our delegates to the St. Louis convention to adopt all honorable means of securing a union of all free-coinage forces upon that issue.

OHIO.

REPUBLICAN.

We contend for honest money, for a currency of gold, silver and paper with which to measure our exchange that shall be as sound as the government and as untarnished as its honor, and to that end we favor bimetalism and demand the use of both gold and silver as standard money, either in accordance with a ratio to be fixed by an international agreement, if that can be obtained, or under such restrictions and such provisions to be determined by legislation as will secure the maintenance of the parities of values of the two metals, so that the purchasing and debt-paying power of the dollar, whether of silver, gold or paper, shall be at all times equal.

DEMOCRATIC.

We, the democrats of Ohio, in convention assembled, hold that the money question is the vital and paramount issue now before the people of this country and that its early and correct settlement is necessary to the revival of business and the return of prosperity; therefore

Resolved, That we are unalterably opposed to the single gold standard and demand an immediate return to the constitutional money of gold and silver by the restoration by this government, and independent of other nations, of the unrestricted coinage of both gold and silver into standard money at the ratio of 16 to 1, and upon the terms of exact equality existing prior to 1873; such silver coin to be a full legal tender, equally with gold coin, for all debts and dues, public and private.

PROHIBITION.

Money, whether gold, silver or paper, should be issued by the national government

only, through government banks of loan and deposit, upon adequate security and at a uniform rate of interest, the amount so issued to be regulated by the demand and the ability to furnish the required security. It should be full legal tender, and the making of contracts repudiating this quality should be prohibited. Government obligations payable in coin should be paid as contracted in gold or silver, at the convenience of the government. There should be free coinage of gold and silver at the ratio of 16 to 1.

OREGON.

REPUBLICAN.

The American people, from tradition and interest, favor bimetalism, and the republican party demands the use of both gold and silver as standard money, with such restrictions and under such provisions, to be determined by legislation, as will secure the maintenance of the parity of values of the metals so that the purchasing and debt-paying power of the dollar, whether of silver, gold or paper, shall be at all times equal. The interests of the producers of the country—its farmers and its workmen—demand that every dollar, paper or coin issued by the government shall be as good as any other dollar.

DEMOCRATIC.

The present depressed condition of the country and shrinkage of values are largely due to the financial system which has controlled the nation for more than twenty years past. We hereby declare ourselves as unalterably opposed to a single gold standard and demand immediate return to the constitutional standard of gold and silver by the restoration by the general government, independently of any foreign power, of unrestricted coinage of both gold and silver into standard money at the ratio of 16 to 1 and upon terms of exact equality, as they existed prior to 1873, the silver coin to be full legal tender equally with gold for all debts and dues, public and private, and we denounce all discrimination by the government against either gold or silver currency of the country.

We demand that the secretary of the treasury shall coin into standard silver dollars, as soon as practicable, all silver bullion now in the treasury of the United States which represents silver seigniorage or coinage profit to the government, and also all silver bullion that may hereafter be offered for coinage. We instruct our delegates elected to represent us in the national convention to support a candidate in favor of the free and unlimited coinage of silver at the ratio of 16 to 1.

PENNSYLVANIA.

REPUBLICAN.

The republican party has always maintained the national honor and credit. It forced the resumption of specie payment. It kept faith as to every debt created for the preservation of the union and has paid the greater part of it in accordance with the spirit and letter of the laws under which it had been contracted. It largely reduced the interest charges upon the balance of the debt by refunding at lower rates. It substituted for the fluctuating and inadequately secured notes of the state banks a uniform national currency of stable value and of equal purchasing and debt-paying power. Faithful to its record, believing that the people are entitled to the use of the best money, and anxious to restore and preserve

the industrial and commercial prosperity of the union, the republican party favors international bimetalism, and until that can be established upon government account it demands the maintenance of the existing gold standard of value.

DEMOCRATIC.

We are in favor of a firm, unvarying maintenance of the gold standard. While we favor the most liberal use of silver consistent with the enforcement of a gold standard, we are absolutely opposed to the free coinage of silver and to the compulsory purchase of silver bullion by the government. We believe that the interests of the people demand that the earnings of trade, agriculture, manufactures and commerce, and especially the wages of labor, should be paid in money of the greatest intrinsic value and of the highest standard adopted by the civilized nations of the world. We are therefore unalterably opposed to all devices and schemes for the debasement of our currency and to all evasions and compromises of a question so closely affecting individual and national credit and honor.

PROHIBITION.

The currency of the nation should be issued by the general government without the intervention of individuals or corporations, and should consist of treasury notes which shall be legal tender for the payment of all debts and redeemable in gold and silver bullion at the market value.

RHODE ISLAND.

REPUBLICAN.

The republicans of Rhode Island are inflexibly opposed to the free and unlimited coinage of silver, and they believe the continued agitation of what is called the silver question to be unpatriotic and destructive of all the interests of industry and commerce.

The existing gold standard is the measure of value adopted by the nations with which the United States has the most important commercial relations, and the very suggestion of a departure from it inflicts injury to the credit of the nation, whose honor should never be questioned at home or abroad.

To those who toil for their daily bread a currency redeemable in and of equal value with gold is essential. While the capitalist may protect himself against the fluctuations even of silver, the laborer and the artisan, the salaried official and the widow, are powerless to guard against the changing values of a currency which a great and beneficent government should make absolutely secure and unchanging in its purchasing power.

DEMOCRATIC.

Believing that the true interests of the people require that the earnings of trade and the wages of labor be paid in money that is intrinsically worth, in all the markets of the world, what it purports to be worth, we demand the maintenance of the existing gold standard of value, and that the government shall keep all its obligations at all times redeemable and payable in gold; and we oppose the free coinage of silver and any further purchases of silver bullion or the coinage thereof on government account.

SOUTH CAROLINA.

REPUBLICAN (LILY WHITE).

We are in favor of maintaining the present monetary standards until some satisfactory ratio between the hard-money metals can be reached by international agreement.

REPUBLICAN (REGULAR).

We stand with our party in the reiteration of its demand for "both gold and silver as standard money." We believe that legislation should secure and maintain the parity of values of the two metals, to the end that the purchasing and debt-paying power of the American dollar—silver, gold and paper—shall be the same any and every where. We believe that bimetalism alone can secure this result.

DEMOCRATIC.

A sound and just system of finance is the most potent factor in the nation's prosperity, and we demand the restoration of the money of the constitution by giving silver the same rights and privileges now given to gold. We demand the free and unlimited coinage of silver at a ratio of 16 to 1, regardless of the action of any and all other nations, and that such coinage be a legal tender for all debts, public and private. Congress alone has the power to coin and issue money, and President Jackson declared that this power could not be delegated to a corporation. Therefore we demand that the national banking system be abolished. The absorption of wealth by a few, the consolidation of our leading railroad systems and the formation of trusts and pools require a stricter control by the federal government of those arteries of commerce. We demand the enlargement of the powers of the interstate commerce commission and its constitutional restrictions and guaranties which will protect the people from robbery and oppression.

SOUTH DAKOTA.

REPUBLICAN.

Whereas, There is a diversity of opinion among the republicans of the state upon the financial question, and whereas, we have perfect confidence in the wisdom and patriotism of the republican party that shall assemble at St. Louis next June, that it will consider and adopt a platform broad enough and strong enough for every republican to stand upon, therefore we reaffirm our devotion and loyalty to the platform adopted at Minneapolis in 1892 and adopt it as our platform until the national convention shall give us another.

DEMOCRATIC.

The democratic party of South Dakota is in favor of the present standard value of our monetary system and the use of full legal-tender silver coins and paper convertible into coin on demand in such quantities as can be maintained without impairing or endangering the credit of the government or diminishing the purchasing or debt-paying power of the money in the hands of the people.

POPULIST.

The government should provide for the free and unlimited coinage of silver and gold at a ratio of 16 to 1, and independent of any other nation on earth, and in addition should provide for a full legal-tender national currency, safe, sound and flexible, issued without the use of banking corporations and in sufficient volume to do the business of the country on a cash basis.

The government should provide postal savings banks for the safe deposit of the savings of the people.

TENNESSEE.

REPUBLICAN.

We are unalterably opposed to any scheme that will give to this country a depreciated

and debased currency. We favor the use of silver as currency, but to the extent only that its parity with gold will be maintained, and in consequence are opposed to a free and unlimited and independent coinage of silver at a ratio of 16 to 1. We believe that every American dollar should be an honest 100-cent dollar always and everywhere.

DEMOCRATIC.

We hold that it is the high duty and honor of the democratic party to call back the government to the old paths, to restore it to its pristine purity and virtue and to root out all the pernicious influences that have corrupted its legislation and the administration of its laws. As a first and most necessary step to this end we demand the restoration of the money of the constitution by a law providing for the free and unlimited coinage of both gold and silver at the ratio of 16 to 1, regardless of the action of any other nation.

We demand the enactment of laws, both state and national, making both gold and silver legal tender for all debts and prohibiting in contracts thereafter made any discrimination for or against either.

We oppose the increase of the public debt by the issuance of interest-bearing bonds to sustain the gold standard.

We demand that all obligations of the United States shall be honestly discharged according to the terms of the contract in either gold or silver, at the option and convenience of the government, and not in gold alone, at the option of the creditor.

We demand the repeal of the unconstitutional 10 per cent tax on the issues of state banks, and the abolition at the earliest possible time of the national banking system.

TEXAS.

REPUBLICAN (REGULAR).

We reaffirm the historic adherence of the republican party to sound finance. We demand an honest dollar of greatest purchasing power for every class alike; the largest issue of gold, silver and paper compatible with security and the requirements of trade, all of equal value, interchangeable one for the other, every dollar resting on gold as money of final redemption. The republicans of Texas declare this to be, in their deliberate judgment, the only basis for a large and liberal circulation of money and for the maintenance of universal confidence.

REPUBLICAN (JILLY WHITE).

We favor bimetalism—I. e., the use of gold and silver coin as money of ultimate redemption.

DEMOCRATIC (GOLD-STANDARD WING).

Holding it to be as impossible for man to measure value by more than one standard as it is to so measure any other quantity, and being firmly convinced that a change in the standard for the measure of value at this time would result in a financial panic to which the history of the world furnishes no parallel, and believing that every government owes it to its own honor and to its citizens that it shall so order its laws as to require all debts to be paid in money as nearly as possible equal in value to the money in circulation at the time of the creation of the debt, we declare that it is the duty of the United States to maintain the present single gold standard of the measure of value, to the end that justice

shall be done to all men and the honor of the nation preserved. We believe in the use of silver as current money and the coinage and circulation of such amount thereof as can be kept at a parity with gold, but we oppose the free and unlimited coinage of silver by this government alone as a measure borrowed from populism and fraud, if successful, with dishonor and disgrace to the nation and destruction to the people. We believe that the issue of the greenbacks by a republican congress under the imperious exigencies of a great civil war, and which were then declared to be a temporary expedient, and their retention in circulation by subsequent congressional action, have contributed to miseducate the public mind upon questions of finance more than all other causes combined. It has miseducated our people as to the proper financial functions of the government and has tended to the propagation of fatistic ideas now so current in the land. It has misled many of our people into the belief that the government can create values with its stamp, and their constant redemption and reissuance has more than once nearly bankrupted our treasury and enabled the money-changers to rob the people. We demand the immediate retirement of this government from the banking business and that the law authorizing the reissuance of the treasury notes shall be repealed and such promises be retired and canceled. We favor the establishment of a safe system of banking under rigid governmental supervision in order that the people of this country may have at all times a sound, safe and elastic currency amply sufficient for the transaction of their business.

DEMOCRATIC (FREE-COINAGE WING).

We favor the free and unlimited coinage of gold and silver into standard money without discrimination against either, and at the ratio of 16 to 1, which standard money shall be legal tender for all debts, public and private, and we further demand that the money of the country shall consist of gold and silver thus coined, and of paper convertible into these coins on demand of the holder; and in this connection we demand that the practice of the treasury department of refusing to pay coin notes in silver the same as in gold shall be discontinued, because the same is an unwarranted use of power, which results in making the federal treasury but a brokerage office for speculation in gold.

We demand that a law shall be enacted by the federal congress making gold and silver coined at the ratio heretofore mentioned, and the paper convertible into such coin on the demand of the holder of such notes, legal tender for all debts, public and private, thereafter contracted, without reference to any contract or agreement that the debt shall be paid in some particular kind of money, reserving alone to the federal government the right to designate the kind of money in which customs and dues may be paid.

We are opposed to the cancellation and retirement of the legal-tender notes of the government, which serve all the purposes of money to the government and the people at the least expense at which currency can be supplied.

We oppose national banks of issue for the reason that the issuance of paper currency is a function of the government which should not be farmed out to any individual, either natural or artificial.

UTAH.

REPUBLICAN.

We believe in a protective tariff; we believe in reciprocity; we believe in bimetallism, which is the full recognition alike of gold and silver and their free coinage in the mints of the nation at the ratio of 16 to 1.

We contemplate with sorrow and shame the spectacle which our country presents to-day because of the attempt to substitute for a protective tariff a tariff for revenue, and because of the destruction of silver as money of final redemption.

We hold that a policy which has filled the land with idle men, which takes from labor its honest reward, which doubles the burden of debt, which amid bountiful harvests, in a time of profound peace, makes necessary the issuing of hundreds of millions of dollars' worth of interest-bearing bonds in order to meet the current expenses of the government, is an impeachment of both the intelligence and integrity of those who control our government.

We ask our delegates to St. Louis to do their utmost to secure in the national republican platform a full acknowledgment of the imperative need of a return to real bimetallism and a promise of its swift adoption, without regard to other nations, by opening our mints to the free coinage of gold and silver at a ratio of 16 to 1.

DEMOCRATIC.

The democratic party of Utah, in convention assembled, reposing its trust in the honesty, intelligence and patriotism of the people—standing upon the great essential principles of justice and liberty on which our institutions are founded—while reaffirming its devotion to those principles as declared from time to time in the party platform, and especially those principles announced by the democrats of Utah in the reassembled convention of 1895, now believing that the restoration of the money of the constitution is of paramount importance, declares in favor of the immediate restoration of the free and unlimited coinage of gold and silver at the present legal ratio of 16 to 1, as such coinage existed prior to 1873, regardless of the action or policy of other nations; gold and silver coin to be full legal tender for all debts, public and private.

VERMONT.

REPUBLICAN.

The republicans of Vermont are unalterably opposed to any scheme to give the country a depreciated or debased currency. We are, therefore, opposed to the free coinage of silver, except by international agreement, and, until re-established, we believe the present monetary standard should be honorably maintained. The continued agitation for the free coinage of silver retards the return of confidence and prosperity, stands in the way of beneficial legislation and is in every respect harmful to the best interests of the whole country. The credit of the government should be sustained, not by issues of bonds and increase of the national debt, but by a system of duties which shall at once replenish the public treasury, put in motion the now silent wheels of business and insure living prices to the products of American farms and workshops.

DEMOCRATIC.

We demand the maintenance of a gold standard of value as being for the true in-

terest of all our people, and especially of those who are obliged to labor for what they receive, and we are opposed to the free coinage of silver except under international agreement.

VIRGINIA.

DEMOCRATIC.

We are for sound money, the soundest that the world has ever had or can have, the money of our constitution, the money of the people, the money of civilization through the ages past, and destined to be such, as we believe, for ages to come. This sound money should consist of silver and gold, and of paper redeemable in silver or gold at the option of the payer, the units of the whole mass to be kept at parity by coinage rights and equal legal-tender function, the only method by which the parity of the two metals has been continuously and successfully maintained.

We hold to the use of both gold and silver as the standard money of the country and to the coinage of both gold and silver without discriminating against either metal or charge for mintage. The immediate and complete restoration of the bimetallism of money which existed in the United States from 1793 to 1873 is, in our opinion, demanded by the interests of commerce, manufactures and agriculture, which are alike suffering from the great fall of prices and the consequent embarrassment and bankruptcy of those engaged therein, and in order so to restore it we demand the full and unlimited coinage of both silver and gold at the ratio of 16 to 1, without waiting for the assent or concurrence of any other nation. It cannot be that this great nation, the foremost of the earth in riches, in power, is unable to form a financial system of its own, and, while we would welcome an international agreement that would settle the vexed question, we are unwilling to defer action or make the interest of our own people dependent upon the course of others.

We warn our countrymen that, until silver be upheld as money of redemption and sustained at parity with gold by equal privileges at the mint and by equal legal-tender function, a further contraction of the currency and the further accumulation of public indebtedness will be inevitable. We have \$4 less per capita in circulation now than we had in November, 1893, when the Sherman law was repealed, and in the present strained condition of our resources, the deficits of revenue and the fall of prices a further contraction of money and accumulating of debt would paralyze business, lower wages and bring upon the country widespread panic and ruin. We hereby instruct all of the delegates from Virginia to the national democratic convention at Chicago to vote for the platform declaring for the free and unlimited coinage of silver and gold at the ratio of 16 to 1, and for candidates for president and vice-president who openly advocate that principle.

WASHINGTON.

REPUBLICAN.

That we favor the maintenance of the present gold standard and are opposed to the free and unlimited coinage of silver at the ratio of 16 to 1. We are, however, favorable to an international agreement looking to the general use of both metals as money at a fixed ratio, and commend the efforts in that behalf of the last republican administration.

DEMOCRATIC.

We demand the free and unlimited coinage of silver at the ratio of 16 to 1, without waiting for the intervention of any other nation.

WEST VIRGINIA.

REPUBLICAN.

We demand a sound-money policy which shall maintain at an equality of purchasing power every dollar of American money. Every American dollar must be worth 100 cents. The monetary system of the United States must be as sound and safe as the soundest and safest in the world.

We favor the largest use of silver consistent with the maintenance of the gold standard.

DEMOCRATIC.

The four delegates-at-large were chosen by district conventions, all adopting free-coinage resolutions. That of the 3d district is a fair exponent of the party belief: We reaffirm the declaration of the constitution and the time-honored doctrine of the democratic party that both gold and silver shall be the standard money of the country. We condemn the destruction of silver as money of final payment, and we deplore its melancholy consequences plainly visible in the injury to trade and the fall in prices and the lamentable depression in values which have continued since 1873. Accordingly, we demand the free and unlimited coinage of both gold and silver at the ratio of 16 to 1, without dependence upon the action of other countries, and we hereby instruct our delegates this day appointed from the 3d congressional district of West Virginia to the national democratic convention at Chicago to vote for a platform declaring for the free coinage of silver and gold at the ratio of 16 to 1 and to vote for and use all honorable means to nominate candidates for president and vice-president who openly advocate that principle.

WISCONSIN.

REPUBLICAN.

The republicans of Wisconsin are unyield-

ing in their demand for honest money. We are unalterably opposed to any policy that will give to this country a depreciated or debased currency. We favor the use of silver as currency to the extent only and under such restrictions that its parity with gold can be maintained.

DEMOCRATIC.

We believe that the demands of a commerce built upon the broad and enlightened doctrine of free trade require a currency that cannot be discredited in any civilized country.

Realizing this logical demand for the best money for international trade; realizing also the dangers of a fiat currency in domestic use, and aware that the present condition of commercial distress calls for the patriotic and sturdy maintenance of national honor and financial integrity, we declare ourselves opposed to the free and unlimited coinage of silver and in favor of gold, the highest monetary standard of the world.

PROHIBITION.

We demand that silver be restored to its position prior to 1873.

WYOMING.

REPUBLICAN.

We reaffirm our allegiance to the principle as enunciated in the republican platform adopted at Casper in 1894 [free silver], and we commend the record of our senators and representative in congress in maintaining this principle, and we instruct our delegates to the St. Louis convention to take like action when the financial plank of the platform of that convention is being made.

DEMOCRATIC.

Whereas, The paramount issue before the American people is the currency question; therefore, be it

Resolved, That we, the democracy of Wyoming, demand the free and unlimited coinage of silver and gold into primary redemption money at the ratio of 16 to 1, without waiting for the action or approval of any other government.

THE TARIFF.

[Where parties are omitted no declaration was made.]

ALABAMA.

REPUBLICAN.

The convention split, the McKinley faction adopting a platform.

We believe in an adjustment of the tariff duties for the two-fold purpose of meeting the requirements of the government and of furnishing reasonable and adequate protection to American industries, to the end that every willing worker throughout this broad land may receive a fair day's wages for a fair day's work.

We also renew our allegiance to the great doctrine fostered by that eminent statesman, James G. Blaine—the doctrine of reciprocity. We therefore favor as a logical and beneficial result of protective-tariff laws mutual trade arrangements with foreign countries that will provide for our farms and workshops a market for their surplus products and at the same time enable us to buy from them under advantageous conditions such articles as they produce and we must have.

PEOPLE'S.

We favor a tariff for revenue, so adjusted as to protect, as far as practicable, the

farmers and the labor in our shops, mines, factories and mills and their products against foreign pauper labor.

ARKANSAS.

REPUBLICAN.

We favor protection to American industries. In 1860 the battle of the republican party was to arrest the spread of slave labor in America; now it is to prevent the increase of ill-paid and degraded free labor in America.

Whatever the next republican tariff law may provide, its rates will measure the difference between American and European conditions and will be fully adequate to protect ourselves from the invasion of our market by oriental products to the injury of American labor, and will in no case be too low to protect and exalt American labor and promote and increase American production.

We are not contending for any particular tariff law or laws or for any special schedules or rates, but for the great principle, the American protective policy, the temporary overthrow of which has brought distress and ruin to every part of our beloved country.

DEMOCRATIC.

We reaffirm the oft-repeated declaration of the democratic party in favor of a tariff for revenue only.

CALIFORNIA.**REPUBLICAN.**

We believe a revision of tariff laws upon the basis of the American protective system to be the foremost of national legislation, and have full confidence in the national convention soon to assemble to deal more fully with this question. We condemn the policy of the democratic party for the last four years, resulting as it has in destroying every barrier to American protection, and charge its policy with the responsibility of degrading labor and impoverishing every interest dear to the American people.

We believe we should live under the banner calculated to give us the most protection in weakness and in strength, which exalts life and promotes human happiness, and that such system rests upon the basis of protective tariff as advocated by William McKinley and James G. Blaine.

POPULIST.

We request our delegates to the national convention to present the following for its consideration: "We favor genuine protection to American labor by the restriction of the immigration of foreign labor and by a true American system of finance which will render justice to labor and industry and restrain the evils of usury; and we demand the creation of a national non-partisan tariff tribunal of experts by congress, which shall be subject to the control of congress, to the end that tariff agitation may be taken out of politics and to the end that tariff schedules shall be so adjusted that the benefit derived therefrom shall result to labor and not to trusts; and we denounce the democratic and republican parties for refusing to properly restrict immigration of foreign labor when having power so to do in congress."

COLORADO.**REPUBLICAN.**

(See coinage and financial plank.)

CONNECTICUT.**REPUBLICAN.**

The republicans of Connecticut reaffirm their belief in the doctrine of protection, with reciprocity, as advocated by James G. Blaine, believing that upon its maintenance depends the development of American industry, the elevation of American labor and the protection of the products of the American farm.

DEMOCRATIC.

The purpose of all taxation is revenue. In establishing a system of tariff taxation for revenue careful consideration should be given to the schedules, with due regard for the cost of raw materials and the interests of labor. We are opposed to any further general revision of the tariff, as tending to unsettle business and deprive labor of employment; and we believe that only such changes should be made, from time to time, as are necessary to provide revenue.

These revenues should be made equal to the expenditures, and should provide a surplus for the payment of the federal debt. Expenditures should be governed by economy and simplicity of administration and should be made with regard to the ability of the people to pay taxes, whether direct or indirect.

DELAWARE.**REPUBLICAN.**

We record our approval of the great and cardinal principles of the republican party—protection to American industry as maintained in the tariff and known as the McKinley law. Under its benign influence we have greatly prospered as a nation.

DEMOCRATIC.

We believe that custom-house taxation should be confined to raising revenue for the needs of the government economically administered, and that privileged classes should not be allowed to levy toll upon the taxes paid by the people. We believe that any attempt to alter the present tariff law in the direction of higher duties would tend to unsettle the business of the country, and that the present tariff will be adequate to the needs of the government and to meet the deficit that was brought about or commenced under the McKinley tariff law, and that the late attempt by the bill passed through a republican house of representatives at the recent session of congress to raise the tariff on articles of necessity, while it would increase the revenue of the favored classes would decrease the income of the treasury.

PROHIBITION.

We advocate the entire elimination of the tariff question from partisan politics and its reference to a non-partisan commission, which, under proper regulations by congress, shall adjust the schedules to the changing conditions of trade, thus freeing the whole subject from political bargaining and commercial distrust and giving greater permanency to the system, greatly to the benefit of the farmer and mechanic as well as the manufacturer and all classes of society.

FLORIDA.**REPUBLICAN.**

Resolved, further, That we favor an adequate protection to American industries, an absolute protection to American citizens and American interests at home and abroad, an increase of our army and navy sufficient to maintain such rights, and the establishment and maintenance of a sound-money currency.

DEMOCRATIC.

We favor a tariff for revenue only, with equal and exact justice to all and special favors to none. We congratulate the democratic party upon its long and successful war waged against all forms of abuses and oppressions, and throughout its long career it has opposed the formation and promotion of all monopolies, syndicates and trusts, holding that the aggregation of capital in the hands of a few is a menace to civil government and a shadow of death to free institutions.

GEORGIA.**REPUBLICAN.**

(See financial plank.)

DEMOCRATIC.

Resolved, That we favor a tariff for revenue only, to pay the debts and expenses of the government economically administered.

IDAHO.**REPUBLICAN.**

Whereas, As the republican party believes in protection to American industry for the sake of protection; and,

Whereas, The history of our legislation has been an unbroken effort to build up the

industrial life of America against the pauper labor of the world, therefore it is with pride and pleasure that we herewith present the people of the state for their indorsement that plank of the republican platform adopted May 16, 1860, in which Abraham Lincoln was chosen the first republican president of the United States.

"Resolved, That while providing revenue for the support of the general government by duties upon imports, sound policy requires such an adjustment of these imports as to encourage the development of the industrial interests of the whole country, and we commend the policy of national exchanges which secures to the workingman liberal wages, to agriculture remunerative prices, to mechanics and manufacturers an adequate reward for their skill, labor and enterprise, and to the nation commercial prosperity and independence"; and,

Whereas, The industrial life of Idaho especially calls for the application of the principles herein enunciated; therefore, be it

Resolved, That we favor such protective duties on lead and wool as will afford that protection to these industries which they were afforded under the provisions of republican legislation; and,

Whereas, We herewith present the first utterance of the republican party under which Abraham Lincoln was elected, we also present for the indorsement of our state the last great utterance of our party as it found expression through the genius of James G. Blaine, the principle of reciprocity, under which the markets of the world shall be opened to our surplus products and our doors be opened to the reception of the necessities of life which we do not produce and which have given to the poor the necessities of the table free of duty, while at the same time giving us an abundant revenue.

ILLINOIS.

REPUBLICAN.

The republican party from the day of Lincoln has been devoted irrevocably to the doctrine of protection to home industries, and we hereby renew and reaffirm our faith in this fundamental principle. We believe in a tariff that will produce revenue sufficient to meet the wants of the government honestly and economically administered and high enough to insure to home labor regular and remunerative employment. We advocate the unrestricted exchange of non-competitive articles. We believe in reciprocity—the reciprocity of James G. Blaine—re-enforced by experience and an earnest wish to extend our foreign commerce to the fullest extent consistent to the control of our own markets in the sale of articles that can be profitably produced at home.

DEMOCRATIC.

We favor a tariff for revenue only, and declare that the government should collect no more taxes than are necessary to defray the expenses of the government, honestly and economically administered.

We are unalterably opposed to the revival of any such monstrosity in legislation as that act of congress which was known as the McKinley law, which for the fiscal year ended June 30, 1894, produced a deficit in the United States treasury of \$70,000,000, under which wages were greatly lowered and which gave proprietors a monopoly, while it permitted them to fill their shops with the cheapest kind of cheap labor brought from all parts of the world.

PROHIBITION.

We deprecate the calamitous results caused by the frequent partisan agitation on the tariff question, and favor a tariff commission, representing all national political parties, as nearly equal as practicable, whose duty it shall be to annually recommend to congress such changes in tariff laws as may be necessary to properly adjust the revenues to the needs of the government and to enable our workmen to receive fair wages for their labor.

INDIANA.

REPUBLICAN.

The republicans of Indiana are in favor of protection: We demand a tariff that will not only secure the necessary amount of revenue but will also afford adequate and certain protection to the wage-workers and producers of this country. We demand that American sellers shall have the first chance in American markets. From Lincoln to Harrison, under a wise policy of protection and reciprocity, we steadily decreased our bonded debt, resumed specie payment, maintained the public credit, kept unimpaired the gold reserve, increased the wealth of the whole country and added to the comfort and happiness of the people to a degree unparalleled in the history of nations. The reversal of this beneficent and patriotic policy by the democratic party has brought to the American people nothing but distrust, deficit and disaster. We, therefore, demand a return to the sound republican policy of protection and reciprocity.

DEMOCRATIC.

(See financial plank.)

PROHIBITION.

We favor the amendment of the national constitution so as to allow equitable taxation on the properties and incomes of the people, and that import duties should only be levied as a means of securing equitable commercial relations with other nations.

IOWA.

REPUBLICAN.

If the dominant issue of this contest is to be the tariff, then no man better represents it than Allison, for no man has been oftener placed in the leadership in the formation of republican tariff than Senator Allison. For thirty-one years he has been among the foremost in their construction and discussion, and always upon the line of that fair and sufficient protection that is the strength of the party policy. He was chairman of the sub-committee that after many months of investigation drafted the administrative provisions of the customs laws, accepted under all tariff bills since constructed as most efficient in their operation. He was chairman of the senate committee that drafted the senate substitute for the democratic bill of 1888, which substitute was largely the basis of the republican tariff of 1890. He had the senate leadership again in the perfection of the last republican tariff, where it received many of its important provisions, notably that of reciprocity. He was again selected by the senate republicans to lead the discussion and assault upon the free-trade Wilson bill, and his skill and influence operated largely in saving whatever measure of protection American industry secured under that law. His arraignment of that law was a protest and a prophecy.

DEMOCRATIC.

Earnestly desiring to promote the best interests of the laboring people, we favor the appointment of a cabinet official, to be known as secretary of labor, whose duty it shall be, in all cases of tariff-protected industries, to investigate, ascertain and report to congress what share, if any, of the enhanced price for which protected products are sold in the markets of this country is paid by employers in these industries to their employes, and to be clothed with full power in all cases where public interests are involved or the public is endangered; to inquire into the merits of the controversies between employers and employes, and recommend the adjustment thereof upon such terms as to him, or arbitrators appointed by him, shall seem just, and, in case of the failure of either party to abide by the recommendation made, to report the facts to congress or state legislature, as the case may require, with recommendations for additional legislation, if such, in his judgment, be necessary, and in the discharge of his several duties to be clothed with further power to compel the giving of testimony under oath by parties interested or otherwise, and the production of all books and papers which, in his judgment, are necessary to a full and impartial determination of the matter committed to his care.

POPULIST.

(Adopted the Omaha platform of 1892.)

PROHIBITION.

We declare the principle of taxation amplified in the income-tax law to be just and beneficent, and we greatly deplore the decision of the United States Supreme court by which that law was declared void. So long as it is necessary to look for national revenue from tariff, we declare for a tariff for revenue that shall meet the expenses of the government, economically administered, but discriminating with a special reference to the protection of our domestic labor.

KANSAS.

REPUBLICAN.

We arraign and condemn the present national democratic administration as unstatesmanlike, un-American and without ability to manage the affairs of government at home or diplomatic intelligence and courage to enforce the rights and maintain the dignity and honor of our country in its foreign relations. It has denied the right of American labor to protection against the pauper and criminal labor of foreign nations; it has failed to provide the means of meeting the expenses of the government with its current income, and changed the republican policy of reducing the public debt to the democratic practice of increasing it; and this, too, in a time of profound peace.

DEMOCRATIC.

Resolved, That we commend President Cleveland for the gallant fight he has made for tariff reform.

KENTUCKY.

REPUBLICAN.

We favor a tariff so regulated as to protect the interests of all classes of our citizens upon articles which may be successfully manufactured or produced in this country, thus insuring good wages to the laborer and a home market for the producers, and in this connection we favor the re-establishment of the doctrine of reciprocity. We believe that such a system will

defray every governmental expense, gradually liquidate all indebtedness, restore confidence, put into motion every wheel of industry, rekindle the fires in our furnaces, re-establish the markets for the products of our farmers and relieve the undue excitement now prevailing over the country.

We believe in an American policy which will protect Americans and American interests in all parts of the world and will maintain the doctrine of non-interference in American affairs by the monarchies of the east.

DEMOCRATIC.

We declare it to be a fundamental principle of democracy that the federal government has no constitutional power to impose and collect tariff duties except for the purpose of revenue only, and the collection of such taxes should be limited to the necessities of the government, honestly and economically administered.

PROHIBITION.

Tariff should be levied only as a defense against foreign governments which levy tariff upon or bar out our products from their markets, revenue being incidental. The residue of means necessary to an economical administration of the government should be raised by levying the burden on what the people possess instead of upon what they consume.

LOUISIANA.

REPUBLICAN.

We believe and declare that the prosperity of this great republic is dependent upon the protection of all American industries.

DEMOCRATIC.

The people are entitled to an honest and economical administration of the revenues, and that we adhere to the invariable democratic policy of raising the necessary revenue with incidental protection, and that in levying tariff duties we demand that fair and impartial consideration shall be given to the interests and industries of the various sections of the country and the different classes of the people, to the end that the agricultural, mining, lumber and other interests, as well as manufacturing, shall receive their full share of any benefits following the levying of any tariff duties for revenue. We, therefore, specially urge that sugar, rice and lumber, as a part of Louisiana industry, be included in any tariff schedule that may be adopted by the general government.

MAINE.

REPUBLICAN.

Under his [Reed] administration, as his public efforts conspicuously show, we believe the republican doctrine of protection taught by Lincoln, illustrated by the signal prosperity of the country for thirty years, and surrounded by the reciprocity of Blaine, a policy would be given which would be adapted to the business of the country and adjusted with care from time to time to the changed conditions. Then, with confidence and prosperity restored, revenue will be made adequate to the support of the government, and the issuing of bonds, ostensibly for the maintenance of the redemption fund, but really to meet the deficiency, will cease.

DEMOCRATIC.

During the years of high protection American shipping in the foreign trade has fallen off from 2,496,844 to 822,347 tons, a decline of two-thirds, during which period the value

of our foreign commerce has trebled. During the thirty-five years the democratic policy advocated by Thomas Jefferson was in force American tonnage in the foreign trade increased seven-fold and carried 90 per cent of our commerce, whereas but 11 per cent of that commerce is carried in American ships to-day. We, therefore, denounce the republican policy of American shipping and favor a return to the policy of Jefferson, to the end that American ships may once more carry American commerce.

MARYLAND.

REPUBLICAN.

We reiterate our allegiance to the principles of the national republican party; we declare for protection to American industries, believing that only in protection can prosperity again come to this nation.

We are in favor of reciprocity as tending to build up our commerce with our South American neighbors.

DEMOCRATIC.

Our position upon the question of tariff reform is so well and thoroughly known that nothing more is needed from us on this subject than a clear declaration of our steadfast belief in this article of our political faith, as set forth in the Chicago platform of 1892, leaving to the coming national democratic convention such further declaration upon this important subject as its wisdom shall deem proper, and contenting ourselves with the expression of our satisfaction that under the vigorous administration of President Cleveland, who has at all times courageously maintained the public credit, and by the patriotic and judicious action of a democratic congress the country has been extricated from so many of the evils put upon it by the ill-advised and disastrous policy of the republicans.

MASSACHUSETTS.

REPUBLICAN.

We believe that the government should have an ample revenue, with a sufficient surplus over ordinary expenditures to provide for coast defenses, for the steady building up of the navy, and for the constant reduction of the public debt.

We believe that the present tariff, with its lowered rates and its destructive and dishonest system of undervaluations, should be displaced by one framed on protective principles and arranged to give an ample protection to American wages and American industry and to restore the reciprocity policy of James G. Blaine.

We have always given protection to our ship-builders. In late years we have neglected to protect our ship-owners. We believe the time has come to return to the policy of Washington and Hamilton, which, by discriminating duties in favor of American bottoms, secured 90 per cent of our carrying trade to American ships, and which, if now restored, would again revive our shipping and cause American freights to be paid to Americans.

DEMOCRATIC.

We recognize the benefit that has resulted to our manufacturers and to the people of the country by the admission of wool and certain other raw materials free of duty.

We believe the country would enjoy a much larger measure of prosperity if all raw material used in our manufactures were admitted free.

MICHIGAN.

REPUBLICAN.

We believe in a tariff duty on foreign importations producing sufficient revenue for the support of the government, and so adjusted as to give protection to American industries and American labor, now depressed to an unparalleled degree by threatened and partially accomplished free trade; and to that end we ask the immediate repeal of the present unwise and un-American tariff act, and the re-enactment of a tariff law along the general lines of the last republican tariff act known as the McKinley law, with whatever modification the present condition of our industries may require. We believe that this is the only way in which the clouds of business depression can be removed and permanent and sound business prosperity be restored.

We believe in the principle of reciprocity as instituted and fostered by America's beloved statesman, James G. Blaine, and therefore demand its restoration as a wise and necessary supplement to a protective tariff.

MINNESOTA.

REPUBLICAN.

The republicans of Minnesota, in convention assembled, rejoice in the near approach of the day when, with the restoration of the republican party to power in all branches of the government, will return the prosperity which terminated in 1892. In the language of him whose memory is enshrined in the heart of every republican, we are in favor of a "tariff duty on foreign importations producing sufficient revenue for the support of the government, and so adjusted as to protect American industries." We demand the restoration of the principle of reciprocity as a national policy, and favor as the logical correlative of our protective tariff laws such treaty stipulations with foreign countries as will provide a profitable market for our surplus products and enable us to buy from them on terms mutually advantageous.

DEMOCRATIC.

We maintain our allegiance to the cause of tariff reform, and are uncompromisingly opposed to any change in our tariff laws that will tend to reintrench the cause of protection. Our motto is, "No step backward."

PROHIBITION.

We favor the adoption of a platform by the national convention which shall express the advanced views of the party, not only upon the prohibition question, but also upon other current issues, especially those upon which the party has heretofore declared its position—especially labor, monopoly, transportation and suffrage.

MISSISSIPPI.

REPUBLICAN.

We believe in protection to American labor and American laborers; in enlarging and developing home industries by the wise adjustment of a protective tariff; in a tariff high enough to discriminate in favor of our own people as against the people of any other country; in such a tariff and reciprocity as will produce revenue sufficient to meet all the expenses of the government, economically but not niggardly administered; in such a tariff as will insure to America and Americans the home market, and a fair division in the markets of the world.

MISSOURI. REPUBLICAN.

We steadfastly adhere to the American doctrine of protection. It is now recognized as the one dominant, masterful principle that will bring prosperity to the country. Under a democratic tariff our industries are languishing. Labor is forced to idleness. Capital is without a field for investment and our home market has been largely destroyed. We demand such duties on all imported commodities the like of which are produced by our own people as will give American labor and American capital the advantage in our own markets over foreign products of like kind. Such duties shall be sufficient to cover the distance between American wages and wages in foreign countries, and, excepting luxuries, all imported commodities the like of which cannot be successfully produced in this country shall be on the free list.

We demand a return to the sound republican policy of protection and reciprocity. Under the doctrine of reciprocity as advocated by Blaine, enforced by Harrison's administration, our export trade was vastly increased and new and large markets were opened for our farm products. The repeal of that law by the democratic congress has closed the markets of many foreign countries to a large portion of American products.

DEMOCRATIC.

We denounce as un-American and undemocratic the system of taxation on consumption only, advocated by the republican party. We declare it to be a fundamental principle of the democratic party that the federal government has no constitutional power to impose and collect tariff duties except for the purpose of revenue, and demand that the collection of such taxes shall be limited to the necessities of the government when honestly and economically administered.

MONTANA.

REPUBLICAN.

We maintain that while the protective-tariff policy is indispensable as a means of equalizing wages and the cost of living, it will not in and of itself suffice to meet the difference in exchange which gives a bounty of about 100 per cent to the silver-using countries, and that the disparagement of silver will constantly place American competition at the ruinous disadvantage of 100 per cent in favor of the countries using silver at par.

DEMOCRATIC.

We declare it as an elementary and time-honored principle of the democratic party that the only legitimate purpose of taxation should be to raise sufficient revenue for the support of government, economically administered. Anything taken beyond this is foreign to the end for which government was created. A tariff is none the less a tax because paid indirectly by the consumer; and when imposed for protection it taxes those industries which are natural, for the benefit of those which are fostered and stimulated, and takes from the many to enrich the few. All tariff legislation should guard against such duties as will lead to the formation of trusts and monopolies, thereby enhancing the cost of commodities without adding to the public revenue. In the imposition of taxes, whether by duties on imports or otherwise, the burden should be as nearly as possible equally distributed between all sections and all industries, and if indirect ben-

efits thereby accrue, such benefits should likewise be equally shared. A tariff based on a contrary principle is unequal, and hence unjust.

The agricultural pursuits of the south and west, the mining industry of the Rocky mountain region, the wool-growing industry, common to many parts of the country, should receive the same favorable consideration as the manufacturing industry of the eastern states.

NEBRASKA.

REPUBLICAN.

We assert that the republican party stands for American markets for American products; the governmental supervision and control of transportation lines and rates; the protection of the people from all unlawful combination and unjust exaction of aggregated capital and corporate power, and a pension policy just and generous.

DEMOCRATIC (ADMINISTRATION).

We deny the right of congress to levy taxes for any other purpose than the maintenance of government, and demand a fair trial for the Wilson tariff law, under which business and industry have been recovering from the paralytic stroke of McKinleyism.

PROHIBITION.

The national constitution should be so amended as to allow the national revenues to be raised by equitable adjustment of taxation on the properties and incomes of the people, and import duties should be levied only as a means of securing equitable commercial relations with other nations.

NEVADA.

REPUBLICAN.

We believe in protection for the American farmer and manufacturer, and especially do we demand protection for the American laborer as against any and all foreign laborers who are not American citizens.

DEMOCRATIC.

We most heartily indorse the administration of President Grover Cleveland in everything except its financial policy, and especially commend its course upon the tariff question, and its courageous maintenance of the principles set forth in that declaration of American rights known as the Monroe doctrine.

NEW HAMPSHIRE.

REPUBLICAN.

After opening with a congratulation to the country "upon the near approach of an opportunity for release from democratic misrule," the platform continues:

To this end we demand of the national convention the nomination of candidates whose election will mean the speedy repeal of the infamous and ruinous democratic tariff, and the substitution therefor of one based upon the principles of the McKinley act.

DEMOCRATIC.

We favor a system of tariff taxation so adjusted as to produce the necessary revenue to meet the present expenses of an honest government, with the least possible burden upon the people, and afford such incidental protection as will meet the requirements of American capital and labor.

NEW JERSEY.

REPUBLICAN.

The republicans of New Jersey reaffirm their unalterable devotion to the principles

of the national republican party and their adherence to the policy of protection to American labor. Such a tariff should be imposed upon imports as will afford adequate income for the expenses of the government, avoid increase of the national debt, revive American industry, restore American wages and re-establish the national prosperity on a sound and stable basis.

The reciprocity policy adopted by a republican administration and destroyed by the democrats should be restored. A patriotic statesmanship, inspired by a devotion to American interests, condemns the other policy which opens our markets wide to foreign goods, without securing reciprocal advantages from the nations peculiarly favored.

DEMOCRATIC.

We are opposed to any effort to alter materially the present just and conservative tariff.

1. Because such tariff is sufficient to provide adequate revenue for an economically administered government.

2. Because it is ample to protect American workmen from the unfair competition of foreign pauper labor.

3. Because an attempt to alter the present tariff would tend to unsettle the business of the country.

POPULIST.

Affirmed the Omaha platform of 1892, which opposed the protective principles of the tariff.

NEW YORK.

REPUBLICAN.

We are in favor of a tariff which, while providing an income sufficient to meet the expenses of government, honestly and economically administered, at the same time secures home labor and home capital from unequal foreign competition.

We believe in a reciprocity with other nations which shall give our producers and manufacturers an opportunity to dispose of their surplus products and to obtain articles we desire from those countries on the most advantageous terms.

DEMOCRATIC.

We reiterate our adherence to the principle of a tariff for revenue only. We are opposed to government partnership with protected monopoly, and we demand that import duties, like other taxes, shall be impartially laid and their imposition limited to the necessities of the government, economically administered. Federal taxation should not be imposed to benefit individual interests at the expense of the general welfare. We repudiate the doctrine that it is the province of the government, by the exercise or abuse of the power of taxation, to build up one man's business at the expense of another's, or to impose burdens upon one class of citizens for the benefit of other classes, and we insist that no public taxation, except for public purposes, is the true theory upon which our system of government is based, and upon which it should be honestly and impartially administered. Upon this principle of revenue reform the democratic party takes no step backward.

NORTH CAROLINA.

REPUBLICAN.

We denounce the policy of the democratic party in placing on the free list the great bulk of raw material of the south and the agricultural products of the country. By adopting such a policy the democratic party

has arrayed itself on the side of the trading and speculating classes of this and foreign countries. We favor such a rate of duties on raw material and agricultural products as will insure ample protection to the American people.

We have always given protection to our ship-builders. In late years we have neglected to protect our ship-owners. We believe the time has come to return to the policy of Washington and Hamilton, which, by discriminating duties in favor of American bottoms, secured 90 per cent of our carrying trade to American ships, and which, if now restored, would again revive our shipping and cause American freights to be paid to Americans.

DEMOCRATIC.

We warn the people against the combined evils of the gold standard and the McKinley tariff. These twin monsters go hand in hand in their mission of destruction, drawing the very sustenance from the body of the people and concentrating all wealth and power in the hands of a few.

We denounce the McKinley tariff and all other forms of protective-tariff legislation, and favor the constitutional tariff for revenue only.

NORTH DAKOTA.

REPUBLICAN.

With complete reliance on the ability of the republican national convention to frame a platform of principles on which every republican in the land may stand in confident security, the republicans of North Dakota, in delegate convention assembled, embrace this opportunity to declare ourselves in favor of a tariff law that will give equal protection to agriculturist and artisan, to manufacturer and miner, and at the same time serve to bring our national treasury ample revenues with which to meet the expenditures of the government, economically administered, and carry on all needed public improvements.

We further declare ourselves in favor of such a policy of trade reciprocity as will enlarge the foreign markets for our products without depriving our people of the benefits of protection to domestic enterprise.

Not only does the tariff law passed by the present administration utterly fail to produce necessary revenue, but under its operation foreign industries have been built up and greatly aided, and American industries have been destroyed and American labor degraded.

DEMOCRATIC.

We heartily commend and indorse the action of the democratic party in its efforts in behalf of the whole people in securing reduced taxation and greater commercial freedom by the enactment of the Wilson law. We therefore pledge ourselves as democrats to resist with our ballots and our influence the effort of the republican party to again fasten upon the country the system of high protection by the re-enactment of the McKinley law.

PEOPLE'S.

(See financial plank.)

OHIO.

REPUBLICAN.

We are faithfully wedded to the great principle of protection by every tie of party fealty and affection, and it is dearer to us now than ever before. It has more devoted supporters among the great masses of the

American people, irrespective of party, than at any previous period in our national history. It is everywhere recognized and indorsed as the great, masterful, triumphant American principle—the key to our prosperity in business, the safest prop to the treasury of the United States, and the bulwark of our national independence and financial honor.

We denounce the present tariff law as the sublime product of democratic ignorance and incompetency, bringing, as it has, to a prosperous and happy people, a period of unprecedented adversity and distress, from which nothing but a return to the policy of protection can relieve it.

We denounce the free-wool provision of the present tariff law as an unjust discrimination against an important industry and against a large part of our people, and demand such protection for sheep husbandry as will secure fair prices for American wool.

The republican party stands for a reciprocity that reciprocates, and which does not yield up to another country a single day's labor that belongs to the American workingman. It stands for international agreements which get as much as they give, upon terms of mutual advantage.

PROHIBITION.

The national constitution should be so amended as to allow the national revenues to be raised by an equitable adjustment of taxation on the property and incomes of the people. Import duties should be levied only as a means of securing equitable commercial relations with other nations.

OREGON.

REPUBLICAN.

We believe that the government should have ample revenue, with a sufficient surplus over ordinary expenditures to provide for coast defenses, for the steady building up of the navy and for the constant reduction of the public debt. We believe that the present tariff, with its lowered rates and its destructive and dishonest system of undervaluations and discriminations as to localities, should be replaced by one framed on protective principles, similar to that of the McKinley bill, and arranged to give ample protection to American wages and American industry, and to restore the reciprocity policy of James G. Blaine.

We have always given protection to our ship-builders. In late years we have neglected to protect our ship-owners. We believe the time has come to return to the policy of Washington and Hamilton, which, by discriminating duties in favor of American bottoms, secured 90 per cent of our carrying trade to American ships, and which, if now restored, would again revive our shipping and cause American freights to be paid to Americans.

DEMOCRATIC.

We are in favor of a tariff for revenue only, so adjusted that it shall affect alike our commerce, our agriculture, our labor and our manufacture.

PENNSYLVANIA.

REPUBLICAN.

First of all national issues stands protection, and first among its advocates have been the republicans of Pennsylvania. We believe in protection as a right to all American industries, but as a special favor to none. It should be neither partial, sectional nor hypocritical, and should be as

nearly as possible equal and universal. We are not pledged to any schedules, but we demand a restoration of the policy of protection, and we pledge it as soon as the republican party shall be fully restored to power in the executive and congressional departments of the government, and it shall be restored equitably to the farmer and the miner, to the manufacturer and artisan.

We demand the restoration of that wise policy of reciprocity which was framed by James G. Blaine and adopted by the wise and beneficent administration of President Harrison, to the great benefit of the commerce of the country, and would be abandoned by the present democratic administration.

We approve the policy of national protection to our ship-owners and the ship-building interests by discriminating duties in favor of American shipping, in order that the American flag be restored upon the high seas.

DEMOCRATIC.

It [the democratic party] believes that federal taxation, in whatever form, is justifiable only to the extent that may be needful for the maintenance of government, honestly and economically administered, within the sphere of granted powers.

It is opposed to all schemes of taxation that bear unequally upon individuals, or that tend to increase the profits of the few at the expense of the many, or to impose upon the few those burdens of government which shall be borne by all alike.

The democratic party has fulfilled the pledge under which it was intrusted with power, relieving the people from unjust and oppressive taxation, and by the enactment of a tariff for purposes of revenue framed on constitutional lines.

PROHIBITION.

Duties on imports should be limited to the difference in the labor cost of producing the goods in this and in competing countries, and a commission of experts should be appointed to determine what the difference is from time to time.

RHODE ISLAND.

DEMOCRATIC.

We believe that the Wilson act was a step in the right direction, and should be given a fair test. We do not believe in reciprocity, as it is impracticable and unnecessary, and tends to create hostilities against us.

We congratulate the country that under the Wilson tariff bill our commerce is rapidly increasing, as evidenced by the treasury reports on exports of agricultural implements, cotton manufactures, india rubber goods, machinery, iron, steel, leather and oils.

SOUTH CAROLINA.

REPUBLICAN (LILY WHITE).

We are in favor of moderate and reasonable protection for home labor and home capital, against the cheaper labor and cheaper capital of other countries, and of such reciprocal commercial arrangements with other countries as may be necessary to foster and extend our foreign trade.

REPUBLICAN (REGULAR).

We reaffirm our faith in the doctrine of protection to American industries, which, under wise republican legislation, more than any principle of any party, has maintained the onward march of prosperity for

the workmen of our country by the reduction of prices of manufactured articles of general consumption and by levying duties upon such imports coming into competition with the products of American labor, as well as to equalize the selling price thereof to the cost of production of similar articles of American production, and prevent home labor from competition with foreign labor in its overcrowded condition of pauperism.

SOUTH DAKOTA.

REPUBLICAN.

We are faithfully wedded to the great principle of protection by every tie of party fealty. It has more devoted supporters among the great masses of the American people, irrespective of party, than at any other previous period in our national history. It is ever recognized and indorsed as the great, masterful, triumphant American principle—the key to our prosperity in business, the safest prop to the treasury of the United States and the bulwark of our national independence and financial honor.

DEMOCRATIC.

The democratic party of South Dakota is opposed to any effort to alter materially the present just and conservative tariff:

1. Because such tariff is sufficient to provide adequate revenue for an economically administered government.
2. Because it is ample to protect American workmen from the competition of foreign labor.
3. Because an attempt to alter the present tariff would tend to unsettle the business of the country.

POPULIST.

More money to increase prices and legislation to maintain them. American system of finance and trade for the American people should be the battle cry of every loyal American citizen until industrial emancipation has been obtained. Therefore we demand that our tariff laws shall be administered by a non-partisan commission under well-defined instructions to protect the American laborer.

TENNESSEE.

REPUBLICAN.

We believe in an adjustment of the tariff duties for the two-fold purpose of meeting the requirements of the government and of furnishing reasonable and adequate protection to American industries, to the end that every willing worker throughout this broad land may receive a fair day's wages for a fair day's work.

We also renew our allegiance to the great doctrine fostered by that eminent statesman, James G. Blaine, the doctrine of reciprocity. We, therefore, favor as a logical and beneficial result of protective-tariff laws mutual trade arrangements with foreign countries that will provide for our farms and workshops a market for their surplus products, and at the same time enable us to buy from them under advantageous conditions such articles as they produce and we must have.

DEMOCRATIC.

We demand that all federal taxation shall be strictly and only for revenue for the support of an economically administered government, and we condemn the policy of the republican party in prostituting the taxing power to enrich the few at the expense of the many.

TEXAS.

REPUBLICAN (REGULAR).

We reaffirm the American doctrine of protection. Under its influence every legitimate enterprise will revive, labor will be employed and the earning power of every laborer in every field will be enhanced. We denounce the democratic Gorman-Wilson act as a pretense and a fraud; professing a reduction of the tariff, it struck down the greatest interests of the south, which for thirty years had been protected under republican administrations. We demand the re-enactment of a tariff which shall provide ample revenues for the expenses of the government, and secure for American labor in every part of our country protection against the invasion of the products of the pauper labor of Europe and of Asia, where children of tender years and every member of every family is required to labor on starvation wages, without education and without hope. We demand that wool, hides, cattle, sugar and lumber shall be provided by congress with that character of protection which these great industries warrant and require.

REPUBLICAN (LILY WHITE).

We believe in a protective tariff that will protect our markets for America's products and that will insure American wages for American workmen.

We believe in a protective tariff for Texas products—horses, cattle, sheep and all raw material, as well as manufactured products. We believe in the payment by this government of the bounty to sugar producers and manufacturers as under the McKinley act of 1890, to the end that the production of sugar be stimulated until all that we can consume is produced by our own people in this country.

DEMOCRATIC (GOLD-STANDARD WING).

We favor a tariff for revenue only, sufficient in amount to support the government, economically administered. We demand a return to frugal and simple government, the abolition of all useless offices, the rigid curtailment of all expenses and the return of government to its ordinary functions of protection to life, liberty and property. We oppose all sumptuary legislation, no matter under what disguise, and demand that the citizen be left free to pursue his own happiness without unnecessary interference by government.

DEMOCRATIC (FREE-SILVER WING).

We favor a tariff for revenue only, but in a sufficient amount, supplemented by other taxation, to meet the expenses of the government, economically administered, so as to render it unnecessary to increase the public debt in any manner whatever. And we believe that the present tariff law, which lets into this country raw materials free of duty and levies heavy duties on manufactured products, thus subjecting our agricultural and pastoral classes to competition with the world, while it enables the rich manufacturers, by means of combinations and trusts, to extort their own prices for their products from the people, violates the federal constitution as well as the fundamental principles of the democratic party that tariff duty should be levied and collected for the purpose of revenue only.

UTAH.

REPUBLICAN.

We hold that, as a tariff for revenue has failed to restore prosperity, so a protective

tariff, as long as the money of the country is held, ounce for ounce, 100 per cent higher than the money of the orient and of Spanish America, is impotent to save our farmers and manufacturers against a competition which they are helpless to meet, and we repudiate the belief that protection without bimetalism can restore prosperity. The situation makes clear that bimetalism and protection must be accepted as constituting one vital, indivisible principle, that not only the progress but the safety of the industries of our country and the toilers who carry on those industries make the acceptance of this principle imperative—protection by a tariff to equalize the wages of our country and those paid abroad, and bimetalism to take from gold its present appreciation, and to equalize the money of this country and that of silver-standard nations.

We cordially indorse the stand taken in the national legislature by western senators and representatives in behalf of holding bimetalism and protection together as one.

VERMONT.

REPUBLICAN.

We believe in a tariff that shall raise sufficient revenue to meet the necessities of the government, economically administered, and at the same time furnish reasonable protection to American industries, American labor and the product of American farms.

We believe in the policy of reciprocity, established under the last republican administration, which affords us a market for our surplus products and manufactures, and enables us to obtain from other countries, under the most advantageous terms, articles which we desire and do not produce.

DEMOCRATIC.

We demand tariff legislation for the constitutional purpose of providing revenues for the government, and not for fostering trusts.

VIRGINIA.

REPUBLICAN.

The republican party of Virginia, in convention assembled, reaffirms its allegiance to the principles of the party to which it belongs, as enunciated in the national platform, and expresses its pride in being part of an organization which faithfully adhered to the great principles of protection, under which no furnace fires have ever been put out, no factories have been closed and no army of workers has been put upon the streets and highways in enforced idleness.

DEMOCRATIC.

We are opposed to McKinleyism, which proposes to tax the poor man for the benefit of the trusts and capitalists, and we favor a tariff tax for revenue, limited to the necessities of an economically administered government and adjusted so as to throw its burden most lightly upon the great producing classes of our country.

We oppose the republican party because, while professing to protect our laboring men and mechanics, they are in practice filling their mines and factories with pauper labor from Europe, foreign to our laws and language and to our institutions. We point to the fact that that party was the author of all the arts of finance legislation which stimulated the panic and brought on hard times to the country, and that it has utterly failed to suggest any scheme of relief.

WASHINGTON.

REPUBLICAN.

Resolved, That we demand a restoration of the republican policy of protection to American industries and American labor and the doctrine of reciprocity.

Resolved, That while we have always given protection to our ship-builders in late years we have neglected to protect our ship-owners, and we believe that the time has come to return to the policy of Washington and Hamilton, which, by discriminating duties in favor of American bottoms, secured 90 per cent of our carrying trade to American ships.

WEST VIRGINIA.

REPUBLICAN.

We believe in the principle of protection to American industries as taught and maintained for thirty years by the republican party, but we favor its extension so as to include protection to American shipping, one of our greatest industries, which has been abandoned for more than sixty years. We favor such legislation as will protect and restore American shipping and compel the foreign commerce of the United States to be carried in American ships, and thereby pay \$200,000,000 annually to Americans, which is now paid foreigners for carrying American commerce.

DEMOCRATIC.

We are opposed to McKinleyism, which proposes to tax the poor man for the benefit of trusts and capitalists, and we favor a tariff tax for revenue, limited to the necessities of an economically administered government and adjusted so as to throw its burdens most lightly upon the great producing classes of our country.

WISCONSIN.

REPUBLICAN.

The republicans of Wisconsin renew their devotion to the doctrine of protection. We believe in an adjustment of tariff duties for the two-fold purpose of providing sufficient revenue to meet the requirements of the government and to furnish reasonable and adequate protection to American industries and labor, a tariff both for revenue and protection. We also renew our allegiance to the doctrine of reciprocity.

DEMOCRATIC.

We believe that a tariff for revenue only would extend American commerce to the uttermost parts of the earth, and that untrammelled industry would advance our country to the foremost place among nations. We are, therefore, firm in our adherence to the doctrine enunciated by the last national democratic convention, that this government should impose no tariff taxes except for revenue.

WYOMING.

REPUBLICAN.

We denounce the present democratic administration, whose vicious and vacillating course has brought us distress at home and humiliation abroad. We denounce the free-trade policy inaugurated by the democratic party, which has deranged our business, crippled our industries and compelled an increase in the national indebtedness during times of peace; on the contrary, we believe that the paramount issue before the American people is protection to American industries and American labor, and through this

system alone can the revenues of the government be sustained and prosperity revived. We denounce the free-wool provision of the Wilson tariff act as an unjust discrimina-

tion against an important industry of this state, and demand such protection for sheep husbandry as will secure fair prices for American wool.

CUBAN AND FOREIGN AFFAIRS.

[Where parties or states are omitted no declaration was made.]

CALIFORNIA.

DEMOCRATIC.

We hereby indorse the administration of President Cleveland, except as to his financial policy. His foreign policy has been wise, statesmanlike and patriotic, and his domestic policy has been pure and incorrupt.

CONNECTICUT.

REPUBLICAN.

We believe in the Monroe doctrine and in supplying the government with ships and fortifications, and men to man them, sufficient at all times to uphold and maintain it.

DEMOCRATIC.

We heartily indorse the administration of President Cleveland, and we especially approve his firm support of the public credit and his exemplification of the Monroe doctrine.

DELAWARE.

REPUBLICAN.

We sympathize with the deplorable condition of the people of Cuba who are struggling for independence.

DEMOCRATIC.

We sympathize with the patriots of Cuba in their struggle for freedom and self-government, and we sincerely hope that belligerent rights may be accorded to them by the executive, consistently with our international obligations.

FLORIDA.

REPUBLICAN.

The state convention adopted the following separately from the regular platform:

Whereas, Our people are under a free government the fundamental principles of which are "government of the people and for the people";

Whereas, Near the borders of the state of Florida an oppressed and tyrannized people are bravely sacrificing their lives and fortunes, as our forefathers did in their struggle to free themselves from the thralldom of a monarchical and tyrannical rule;

Resolved, That we, the republicans of our fair state, in convention assembled, deeply sympathize with the Cuban patriots in their effort to secure the liberty which we enjoy, and will cheerfully hail the day when the banner bearing the single star shall float over a free people, and the "Queen of the Antilles" shall be added to the free government of America.

DEMOCRATIC.

Imitating the example of our revolutionary forefathers in their heroic struggle for independence, we sympathize with the Cubans in their efforts to throw off the yoke of foreign domination and establish a government of their own choosing, and we urge President Cleveland to hasten to put into effect the resolution of congress giving these struggling patriots the rights of belligerents; and in this connection we take pride in commending the courageous manner in which the president has upheld the Monroe

doctrine in Venezuelan affairs, which has given influence and dignity to the American name and commanded respect for its flag.

ILLINOIS.

REPUBLICAN.

We believe that the sympathy of this nation should be extended to all people who have been driven by oppression and wrong to take up arms in behalf of self-government, and we, therefore, express our sympathy for the people of Cuba in their struggle for independence, and we trust that their efforts may establish a republic based upon the intelligence and patriotism of a free people.

INDIANA.

DEMOCRATIC.

That we do most earnestly sympathize with the people of the island of Cuba in their gallant struggle against the Spanish monarchy for freedom and independence.

We believe that public war exists in Cuba, and that the parties thereto ought to be accorded all the rights of belligerents.

IOWA.

REPUBLICAN.

If the foreign policy of the nation is to be the issue, Senator Allison has held rigidly to the teachings of Washington and the teachings of Monroe—opposing all entangling alliances with other countries, assailing no established rights of the nations upon this continent, but firmly insisting that the political system of Europe shall not be enlarged and extended in this hemisphere, menacing alike the integrity of the United States and the republican government of the continent.

KANSAS.

DEMOCRATIC.

Resolved, That we commend President Cleveland for his statesmanlike vindication of the Monroe doctrine; for his stern demand for justice and the faithful observance of treaties with Spain in defense of American citizens unjustly imprisoned in Cuba, and for his distinguished service in the interest of economical administration.

KENTUCKY.

REPUBLICAN.

We sympathize with the people of Cuba in their struggle for independence, and trust that their efforts may establish a republic based upon the intelligence and patriotism of a free people.

MASSACHUSETTS.

REPUBLICAN.

We sympathize with the Cubans in their struggle for independence. As friends of freedom everywhere, we wish them success, and believe that the United States should use its influence and good offices in the interests of humanity to bring to an end the useless and bloody war now desolating Cuba, and to give to the people of that island peace and self-government.

DEMOCRATIC.

As a party that has sympathized with every people struggling for a larger liberty, we send to the brave Cubans words of encouragement and hope for their success in the contest they are now waging for independence.

MICHIGAN.

REPUBLICAN.

We extend our sympathy to the people of Cuba in their struggle for liberty.

DEMOCRATIC.

We indorse the foreign policy of the administration as one which has warned off foreign encroachment upon American rights, maintained the dignity and prestige of our country abroad and kindled anew the pristine patriotism of our countrymen.

We trust the administration, which moves with proper conservatism in dealing with questions involving our relations with all European powers having colonies on this hemisphere, to recognize the belligerency of the Cuban patriots, and, as soon as may be, to give further countenance and aid to the Cuban republic, in accordance with the sentiment of our people, the genius of American liberty, the dictates of common humanity and of Christian civilization.

MINNESOTA.

REPUBLICAN.

The republicans of Minnesota, in convention assembled, assert their belief in the policy of the United States as declared by James Monroe and by every one of our statesmen since. They also declare their conviction that the people of Cuba ought to be recognized as belligerents. Believing thoroughly in the doctrine of arbitration between nations, they nevertheless advocate a sufficient system of coast defenses and such other naval and military precautions as will surely make us able to secure peace by our manifest invincibility in war.

MONTANA.

REPUBLICAN.

We declare our unwavering adherence to the Monroe doctrine, and demand its rigid and determined enforcement at all times and against all European nations, believing it essential to our peace and welfare.

We extend our sympathy to the struggling patriots of Cuba in their efforts to cast off the yoke of foreign tyranny.

NEBRASKA.

REPUBLICAN.

We extend our sympathies to the struggling patriots of Cuba in their heroic efforts to establish a government of the people, and we demand the recognition of their rights as belligerents by the national administration.

DEMOCRATIC (ADMINISTRATION).

The theory of non-interference on the part of European governments on this continent announced by President Monroe more than half a century ago has taken a firm hold of the American people, and we heartily indorse and approve the course of President Cleveland and Secretary Olney in their firm and unflinching adherence to this great principle.

NEW HAMPSHIRE.

REPUBLICAN.

The platform favors a foreign policy characterized by sturdy Americanism, including the assertion of the Monroe doctrine and

the moral and material support of the Cuban patriots, if they have not already achieved their independence.

DEMOCRATIC.

The Monroe doctrine embodies our idea of national self-defense, and should be vigorously maintained.

NEW JERSEY.

REPUBLICAN.

We believe that the Monroe doctrine should be inflexibly maintained against all attempts to invade or overthrow it. No extension of monarchical institutions should be permitted on this continent on any pretext whatever.

The honor of the American flag and the rightful influence of the nation in its relations with other peoples must be vigorously and fearlessly maintained. In our diplomacy there should be more of the virile force and emphasis which command respect. Our navy should be enlarged so that it may be made an effective factor in any controversies which may arise, and our harbors and seacoasts, especially the exposed seacoast of our own state, should be protected by an adequate system of defenses.

Recalling the struggles and the sufferings of our forefathers to secure liberty and independence, we believe that the practical sympathy of this nation should be extended to all peoples who have been driven by oppression and wrong to take up arms in behalf of the right of self-government.

DEMOCRATIC.

We sympathize with the patriots of Cuba in their struggle for freedom, and look for a recognition of them by our government at such time as best shall aid the cause of freedom, without unnecessarily severing our peaceful relations with a friendly foreign power.

NEW YORK.

DEMOCRATIC.

Resolved, That we sympathize with the brave and heroic Cubans in their struggle to obtain their freedom, and denounce and condemn the atrocities, the outrages and cruelties perpetrated by Spanish soldiers under the Spanish flag in the island of Cuba.

NORTH DAKOTA.

REPUBLICAN.

We favor the Monroe doctrine, which we interpret to mean positive opposition to further acquisition of American soil by foreign powers. We extend our sympathy to the struggling Cuban patriots in behalf of liberty.

OHIO.

REPUBLICAN.

It [the republican party] stands for a foreign policy dictated by and imbued with a spirit that is genuinely American; for a policy that will revive the national traditions and restore the national spirit which carried us proudly through the earlier years of the century. It stands for such a policy with all foreign nations as will insure both to us and to them justice, good faith, dignity and honor. It stands for the Monroe doctrine as Monroe himself proclaimed it.

OREGON.

DEMOCRATIC.

We demand of the general government rigid enforcement of the Monroe doctrine.

RHODE ISLAND.

DEMOCRATIC.

We affirm our belief in the maintenance of the Monroe doctrine, especially as interpreted by our president.

SOUTH CAROLINA.

REPUBLICAN (REGULAR).

The recognition of belligerent rights to the Cubans, engaged in a war for independence from Spain, would be but a tardy act of justice, founded upon general humane principles and in keeping with the lessons taught by the United States, the foremost of American governments, especially since the advent of the inhuman Weyler upon the scene. We indorse the wise act of congress to take decisive action in the premises, an act which will thus force peace by shortening the struggle and minimizing the destruction of life and property.

SOUTH DAKOTA.

DEMOCRATIC.

The democratic party of South Dakota sympathizes with the patriots of Cuba in their struggle for freedom, and looks for a recognition of them by our government at such time as best shall aid the cause of freedom without necessarily severing our peaceful relations with a friendly foreign power.

POPULIST.

We heartily commend their [Pettigrew and Kyle] patriotic stand for American freedom from European domination, and extend to them a cordial welcome to the ranks of the people's party.

TENNESSEE.

REPUBLICAN.

We believe the material and commercial interests of both the United States and Cuba demand an early cessation of the war now being conducted in that island, and

that it is the duty of our government to set on foot such policy as shall speedily end the war and enable the people of the two countries to peacefully pursue and cultivate the vast trade which is now almost completely cut off, and which is so mutually profitable to both peoples.

TEXAS.

REPUBLICAN (REGULAR).

We are in favor of the maintenance of every American right as defined by the Monroe doctrine, and sympathize with all people struggling for liberty, but we oppose the unnecessary acquisition of new territory or the involving of our government in foreign complications contrary to the traditions and history of our country.

VERMONT.

REPUBLICAN.

We believe in a consistent and dignified foreign policy, based upon the traditional doctrine of non-intervention in the affairs of the old world and the maintenance of the Monroe doctrine in this.

DEMOCRATIC.

We sympathize with the brave Cubans struggling for their independence, and extend to them kindly words of encouragement and hope for their success.

WASHINGTON.

DEMOCRATIC.

We believe in the Monroe doctrine, as interpreted by President Cleveland and his able secretary of state, Richard Olney.

WEST VIRGINIA.

REPUBLICAN.

We extend to the struggling patriots of Cuba the warm hand of fellowship, and assure them of our deep sympathy in their heroic effort to make for themselves a country. The time is fully ripe to accord to them the rights of belligerents.

IMPORTANT LEGISLATION.

First Session of the LIVth Congress.

FORFEITURE OF LAND GRANTS.

This act amends that of Sept. 29, 1890, so as to extend the time within which persons entitled to purchase lands forfeited by said act shall be permitted to purchase the same in the quantities and upon the terms provided in said section at any time prior to Jan. 1, 1897: Provided, That actual residence upon the lands by persons claiming the right to purchase the same shall not be required where such lands have been fenced, cultivated or otherwise improved by such claimants, and such persons shall be permitted to purchase two or more tracts of such lands by legal subdivisions, whether contiguous or not, but not exceeding 320 acres in the aggregate.

Approved Jan. 23, 1896.

TO PROHIBIT PRIZE-FIGHTING.

That any person who, in any of the territories or the District of Columbia, shall voluntarily engage in a pugilistic encounter between man and man or a fight between a man and a bull or any other animal, for money or for other thing of value, or for any championship, or upon the result of which any money or anything of value is bet or wagered, or to see which any admission fee is charged, either directly or indirectly, shall be deemed guilty of a felony,

and upon conviction shall be punished by imprisonment in the penitentiary not less than one nor more than five years.

By the term "pugilistic encounter," as used in this bill, is meant any voluntary fight by blows by means of fists or otherwise, whether with or without gloves, between two or more men, for money or for a prize of any character, or for any other thing of value, or for any championship, or upon the result of which any money or anything of value is bet or wagered, or to see which any admission fee is charged, either directly or indirectly.

Approved Feb. 7, 1896.

RELATING TO PROOF OF DEATH IN PENSION CASES.

That in considering claims filed under the pension laws the death of an enlisted man or officer shall be considered as sufficiently proved if satisfactory evidence is produced establishing the fact of the continued and unexplained absence of such enlisted man or officer from his home and family for a period of seven years, during which period no intelligence of his existence shall have been received. And any pension granted under this act shall cease upon proof that such officer or enlisted man is still living.

Approved March 13, 1896.

REMOVAL OF DISABILITIES.

That section 1218 of the revised statutes of the United States, as amended by chapter 46 of the laws of 1884, which section is as follows: "No person who held a commission in the army or navy of the United States at the beginning of the late rebellion and afterward served in any capacity in the military, naval or civil service of the so-called confederate states, or of either of the states in insurrection during the late rebellion, shall be appointed to any position in the army or navy of the United States," be and the same is hereby repealed.

Approved March 31, 1896.

SAFETY OF PASSENGERS.

That in order to provide for the safety of passengers on excursion steamers, yachts, oarsmen and all craft, whether as observers or participants, taking part in regattas, amateur or professional, that may hereafter be held on navigable waters, the secretary of the treasury be and he is hereby authorized and empowered in his discretion to detail revenue cutters to enforce such rules and regulations as may be adopted to insure the safety of passengers on said excursion steamers, yachts, oarsmen and all craft, whether as observers or participants, taking part in such regattas.

Approved May 19, 1896.

DONATION OF CANNON.

That the secretary of war and the secretary of the navy are each hereby authorized in their discretion to loan or give to soldiers' monument associations, posts of the Grand Army of the Republic and municipal corporations condemned ordnance, guns and cannon balls which may not be needed in the service of either of said departments. Such loan or gift shall be made subject to rules and regulations covering the same in each department, and the government shall be at no expense in connection with any such loan or gift.

Approved May 22, 1896.

RESIDENCE IN DIVORCE CASES.

That no divorce shall be granted in any territory for any cause unless the party applying for the divorce shall have resided continuously in the territory for one year next preceding the application: Provided, That this act shall not affect any action duly commenced and pending at the date of the passage thereof.

Approved May 25, 1896.

A NATIONAL UNIVERSITY.

That Arthur McArthur, Richard H. Alvey, Charles C. Cole, William B. Webb, Eugene Carusi, H. O. Cloughton, Thomas Wilson, Matthew G. Emery, John Goode, Charles Lyman, John T. Winter, Howard H. Barker and William C. Whittemore, their associates and successors, are hereby constituted a body politic and corporate, by the name of the National University, with power to sue and be sued, plead and be impleaded and to have perpetual succession; to acquire, take by devise, bequest or otherwise, hold, purchase, incur and convey such real and personal estate as shall be required for the purpose of its incorporation; to make and use a common seal and the same to alter at pleasure.

That the aforesaid incorporators shall be and constitute a board of trustees for the said university, seven of whom shall constitute a quorum to do business, and which board shall be and are authorized to fill any vacancies in their number, to appoint such

officers and agents as the business of the corporation shall require and to make by-laws for the accomplishment of its purposes, for the management of its property and for the regulation of its affairs. Said corporation is hereby empowered to establish and maintain within the District of Columbia a university for the promotion of education. The said corporation shall have power to grant and confer diplomas and the usual college and university degrees and honorary degrees, and also such other powers as may be necessary fully to carry out and execute the general purposes of the said corporation as herein appearing.

That this act may be amended or repealed at any time by the congress at its pleasure. Approved June 1, 1896.

TAX ON "FILLED CHEESE."

That for the purposes of this act the word "cheese" shall be understood to mean the food product known as cheese, and which is made from milk or cream and without the addition of butter or any animal, vegetable or other oils or fats foreign to such milk or cream, with or without additional coloring matter.

That for the purposes of this act certain substances and compounds shall be known and designated as "filled cheese"—namely, all substances made of milk or skimmed milk, with the admixture of butter, animal oils or fats, vegetable or any other oils, or compounds foreign to such milk, and made in imitation or semblance of cheese.

That special taxes are imposed as follows: Manufacturers of filled cheese shall pay \$400 for each and every factory per annum. Every person, firm or corporation who manufactures filled cheese for sale shall be deemed a manufacturer of filled cheese. Wholesale dealers in filled cheese shall pay \$250 per annum. Every person, firm or corporation who sells or offers for sale filled cheese in the original manufacturer's packages for resale, or to retail dealers as hereinafter defined, shall be deemed a wholesale dealer in filled cheese. But any manufacturer of filled cheese who has given the required bond and paid the required special tax, and who sells only filled cheese of his own production, at the place of manufacture, in the original packages, to which the tax-paid stamps are affixed, shall not be required to pay the special tax of a wholesale dealer in filled cheese on account of such sales.

Retail dealers in filled cheese shall pay \$12 per annum. Every person who sells filled cheese at retail, not for resale, and for actual consumption, shall be regarded as a retail dealer in filled cheese, and the internal-revenue law is made applicable to the business.

The law provides further for a fine of not less than \$400 nor more than \$3,000 for carrying on the business of manufacture without having paid the tax; for the giving of bonds for the proper conduct of the business; for stamping the product "filled cheese" so as to be easily seen; for compelling retail dealers to put up a sign, "Filled cheese sold here," and for other ways of enforcing the law.

APPROPRIATIONS FOR SECTARIAN SCHOOLS.

The Indian appropriation bill contains this provision:

And it is hereby declared to be the settled policy of the government to hereafter make no appropriation whatever for education in any sectarian school: Provided, That the

secretary of the interior may make contracts with contract schools, apportioning as near as may be the amount so contracted for among schools of various denominations for the education of Indian pupils during the fiscal year 1897, but shall only make such contracts at places where non-sectarian schools cannot be provided for such Indian children, and to an amount not exceeding 50 per centum of the amount so used for the fiscal year 1895: Provided, further, that the foregoing shall not apply to public schools of any state, territory, county or city, or to schools herein or hereafter specifically provided for.

INCREASING THE NAVY.

That for the purpose of further increasing the naval establishment, of the United States the president is hereby authorized to have constructed by contract three seagoing coastline battleships designed to carry the heaviest armor and most powerful ordnance upon a displacement of about 11,000 tons, to have the highest practicable speed for vessels of their class, and to cost, exclusive of armament, not exceeding \$3,750,000 each; and three torpedo boats, to have a maximum speed of not less than thirty knots, to cost in all not exceeding \$800,000; and not to exceed ten torpedo boats, to cost in all not exceeding \$500,000, and to have the highest practicable speed for vessels of their class; and not more than two of said battleships and not more than three of said torpedo boats shall be built in one yard or by one contracting party, and in each case the contract shall be awarded by the secretary of the navy to the lowest best responsible bidder; and in the construction of all said vessels all of the provisions of the act of Aug. 3, 1886, entitled "An act to increase the naval establishment," as to materials for said vessels, their engines, boilers and machinery, the contracts under which they are built, except as to premiums, which are not to be offered, the notice of any proposals for the same, the plans, drawings and specifications therefor, and the method of executing said contracts, shall be observed and followed; and said vessels shall be built in compliance with the terms of said act, save that in all their parts said vessels shall be of domestic manufacture; and, subject to the provisions hereinafter made, one and not more than one seagoing battleship and three of said torpedo boats shall be built on or near the coast of the Pacific ocean or in

the waters connecting therewith, provided that said battleship or torpedo boats can be constructed at an additional cost not exceeding 4 per centum of the lowest accepted bid for the other battleships or torpedo boats provided for in this act; and one torpedo boat on the Mississippi river, one torpedo boat on the coast of the Gulf of Mexico and one torpedo boat on the Missouri river.

PROPERTY OF THE MORMON CHURCH.

That all of the real estate now in the hands of the receiver of the late corporation of the Church of Jesus Christ of Latter-Day Saints and all the rents, issues and profits arising therefrom, which includes all the money held by him, be and the same are hereby granted and conveyed to the Church of Jesus Christ of Latter-Day Saints, the expenses of the receivership, to be allowed by the Supreme court of the state of Utah, being first paid, and said receiver, after the payment of said expenses, is hereby required to deliver the said property and money to the person or persons constituting the first presidency of said Church of Jesus Christ of Latter-Day Saints or to such person or persons as he or they may designate.

Approved March 28, 1896.

THE BOND BILL AND ITS SUBSTITUTE.

The action of the United States senate in rejecting the bond bill passed by the house and moving and adopting a free-coinage substitute therefor, while wholly unimportant as a piece of legislation, is of interest as showing the position of parties and members of the senate on the question of finances. The measure and the action of congress leading up to it may be summarized as follows:

In a message sent to congress Jan. 28, 1895, the president urged congress to grant to the secretary of the treasury authority "to issue bonds bearing a low rate of interest, payable by their terms in gold, for the purpose of maintaining a sufficient gold reserve," to which request congress did not accede. In his annual message of Dec. 3, 1895, the request was renewed, and in response thereto there was introduced into the house of representatives the following bill "for protecting the gold reserve and authorizing the issue of bonds to meet temporary

deficiencies": "That, in addition to the authority given to the secretary of the treasury by the act approved Jan. 14, 1875, entitled 'An act to provide for the resumption of specie payments,' he is authorized, from time to time, at his discretion, to issue, sell and dispose of, at not less than par, coin, coupon or registered bonds of the United States to an amount sufficient for the object stated in this section, bearing not to exceed 3 per centum interest per annum, payable semi-annually, at the pleasure of the United States, in coin, after five years from their date, with like qualities, privileges and exemptions provided in said act for the bonds therein authorized. And the secretary of the treasury shall use the proceeds thereof for the redemption of the United States legal-tender notes, and for no other purpose. Whenever the secretary of the treasury shall offer any of the bonds authorized for sale by this act or by the resumption act of 1875 he shall advertise the

same and authorize subscriptions therefor to be made at the treasury department and at the sub-treasuries and designated depositories of the United States.

"That to provide for any temporary deficiency now existing or which may hereafter occur the secretary of the treasury is hereby authorized, at his discretion, to issue certificates of indebtedness of the United States to an amount not exceeding \$50,000,000, payable in three years after their date to the bearer, in lawful money of the United States, of the denomination of \$20, or multiples thereof, with annual coupons for interest, at the rate of 3 per centum per annum, and to sell and dispose of the same for not less than an equal amount of lawful money of the United States, at the treasury department and designated depositories of the United States and at such postoffices as he may select. And such certificates shall have like qualities, privileges and exemptions provided in said resumption act for the bonds therein authorized. And the proceeds thereof shall be used for the purpose prescribed in this section and for no other."

This bill passed the house by a vote of 170 to 136. All the affirmative votes, except one, were cast by republicans, while the negative vote was made up of 46 republicans, 83 democrats, 6 people's party and 1 silver. This bill was sent to the senate Dec. 28, 1895, and was referred to the finance committee of that body. On the 30th of December, 1895, Mr. Morrill of Vermont, chairman of that committee, reported the bill to the senate. That committee recommended that all the house provisions, except the enacting clause, be stricken out and that the following free silver coinage substitute be inserted, the title being amended so as to read "To restore the coinage of silver dollars, and for other purposes":

"Section 1. That from and after the passage of this act the mints of the United States shall be open to the coinage of silver, and there shall be coined dollars of the weight of 412½ grains troy of standard silver, nine-tenths fine, as provided by the act of Jan. 18, 1837, and upon the same terms and subject to the limitations and provisions of law regulating the coinage and legal-tender quality of gold, and whenever the said coins herein provided for shall be received into the treasury certificates may be issued therefor in the manner now provided by law.

"Sec. 2. That the secretary of the treasury shall coin into standard silver dollars, as soon as practicable, according to the provisions of section 1 of this act, from the silver bullion purchased under authority of the act of July 14, 1890, entitled 'An act directing the purchase of silver bullion and the issue of treasury notes thereon, and for other purposes,' that portion of said silver bullion which represents the seigniorage or profit to the government, to wit, the difference between the cost of the silver purchased under said act and its coinage value, and said silver dollars so coined shall be used in the payment of the current expenses of the government; and for the purpose of making the said seigniorage immediately available for use as money the secretary of the treasury is hereby authorized and directed to issue silver certificates against it, as if it were already coined in the treasury.

"Sec. 3. That no national-bank note shall be hereafter issued of a denomination less than \$10, and all notes of such banks now outstanding of denominations less than that sum shall be as rapidly as practicable taken up, redeemed and canceled and notes of \$10 and larger denominations shall be issued

in their stead, under the direction of the comptroller of the currency.

"Sec. 4. That the secretary of the treasury shall redeem the United States notes, commonly called 'greenbacks,' and also the treasury notes issued under the provisions of the act of July 14, 1890, when presented for redemption, in standard silver dollars, or in gold coin, using for redemption of said notes either gold or silver coins, or both, not at the option of the holder but exclusively at the option of the treasury department, and said notes, commonly called 'greenbacks,' when so redeemed shall be re-issued as provided by the act of May 31, 1878."

The vote on the adoption of the substitute was reached Feb. 1, 1896. Several motions were disposed of prior to the one offered by Mr. Gorman of Maryland to table the bill, which afforded the first test of strength. Mr. Butler of North Carolina sought to insert a provision for the redemption of greenbacks in gold or silver, according to the fluctuations of the ratio, and, as he intimated that he would not vote for the bill unless this amendment should be adopted, Mr. Hill of New York, who had endeavored from the first to defeat the free-coinage men, voted in the affirmative with Butler in the hope that the amendment might carry and thus alienate votes from the bill proper. This plan did not work and Butler failed to carry out his threat. There was a majority of 9 in opposition to the Gorman motion to table the bill. It was after 3 o'clock when the last call of the roll was completed.

All the proposed amendments having been cut off, the senate was brought to a direct vote on the free-silver substitute and the substitute was agreed to—yeas, 43; nays, 34—as follows:

*Vacancy.

The substitute was sent to the house and came up on the 13th of February, 1896, when a committee of the whole house voted non-concurrence by a vote of 190 to 80. On the next day (Feb. 14) the rejection of the senate substitute bill was confirmed by the house by a vote of 215 to 90. The majority vote was made up of 184 republicans and 31 democrats, while the minority vote was composed of 65 democrats and populists, 24 republicans and 1 silver member.

THE CASE OF MR. WALLER.

In the Daily News Almanac for 1896, page 220, the dispute between the United States and France regarding the arrest, trial, conviction and punishment of John L. Waller, ex-United States consul at Tamatave, Madagascar, was discussed at some length. But a dispute that at one time threatened to disturb the friendly relations between the two countries was settled in February, 1896, by the government of France acceding to the demands of the United States and releasing Mr. Waller from imprisonment.

The account of the affair in last year's issue closed with the demand of our government on France for the release of Mr. Waller on the condition that the United States should make no claim against the French government on behalf of Mr. Waller for damages growing out of his arrest and imprisonment. Mr. Waller is, however, free to bring an action against the French government in his own behalf. The facts as to the peaceable termination of the dispute are given in a message to congress sent on Feb. 11, 1896, in reply to a resolution of congress asking for information on the subject.

In his message transmitting the Waller correspondence President Cleveland says:

"It will be seen upon examination, as would, of course, be expected, that there is a slight conflict of evidence upon some of the features of Mr. Waller's case. Nevertheless, upon a fair and just consideration of all the facts and circumstances as presented, and especially in view of Mr. Waller's own letter, the conclusions set forth in the report of the secretary of state do not appear to admit of any reasonable doubt nor to leave open to the executive any other course of action than that adopted and acted upon as therein stated. It is expected that Mr. Waller's release from imprisonment will be immediately forthcoming."

Accompanying the correspondence, which is voluminous, is a report by Secretary Olney, summarizing its features and explaining the reasons which animated the executive in terminating the incident as above described. In the beginning the secretary gives the history of the Crockett case, showing that Waller, while United States consul at Tamatave, acting as administra-

tor of the estate of Crockett, a deceased United States citizen, was guilty of maladministration; that when Mr. Edward T. Wetter took charge of the consulate in January, 1894, as Waller's successor, Waller had disappeared and the consular records were in great confusion.

Wetter caused a civil suit to be brought against Waller on account of the Crockett estate, and before a court, composed of Consul Wetter, Mr. Geldart (Waller's intimate friend) and Messrs. Ryder and Howe, Waller was convicted of gross mismanagement of the estate, of abuse and neglect of trust, and was removed from the position of administrator, besides being ordered to make good the sum of \$1,961 and interest to the Crockett heirs. Wetter asked leave of the state department to prosecute Waller criminally and the department replied that it could give no specific instructions.

Touching the Waller concession the secretary says, referring to a letter from Wetter dated April last:

"This same letter contains an allusion to the Waller rubber concession or land grant near Fort Dauphin. After indicating various ways in which the Crockett money may have been spent in bribes to secure the concession, no evidence to that effect is reported, and neither is there any proof of the nature, extent, validity or value of the concession. The value may have been supposed to be dependent upon the issue of the contest then going on between the French and the natives, while it is certain that the French authorities have always held the concession to be without any validity."

Secretary Olney next tells how Waller, returning to Tamatave in October, 1894, on his way to America, was prevented from proceeding by the insistence of Consul Wetter upon his paying the Crockett judgment, which he was unable to do; and how, after the capture of Tamatave by the French in December, 1894, Waller was arrested by them and tried by a court known as "Marine First Permanent Council of War." The charges were: First, dispatching a letter to his wife from Tamatave, without the same having been vised by the French authorities; second, attempting to correspond

with the enemies of France and to furnish them information prejudicial to the military and political situation of France. The trial took place in open court and Waller was sentenced to twenty years' imprisonment, an appeal being rejected. Secretary Gresham in April, 1895, called upon the French government for the record and evidence, and these were furnished.

As to the evidence Secretary Olney says: "Without any admission of the duty of the French government to permit an inspection of the evidence—a duty which that government claimed from the outset did not exist—the evidence was submitted to Mr. Eustis for such examination as he chose to make. Waller's guilt upon the first charge, sending a letter from Tamatave without permitting the French authorities to inspect it—an offense said to be punishable by a nominal fine—stands confessed. As respects the second charge, a charge, of course, of much greater gravity, Mr. Eustis reports as follows:

"In order to understand the significance of the information communicated (by Waller) it must be borne in mind that the French had a garrison at Tamatave and the Hovas had one at Faratafe. These two points were distant from each other a few miles. In a letter to Tessier he describes the condition of Tamatave; that smallpox is raging; that many are dying; that there are more than 100 French soldiers in the hospitals; that they have dysentery and fever, and unless there should be a change in the order very soon the fatality of both soldiers and citizens will be very great. Then he speaks of the scarcity of provisions; of the arrest of several Hovas, who were reported to have been shot.

"To have communicated the enfeebled and straitened condition of the garrison at Tamatave might certainly have provoked the attack of the Hovas from Faratafe, the information being given to an agent of the Hovas. He described outrages committed by French soldiers upon Malagasy women, and says that it seems strange that civilized men should commit such crimes, and speaks of much Malagasy property having been destroyed by the French troops. Whether these statements were true or false, they were certainly calculated to increase the horrors of war by provoking retaliation on the part of the Hovas. He writes that all mail leaving Tamatave for Antananarivo is read by the colonel of the French army before it can pass; that he has a chance to send this letter by the English steamer via Natal, because it will escape the eyes of the officials.

"In his letter to his wife he denounces D. and P. (who are identified as Draper and Purdy) as French spies, and asks her to inform Tessier and friends of the fact. It is true that he advises that they may be sent away from the capital, but doubtless knew that spies in time of war are not banished but are usually shot, and when asked by the presiding officer why he exposed these two men to be executed he replied that he did it from motives of revenge. I am credibly informed that those two men were American citizens.

"Waller's wife, in acknowledging the receipt of this letter, was not to mention anything in it, but simply say 'Your 44 received,' and after she and Tessier had read it to destroy it and not to mention its contents, except to Tessier and secretaries—the latter are interpreted as meaning secretaries of the Hovas government. These letters are in the handwriting of Waller, and

at the trial he acknowledged having written them."

These conclusions, stated in a letter of Dec. 12, 1895, had been briefly summarized in a telegram of Dec. 7, as follows:

"It is proper to state that before examining the evidence I had been inclined to believe, from the information I could gather, that Waller was perhaps convicted on insufficient evidence; that on account of the prejudice against him he might not have had a fair trial. After examining the original letters of Waller I have no doubt whatever of his guilt. It was not a case of inadvertent or imprudent writing, but was a deliberate attempt to give information to the enemy to the prejudice of the military situation of France. The evidence fully sustains the charge. The whole tenor of the correspondence discloses his guilty intention, and no court could have hesitated to condemn him."

It should be further stated that considerable corroboration of the conclusions thus arrived at by Mr. Eustis is found in the collateral information which has come to the possession of the department, including the statement of Mrs. Waller and her son, Paul Bray. Secretary Olney quotes some of this corroborative evidence and proceeds as follows:

"These extracts from letters and minutes are not only in line with the results reached by Mr. Eustis, but raise the serious question whether Waller was not intriguing not merely against the French but against the safety and lives of American citizens. On all the evidence, and in view particularly of his own letters, Waller was unquestionably guilty of an offense against the French government of a serious character and fully justifying severe punishment."

The secretary tells how, while waiting to be supplied with the copy of the evidence taken in the court-martial, Mr. Eustis submitted the record to an eminent French lawyer to get his opinion upon the validity of the proceedings, and he found that they could not be challenged through the courts. When the evidence was produced and showed Waller's guilt it was realized that an attack upon the record could, even if successful on pure technicalities, do no more than accomplish Waller's release. Damages could only be sought later. Mr. Olney says:

"But, in view of Waller's willful and culpable attempt against the French authority in Madagascar, it is manifest that no claim for damages on Waller's account could be properly pressed by the United States, or could be expected to be entertained by the French government. An international reclamation, the rejection of which may justify reprisals or even be treated as a *casus belli*, ought not to rest on pure technicalities when the facts and evidence are against the claim. It should be founded upon something more than the mere non-observance of legal formalities—upon something more than irregularities originating in ignorance or inadvertence rather than in intention, and not necessarily nor actually working any substantial wrong or injustice. The rule laid down by the Supreme court of the United States (110 U. S., p. 74) in relation to claims before an international tribunal of arbitration a fortiori applies to a claim made by one government upon another direct. So, though Waller has been deprived by the French of his liberty for nine or ten months, it cannot be said that the penalty to which he has been subjected has been disproportionate to his offense. On the contrary, the penalty regarded as the outcome

of a lawful proceeding would universally be regarded as a moderate one.

"In these circumstances, after urgent representations by this government, an offer was made by the French government to release Waller from further imprisonment and pardon this offense upon the condition that the affair be thereby terminated as between the two governments, and that the United States should make no claim in behalf of the prisoner based upon his arrest, conviction or imprisonment. The acceptance of this offer seemed to be so favorable to Waller, and, in view of all the facts, so considerate toward our government, that under the direction of the president, our ambassador to France has been instructed to give notice of such acceptance on our part and to exchange the notes necessary to carry out the arrangement.

"Waller has not consented to this adjustment and still insists that he should receive compensation from the French government.

"The fact has not been overlooked that Waller is reported to have at one time declared that on the voyage to Marseilles from Tamatave he was subjected to gross personal indignity and abuse. In view, however, of the intrinsic improbability of the charge, of its never having been repeated even by Waller himself, or there being no allusion to it in the narratives of his wife and stepson, of the alleged maltreatment forming no part of Waller's specification of his injuries and claims for damages as communicated to Mr. Eustis, and of the proved unreliability and malice of Waller's complaint of cruelty practiced upon him on shipboard, it is either wholly unfounded or, at the best, grossly exaggerated. It is further discredited by the fact that the treatment of Waller since his arrival in France has been exceptionally considerate and humane. Nevertheless, that no possible injustice might be done to him, Waller's complaint of ill treatment on his journey to France was specifically called to the attention of the French government. That government at once investigated the cruelties charged and insisted that they could never have been inflicted, but undertook, at the request of this government, to investigate and punish any persons found guilty of them. It at the same time declared, however, that even if the complaint should prove to be well founded, it could not entertain any claim

of damages for Waller preferred by the United States, because the French tribunals were open to him, and he could pursue his remedies there either against the government or private individuals in the same manner and with the same effect as could any French citizen under the like circumstances.

"This position of the French government—that claims of aliens cognizable by the courts of a foreign country cannot be made the subject of diplomatic intervention unless there has been a palpable failure of justice after all local judicial remedies have been exhausted—is one upon which this government has often insisted and of which it has often availed itself. Its applicability to the case of Waller was confirmed by the opinion of the eminent French lawyer already referred to, by whom it was pointed out that in respect of remedies in the French tribunals an alien is in all respects on the same footing as a Frenchman, except that the alien must furnish security for costs.

"As our ambassador at Paris, under instructions from this department, could easily arrange to furnish such security should Waller desire to resort to the French courts, there seemed to be nothing in Waller's charges of ill treatment while on his way to France which ought to stand in the way of an acceptance of the offer of the French government for his immediate release. Accordingly, upon the request of Waller, our ambassador at Paris will be instructed to arrange for furnishing security for the costs of any suit before the French tribunals which Waller may be advised the facts of his case will warrant. Mr. Eustis has already been instructed to supply him with the means of transportation to the United States should he desire to come here. It may be added as a part of the history of the case that, the family of Waller being left in destitute circumstances, the department instructed its representatives to provide for their present necessities and to furnish them the means of getting to the United States. That relief was accordingly extended to them, the charges to which this government has thus far been put amounting to \$1,317.14."

On Feb. 20 Waller was set at liberty at Nimes and the famous case was brought to a close entirely satisfactory to the government of the United States.

NATIONAL NOMINATING CONVENTIONS OF 1896.

Arranged in the order in which they were held. For history of all previous conventions see Daily News Almanac for 1893, page 39.

THE PROHIBITIONISTS.

The prohibition party held its seventh national convention at Pittsburg, Pa., on the 27th of May. There were present 811 delegates, representing thirty-nine states and territories. The convention was called to order by Samuel Dickie, chairman of the national committee, who named, on behalf of the committee, A. A. Stevens as temporary chairman of the convention. A minority of the national committee offered the name of Edward J. Wheeler as a substitute for that of Mr. Stevens, but Mr. Dickie refused to entertain the motion. Considerable disturbance followed this action of the chairman, when Mr. Wheeler arose and withdrew in the interest of harmony, and Mr. Stevens took the chair. Alonzo E. Wilson was named as temporary secretary of the convention.

The committee on permanent organization presented the name of Oliver W. Stewart of Illinois for permanent chairman and that of Alonzo E. Wilson of Illinois as permanent secretary. A minority report presented the name of A. A. Stevens of Pennsylvania as a substitute for that of Mr. Stewart. A long and bitter wrangle followed, but the report of the majority was adopted and Mr. Stewart was conducted to the chair. A committee on resolutions was appointed, with James B. Cranfill of Texas as chairman.

The second day of the convention was spent in a long and bitter contest over the party platform. The majority of the committee on resolutions, by Dr. I. K. Funk of New York, reported the following platform:

The prohibition party, in national convention assembled at Pittsburg, Pa., May 27, 1896, acknowledging Almighty God as the source of all power in government, do hereby declare:

1. We hold, with the United States Supreme court, that the statistics of every state show a greater amount of crime and misery attributable to the use of ardent spirits obtained at retail liquor saloons than to any other source. We maintain that the liquor dealers corrupt legislation, debauch voters, bribe officials, intimidate public men, control political parties and make good government in the centers of population impossible.

2. We are unalterably opposed to the alcoholic drink traffic, and declare for the suppression of the manufacture, sale, importation, exportation and transportation of intoxicating liquors for beverage purposes. We utterly reject all plans for regulating or compromising with this traffic, whether such plan be local option, taxation, license or public control.

3. We call the attention of the wage-earners to the fact that the enormous waste caused by the liquor traffic is inevitably at the cost of production, and we maintain that success for the prohibition party will remove this great burden from industry.

4. We stand unequivocally for good government, honestly and economically administered in every detail. We stand for full protection of the elective franchise, which is the basis of our civil liberties. With the destruction of the liquor power, the greatest corrupter and debaucher of votes and voters will have disappeared, and

the people and their representatives will be free to promote the best interests of all.

5. There is no greater evil to the nation than the competition of political parties for the liquor vote, and any party not openly opposed to the saloon will engage in such competition, court the favor of the criminal classes, and barter away public morals and the purity of the ballot.

6. We call upon voters to enforce the declaration of the churches against the liquor traffic by supporting the prohibition party, which aims to settle the only political question upon which the churches make deliverances, and we maintain that a new era of political righteousness will come when the voting members of the churches stand at the ballot box in state and national elections for the principles and candidates of the prohibition party.

7. We call attention to the fact that every political revolution in our country has been brought about by the concentration of thought upon some great issue. We hold that the time is now ripe for a successful political movement against the liquor traffic, and we invite the co-operation of all citizens who are in sympathy with this purpose, whatever their opinions may be upon other questions, confident that a party which works in a righteous conflict with the saloon will have intelligence and conscience enough to settle other problems of government and maintain the interests of the republic.

8. No citizen should be denied the right to vote on account of sex.

9. Suffrage should not be denied to any citizen on account of sex.

10. All citizens should be protected in their right to one day's rest without opposing any one who conscientiously observes any other than the first day of the week.

11. American public schools taught in the English language should be maintained, and no public funds should be applied to sectarian institutions.

12. The president, vice-president and senators of the United States should be elected by the vote of the people.

13. Ex-soldiers and sailors should be granted pensions graded upon disability and time of service, not merely as a debt of gratitude, but for service rendered in the preservation of the union.

14. Our immigration laws should be so secure as to exclude paupers and criminals; immigrants wishing to become citizens should be required to register in a court, and the right of franchise should not be granted until five years thereafter.

15. None but citizens should be allowed to vote in any state, and naturalized citizens should not be allowed to vote for one year after naturalization papers are issued.

The minority report was then presented by John P. St. John of Kansas, the salient points of which were as follows:

All money should be issued by the government only, and without the intervention of any private citizen, corporation or banking institution. It should be based upon the wealth, stability and integrity of the nation, and should be a full legal tender for all debts, public and private, and should be of sufficient volume to meet the demands of the legitimate business interests of the country, and for the purpose of honestly liquidating

ting all our outstanding obligations, payable in coin, we demand the free and unlimited coinage of both gold and silver at a ratio of 16 to 1, without consulting any other nation.

Land is a common heritage of the people, and should be preserved from monopoly and speculation. All unearned grants of land subject to forfeiture should be reclaimed by the government, and no portion of the public domain should hereafter be granted except to actual settlers, continuous use being essential to tenure.

Railroads, telegraphs and other natural monopolies should be owned and operated by the government, giving to the people the benefit of service and product therefrom at cost.

The national constitution should be so amended as to allow the national revenues to be raised by equitable adjustment of taxation on the properties and incomes of the people, and import duties should be levied only as a means of securing equitable commercial relations with other nations.

The contract-labor system through which speculators are enriched at the expense of the state should be abolished.

Believing that free expression of the popular will is essential in a representative government, we favor the adoption of the initiative and referendum, and proportional representation.

The day was spent in debating the question as to the adoption of the reports. A vote was at last reached on tabling the minority report and on the adoption of the money plank of the minority. The votes on these two questions were as follows:

States.	To table minority report.		To adopt money plank.	
	Yeas.	Nays.	Yeas.	Nays.
Arkansas	2	3	2	3
California	7	7	7	7
Colorado	10	10	10	10

Dist. of Columbia	1	1	1	1
Total	310	492	387	427

Following this action Mr. Patton of Illinois moved as a substitute for the platform presented by the majority the platform to be found elsewhere under the heading of "National Party Platforms," as the platform of the party, which was adopted. At this juncture a large body of delegates (about 300) left the convention. At the evening session Joshua Levering of Maryland was nominated for president and Hale Johnson of Illinois for vice-president.

THE NATIONAL PARTY.

The "bolters" from the prohibition convention, numbering some 300 delegates, assembled in Pittsburg on the 29th of May, and were called to order by A. L. Moore of Michigan, who was made the permanent chairman of the convention. A committee on resolutions, consisting of C. K. Perrine and Helen M. Gougar, was appointed and reported the platform given under the head of "National Party Platforms," elsewhere in this volume. A roll of the states was called to ascertain the number of delegates present and the states represented in the convention, which resulted as follows:

Arkansas	2	Montana	1
California	7	Nebraska	18
Colorado	3	New Hampshire	3
Florida	2	New York	15
Illinois	23	North Carolina	3
Indiana	39	North Dakota	1
Iowa	16	Ohio	43
Kansas	25	Pennsylvania	17
Kentucky	5	Vermont	2
Maryland	6	Washington	4
Massachusetts	10	West Virginia	2
Michigan	26	Wisconsin	7
Minnesota	5		
Mississippi	2	Total	299
Missouri	12		

Among those who joined the new party from the prohibitionists were the following state chairmen of the prohibition party: J. M. Glass of California, B. F. Wright of Iowa, G. G. Wharton of Kansas, Dr. H. A. Gibbs of Massachusetts, John Geiberson of Michigan, C. E. Bentley of Nebraska, J. H. Southgate of North Carolina and L. B. Logan of Ohio.

Nominations for presidential and vice-presidential candidates followed the adoption of the report of the committee on a name for the new party, and the convention adjourned. The nominations were C. E. Bentley of Nebraska for president and J. H. Southgate of North Carolina for vice-president, which were made by acclamation.

THE REPUBLICAN PARTY.

The eleventh national convention of the republican party assembled in St. Louis on the 16th day of June and effected a temporary organization, with C. W. Fairbanks of Indiana as temporary chairman. The usual committees were appointed, that on resolutions having Senator Foraker of Ohio for chairman, he being elected over Senator Dubois of Idaho, who represented the free-silver element of that committee. On the second day of the convention Senator John M. Thurston of Nebraska was chosen permanent chairman of the convention. The first test as to the spirit of the body on the question of candidates was given on Wednesday, when the report of the committee on credentials was presented. The majority report was adopted by a vote of 545 to 359—a McKinley and anti-McKinley test vote.

At a meeting of the committee on resolutions Senator Teller of Colorado offered a resolution declaring for the free coinage of

silver at the ratio of 16 to 1 for the financial plank of the platform, which was voted down by a vote of 41 to 10. The affirmative votes were cast by the members of the committee from the states of Colorado, California, Utah, Montana, Idaho, Wyoming, Arizona, Nevada, North Carolina and New Mexico. On Thursday Mr. Foraker presented the report of the committee on resolutions. Senator Teller presented the following as a report from the minority:

"We, the undersigned members of the committee on resolutions, being unable to agree with a portion of the majority which treats on the subject of coinage and finances, respectfully submit the following paragraph as a substitute therefor:

"The republican party authorizes the use of both gold and silver as equal standard money and pledges its power to secure the free and unlimited coinage of gold and silver at our mints at the ratio of sixteen parts of silver to one of gold."

He moved the adoption of this as a substitute for the financial plank in the platform as reported by the majority. Mr. Foraker moved that the substitute be laid on the table. The vote upon this question was as follows:

	Whole	No.	Yeas.	Nays.
Alabama	22	19	7	
Arkansas	16	15	1	
California	18	3	15	
Colorado	8		8	
Connecticut	12	12		
Delaware	6	6		
Florida	8	6	2	
Georgia	26	23	3	
Idaho	6		6	
Illinois	48	47	1

District of Columbia	2	2		
Alaska	4	4		
Virginia	24	17	7	
Total	923	812½	110½	

The platform as adopted will be found under the head of "National Party Platforms" in this volume.

Immediately after the adoption of the platform the chair recognized Senator Cannon of Utah, who read a protest signed by Senators Teller of Colorado, Dubois of Idaho, Cannon of Utah and Pettigrew of South Dakota, and Congressmen Hartman of Montana and Cleveland of Nevada. The statement declares that:

"As surely as it is requisite for peace and progress that minorities shall yield to majorities in matters of mere method, just so surely is it necessary for that same peace and progress that minorities shall not yield in matters of fundamental truth."

It recites the previous declarations of the republican party for bimetalism, and goes on, in part:

"History, philosophy, morals, all join with the commonest instinct of self-preservation in demanding that the United States shall have a just and substantially unvarying standard composed of all available gold

and silver, and with it our country will progress to financial enfranchisement. But with a single gold standard the country will go on to worse destruction, to continued falling prices, until our people would become the hewers of wood and the drawers of water for the consumers in creditor nations of the earth. * * * We hold that this convention has seceded from the truth; that the triumph of such secession would be the eventual destruction of our freedom and our civilization. To that end the people will not knowingly follow any political party, and we choose to take our place in the ranks of the great mass of citizens who realize that the hour has come for justice.

* * * Accepting the fiat of the convention as the present purpose of the party, we withdraw from this convention to return to our constituents the authority with which they invested us, believing that we have better discharged their trust by this action, which restores to them authority unsullied, than by giving cowardly and insincere indorsement to the greatest wrong ever willfully attempted within the republican party, once redeemer of the people, but now about to become their oppressor, unless providentially restrained by the votes of freemen.

The conclusion of the reading was greeted by a storm of hisses and groans. The seceding senators and their associates then left the convention hall. The seceding delegates were:

Henry M. Teller, Frank C. Goudy, John W. Rockefeller, James M. Downing, Archie M. Stevenson, J. F. Vivian, C. H. Brickenstein, C. Joseph Hart, from Colorado.

Frederick T. Dubois, Willis Sweet, Lytleton Price, A. B. Campbell, Benjamin E. Rich, Alexander Robinson, from Idaho.

Charles D. Hartman, from Montana.

Frank J. Cannon, Clarence E. Allen, Thomas Kerns, from Utah.

Richard F. Pettigrew, from South Dakota.

A. C. Cleveland, Enoch Strother, from Nevada.

The convention then proceeded with the call of states for nominations for the presidency. Senator W. B. Allison of Iowa was nominated by R. M. Baldwin of Council Bluffs. Thomas B. Reed of Maine was nominated by Senator Lodge of Massachusetts. Levi P. Morton of New York was nominated by Chauncey M. Depew. William McKinley of Ohio was nominated by Senator-elect Foraker of Ohio. Senator M. S. Quay of Pennsylvania was nominated by Gov. Hastings of that state. The convention then began balloting. Only one ballot was necessary, the result being as follows:

	McKinley.	Morton.	Quay.	Reed.
Alabama	19	1	..	2
Arkansas	16	..	..	..
California	18	..	..	..
Colorado	..	..	..	..
Connecticut	7	..	..	5
Delaware	6	..	..	..

Arizona	6	..	..	..
New Mexico	5	..	..	..
Oklahoma	4	..	..	1
Indian Territory	6	..	..	..
Dist. Columbia	..	..	..	1
Alaska	4	..	..	..
Total	631 1/2	58	61 1/2	84 1/2

Mr. Allison received 35 1/2 votes—26 from Iowa, 3 each from Texas and Utah, 1 each from New Mexico, Oklahoma and District of Columbia, and 1/2 from Louisiana. Senator Cameron of Pennsylvania only received 1 vote—from Montana. Four of Montana's votes were cast blank.

Necessary for choice, 454. Total number delegates present, 906.

The vote of Ohio carried the McKinley vote up to the number necessary to nominate him, and great enthusiasm was manifested. As soon as the chairman had announced the result of the ballot, Senator Lodge moved that the nomination of McKinley be made unanimous, and Mr. Platt of New York seconded the motion, pledging that New York would "give its usual (if not double its usual) republican majority." The motion was adopted by a rising vote, and the chair announced Mr. McKinley duly nominated.

The convention at once, at 6:20 p. m., proceeded to the selection of a candidate for vice-president. After nominations a ballot was taken, which resulted in the nomination of Garret A. Hobart of New Jersey.

The vote in detail on vice-president was as follows:

	No. Votes.	Hobart.	Evans.	Bulkley.
Alabama	22	10	11	1
Arkansas	16	10	5	1
California	18	14	3	1
Colorado	8	..	..	..
Connecticut	12	..	..	12

Total	922	533½	280½	39

*Absentees—Indiana, 2; Iowa, 3; Kentucky, 1; Maine, 5; Montana, 5; Nevada, 3; Texas, 7; Wisconsin, 1; Missouri, 1.

Votes were cast for the following:

Reed, 3; Thurston, 2; Frederick Grant, 2; Dewey, 3; Morton, 1; absent, 23. Necessary to a choice, 448. Lippitt received 8 votes, cast by Rhode Island, and Walker 24, cast by Virginia. The nomination of Mr. Hobart was made unanimous.

Committees were appointed to notify the nominees, and the convention adjourned sine die.

THE DEMOCRATIC PARTY.

The seventeenth national convention of the democratic party assembled at Chicago on Tuesday, July 7. The delegates were from the start divided into two factions, which may be distinguished as the free-silver and the gold wings. Senator Hill of New York, as the leader of the gold wing, was nominated by the chairman of the national committee for the temporary chairman of the convention. The free-silver wing opposed the nomination, and Senator Daniel of Virginia was nominated and elected by a vote of 556 to 349. Senator Jones of Arkansas was chosen permanent chairman. The usual committees were appointed, and the convention adjourned to the next day.

The sub-committee to draft the platform had Senator Jones of Arkansas for its chairman, and on Thursday he reported the majority platform to the convention. This will be found among the national platforms elsewhere in this volume. The minority, by Senator Hill, presented the following report:

To the Democratic National Convention: Sixteen delegates, constituting the minority of the committee on resolutions, find many declarations in the report of the majority to which they cannot give their assent. Some of those are wholly unnecessary. Some are ill considered and ambiguously phrased, while others are extreme and revo-

lutionary of the well-recognized principles of the party. The minority content themselves with this general expression of dissent, without going into a specific statement of the objectionable features of the report of the majority, but upon the financial question, which engages the chief share of public attention, the views of the majority differ so fundamentally from what the minority regards as vital democratic doctrine as to demand a distinct statement of what they hold to, as the only just and true expression of democratic faith upon this prominent issue, as follows, which is offered as a substitute for the financial plank in the majority's report:

"We declare our belief that the experiment on the part of the United States alone of free silver coinage and a change of the existing standard of value independently of the action of other great nations would not only impair our finances, but would retard or entirely prevent the establishment of international bimetalism, to which the efforts of the government should be steadily directed. It would place this country at once upon a silver basis, impair contracts, disturb business, diminish the purchasing power of the wages of labor and inflict irreparable evils upon our nation's commerce and industry.

"Until international co-operation among leading nations for the coinage of silver can be secured we favor the rigid maintenance of the existing gold standard as essential to the preservation of our national credit, the redemption of our public debt and the keeping inviolate of our country's honor. We insist that all our paper and silver currency shall be kept absolutely at a parity with gold. The democratic party is a party of hard money, and is opposed to legal-tender paper money as a part of our permanent financial system, and we, therefore, favor the gradual retirement of all United States notes and treasury notes under such legislative provisions as will prevent undue contraction.

"We demand that the national credit shall be resolutely maintained at all times and under all circumstances."

The minority also feel that the report of the majority is defective in failing to make any recognition of the honesty, economy, courage and fidelity of the present democratic administration. And they therefore offer the following declaration as an amendment to the majority report:

"We commend the honesty, economy, courage and fidelity of the present democratic national administration." David B. Hill, New York; William F. Vilas, Wisconsin; George Gray, Delaware; John Prentiss Poe, Maryland; Irving W. Drew, New Hampshire; C. O. Holman, Maine; P. J. Farrell, Vermont; Lynde Harrison, Connecticut; David F. Baker, Rhode Island; T. A. C. Weadock, Michigan; James E. O'Brien, Minnesota; John E. Russell, Massachusetts; Robert E. Wright, Pennsylvania; William R. Steel, South Dakota; Allan A. McDermott, New Jersey; C. D. Rogers, Alaska.

A long, stormy and bitter debate followed, in which a large number of the delegates took part. Senator Tillman of South Carolina introduced the following resolution:

"We denounce the administration of President Cleveland as undemocratic and tyrannical, and as a departure from those principles which are cherished by all liberty-loving Americans. The veto power has been

used to thwart the will of the people as expressed by their representatives in congress. The appointive power has been used to subsidize the press, to debauch congress and to overawe and control citizens in the free exercise of their constitutional rights as voters. A plutocratic despotism is thus sought to be established on the ruins of the republic. We repudiate the construction placed on the financial plank of the last democratic national convention by President Cleveland and Secretary Carlisle as contrary to the plain meaning of English words, as being an act of bad faith, deserving the severest censure.

"The issue of bonds in the time of peace with which to buy gold to redeem coin obligations payable in silver or gold, at the option of the government, and the use of the proceeds to defray the ordinary expenses of the government, are both unlawful and usurpations of authority deserving impeachment."

This resolution was debated by Senator Hill, Senator Vilas, Gov. Russell, and closed by Mr. Bryan of Nebraska, who moved to lay it on the table. It was in this speech that he used the figure of speech that set the convention so strongly in his favor—his declaration regarding "the crown of thorns" and "cross of gold." The previous question was then demanded on the adoption of the substitute offered by Senator Hill, and it was defeated by a vote of 626 to 303. A vote was then taken on Senator Tillman's resolution denouncing the president, and it was defeated by a vote of 564 to 357. The roll of the states was then called on the adoption of the platform as reported by the committee on resolutions, with the following results:

	Yeas.	Nays.
Alabama	22	..
Arkansas	16	..
California	18	..
Colorado	8	..
Connecticut	..	12
Delaware	1	5
Florida	5	3

Indian Territory	6	..
Total	628	301

A roll of the states was then called for presidential nominations. Senator Vest placed in nomination Richard P. Bland of Missouri; H. T. Lewis of Georgia nominated William J. Bryan of Nebraska; Senator Turpie of Indiana nominated Claude Matthews of that state; Fred White of Iowa nominated Horace Boies of that state; John S. Rhea named Joseph S. C. Blackburn of Kentucky; A. W. Patrick nominated John R. McLean of Ohio; Mr. Harritt nominated Robert E. Pattison of Pennsylvania, and Mr. Miller nominated Sylvester Pennoyer of Oregon. Five ballots were taken, as follows:

Scattering, 5. Total, 930.

After the nomination of Mr. Bryan the convention adjourned to Saturday morning. Upon assembling, on the fifth ballot Arthur Sewall of Maine was nominated for the vice-presidency, the ballots being as follows:

Candidates.	1st.	2d.	3d.	4th.
Sewall	100	27	97	262
McLean	111	158	210	296
Williams (Mass.)	76	16	15	19
Lewis	11	..	..	..
Clark	50	22	22	46
Fithian	1	..	..	..

Teller	1	..	..	..
Pattison	2	1	1	1
White	1	..	..	..
Not voting	258	255	260	252

On the fifth and last ballot Sewall received 514, McLean 78, scattering 103 and not voting 235, and Mr. Sewall was declared to be the nominee of the convention.

The convention almost immediately adjourned sine die.

THE SOCIALISTIC LABOR PARTY.

The third national nominating convention of the socialistic labor party met in the city of New York on the 4th of July and continued its session until the 9th, eighty-five delegates being present, representing the states of Connecticut, Illinois, Iowa, Maryland, Massachusetts, Missouri, New Hampshire, New Jersey, New York, Ohio, Pennsylvania and Rhode Island.

Thomas C. Brophy of Massachusetts was made the permanent chairman of the convention. The usual committees were appointed and their reports submitted. The platform adopted will be found under the heading "National Party Platforms," elsewhere in this volume.

Charles N. Matchett of New York was nominated for the presidency on the first ballot, the vote standing: Charles N. Matchett of New York, 41; Matthew Maguire of New Jersey, 23; William Watkins of Ohio, 4, and George R. Reare of Missouri, 1. Matthew Maguire of New Jersey was nominated for vice-president by acclamation.

THE PEOPLE'S PARTY.

The second national convention of the people's party met at St. Louis on Wednesday, July 22. Senator Marion Butler of North Carolina was chosen temporary chairman without a formal vote, since all the factions desired to avoid a test of strength. The committee on credentials was appointed, and the convention took a recess. At the evening session it was found that no provision had been made for lighting the hall, and the convention was forced to adjourn. The committee on credentials decided four state contests.

On Thursday committees on organization, resolutions and notification were appointed. The afternoon was consumed by discussion of and voting upon the report of the credentials committee. The majority report on permanent organization, proposing Senator Allen of Nebraska for permanent chairman, was then presented, together with the minority report, presenting the name of James E. Campion of Maine. Amid great confusion a vote was taken, which resulted in 758 votes for Allen, 564 for Campion and 1 for Ignatius Donnelly. This vote was generally regarded as a test between the Bryan and anti-Bryan ("middle of the road") factions in the convention. Senator Butler's motion providing for the appointment of a committee to confer with a similar committee of the silver convention, then in session in St. Louis, was then agreed to.

On Friday much time was taken up in discussing the two reports of the committee on rules. The minority report, which provided for the nomination of a candidate for vice-president preceding the nomination of a presidential candidate, thus reversing the regular procedure, was adopted by a vote of 785 to 615. Gen. Weaver of Iowa, chairman of the resolutions committee, then read the platform agreed upon by the majority of the committee. J. S. Coxey of Ohio presented various amendments, including his non-interest-bearing bond and good-roads propositions, woman suffrage and government control of all necessary industries. Mr. Kearby of Texas then presented the minority report, which was shorter and less elaborate than the other. Mr. Vallette of Rhode Island, a member of the committee, presented a platform which was said to be simply a paraphrase of the declaration of independence. The majority report was then

adopted, all the amendments having been tabled. This platform will be found under the heading, "National Party Platforms," elsewhere in this volume.

The evening session on Friday was taken up with nominating speeches for the vice-presidential candidate. The names of Arthur Sewall of Maine, ex-Congressman Thomas E. Watson of Georgia, Representative Harry Skinner of North Carolina, Frank Burkitt of Mississippi, A. L. Mimms of Tennessee and Mann Page of Virginia were presented. Watson was nominated on the first ballot.

On Saturday the national committee was named, and then the convention proceeded to present the names for the presidential nomination. Gen. Weaver nominated W. J. Bryan of Nebraska and Henry W. Call nominated S. F. Norton of Chicago. A telegram from Mr. Bryan directing that his name be withdrawn if Sewall should be defeated for nomination was reported to have been withheld from the convention, although it had already been published in the newspapers. The vote resulted as follows:

	Bryan.	Norton
Alabama	38 1/4	15 3/4
Arkansas	25	12
California	45	12
Colorado	45	12
Connecticut	6	1
Delaware	3	1
Florida	8	1
Georgia	56	5
Idaho	7	15

Arizona	6	16 1-5
District of Columbia	6	16 1-5
New Mexico	6	16 1-5
Oklahoma	9	16 1-5
Indian Territory	6	16 1-5

Totals as officially announced—Bryan, 1,042; Norton, 321; Donnelly, 3; Debs, 8; Coxey, 1.

At 4:40 p. m. the convention adjourned sine die.

THE SILVER NATIONAL PARTY.

The first national convention of the new silver party met at St. Louis Wednesday, July 22, with about 450 delegates present. Representative Newlands of Nevada was made temporary chairman. The usual committees were appointed. The resolutions committee chose Gen. A. J. Warner of Ohio as chairman. The committee on permanent organization, of which C. G. Bradshaw of Montana was chairman, chose W. P. St. John of New York for permanent chairman of the convention and Charles A. Towne of Minnesota for vice-chairman. Both were elected, and Mr. St. John took the platform.

A special committee was then appointed to confer with a similar committee of the populist convention.

On Thursday Vice-Chairman Towne made an address strongly favoring Bryan. A poll to ascertain the previous political affiliations of the delegates showed 496 republicans, 135 democrats, 47 populists, 12 independents, 9 prohibitionists, 1 nationalist and 1 greenbacker, representing in all twenty-five states. Secretary Diffenderfer's statement showed 946 delegates from thirty-six states and territories.

On Friday the platform was read by Senator Jones of Nevada and unanimously adopted. It will be found in full under the heading of "National Party Platforms," elsewhere in this volume.

Following the adoption of the platform nominations for presidential and vice-presidential candidates were called for. E. C. Little of Kansas presented as a candidate for the nomination the name of W. J. Bryan, who was nominated by acclamation, after much enthusiastic speech-making. Mr. Sewall was also nominated by acclamation. At 6:30 p. m. the convention adjourned sine die.

THE NATIONAL (GOLD) DEMOCRATS.

A large body of the democratic party, especially at the east, was dissatisfied with both the platform and the nomination of the national democratic convention that assembled at Chicago in July, and no sooner had the convention adjourned than steps were taken to call another convention and place in nomination candidates in opposition to Bryan and Sewall, upon a platform committed to the gold standard. Early in August the following call was issued:

"Indianapolis, Ind., Aug. 7.—To the democrats of the United States: A political party has always been defined to be an association of voters to promote the success of political principles held in common. The democratic party during its whole history has pledged to promote the liberty of the individual, the security of private rights and property and the supremacy of the law. It has always insisted upon a safe and stable money for the people's use. It has insisted upon the maintenance of the financial honor of the nation, as well as upon the preservation inviolate of the institutions established by the constitution. These, its principles, were abandoned by the supposed representatives of the party at a national convention recently assembled at Chicago. The democratic party will, therefore, cease to exist unless it is preserved by the voluntary action of such of its members as still adhere to the fundamental principles. No majority of the members of the convention, however large, had any right of power to surrender these principles. When they undertook to do so, that assemblage ceased to be a demo-

cratic convention. The action taken, the irregular proceedings and the platform enunciated by that body were, and are, so utterly and indefensibly revolutionary and constitute such radical departures from the principles of true democracy which should characterize a sound and patriotic administration of our country's affairs that its results are not entitled to the confidence or support of true democrats. For the first time since national parties were formed there is not before the American people a platform declaring the principles of the democratic party as recognized and most courageously and consistently administered by Jefferson, Jackson and Cleveland, nor are there nominees for the offices of president and vice-president of the United States pledged to carry those principles into practical effect. The faithful and true democrats of the United States are determined that their principles shall not be ruthlessly surrendered, nor the people be deprived of an opportunity to vote for candidates in accord therewith.

"Therefore the national democratic party of the United States, through its regularly constituted committee, hereby calls a national convention of that party for the announcement of its platform and the nomination of candidates for the offices of president and vice-president of the United States and the transaction of such business as is incidental thereto, to be held at Indianapolis, Wednesday, the 2d day of September, 1896, at 12 o'clock noon, and hereby requests that the members of the party in the several states who believe in sound money and the preservation of law and order, and who are unalterably opposed to the platform adopted and candidates nominated at Chicago, will select in such manner as to them shall seem best, a number of delegates to the same, equal to twice the number of electoral votes to which such states are respectively entitled. Such delegates shall be duly credited, according to the usages of the democratic party. Their credentials shall be forwarded or delivered to the secretary of this committee with all convenient speed, and this committee will make up and announce the roll of the delegates entitled to participate in the preliminary organization of the convention.

"JOHN M. PALMER of Illinois, Chairman.
"JOHN R. WILSON of Indiana, Secretary.
"J. M. FALKNER of Alabama.
"JOEL SPERRY of Connecticut.
"JOHN L. GASKINS of Florida.
"T. B. NEAL of Georgia."

Pursuant to this call the convention assembled at Indianapolis, Ind., on the 2d day of September, and was called to order by Senator John M. Palmer of Illinois.

There were present 824 delegates, representing forty-one states and three territories. The states not represented were Wyoming, Utah, Idaho and Nevada. Ex-Gov. Roswell P. Flower of New York was made temporary chairman and Senator Donelson Caffery of Louisiana was elected permanent chairman. The usual committees were appointed.

On Thursday the platform reported by the committee on resolutions was unanimously adopted. This platform will be found under the heading "National Party Platforms," elsewhere in this volume. Nominations for president and vice-president were called for and John M. Palmer of Illinois and E. S. Bragg of Wisconsin were placed in nomination. One ballot only was taken, which resulted as follows:

	Total vote.	Palmer.	Bragg.		Total vote.	Palmer.	Bragg.
Alabama	22	16	6	New York	72	47	25
Arkansas	16	16	..	North Carolina	22	22	..

VENEZUELA AND GREAT BRITAIN.

Following the message of the president on the Venezuelan dispute (see Daily News Almanac, 1896, page 341) congress passed a law providing that the sum of \$100,000 or so much thereof as may be necessary be appropriated for the expenses of a commission to be appointed by the president to investigate and report upon the true divisional line between the republic of Venezuela and British Guiana, which was approved Dec. 21, 1895.

Under the authority conferred by this act the president appointed the following named commissioners "to investigate and report upon the true divisional line between the republic of Venezuela and British Guiana": David J. Brewer, associate justice of the Supreme court of the United States, who was chosen president of the commission; Richard H. Alvey, chief justice of the Court of Appeals of the District of Columbia; Andrew D. White, ex-United States minister to Germany and Great Britain; Frederic R. Coudert, counsel for the United States in the Bering sea arbitration, and Daniel C. Gilman, president of Johns Hopkins university. Great Britain was asked to submit to the commission its claims.

Great Britain's claims have had a degree of indefiniteness about them that has varied with different periods, that country having since 1815 established four boundary lines, each one crowding farther than the preceding one to the west on to Venezuela's territory. The first of these was the Schomburgk, laid out in 1841; the second was the Aberdeen line, drawn in 1844; the third was the Grenville boundary, drawn in 1881, and the last was located very much farther west, by a claim with little or no validity to it.

Immediately following the peace of Paris, in 1815, which confirmed the right of Great Britain to the three provinces in Guiana which she had wrested from the Dutch, there were some enthusiasts in England who conjectured that British Guiana comprised nearly all of South America below the Orinoco river.

Sir Andrew Halliday, who visited Guiana, in a book published in 1837, in a glowing description of British Guiana, said:

"The coast line of this rich and important colony may, as I have stated, extend to a little more than 200 miles; but its depth or length inland has not, so far as I am aware, been as yet determined.

"One or two travelers do say that they had penetrated so far to the south that from the summit of the Cordilleras they could discern the south Atlantic ocean and that from said heights the waters parted north and south. Hence some have conjectured that this is the southern boundary of British Guiana, though its true latitude has neither been ascertained nor is it at all stated in any work that I am aware of."

One fact is made clear by Sir Andrew Halliday in his book—namely, that Great Britain up to 1837 had made no definite claim to boundaries for British Guiana, and had not even attempted to lay out boundaries.

Exactly what Great Britain conquered from the Dutch were the colonies along the Essequibo. The contention of Great Britain has been that she is entitled to the whole immense valley of the Essequibo and to the entire Essequibo watershed, extending in all directions to the very ridges of high mountain ranges, hundreds of miles distant from the colonies which the British arms originally took by conquest.

Sir Andrew Halliday's statements regarding the British Guiana boundary were corroborated by Sir Robert H. Schomburgk in a book published by him in London in 1840, entitled "A Description of British Guiana." The object of the work was to give an account of whatever related to the physical structure, natural productions and present and future capabilities of the colony of British Guiana, including statistical information. The whole embraced the results of Schomburgk's scientific expeditions of discovery in Guiana from 1835 to 1839 under the direction of the Geographical society of London.

In his preface Schomburgk said: "Though the accompanying map is incomplete, many of its details resting on information procured from the natives, yet the greater portion has been laid down from my own personal observations and offers a correct view of the facilities which the numerous rivers and their tributaries afford for internal navigation, and will show how important it is to the colony that its boundaries should be more clearly defined than at present and freed from the encroaching claims of the adjacent states, which, if admitted, would deprive British Guiana of the greater part of her most valuable territory."

Schomburgk's sketch map of British Guiana gave to the British such a liberal slice of Venezuela that it was decided by the British foreign office that he was just the right man to lay out a boundary line between Venezuela and British Guiana.

Accordingly, in 1840, he was appointed as her majesty's commissioner for surveying the boundaries of British Guiana. He proceeded to South America and was engaged in that work three years, completing his labors in 1843. They found official expression in a line which has ever since been known as the "Schomburgk line."

A comparison of the boundary line in Schomburgk's sketch map, made prior to 1840, with the "Schomburgk line" laid down by him as her majesty's commissioner, will show that the two are practically identical. When Schomburgk drew his arbitrary line he set up posts, to indicate British dominion, at Point Barima, Amacuro and other localities. The Venezuelan government made a vigorous protest, and Lord Aberdeen, then English foreign secretary, ordered the posts removed. This was taken to indicate that England felt no certainty of the justice of her claim.

Up to this time, it will be seen, England did not contend that she was entitled to all of the watershed of the Essequibo. This is made clear by the fact that neither the Schomburgk line nor Lord Aberdeen's proposed boundary, nor any suggested boundary of England, until within very recently, included the watershed of the Cuyuni river, a tributary of the Essequibo. The most extreme claim of England until the present was for a boundary crossing the Rio Cuyuni at a point east of its junction with the Uspania river.

The fluctuating claims of England are further illustrated by a map published in London in 1842 under the superintendence of the Society for the Diffusion of Useful Knowledge. The authorities given for the map are Humboldt, Schomburgk, Godazzi and others. The difference between this line and the Schomburgk line is that, while they have practically the same starting and ending points, the former is straighter than the latter and takes in more Venezuelan territory.

The old French geographers did not give British Guiana any territory to speak of west of the Essequibo river. The *Le Dictionnaire Geographique Universel*, published in Paris in 1828, stated the area of British Guiana to be only 3,120 square leagues. It called British Guiana the smallest of the Guianas.

In an old French map in the *"Atlas Universel de Geographie,"* published in Paris in 1839, the line of British Guiana extends parallel, generally speaking, with the Essequibo river, distant only a few leagues west thereof.

This was the dispute between Venezuela and Great Britain which called out from the United States a proposal for arbitration, and a good deal of diplomatic correspondence followed in which Great Britain did not express a willingness to join, and this was the condition of affairs at the opening of 1896.

The commissioners appointed by the president met on the 4th of January, 1896, and began their work. The commission had little material upon which to base its investigations, and both the British and Venezuelan governments were invited to present their cases and the evidence upon which their respective claims were based. Lord Salisbury replied Feb. 7 that any information at the command of her majesty's government would be readily placed at the disposal of the president. The British blue book on the Venezuelan question was presented to the house of commons on the 6th of March, 1896, and gave in general outline the position of Great Britain in the boundary dispute. The history of the claim is too voluminous for publication in these pages, but the following is a summary of the position of Great Britain as published in the work referred to:

1. Long prior to and at the time of the treaty of Munster, in 1646, the Dutch founded settlements in various parts of British Guiana, particularly on the coast.

2. The only Spanish settlement prior to them was Santo Home de Guayana.

3. During the whole period from 1648 to 1796 the Dutch had uninterrupted possession of the entire coast line and the River Corentin to Barima.

4. During the same period they had explored the upper portions of nearly all the rivers and made many settlements in adjacent districts.

5. Prior to 1723 there was no settlement of Spaniards except Santo Home de Guayana.

6. Between 1724 and 1796 Capuchin missions were established southward of the Orinoco and gradually extended eastward toward the Dutch territory, the farthest point occupied by the Spaniards being Tummeremo, founded about 1788.

7. Before 1796 the Dutch had settled far up the Cuyuni, a Dutch post was established near the Yuruary and the Dutch had full control of the whole basin of the Cuyuni.

8. Except for the settlement of Santo Home de Guayana and their missions, the Spaniards exercised no authority in the territory now in dispute.

9. Great Britain, on becoming possessor of the colony, succeeded to all the rights of the Dutch.

10. After 1796 Great Britain extended her settlements and exercised over the territory originally claimed by the Dutch all the rights whereby nations usually indicate a claim to territory.

11. Neither Spain nor Venezuela, after the latter had declared her independence, at any time had possession of or dominion over the territory in question.

12. Great Britain, while maintaining her just rights, has consistently shown a desire to make a fair arrangement with Venezuela in regard to the boundary.

13. The claim of Venezuela that her territory extends to the Essequibo is based on contentions nowise supported by facts and cannot be justified on any reasonable ground.

The foregoing thus establishes Great Britain in her strict right to be entitled to the

territory extending to Barima, including the watersheds of the Essequibo, Cuyuni, Yuruary, Pomaroon, Waini and Barima.

The British press was greatly encouraged by the strong showing made by the government, and that opinion was shared quite extensively in the United States. On the 10th of March the counsel for the republic of Venezuela presented its case to the commission, which made a volume of 440 pages. The case of Venezuela was confined to diplomatic correspondence extending from 1822 to the present time. The preface of the book is an official letter from the Palmerston ministry of 1840, which discredited the Schomburgk line as a boundary, which is followed by the treaty of cession to Great Britain by the Dutch in 1814. The volume contains:

1. Instructions from the secretary of foreign affairs of Colombia, of which Venezuela was a part in 1822, to her minister in London, ordering him to insist that the colonists who had crossed the Essequibo should submit to the laws of Colombia or leave the country.

2. Request of the British minister, dated May 26, 1836, that Venezuela should establish a lighthouse at Point Barima.

3. The Aberdeen negotiations as to the boundary between the two countries in 1841 and 1844.

4. Disavowal by Great Britain in 1850 that she made any claim to Venezuelan Guiana.

5. Negotiations carried on with Earl Derby in 1876 for a settlement of the boundary dispute.

6. Negotiations in 1880 and 1881 with Lords Salisbury and Granville.

7. Negotiations carried on in 1883 and 1884 at Caracas.

8. Gen. Blanco's negotiations with Sir Julian Pauncefote and Earl Granville in London in 1884 and 1886.

9. Negotiations at Caracas in 1886-7.

10. and 11. Resumption of negotiations with Lord Salisbury in 1890 regarding a commission to arbitrate west of the Schomburgk line.

12. The Rosebery compromise of 1893.

13. Negotiations with the United States since 1893 relative to intervention.

The logic of Venezuela's case did much to destroy the arguments that Great Britain presented in support of her contention and caused considerable modification of public opinion in England. Mr. Balfour, first lord of the treasury, at Manchester, and Mr. Chamberlain, at Birmingham, took sides in favor of the Monroe doctrine as held by the United States, while such papers as the Chronicle, Pall Mall Gazette, St. James Gazette and the Times took sides rather adverse to the claims of the British government. The London Chronicle proposed in January as a simple and dignified mode of settlement that the Venezuelan dispute should be included in a general plan for the arbitration of all questions between Great Britain and the United States which failed of settlement by diplomatic means. This idea of a permanent means of settling disputes was widely advocated in this country at public meetings and by the press.

In April the agent of Venezuela made a long rejoinder to the British blue book before the commission. Little was done through the summer that was made public, although a good deal of correspondence went on between the two governments in the attempt to find some basis of settle-

ment. The main point to be settled was the disposition of British vested rights in the territory in dispute. The following correspondence between the two governments shows the points and their treatment:

"Foreign Office, London, July 3, 1896.—Sir: I have to acknowledge your excellency's dispatch of 15th June inclosing a note from Mr. Olney in which he explains the reasons that induce the government of the United States to withhold their assent from the proposals with respect to the Venezuelan frontier contained in my dispatch No. 130 of May 22.

"The arguments by which Mr. Olney supports this view will receive the careful consideration of her majesty's government. I am not now writing to you for the purpose of discussing them. My object in addressing your excellency is to point out that in a matter of some importance Mr. Olney, owing, doubtless, to the inadequacy of my own explanation, has misapprehended the purport of the proposal which I had the honor to make to him. He states that 'it appears to be a fundamental condition that the boundary line decided to be the true one by the arbitrators shall not operate upon territory actually occupied by a British subject—shall be deflected in every such case so as to make such territory part of British Guiana.'

"This was not the intention of my proposals and the language of my dispatch of May 22 does not, I think, fairly bear this construction. I proposed that 'the tribunal should not have power to include such districts as the territory of Venezuela.'

"But I did not propose that they should necessarily be assumed without further proof to be part of British Guiana. I only stipulated that the ownership of them was not to be decided by the tribunal, which in our judgment was inadequate for this purpose, though it was adequate for the assignment of the unsettled districts. The settled districts shown to be in dispute by the inquiries of the commission were to be disposed of by subsequent negotiation. The claim of Venezuela is so far-reaching that it brings into question interests and rights which cannot properly be disposed of by an unrestricted arbitration. It extends as far as the Essequibo; it covers two-thirds of the colony of British Guiana; it impeaches titles which have been unquestioned for many generations. These districts must be treated separately, and until further inquiry has thrown more light upon the matter it is only by reserving the settled districts generally that this can be done.

"The view of her majesty's government is that where the matter in issue is of great importance, and involves rights which belong to a considerable population and are deeply cherished by them, special precautions against any miscarriage of justice are required, of which I have indicated the general character in this correspondence, but which are not required where a title to unoccupied territory is alone in issue. It is for this reason that her majesty's government proposed to except these districts from the jurisdiction of the arbitral tribunal, though it could deal adequately with the disputed claims to territory that is not occupied. But they did not intend by that stipulation to ask the government of the United States to prejudge any questions which had been raised or might be raised with respect to the ownership of settled districts. This part of the subject, confessedly the most difficult part, would have

been reserved for separate examinations. I should wish you to offer this explanation to Mr. Olney when you have an opportunity, and, if he desires it, give him a copy of this dispatch. I will reserve for another occasion the observations which, after consideration, I may have to make in reply to the general argument of his note.

"SALISBURY."

Following is Secretary Olney's letter to Sir Julian Pauncefote in answer to Lord Salisbury:

"Department of State, Washington, July 13, 1896.—Excellency: I have the honor to acknowledge the receipt from you of a copy of Lord Salisbury's dispatch to you of the 3d inst. Its object is to explain that his lordship in his previous dispatch of May 22 did not intend that the boundary line fixed by the proposed arbitral tribunal should include in British Guiana any territory bona fide occupied by a British subject Jan. 1, 1887. But as such territory must fall upon one side or the other of any complete boundary line, and was certainly not in any event to be assigned to Venezuela, all the present explanation would seem to show that Lord Salisbury's proposals of May 22 contemplated not a complete boundary line but a part or parts of such line—namely, such part or parts as might divide uninhabited or unsettled territory. Such a conclusion requires a somewhat heroic construction of a paper which in terms proposes the following basis of settlement of the Venezuelan boundary dispute, by which the two governments are to endeavor to agree to a boundary line upon the basis of a certain report, and by which, in absence of such an agreement, an arbitral tribunal is to fix the boundary line upon the basis of such report. Nothing in this language intimates that anything less than a complete boundary line is to be the outcome of the plan suggested.

"The discussion is, however, hardly worth pursuing. If Lord Salisbury did not make his meaning clear in the dispatch of May 22 he certainly is entitled to make it clear now.

"There is another part of the dispatch which seems to me of more importance and upon which I wish to base an inquiry. 'The claim of Venezuela,' it is said, 'is so far-reaching that it brings into question interests and rights which cannot properly be disposed of by an unrestricted arbitration.

it extends as far as the Essequibo; it covers two-thirds of the colony of British Guiana; it impeaches titles which have been unquestioned for many generations.'

"That Venezuela claims territory extending to the Essequibo, or covering two-thirds of the colony of British Guiana, cannot be regarded as being of itself an insuperable obstacle to unrestricted arbitration. But the objection that the Venezuelan claims impeach titles which have been unquestioned for many generations is undoubtedly of the most weighty character. The inquiry I desire to put, therefore, is this: 'Can it be assumed that her majesty's government would submit to unrestricted arbitration the whole of the territory in dispute provided it be a rule of the arbitration, embodied in the arbitral agreement, that territory which has been in the exclusive, notorious and actual use and occupation of either party for even two generations, or say for sixty years, shall be held by the arbitrators to be the territory of such party?'

'In other words, will her majesty's government assent to unrestricted arbitration of all the territory in controversy with the period for the acquisition of title by prescription fixed by agreement of the parties in advance at sixty years?'

"I inclose copy of the dispatch for Lord Salisbury's use. I should be glad to have its substance transmitted by cable, that it may be published with the other correspondence on the 18th inst.

"RICHARD OLNEY."

The basis of settling these claims as proposed by Secretary Olney was satisfactory to the British government, and a treaty of arbitration was made between the two governments and signed in Washington Nov. 9, 1896, providing for the appointment of five commissioners to locate the line in dispute between Venezuela and Great Britain. Two of these commissioners were to be named by the chief justice of the Supreme court of the United States, two by the lord chief justice of Great Britain and one by an agreement between the two governments. It was unofficially announced in November that Oscar II., king of Sweden and Norway, had been agreed upon as the fifth member of the board of arbitration. The Venezuelan commission has closed its labors and will make no report, as such action would be an interference with the privileges and duties of the high court of arbitration.

TURKEY AND ARMENIA.

Some account of sixteen centuries of persecution, rapine and murder of the Armenians in Asia Minor.

To grasp the true grievousness of the Armenian situation we must take into consideration the fact that these people have inherited their land nearly if not quite from the days of the flood, when, according to the biblical account, the ark rested on Ararat, the central mountain of Armenia, they being the direct descendants of Japheth and therefore belonging to the Caucasian family, and so close akin, both by blood and by belief, to the great Christian nations of the earth.

They received the teachings of Christ in the first century of the Christian era, and are said by tradition to have offered Him refuge from His persecutors, which He declined, but sent to them Thaddæus and Bartholomew as teachers. They did not acknowledge

Christianity as a national religion till the third century, since which time they have remained true to their faith, first meeting their Mohammedan foes in 636, when they were worsted in battle. Twelve thousand men, women and children were immediately massacred then, and ever since the bloody tide of persecution and death has devastated their land, sweeping millions more into heroic martyrdom.

TWENTY MILLIONS GONE.

Their nation, which has a marvelous vitality, has been reduced from 25,000,000 to only about 4,000,000, all told, to-day, and it is likely to be exterminated. It was in 276 that the Armenian nation accepted Christianity as the national religion, and

ever since it has stood on guard between the new civilization of the west and eastern heathenism.

Before Mohammed was born or the Turk or Tartar was dreamed of it fought the battles of the truth and turned back the tide of dark superstition which threatened to overrun the western world.

St. Chrysostom wrote of the Armenians in his day (about 380 A. D.) what is too true still: "Like ferocious beasts they [the Kurds] fell upon the unhappy inhabitants of Armenia and devoured them. Trouble and disorder are everywhere. Hundreds of men, women and children have been massacred; others have been frozen to death. The towns and villages are desolated; everywhere you see blood; everywhere you hear the groans of the dying, the shouts of the victor and the sobs and the tears of the vanquished."

Such has been the history of Armenia since accepting Christianity.

THE MOHAMMEDAN CONQUEST.

When the Mohammedan hordes, under Mohammed II., captured Constantinople in the fifteenth century they found much the same sort of civil and religious liberty allowed there as ancient Roman rule had recognized the world over, even before the Christian era began—such as prevailed in Palestine in the days of Christ, when Jew and gentile were alike tolerated, centuries before the birth of Mohammed, whose followers have reverted to the barbarism of prehistoric ages in their futile attempt to turn back the tide of Christian civilization.

The real, irrevocable religious law of Islam is that all who live on Mohammedan soil must be Mohammedans or die, but the sultan may spare a tributary as a slave or an alien if expedient.

It being impracticable in 1453 either to enslave, banish or exterminate the Byzantines and their alien populations from their newly acquired empire without depopulating it of the very peoples most needed to uphold its prosperity, they were permitted to remain, and their former social, civil and religious rights, privileges and liberties were to a great extent recognized and continued as a necessity to the new state, not because of any liberality or love of civil or religious freedom but because their conquerors needed their co-operation and aid.

The Roman emperor had granted previous to this conquest to the Turkish residents of Constantinople the right to be ruled by Moslem law administered by their own judges, thus extending to them the "extra territorial rights" which are recognized to-day, not as an innovation of the nineteenth century but as a continuation of customs from time immemorial, which the Turk is now trying to subvert to the political-religious system of Mohammedanism, not only among Armenians but Americans as well.

ISLAM OR THE SWORD.

The Mohammedan law, religiously prohibiting all peaceful or friendly relations with non-Mohammedans, requires the rupture of treaty compacts as soon as the sultan is able to successfully enforce his power, so it is easy to see that no treaty obligations are intended to be kept by Turkish or Mohammedan diplomats, except as the exigencies of the occasion may require or the power of an opponent obliges the sublime porte to submit to such, when it is ready to resort to any duplicity to deceive either friend or foe.

NINETEENTH-CENTURY MASSACRES.

In 1822 the terrible massacres of Greek Christians of Scio and adjacent localities swept away at least 50,000 lives. In 1850 the massacre of Nestorians and Armenians took off 10,000 in Kurdistan. In 1860 11,000 Maronites and Syrians of Lebanon and Damascus were slaughtered. In 1876 10,000 Bulgarians perished.

The Hon. Eugene Schuyler, American consul-general, wrote to the Hon. Horace Maynard, then American minister at Constantinople, from Philippopolis, under date of Aug. 10, 1876, as follows: "It is difficult to estimate the number of Bulgarians killed, but I am inclined to put 15,000 as the lowest for the districts I have named." This shows that the above figures are not exaggerations, nor do they include the Cretan massacres of 1866-7 or the Armenian outrages of 1877; these were massacres of Christians only.

In 1892 and 1893 the Yezidis, a heathen sect in Turkey who have never accepted the Moslem faith, suffered the same shameful fate as their Armenian neighbors, robbery, outrage, torture and death following their refusal to accept of a forcible conversion offered by an imperial representative, who was to receive so much per head for every convert made.

It has been reserved for the last decade of this nineteenth century to outdo all others in the extent of the outrages recorded. The first of these recent massacres took place at Erzeroum in June, 1890, followed by similar outbreaks in Caesarea, Yozgat and Marsovan at intervals.

While the sultan and his officers were pretending to prepare for promised reforms in Turkey they were in reality premeditating the destruction of innocent men, defenseless women and helpless children.

Under promise of proper protection if they would give up their arms to the government all Armenians were disarmed, and if any concealed weapons were discovered among them they were at once confiscated by force. This was done to render them defenseless.

The last burden of taxation which they could bear was placed upon them, till they could pay no more into the imperial treasury, in preparation for their own extermination, when the persecutions began.

In the remote mountain region of Sassoun, which could be most easily cut off from communication with the outer world and where they could the longest conceal their acts, they commenced the massacres of more recent dates.

In 1893 Kurdish raids upon the Christian villages, instigated and encouraged, if not actually ordered, by the Turkish government, drove the Armenians to desperation. They defended their homes till winter intervened and prevented the fulfillment of the official programme of extermination that year, but their so-called rebellion was made a pretext for officially premeditated massacre.

MASSACRE OF SASSOUN.

Early in 1894 the Kurds were let loose again, with directions to destroy the Christians, confiscating their property and appropriating whatever was worth carrying away with them, including women and children as well as cattle. An army of Turks, more terrible than the Kurds themselves, was sent to see that the work of extermination was not thwarted again by the bravery of the brawny mountaineers. The district of Sassoun was declared to be in "rebellion"

against the government. The entire region was surrounded by Kurds and Turkish soldiers, and the villagers, driven from their homes, were forced to flee with their wives and children to the mountains.

A state of siege was declared and cordons of troops cut off all communication. When this was over nothing was left in that fair land but the ruins of burned homes, devastated fields and a remnant of the suffering people.

So perished the brave race of independent Christian mountaineers of Sassoun! What had happened in Sassoun in 1894 was soon repeated all over Armenia with ever-increasing horrors.

Official figures for 1895, which place the actual number of those massacred at about 50,000, fall very far short of the facts in the case, while ten times that number of women and children were acknowledged to have been rendered homeless, starving, friendless fugitives, the least of whose troubles would be welcome death, which would deliver them from the power of Turk or Kurd or Circassian who could lay hold of them.

TURKISH REPORTS.

The following figures are taken from Turkish sources of information, so, naturally, are not supposed to be exaggerations. They are from seven districts only, with estimated losses for two months, from Sept. 30 to Nov. 30, 1895:

Armenian population in large towns.	177,700
Reduced to starvation, about.....	75,000
Killed, according to estimates.....	20,000
Number of Armenian villages formerly.....	3,300
Number of Armenian villages destroyed.....	2,500
Armenians living in villages formerly.....	538,500
Reduced to starvation.....	350,000

From the above figures it would appear that the average number of inhabitants for each village was 163. Allowing for each of the 2,500 villages destroyed only 100 killed would make the loss of life from villages alone 250,000. Cutting this estimate in two would leave 125,000, which is 25,000 more than has been claimed by the highest figures, but may fall far short of the actual facts in the case finally.

The following figures are summarized from the official records of the blue book published by the British government in February, 1896, marked "C-7, 927." Under date of Pera, Jan. 30, 1896, the British minister to Turkey writes as follows of its evidence: That it is based upon consular reports mainly, but part of it is obtained from other reliable parties—to use his own words, "not natives of this country, but their evidence was admitted only when they described events of which they were eye-witnesses, and when it was in harmony with the general tenor of the official reports.

"The number of victims has been entered only in those cases where there exist data for forming an accurate estimate. This was often found to be impossible, particularly in the case of villages respecting whose fate nothing was known except that the region in which they were situated had been devastated. For instance, there is no record of the loss of life in the country districts of Van, Karpoot or Diarbekir. The total loss respecting which accurate information was obtainable amounts to about 25,000 persons, and if we add to this the massacres respecting which there are no details the

estimate may be increased to a much higher figure. I have, etc., "PHILIP CURRIE."

THE WORK OF TWO MONTHS.

	Killed.

Akhissar, Oct. 3.....	50
Total.....	31,611

In such a vast extent of territory, during such a reign of terror, it would be impossible to obtain full information for official records. The real number of victims will never be officially known.

The following reliable figures show the number of clergy of the Gregorian Armenian church killed, the names of most of whom are known:

Province of Trebizond—Six priests, whose names are not known.

Province of Erzeroum—Seventeen priests, abbots and high church dignitaries.

Province of Van—Four priests and abbots.

Province of Bitlis—Nine clergymen of various ranks.

Province of Sivas—Nineteen abbots and priests.

Province of Karpoot—Eighteen clergymen.

Province of Diarbekir—Nine priests and ministers.

The following notes to the report show how some of these clergymen were butchered:

Der Yeghia of Teynik was killed while presenting a petition to the government for protection.

The Abbot Bedross of Sourp had his tongue torn out and limbs cut off one by one. He was then killed "with tortures."

The Abbot Isaac of the Holy Cross, the priest of Broshentz and the abbot of St. Gamaliel were impaled in the form of a cross and then burned.

The Abbot Sarkis of the Monastery of the Holy Mediator was first blinded.

Der Yegia was shot while conducting funeral services.

The body of Der Matteos was treated with the grossest indignity.

The eyes of Der Mugurdich of Zilleh were first destroyed.

Der Vassil of Vizir-Keupru was burned alive.

The New York Independent gives the names of twenty-one martyred protestant

pastors in Armenia at this time. The number of churches destroyed or pillaged is given by districts as follows: In the province of Trebizond, 13; Erzeroum, 9; Kegni, 21; Erzincan, 3; Van, 58; Bitlis, 7; Sivas, 6; Karpoot, 25; Diarbekir, 5; making a total of 147.

DESTRUCTION OF AMERICAN MISSION PROPERTY.

On Feb. 2, 1893, a building belonging to the American college at Marsovan was destroyed by fire, and it being clearly proved to have been burned by official instigation the Turks were obliged to pay for it.

Nov. 11, 1895, eight buildings belonging to the American mission at Karpoot were destroyed, making a loss of \$100,000 and leaving the missionaries destitute of the very necessities of life.

In November, 1895, at Marash the American mission buildings were plundered and the seminary building burned during the terrible massacre there, the Turkish soldiers joining openly in the attack.

These three instances are stated as illustrations of the state of affairs throughout the Turkish empire for years past regarding American mission property.

Of course this does not include all losses of the classes indicated, but what information is given in these details is absolutely correct and is sufficient to show the situation.

During 1896 the same scenes of outrage, robbery and death have been and continue to be enacted, but full authentic details are not yet obtainable.

A massacre occurred in Killis March 20, 1896, the Turkish figures placing the killed at 80, but better information makes the number about 350.

On June 20, 1896, according to authentic accounts, 1,215 Armenian Christians were

killed in the city of Van and 5,522 in the district.

During Aug. 28, 29 and 30, 1896, not less than 6,000 men, women and children were massacred in Constantinople, according to all accounts.

Sept. 15, 1896, occurred a massacre of about 700 Armenians in the city of Eghin.

About another month later still, or during the last days of October, 1896, a massacre was officially announced at Everek of about 500 persons.

It is impossible at this date to obtain full, reliable, detailed information as to these last reported massacres.

That they have been accompanied by the most heartrending atrocities of robbery, torture and outrage is confirmed by official reports from all quarters.

The massacre in August last in Constantinople was only the continuation of the work of exterminating Christianity determined upon throughout the Turkish empire, in Crete and Constantinople, as well as Armenia, and the unwise attack upon the Ottoman bank, if not instigated by the Turkish government as an excuse to renew the massacres under the usual pretense of putting down disorders, was certainly used as such with wonderful promptness.

That a handful of men, no matter how desperate, could take possession of the Ottoman bank and hold it for a whole day in the heart of Constantinople and then escape is a strange commentary on the strength of the Turkish government.

For days and nights after this massacre the dead and wounded were carted off like so much garbage and dumped into the sea.

The work of extermination for two years may be briefly summarized. Millions of dollars' worth of property has been destroyed or stolen; hundreds of thousands have been outraged, imprisoned, tortured and rendered utterly destitute, and fully 100,000 persons have been massacred.

NATIONAL PARKS AND RESERVATIONS.

THE YELLOWSTONE NATIONAL PARK.

This is a tract of land near the head waters of the Yellowstone river, in the states of Montana and Wyoming. It is 62 miles in length from north to south, 54 miles in width from east to west, and contains about 3,348 square miles, or 2,142,720 acres; its area is greater than that of the States of Delaware and Rhode Island combined. The average altitude is about 8,000 feet.

CASA GRANDE RUIN.

The Casa Grande Ruin, located near Florence, in the Territory of Arizona, is one of the most noteworthy relics of a prehistoric age and people remaining within the limits of the United States. The land on which it is located is part of 480 acres reserved from settlement by executive order dated June 22, 1892. It was discovered already in a ruinous condition by one Padre Kino in 1694, and since that time has been a subject of record by explorers and historians. This structure, like others erected by the most advanced among the native races in the southwest, is of perishable material, being built of cajon—that is, of puddled clay, molded into walls dried in the sun.

HOT SPRINGS RESERVATION.

The permanent reservation at Hot Springs

consists of four mountain reservations—Hot Springs mountain, North mountain, Sugar Loaf mountain, West mountain—and Whittington Avenue reserve, having an aggregate area of 911.63 acres.

The hot water issues from the base and side of the Hot Springs mountain, and the actual quantity thereof is not known. That which is under control and being used to supply the bath houses amounts to about 507,000 gallons a day, and the amount collected and passed through the impounding reservoir about 350,000, making a total quantity of hot water under control of about 857,000 gallons a day.

SEQUOIA AND GENERAL GRANT NATIONAL PARKS.

Sequoia park is located in Tulare county, California. Its area is about 250 square miles. General Grant park is situated in Mariposa county, California, and contains about four square miles. In these reservations are found the finest known specimens of the Sequoia gigantea, the famous "big trees" of California.

YOSEMITE NATIONAL PARK.

This park is situated in Tuolumne, Mariposa and Mono counties, California, and covers an area of about 1,512 square miles, being 36 miles wide and about 42 miles long.

THE CUBAN FLAG.

The stripes are blue and white and the field is red with a white star.

THE CUBAN REVOLT.

Narrative of the events in the great uprising from Oct. 1, 1895, to Nov. 1, 1896.

The record in the Daily News Almanac for 1896 of the events in the revolution in Cuba from its commencement closed with Oct. 1, 1895. At that date a provisional government had been established, a constitution formulated and a flag adopted.

The campaign opened about the first of October with a good deal of vigor on the part of the insurgents, in which they employed dynamite for the destruction of railroad trains and bridges. Baracoa, one of the most important seaports in northeastern Cuba, was blown up by the revolutionists Oct. 10, and on the same day Cols. Cotrina and Diaz of the Spanish army were defeated and their forces utterly routed. The most important battle of the month was fought on the 2d at Mount Mogote between the Cubans, with 800 men, under Maceo, and the Spaniards, with 2,000 men, under Garcia, Navarro and Linares. The engagement lasted five hours and resulted in the defeat of the Spaniards, five officers being killed and ten wounded. The next important engagement was fought at Taguasco, in Santa Clara, on the 18th and 19th of November. The Spaniards were commanded by Valdes, Luque and Aldave, while the insurgents were commanded by Gomez and Maceo. In this battle the Spanish loss was over 500 and they were defeated. No battle since the war began did more to depress the Spaniards than that of Taguasco. Gen. Campos was severely criticised for his apparent inactivity, while the rebels were so restless and persistent as to give promise of an early closing of the war. But Gen. Pando was dispatched from Cadiz with 30,000 fresh troops and bore with him to Cuba a commission of lieutenant-general. Gen. Pando had served as governor-general of Cuba, knew the people and the island well, and his selection gave promise that Spain would vigorously push the war in Cuba to a successful issue if possible.

Operations in December opened with the defeat of the insurgents at Las Villas and at Camaguey, but on the 10th the rebels defeated the Spaniards at La Virginia, while at Minas a small Spanish force was routed by a considerable rebel force. The chief military event of the month occurred on the

23d, when the Cubans entrapped a force of 3,000 Spaniards in Palmirito, utterly defeating them, and practically obliterated the entire force. Near the end of the month Gen. Campos returned to Havana from the field, where he had been conducting the military operations, and was received by the people with every mark of respect and confidence. But while the people of Havana were wining and dining Gen. Campos the rebels were vigorously carrying on the war. The march of Gen. Gomez and the invasion of Matanzas was one of the most dramatic incidents of the war. Its success induced the rebels to invade the still loyal province of Havana, which began Dec. 26. The movement was, however, checked by the royal forces, which met them near Calimete and repulsed them. This was followed by two defeats of the Cubans and the invasion of the province of Havana was temporarily abandoned. The chief importance of this was that it inspired the Spaniards and caused Gen. Campos to declare that "the backbone of the rebellion was broken."

The defeats did not dishearten the Cubans, for by the opening of the new year (1896) they had so far recovered as to fix the center of their operations at Guanajay, a place of great strategic importance, only forty-five miles distant from Havana. The close of the year 1895 found the insurgents taking up their line of march toward the capital city of the island and forced Gen. Campos to declare martial law through the provinces of Havana and Pinar del Rio. At that time considerably more than half of the island, with the exception of a few garrisoned towns and seaports, was in the possession of the Cubans. The provinces of Santiago de Cuba, Puerto Principe and more than half of Santa Clara were theirs; but, while this was true, the rebels were also disputing the possession of the other half with the government and had possessed themselves of the western portion of Pinar del Rio.

The year 1896 opened with signal successes for the Cubans, and several important towns near the line of the province of Havana that were garrisoned with volunteer Cuban forces surrendered to the rebels without firing a shot. In this way the royal

forces lost large amounts of arms and munitions of war, which were seriously needed by the rebel forces. By the middle of January it was estimated that fully one-third of the sugar crop of the island had been destroyed. This was done because of a movement on the part of Spain toward a loan from France, to the payment of which the sugar product of the island was pledged. The destruction of the sugar and tobacco crops was stopped by the order of the provisional government. During the month nearly all the railroads leading from Havana to different parts of the island were destroyed and communication cut off. Gomez had his force finely mounted and against them the Spanish infantry was of no avail.

The most important event of the war thus far took place in January, being the recall of Capt.-Gen. Campos and the sending of Gen. Weyler from Spain to take his place. Without doubt Gen. Campos is the greatest soldier in the Spanish service, but it was believed in Spain that he advocated too conciliatory a policy in dealing with the rebels and that such methods were out of place in dealing with the revolt. He had been nine months in attempting to put down the rebellion; he had had more than 100,000 soldiers from Spain and had expended over \$19,000,000, but as a result of this he could show nothing better than the Cubans in possession of more than one-half of the island, with a large, well-disciplined and fairly well-armed force, which was even then thundering at the gates of Havana. On the 17th of January Gen. Campos was recalled to Spain and Gen. Weyler appointed as captain-general of Cuba, but he did not reach Havana until Feb. 10.

Through January a panic prevailed in Havana, caused by the fears of the capture of the city by Gomez, very many of the inhabitants leaving the city.

On the 1st of February Cisneros-Betan-court, president of the Cuban republic, issued the following address to the people of the United States:

"Republic of Cuba, Executive Headquarters, Cubitas Mountain, Feb. 1.—To the American People: The infant and struggling republic of Cuba appeals to the grand and powerful union of American states.

"Undoubtedly this action is most unusual in the history of nations, but because of the international standing of the Cuban republic, or, more correctly, because it has no recognized place among the powers of the world, are we thus compelled to appeal informally and through the medium of the press directly to the people.

"Indeed, it is that international standing that we are now seeking; that we now ask the American nation to give us, and that we pray it will see fit to grant in the name of liberty and of justice.

"Why do we ask the American people alone to hear us and why do we not address this document to the entire world? The answer is well known. We call to the people who have themselves suffered oppression and felt the iron heel of the tyrant. We call to the nation of heroes who threw off the slavish yoke, and who signaled to the downtrodden of the earth that the beacon light of liberty in America would never grow dim, but would throw its rays across the oceans to strugglers for freedom in other lands.

"We call to the nation that has ever greeted with open arms the honest exiles from far and near; the nation that gave hope to Poland and succor to Ireland; the

nation that drove monarchy from Mexico and Hawaii and so nobly and faithfully shielded our southern sister, Venezuela.

"To whom would we appeal if not to America? To what land if not to that of Washington, of Jefferson, of Monroe, of Jackson, of Grant, of Blaine, of Cleveland and of the immortal Lincoln?

"The present is Cuba's second struggle for liberty. From 1868 to 1878—ten long, suffering years—a little band of patriots fought gallantly on. While the wrongs then were as great as they now are, the Cuban people did not rise as they have risen in this war to throw off the Spanish yoke. The thirst for liberty which permeates the island to-day was unknown then except to a small minority of the people, and after ten years of warfare the end came, but it did not bring success.

"But even then Spain made promises to the Cuban people that she did not propose to fulfill. And from that time the island has suffered as no other section of the earth has in the same period. Spain claims she holds Cuba by divine right. Such were her pretensions with regard to all her American possessions, but a divine hand liberated those same possessions and to-day they are free and independent republics of the new world.

"The Spaniards have raised the cry abroad that the Cuban rebellion is merely an uprising of negroes. There is no truth in this as stated. It is not a negro uprising, nor a white uprising, but a rebellion of the people of Cuba against a cruel and unrelenting despot. But even if it were a negro rebellion, would the people of the United States frown upon it?

"The answer to that question is told by the firing upon Fort Sumter, the war of 1861 to 1865, the million of graves in the southland and the God-inspired proclamation of Abraham Lincoln. Was not the freedom of the black man announced in that undying language used by the martyr president? And did not the blood of a million American freemen stain grassy mounds in the now loyal and patriotic south, writing in eternal words the emancipation of the black man?

"The world knows the noble yet fearful history. Spain knows it, and when her representative in the capital of the United States says the Cuban rebellion is a negro movement entirely he not only falsifies but he insults the memory of the grand army of the dead.

"We are proud to have our colored brothers with us in this glorious struggle for freedom; for Cuba, when free, will be like the land of Washington, where every man worthy of citizenship will be accorded the full rights of civil and religious liberty.

"We ask the American people to grant us, through their president and congress, those rights of belligerency to which, according to the laws of war and of nations, we are entitled. Our armies have marched whither they might throughout the entire island and for weeks have threatened the stronghold of Spain's power in Cuba.

"Must we capture Havana and drive Spain's hirelings across the sea before we are even given the right as men to fight for that priceless gift which God destined should be universally divided among His children? Must we gain our independence before we are accorded the sanction of the world to labor for it?

"The Cuban republican government of the island is a firmly established institution.

Covering considerably over one-half of the area is the civil branch of our authority, with regularly appointed governors of different sections, prefectos in subdivisions, etc. Of course Spanish formalities are still followed to a great extent in the administration of the local governments, for a complete change of method in a few months would be too radical.

"Here, in Cubitas, are the head officers and chief departments of the republic. Here we are able and most willing to receive representatives of the United States or other nations.

"On all grounds of diplomatic and international usage the Cuban republic is entitled not alone to recognition of belligerent rights for its armies now in the field, but to actual independence. Still, we do not ask that the latter be accorded us at present. All we wish now is to be looked upon by the government of the United States as men and soldiers battling for their birthright. We do not wish to appear in the eyes of the world like bandits and rabble.

"Is Spain entitled to consideration at the hands of a modern, civilized and highly progressive nation? Does her misrule of Cuba for a century commend her to the hearts and minds of men? Are her hirelings here to lift up and educate the Cuban and make his beloved island prosperous? Under the accursed flag of Castile will not freedom's muffled shrieks still be heard on the American hemisphere? Will not the continuance of her supremacy in Cuba mean the perpetuation of mediaeval institutions, the downtreading of right and equity and the upholding of all that to men of the nineteenth century is debased and barbaric?

"People of the free and glorious United States, Cuba appeals to you! She asks that you raise your voice in her behalf. She asks that you announce to the world that at least as against the tyrant she be given an equal chance.

"Cuba, the bleeding, appeals to her American sisters. She does it in the name of God, of justice, of civilization and of America.

"SALVADOR CISNEROS-BETANCOURT."

This address produced a profound sensation for the Cubans in the United States.

Gen. Weyler, immediately on his arrival in Cuba, reorganized the entire military force of the island, and on the 17th of February he issued three proclamations, which, in effect, established the strictest martial law in the country. The first of these defined offenses which were triable by court-martial, with a death penalty or life imprisonment attached to each of the fourteen classes of offenses named by him. The second proclamation ordered the inhabitants within the jurisdiction of Sancti Spiritus and the provinces of Puerto Principe and Santiago to present themselves at the army headquarters and secure documents proving their identity, which must be done within eight days, and revoked all passes previously granted. The third proclamation gave army corps commanders full powers to proceed with court-martial trials.

The trocha, which has been relied upon by Gen. Weyler to hold the rebels in check, was first employed by Gen. Campos, and it has played so important a part in the Cuban war that some description of it and its effectiveness is of interest.

The first line of trocha set up by Marshal de Campos was for the purpose of holding the insurgents within the limits of Santiago

de Cuba. It crossed the entire island from north to south on the western line of the province. It was similar in design to all of the succeeding ones, with the exception of the one dividing Puerto Principe from Santa Clara. Block houses, wire netting and trenches were the salient features of all. A description of the last line erected by Gen. Weyler will convey an excellent idea of the practical nature of these barriers, especially as against cavalry, the single arm of the service in which the rebels excel.

Weyler's trocha was erected to keep Maceo in Pinar del Rio and prevent a junction of the rebel forces. Gomez, who had been in that province, forced the last ditch Campos put up, and when the new captain assumed command was operating in the province of Havana within a few miles of the city. He made several assaults on Batabano, a town on the southern border of the province, about twenty miles away, cutting the Spanish communications and practically establishing a blockade so far as supplies from the surrounding country were concerned. He dynamited trains, cut water pipes near the city, one dash being under the guns of a fortified outpost less than four miles from the city limits, and then withdrew toward the east, leaving his lieutenant apparently in the cul de sac the Spaniard had spread for him. This was set several months ago, and the doughty mulatto is still at large and causing the loyal people of the island a world of sleeplessness.

Weyler established a trocha running from Mariel on the north to Majana on the south. This line is twenty-two miles in length and furnishes a fair sample of the engineering skill of the Spanish. It has never been seriously assaulted, and whether or not the rebels could pierce it, as they have all others, is a question. The headquarters of the commander of the trocha are at Artemisa, four miles from Majana, the southern extremity of the defense. The defenses consist of small block houses set up at intervals of 120 yards, connected by rifle pits and trenches in front, with wire fencing and netting spread for some distance to the front to intercept cavalry. Some of the houses are constructed of loose stone faced with looser earth, the best defenses known to ordnance science against rifle practice. Others are made of thick planking. The rear of the line is defended by earthworks loosely thrown up, consisting of stone and earth. Occasional block houses as rallying points and to give shelter to the troops are between the lines. Field batteries of modern guns are stationed at intervals, some in bastions for obstinate defense and others in open works, admitting of rapid shifting of position. Several batteries are also in reserve, but all are guarded by heavy bodies of troops to prevent their surprise and capture by the rebels.

At the southern extremity of the trocha, near Majana, the line is divided into several spurs to prevent surprise and an attack by the flank. At four points on the line camps are established, with heavy bodies of troops in reserve for service in the trenches and to rally at any threatened point. The central section of the trocha extends from Artemisa to Guanajay, twelve miles. Loose stone breastworks and rifle pits with the wire netting against cavalry constitute the defenses. Camps of heavy bodies of men are to the rear, and back still of these are other lines of defense of similar construction. This feature of the trocha obtains the entire distance, and varies from the others

in that it is seemingly a line of defense from attack from both front and rear. It faces toward the west, but is equally available against any incursion on the part of Gomez.

These two sections cover open ground, where troops could be deployed to good advantage and where there is no lack of troops. The third section, from Guanajay to Mariel, is over badly broken ground, with frequent elevations which command most of the surrounding territory. All the elevations are strongly fortified with heavy ordnance and machine guns. In addition there are lines of rifle pits to connect each little fortress. Some 50,000 men are detailed for duty watching the line of twenty-two miles. This force is there ostensibly to hold Maceo where the troops sent against him may have free play without the swift-marching rebel being able to retreat to the east and rejoin his commander. They are really there to prevent the mulatto from overrunning Havana. That they are not successful—at least in preventing the insurgents from menacing the capital—is shown by the latest attack on the water supply. The fact is that this narrow line across the island is merely part of the defenses of the city, and its connection is broken frequently by the destruction of trains on the two lines of railroad it covers.

The extreme width of this trocha, east and west, is some three miles. The troops on duty there are practically blockaded, as the rebels so far control the country districts that fresh meats, eggs and milk are barred out. The line is certainly a strong one, but the others established by Campos were strong, yet both of the generals who are leading the fight for Cuba libre have pierced them at will.

March opened with much to encourage the Cubans. On the 2d day of the month the congress of the United States passed the following resolutions:

"Resolved, by the house of representatives, the senate concurring, That in the opinion of congress a state of public war exists in Cuba, the parties to which are entitled to belligerent rights, and the United States should observe a strict neutrality between the belligerents.

"Resolved, That congress deprecates the destruction of life and property caused by the war now waging in that island, and, believing that the only permanent solution of the contest, equally in the interest of Spain, the people of Cuba and other nations, would be in the establishment of a government by the choice of the people of Cuba, it is the sense of congress that the government of the United States should use its good offices and friendly influence to that end.

"Resolved, That the United States has not intervened in struggles between any European governments and their colonies in this continent, but from the very close relations between the people of the United States and those of Cuba in consequence of its proximity and the extent of the commerce between the two peoples the present war is entailing such losses upon the people of the United States that congress is of opinion that the government of the United States should be prepared to protect legitimate interests of Americans by intervention if necessary."

These resolutions were sent to the president, but up to the date of closing this record (Nov. 1) he has not taken any public notice of them in treating with the questions involved.

Early in March Gomez suddenly made his appearance in the heart of the province of Havana with a force of about 12,000 men, which he used in the destruction of railways and bridges up to within a few miles of the capital city. In the province of Pinar del Rio the rebels overran the whole territory, destroying nine towns and laying waste the tobacco plantations. During the month 18,000 fresh troops landed in Havana from Spain.

On the 18th of March a Spanish column was defeated near Candelaria by a force of insurgents under Maceo and Bandera, in which the royal troops lost some of their artillery. On the 22d the insurgents captured Santa Clara, a city with 30,000 population, containing large quantities of Spanish clothing and commissary supplies and 200,000 cartridges. After holding the city for five hours it was abandoned, a large Spanish force having been dispatched to recapture it. On the 26th a large and strong rebel camp and hospital in the province of Santa Clara was captured by the Spaniards. At this time a report was made as to the strength of the insurgent forces. The army was made up of 60,000 men, but the distribution in the field is put at 43,000, in the following provinces: Havana, 16,800; Matanzas, 3,600; Santa Clara, 6,500; Santiago, 5,500; Pinar del Rio, 3,900; Camaguey, 1,500. About two-thirds are well mounted and about one-half well armed; the remainder have shotguns, revolvers or machetes. There are also numberless local bands of from fifteen to 100 men, not of the army but serving the rebel interests in various ways and acting as police and recruiting officers. So destitute of material for making bullets have the insurgents been at times that they have cut the telegraph wires into short pieces to be used for such purposes. The Spanish forces in Cuba are estimated at 200,000 men.

April opened with a sore disaster for the Spaniards. Gen. Gomez was encamped near the city of Santa Clara, and upon each side of him was a large Spanish force. Gomez sent word to each of the Spanish commanders that he was there to fight, and invited him to attack. No sooner had he done so than he quietly retreated, while each of his opponents accepted his invitation. When the royal forces met they opened fire on each other, thinking they had Gomez fairly in a trap. The battle waged fiercely for half an hour before the two commanders found out the true state of affairs and stopped the engagement. One of the most desperate battles of the war so far was fought on the 14th of April near La Chuzas, in the province of Pinar del Rio. Gen. Maceo, with 5,000 troops, attacked a large Spanish force. The Spaniards retreated to the coast, where they were protected by a war vessel. The royalist loss is given at about 1,000 and the Cuban at 600. On the other hand, Gen. Maceo lost heavily and was defeated in an attempt to capture the city of La Palma.

On April 22 Gen. Weyler issued the following amnesty proclamation:

"It having reached my knowledge that rebel parties in the province of Pinar del Rio are in distress through the constant pursuit by the troops and the impossibility of breaking the military line between Mariel and Majanda and through other insurmountable difficulties, and being fearful of surrendering under the fear of the death sentence, the certainty of which has been falsely disseminated among them, I proclaim and command:

"1. The rebel leaders who surrender within twenty days from this date, with their firearms, will be at once pardoned.

"2. Those who are not leaders, but who surrender under the same conditions, with their firearms, will also be pardoned.

"3. Those surrendering without their arms will be likewise pardoned, but the military authority will designate their place of residence in the island.

"4. The surrender must be made to the military authority or to columns operating in the field."

In May there were several important engagements, the first of which was the attack of the royal troops on one of Maceo's forts at Cacarajicara, in Pinar del Rio. The insurgents had 2,000, while the Spanish forces were estimated at some 3,000 or 4,000 men. The military operations for the month were confined to raids and incursions in which towns and property were destroyed. The rainy and unhealthy season begins in May and puts a check upon army movements.

In June nothing of importance took place except the breaking through of the trocha by Maceo with 2,500 men. It is charged that four companies of his forces were made up of women who had banded together to avenge the wrongs they had suffered at the hands of the Spaniards. The women rushed on the Spaniards with great fury, and were only stopped from killing them by Maceo declaring he would turn his guns on them if the butchery was not stopped.

On June 3 Gen. Fitzhugh Lee entered upon the duties of United States consul-general at Havana, succeeding Mr. Williams, who had filled the office for twelve years.

The active sympathy of the people of the United States for the Cuban patriots was expressing itself in something more positive than words, and the government was forced to suppress such exhibitions of good will in order to keep faith with Spain and observe its treaties with her.

The first of these exhibitions of sympathy which came near raising complications between the two governments was the Competitor expedition. The Competitor was a fast fifty-ton schooner that eluded the customs officials at Key West, Fla., and sailed on the night of April 20, carrying a cargo of cartridges, dynamite and rifles for the insurgent forces. The schooner was captured by a Spanish gunboat while trying to effect a landing on the northern coast of Pinar del Rio. Some of the men escaped, but the leader and four others were captured. The men were tried by court-martial and condemned to death. The government of the United States interceded in their behalf and protested against the death penalty being inflicted. It looked at one time as if war between the United States and Spain was inevitable. But the Madrid government decided that the prisoners should have a new trial in the civil courts, according to the treaty stipulations between the two governments.

The next expedition was that of the Laurada, which shipped out of the port of New York and got to sea on the night of May 9. On May 16 the vessel succeeded in landing her cargo, consisting of 300 rifles, 310,000 rounds of ammunition and 1,000 pounds of dynamite, besides other military stores.

Following this was the expedition of the steamer Three Friends, which left Jacksonville, Fla., May 23, on her third expedition. She carried an enormous cargo of military supplies for the rebels. On the 28th the steamer reached Cuban waters, but was

sighted by a Spanish war vessel. It was a trial of speed between the two, but the steamer escaped and the next day landed her cargo in safety. Following these were the expeditions of the City of Richmond, sailing June 24; that of the Bermuda, the Horsa and some others of smaller note.

On July 27, 1896, the president issued the following proclamation:

"By the president of the United States of America—A proclamation:

"Whereas, By a proclamation dated the 12th day of June, A. D. 1895, attention was called to the serious civil disturbances accompanied by armed resistance to the established government of Spain then prevailing in the island of Cuba, and citizens of the United States and all other persons were admonished to abstain from taking part in such disturbances in contravention of the neutrality laws of the United States; and

"Whereas, Said civil disturbances and armed resistance to the authority of Spain, a power with which the United States are on terms of peace and amity, continue to prevail in said island of Cuba; and

"Whereas, Since the date of said proclamation said neutrality laws of the United States have been the subject of authoritative exposition by the judicial tribunal of last resort, and it has thus been declared that any combinations of persons organized in the United States for the purpose of proceeding to and making war upon a foreign country with which the United States are at peace, and provided with arms to be used for such purposes, constitutes a 'military expedition or enterprise' within the meaning of said neutrality laws, and that the providing or preparing of the means for such 'military expedition or enterprise,' which is expressly prohibited by said laws, includes furnishing or aiding in transportation for such 'military expedition or enterprise'; and

"Whereas, By express enactment, if two or more persons conspire to commit an offense against the United States, any act of one conspirator to effect the object of such conspiracy renders all the conspirators liable to fine and imprisonment; and

"Whereas, There is reason to believe that citizens of the United States and others within their jurisdiction fail to apprehend the meaning and operation of the neutrality laws of the United States, as authoritatively interpreted as aforesaid and may be misled into participation in transactions which are violations of said laws, and will render them liable to the severe penalties provided for such violations; now, therefore,

"Resolved, That the laws above referred to as judicially construed may be duly executed, that the international obligations of the United States may be fully satisfied and that the citizens and all others within their jurisdiction, being reasonably apprised of their legal duty in the premises, may abstain from disobedience to the laws of the United States, and thereby escape the forfeitures and penalties legally consequent thereon;

"I, Grover Cleveland, president of the United States, do hereby solemnly warn all citizens of the United States and all others within their jurisdiction against violations of the said laws interpreted as hereinbefore explained, and give notice that all such violations will be vigorously prosecuted. And I do hereby invoke the co-operation of all good citizens in enforcement of said laws, and in the detection and apprehension of

any offenders against the same, and I do hereby enjoin upon all the executive officers of the United States the utmost diligence in preventing, prosecuting and punishing any infractions thereof.

"In testimony whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

"Done at the city of Washington this 27th day of July, in the year of our Lord 1896.

The rainy season begins in Cuba in May or early in June, and until the recurrence of dry weather, which continues from the last of October to May, military operations of an extensive character are practically impossible. The violent thunderstorms that occur between June and September often produce floods and bad roads. The military operations on the part of the insurgents were confined chiefly to skirmishes and raids.

Early in July Col. Drualla, with 600 men, had an engagement with the rebels near Balondron, in which the Spanish troops gained a victory. At about the same time a Spanish force of 1,500 men under Pered had a six hours' fight with the rebels under Jose Maceo, in which the latter was defeated. On the 9th the rebels attacked the outer works at Havana, and after a desultory engagement of short duration the rebels retired, having accomplished all they desired—the creating of great excitement in the capital city.

The most serious battle of the campaign was fought between the 9th and 11th at Najasa, in the province of Puerto Principe, lasting forty hours. The Spaniards were commanded by Gen. Castellanos, while the rebels were led by Gen. Maximo Gomez. The result was a drawn battle, neither side having gained any decided advantage, although Gen. Castellanos retired with his army to Puerto Principe. Very contradictory reports were sent out as to the military operations of the month. July 17 a decisive victory over the rebels was officially reported from Havana. The claim was made that rebel bodies under Iylesito, Betancourt, Sanchez and others were driven out of their entrenchments and put to flight by Gen. Marot. On the 15th Gen. Antonio Maceo gained a great victory in the province of Pinar del Rio. The Spaniards, with 2,000 men under Inclan, undertook to disperse the rebels, who were frequently attacking the trocha. Maceo prepared an ambush, into which Inclan was drawn with his whole force. The rebels opened fire, which threw the Spaniards into confusion, when a charge was made and the Spanish force utterly routed, with severe loss, including the capture of Inclan.

In a battle near Santa Ana Gen. Linares, with 3,000, badly defeated the rebels under Garcia, Cebreco and Perez, who led 2,500 rebels. Gen. Linares was on a march from Ramon de las Yaguas when he was attacked by the rebels, whom he forced to retreat to Santa Ana. On the following day the fight was renewed, when the rebels were driven from their positions but carried away all their wounded men.

The chief event in August was the disastrous defeat of the Spanish forces at Bayamo. The town had been invested for some time by the rebels, and the beleaguered were suffering for food and ammunition. The commander had been informed that assistance was on the way for him, and he sent out Capt. Perez with 150 men to meet it. The rebel general, Rabi, detached 500 men to intercept Perez, who succeeded in surrounding him and left not one of his band alive. Later in the day Rabi captured

the Spanish convoy, capturing 200 men and spoils of war amounting to many thousands of dollars. Within a few days of this event another convoy of Spanish troops was captured near Meron and 300 men were captured or killed.

Skirmishes and unimportant encounters took place at various times in September, the most important of which was fought on the 20th, near Calabazas, in the province of Havana. In this encounter a body of volunteers and regulars was attacked by 600 rebels under Castello and Delgado. The rebels charged the Spaniards most furiously several times with their machetes, but at the last charge a strong re-enforcing party joined the Spaniards and the rebels were routed. On the 29th of September a general attack on the positions of the insurgents was ordered in the province of Pinar del Rio. This resulted in two engagements. Three columns marched under command of Hernandez, Velasquez and Frances respectively. The first set out for Rumbao de Tolima, the nearest rebel outpost, where the Cubans were defeated and driven out. The other bodies moved to Manajal, where they drove out the rebel forces. In the two battles the insurgents lost about 100 men and had to abandon valuable supplies of military stores. A little later the insurgents were driven out of their post at Ceja del Negro after a hard fight, in which the Spaniards suffered most severely in loss of men. Of the 40,000 troops to be sent out from Spain for the winter campaign 30,847 had arrived in Havana by the close of September, but a large number were in the hospitals (about 10,000) and smallpox was epidemic in the city.

The 2d of October brought the news that Gen. Gomez had captured the town of Cascaro and had burned a large portion of it, and on the 5th came the confirmation of the report that Gen. Weyler's plans to entrap and capture Maceo in the province of Pinar del Rio had most miserably failed. Gen. Melquizo, who led the Spanish forces, was defeated by Maceo in three successive battles in the mountains of that province, with very heavy losses. On the 13th a mutiny broke out on the Spanish war vessel Alphonse XIII, at Ferrol, in which forty of the gunners attempted to seize the vessel's boats and leave the ship. After a hard struggle they were overpowered and put in irons. The rebel cause has made many friends in the capital city, and reported dissatisfaction with the government was fully verified on the 27th, when Gen. Weyler removed six professors in the university at Havana who had become compromised with the rebellion and in their places put six officers of the Spanish army.

The failure of the Spanish commanders to capture Maceo induced Gen. Weyler to take the field in person against him and great preparations were made to have the expedition a success. The position of the insurgent leaders was now such that the province of Havana was nearly entirely surrounded on the land side and attacks on the outposts of the city itself became of frequent occurrence. At the close of October Gen. Weyler announced his purpose to take the field and expectations were strong in Havana that with the recruits sent from Spain a turn would be made decidedly to the advantage of the government. In the first engagement, however, between Gen. Weyler and Gen. Maceo the former was severely repulsed, with heavy loss. Such was the military status on the 1st of November, 1896.

UNIVERSITY EXTENSION.

Origin of the work and its present scope as carried on in the United States.

The form of popular education which has sprung into prominence in England since 1873 and in America during the last decade, and which is commonly known as university extension, is primarily a movement to extend as far as possible the advantages offered by the colleges and universities to those who by force of circumstances are prevented from taking up residence work in an institution of higher education. It is not the desire of the promoters of the various phases of the work to represent it as a substitute in any way for residence work in a college or university, nor do they wish, as some critics pretend to believe, to offer a short cut to learning which in time will do away with the labor attendant upon procuring a liberal education. It has, however, been long felt by many that there is in every community a large and growing constituency which would be glad to substitute some systematic form of study for the haphazard methods afforded by popular lectures and by the social clubs doing so-called literary work, and it is in response to demands for work of this kind that the idea of university extension has been formulated into a system and has become a recognized method of educational activity.

The conditions under which university extension may be conducted varies somewhat in different countries, but in general it will be found that the constituency is made up of three classes of people: First, those who have not had the advantages of early school training; second, those who have had the advantages of only a secondary education, and, third, those who have gone even further and completed college courses but who wish to keep in touch with current thought along various lines. Thus it will be seen that university extension appeals to nearly all classes of society.

University extension has been very properly termed "the university of the busy," and the organized movement usually represents a co-operation between the college or university with some local organization, the details of the system varying in different places. In case of a lecture or class course (to be explained later) the society or club in charge of the local arrangements is technically called a "center." The method of procedure varies somewhat in different localities, but certain forms have become recognized as characteristics of the system, and, as the scope has been elaborated, new features have from time to time been added, until now there are three distinct departments of university-extension activity—namely, the lecture-study, the class-study and the correspondence-study departments. The lecture-study work, which is the oldest form of university extension, consists primarily of a series of systematic expositions on an assigned subject. These courses are arranged usually in units of six or twelve (sometimes ten) lectures, the work being framed so as to arouse the interest of the audience and prepare them for further work on the subject. A printed syllabus outlining the scope of the course and suggesting lines of private reading forms a valuable auxiliary toward the accomplishment of the educational end in view. Those who are so inclined are encouraged to write papers on special topics, and on completion of the course by successful examination the student is usually presented with a university-

extension certificate setting forth the name of the course completed and the grade of scholarship attained. By many institutions engaged in the work a traveling library, consisting of from twenty to forty volumes of the principal books bearing upon the subject, is furnished, which is left at some convenient place for consultation by members of the center. Another special feature of this branch of the work is the review class, which has grown in prominence through the demand for an extended discussion of the lecture by the audience. The success of this undertaking suggested the possibility of the second department mentioned above—namely, class instruction. The lecture-study movement paved the way for this method of university extension by showing the value to a community of doing thorough class work away from the university. In response to demands created in this manner a system has been formulated and educational results of great value have been attained. The university-extension class is conducted much in the same manner as one in residence, it being under the direct supervision of the instructor, and the courses usually consist of twelve two-hour sessions. The two methods of work explained above suggested the possibility of still further extending the advantages of the college and university to individuals situated at a distance, and the correspondence method was finally planned. After careful and painstaking experience a system has been worked out which is coming to be looked upon as a valuable method of instruction. The student is furnished with a written or printed outline of the course which he is to pursue, which includes suggestions for preparing the recitation, assigned readings, hints for research work, etc. He is expected to report to his instructor regularly, and on completion by an examination credit is usually given in such a manner as to materially shorten the time of required residence for a degree.

It would be exceedingly difficult to place the exact date at which the idea of university extension first took root in the minds of educational thinkers. It undoubtedly existed long before any of the present generation of workers thought of formulating a system, and can be easily traced in educational history far back into the middle ages. As it is known to-day, however, university extension is an outgrowth of the movement for popular education which has come into prominence during the latter half of the nineteenth century and which has manifested itself in the various forms of public and endowed schools. The idea can be very easily traced through the educational literature of the last sixty years, where the need of a more definite system of popular education has been advocated with more and more persistency. This has been particularly noticeable in England, where definite plans were first made toward the permanent establishment of the work.

As early as 1845 the phrase university extension had become popular in connection with several educational theories in England, and in 1850 there was a plan outlined in a report by the Rev. William Sewall, D. D., rector and senior tutor, Exeter college, to the vice-chancellor of the University of Oxford and formerly professor of moral philosophy, in which he struck the

keynote of university extension when he raised the question, "Though it may be impossible to bring the masses requiring education to the university, may it not be possible to carry the university to them?" although he attached a different meaning to this statement from that which it is now understood to convey. This pamphlet was entitled "Suggestions for the Extension of University Teaching," and was published Nov. 26, 1850. While this and several other documents of this period contained many forecasts of the system which was finally to be worked out, still no definite action was taken toward the permanent establishment for more than a score of years.

The twenty years following 1850 may be called the formative period of university extension. Prominently connected with the study of educational methods of England of this period was Prof. James Stuart, who, through his efforts on behalf of the cause which has enlisted his attention for more than thirty years, has been called "the father of university extension." As early as 1867 he had advocated a substitute for single lecture courses, and in working out his own ideas on the subject he had mapped out a system involving not only the lecture but also the written exercise, syllabus and the review class. As a result of the work of Prof. Stuart during this period a series of memorials was received by the authorities of Cambridge university from Birmingham, Leeds, Nottingham and other towns where he had lectured, suggesting the possibility of a co-operation between organizations in these towns and the university toward the establishment of a system of higher education for the people. These memorials led to the appointment of a syndicate to consider the question. This syndicate was composed of Prof. James Stuart (now a member of parliament), Prof. H. Sedgwick, the Rev. G. F. Browne (now canon of St. Paul's) and Dr. Westcott (now bishop of Durham). The report from this syndicate, with the communications from the memorialists, was placed before the senate of Cambridge university and adopted by it and afterward published in the Cambridge University Reporter (May 28, 1873). The plan in general satisfied the demands of the memorialists and provided a somewhat elaborate course, designed to meet the needs, "first, of workmen; second, of women, including those who have left school, governesses and school-mistresses; third, young men of the middle classes." This action on the part of Cambridge university marks the origin of modern university extension, and from the report of this syndicate has grown the elaborate system now presented by the various institutions doing university-extension work. Four years later (1876) the London Society for the Extension of University Teaching was formed and in 1878 Oxford entered upon the field. To-day nearly all the leading universities of England, Ireland and Scotland are actively engaged in university extension, and from the British isles the movement has extended to Australia, Canada and the United States, and recently the plan has been entered upon in Sweden and Austria. The growth of the movement during the first few years was slow. During the season 1879-80 ninety-seven courses were given in England, with a total attendance of 7,000. The development during the next decade was very rapid, and the reports show that during the season of 1889-90 374 courses were given, with a total attendance of 42,000. In the season of 1894-5 the number

of courses had increased to 486, with a total attendance of 51,633, and last year (1895-6) the number of courses had reached nearly 500, with a total attendance of about 55,000.

The readers of this article will of course be most interested in the development of the work in this country, and it is this which will now be considered. As in England, so in America, the idea had been agitating the minds of educators long before definite steps were taken toward organization. While the conditions in America were not the same in every particular as in England, still there was enough similarity to make the experience which the English workers had had exceedingly valuable in organizing the work. In 1887 the matter was discussed by Prof. Herbert B. Adams of Johns Hopkins university before the American Library association, and as a result courses were afterward offered by the public library authorities of Buffalo, N. Y., and St. Louis, Mo., which partook of many features of university extension. In 1886 features of university extension were introduced into the Chautauqua system. While not given under the direction of an educational institution, still all of the pioneer work was modeled after the English system. The first step taken toward permanent organization of the work was in Philadelphia in 1890, when the American Society for the Extension of University Teaching was organized. The English methods were thoroughly investigated and a system marked out which was intended to meet the needs of the field in which the new society was to work, and to provide for the permanent establishment of the work. The plan followed was in the main the same as that of the London Society for the Extension of University Teaching, and the history of the society from the beginning shows a steady and healthy growth. The following table gives a summary of six years of organized work under this society:

Year—	No. courses.	No. lectures.	Ag. av. at- tend. nce.
1890-1.....	42	298	7,392
1891-2.....	120	715	21,120
1892-3.....	108	625	18,822
1893-4.....	114	679	17,614
1894-5.....	126	723	20,000
1895-6.....	104	603	(*)
Total	614	3,643	

*Not reported.

Soon after the formation of the American society several institutions in different sections undertook the work, but for the lack of financial backing they were unable to continue the work. These organizations, however, contributed much toward working up sentiment in favor of the new movement and are deserving of considerable credit for their efforts. Prominent among these were the Cleveland Society for the Extension of University Teaching and the Chicago Society for University Extension. At this time several state institutions with more or less complete equipment engaged in the movement, and since then courses have been offered with varying degrees of success. Prominent in this work has been the State University of New York, the State University of Kansas, the Ohio Society for University-Extension Teaching, being an organization of the colleges of the state, and the Connecticut society, in co-operation with the American society of Philadelphia.

The next great step taken in university

extension was its recognition by the founders of the University of Chicago in the form of a separate division, making it an integral part of the new university. This action was taken by the University of Chicago in 1892, and by so doing it was the first institution in America to organize the work with a fully equipped corps of instructors. With the particular needs of the new field the promoters introduced into their system of university extension many features which were new to the movement, and, aside from the lecture work, separate departments were added in class and correspondence study. In the lecture work the same methods were followed as had been adopted in England and by the American society. The results of the work of the three departments are shown in the following tables:

THE LECTURE-STUDY DEPARTMENT.

Year—	No. centers.	No. courses.	No. lectures.	Ag. av. attendance.
1892-3.....	67	123	21	26,728
1893-4.....	72	33	17	14,063
1894-5.....	95	128	23	23,657
1895-6.....	81	120	30	25,345

THE CLASS-STUDY DEPARTMENT.

	1892-3.	1893-4.	1894-5.	1895-6.

No. students regularly matriculated	61	153	202	288

An important step in the history of the movement in America in connection with state institutions was the establishment of a separate department of university extension by the University of Wisconsin. A few courses had been offered during the few years prior to the establishment of the University of Chicago, but soon after this definite plans were made for carrying out an aggressive work. This university during the first year of organized activity gave about forty-five courses. The work has had a steady growth and is looked upon as a permanent feature of the university. During the last year and a half the systems of class and correspondence study have been taken up, and it is probable that these methods will henceforth occupy a prominent position in the movement in Wisconsin.

Special mention should be made of the work of Rutgers college, New Brunswick, N. J. The work here was entered upon in a small way at this institution in 1891, and during the first year seven courses were given in five different centers. The following season nine courses were given, and the results showed an increase over that of the first year. During the season 1893-4 still further gains were made, and fifteen courses were given at eleven centers.

A number of courses have been carried on in connection with the University of Cincinnati for several years, but with the opening of the present year the university recognized the work officially and provided for a separate department to meet the demands in the vicinity of Cincinnati.

A special feature which has been taken up by the agricultural colleges of several states during the last few years deserves mention—namely, a system of co-operation between the state agricultural colleges and the farmers' institutes. The methods are the same as those followed by university-extension organizations, and considerable work seems to have been done along this line. Accurate statistics, however, are not available. Prominent in this have been Michigan, Wisconsin and New Jersey.

According to the last report issued by the commissioner of education other institutions which have done more or less work during the last five years are as follows: University of California, Berkeley, Cal.; Leland Stanford, Jr., university, Palo Alto, Cal.; University of Colorado, Boulder, Col.; University of Denver, Denver, Col.; Knox college, Galesburg, Ill.; Lake Forest university, Lake Forest, Ill.; Monmouth college, Monmouth, Ill.; Indiana university, Bloomington, Ind.; Earlham college, Richmond, Ind.; State University of Iowa, Iowa City, Iowa; Tulane university, New Orleans, La.; Bowdoin college, Brunswick, Me.; Colby university, Waterville, Me.; University of Minnesota, Minneapolis, Minn.; William Jewell college, Liberty, Mo.; University of Oregon, Eugene, Ore.; Pacific university, Forest Grove, Ore.; Willamette university, Salem, Ore.; University of the South, Sewanee, Tenn.; University of Texas, Austin, Tex.; Richmond college, Richmond, Va.; University of Wyoming, Laramie, Wyo.

Workers in this country have found the conditions in many cases entirely different from those in England, and have been obliged to work out a system which would be applicable to special needs as they arose. However, experience has proved during the few years that the system has been in operation that America is a fertile field, and there is no doubt as to the permanency of the movement. NEWMAN MILLER.

SKETCH OF OUR FINANCIAL PANICS.

The long business depression that has followed the financial disturbance of 1893 has given great interest to the monetary disasters that preceded it in the United States. These financial upheavals have formed epochs in our history, and each one has been the starting point from which has dated increased industrial and commercial prosperity of the whole country. They have been to our finances and business something like a severe midsummer thunderstorm, which, however terrible it may have been, has resulted in clearing the atmosphere and restoring a healthier condition of things.

There have been in our financial history

eight great panics, not to mention a number of hurries that have temporarily and locally disturbed business of all kinds. The first of these was in 1819. Wild and extended speculation was one of the immediate causes of the business disaster which set in in 1819, and another was the heavy merchandise importations from Europe, and especially from England, which the close of the war of 1812-15 precipitated on the country. The speculation started with the reorganization of the United States bank in 1817, which materially improved the facilities for business credits.

The bank discovered that through its is-

suces it had passed the limit of safety, and that in 1818 it was at the mercy of its creditors. The payment of some of the foreign debts and the large expenditures for Chinese and Indian goods produced a demand for specie which the bank was obliged to meet. The bank began to reduce its notes, which it did to the extent of more than \$7,000,000. With a capital of \$2,000,000 the discounts of the bank reached \$43,000,000, besides some \$12,000,000 loaned on public securities. To carry on its operations the bank was forced to exchange a portion of its funded debt for specie bought in the West Indies, and in one year it imported \$6,000,000 of specie. The bank could not, however, import specie fast enough to stop the drain caused by the redemption of its paper. A congressional investigation of the affairs of the bank resulted in a report that it had violated its charter. This was followed by the flight of the governor of the bank and a fall in the value of its stock. The wild speculation of 1817 and 1818 was stopped, confidence was destroyed, payment of debts was demanded, and a general panic was the result.

The tariff's connection with the panic of 1819 came about this way: Around the time of the outbreak of the war with England in 1812 congress as a war measure doubled the rates of all existing duties. This law remained in operation about four years. Imports practically ceased under this law and the risks which the war caused to commerce, and the capital of the country turned at once to manufacturing as its best avenue for profit. The shipping interest was crippled by war and the legislation hampering foreign commerce, and a large part of the money invested in this interest was diverted to other channels, but chiefly to manufacturing. The close of the war and the expiration a little later of the war tariff found the country with a larger number of factories than it could have gained in three or four times that period in any other condition, and the factories were able to go a long way toward fully supplying the country with commodities in their line. When the restraints against foreign commerce were removed the country was flooded with cheaper and doubtless better goods from England, and the domestic manufacturer found a competition he could not cope with on existing terms. Factories began to close at once, and eventually this produced the condition of uncertainty and depression which the collapse of speculation before mentioned intensified into panic and transformed into prolonged financial and industrial prostration.

As a result of this business convulsion prices fell over 50 per cent, exchange on England rose to 105 and 106, which carried off the gold coin of the country, and land fell in value from 40 to 45 per cent—"thousands in actual want, families living on \$1 a week, women earning 6¼ cents a day." It was four years before the country recovered its normal business condition.

THE PANIC OF 1837.

"I leave this great country prosperous and happy," said Jackson in a farewell address about the time he left the presidency in the early part of 1837. Appearances were delusive, however. Scarcely had Jackson's successor, Van Buren, entered the white house when one of the most widespread and disastrous financial convulsions

which the United States has ever known set in.

The panic of 1837 was more extensive and serious than that of 1819. The country was considerably more populous and its business interests were far more diverse and important. About 9,000,000 inhabitants were in the country when the crash of 1819 set in, and 16,000,000 were here when the convulsion of 1837 took place. The difference in the volume of business between the two dates cannot be so readily figured out, but it was enormous.

About the time that Van Buren entered upon his duties, early in March, Herman Briggs & Co., a large business house in New Orleans, failed. This was the beginning of the panic of 1837. The financial storm which had been gathering during the whole of the Jackson administration now burst forth with terrible fury. Loans were called in by the banks, bank circulation was contracted and business men of the highest standing in the community, being denied accommodation by the financial institutions, were unable to meet their debts. Banks, too, went down in the tempest. Business houses which had successfully weathered many financial gales were wrecked. All sorts of property immediately and immensely declined in values. Suddenly everybody seemed to be insolvent. Confidence vanished. Nobody would trust anybody. Unreasoning terror seized almost the entire community. Business came to a standstill. Post notes were sold, made payable in England, and were remitted in payment for specie. Then came the news that the London houses dealing in the paper were embarrassed and were carried by the Bank of England, which increased the distress here.

In New York city alone in March and April, 1837, the failures reached the enormous sum of \$100,000,000. In New Orleans in the same time they aggregated \$50,000,000. Other business centers suffered severely also. All the banks in New York suspended specie payments and the legislature of that state authorized the suspension to continue for one year. Banks in other cities followed the example of those in New York and specie virtually disappeared from circulation. Even the United States government had the greatest difficulty to obtain gold for silver, and it was compelled to pay the army and navy in paper money, which, though worth its face at the time of payment, might be immensely reduced in value to-morrow. Factories and business enterprises of most sorts stopped altogether or were run only on quarter or half time, and great numbers of employes were thrown out of work. The banks suspended, gold went to a premium of 125 and the country was flooded with "shin-plasters."

A deputation of merchants and bankers from New York called on President Van Buren in May, 1837, two months after he gained office, and appealed to him to summon an extra session of congress to provide means of relief from the prevailing distress. Congress was called to assemble on Sept. 8, but beyond the passage of a bill authorizing the issue of \$10,000,000 in treasury notes it did very little of what the people demanded or Van Buren desired. In the regular session, however, congress passed an independent treasury bill which Van Buren recommended, providing a special receptacle for the money of the government, which had previously been deposited in a few banks, called by the government's foes "pet

banks." Out of this law developed the treasury and sub-treasuries, the latter of which are situated in the chief cities. In Tyler's presidency the independent treasury scheme was repealed, but under Polk it was reenacted.

The panic of 1837-9 was caused by the undue extension of credits, which resulted in the wildest of wild speculations. The various states in the union had contracted large debts, and the payment of interest was provided for by new loans. No money came from abroad and interest rose to 20 per cent, while the rate of discount for the best paper was 15 or 18 per cent. Business circles were flooded with long-time paper sold at ruinous discounts, and the panic was so great that all confidence was destroyed. Reports showed 33,000 failures and a loss of \$440,000,000.

THE PANIC OF 1848.

The panic of 1837 resulted in a great liquidation of debts. The number of banks was reduced by failure from 901 to 691 in 1843, while bank capital was reduced from \$350,000,000 in 1840 to \$196,900,000 in 1846. But no sooner was this condition of things reached than expansion of credits began and discounts increased from \$264,000,000 to \$344,000,000 in 1848. The number of banks also increased from 691 in 1843 to 751 in 1848. This meant a corresponding increase in bank capital and of paper circulation, which rose from \$58,000,000 to \$128,000,000 in 1848. To make matters worse the metallic reserve of the banks fell from \$49,000,000 in 1844 to \$35,000,000 in 1848. The panic that followed when the time for adjustment came in 1848 was not protracted nor very severe. Possibly the country would have escaped it entirely had it not been for a panic in Europe, which was felt here, without causing serious disturbances.

THE PANIC OF 1857.

The business depression in 1848 was brief and the country rapidly recovered. The country was prosperous, which caused a large increase in the number of banks. In 1846 there were 707 banks, with a capital of \$196,000,000, but in 1857 there were 1,416 banks, with a capital of \$370,000,000. All this produced increase of business enterprises and an expansion of credit that was purchased by high rates of interest, and the money was invested in speculative operations. The political situation was also disturbing to all business enterprises.

The passage of the Kansas-Nebraska bill three years earlier had repealed the Missouri compromise and thrown the territories open to slavery; the sections were beginning to prepare themselves for the desperate political struggle which was to occur at the polls three years later, and the shadow of the greater and fiercer struggle lying beyond was already looming up. But the financial situation drew men's thoughts away from coming political combats and concentrated them on the immediate danger.

The panic of 1857 was ushered in by the failure of the Ohio Life and Trust company of Cincinnati, which occurred on Aug. 24 of that year. This was in the first year of the Buchanan administration, as the beginning of the panic of 1837 had been in the first year of the administration of Van Buren. The liabilities of the Ohio Life and Trust company were over \$7,000,000. It was an institution whose credit and prestige stood especially high. When it fell it brought banks and business houses in differ-

ent parts of the country down with it. Several banks in Philadelphia succumbed soon to the storm, runs were made on banks in the principal cities in the various states and suspensions of specie payments became general, though not quite universal. Factories and other business enterprises stopped work and immense numbers of people were thrown out of employment. A widespread prostration in business set in. For a year or thereabouts the scenes of 1837 were repeated. The rally occurred quicker, however, than it did from the panic of 1837, for most of the strong banks resumed specie payments within six months after the crash set in, but it was 1860 before all the traces of the financial wreck were removed.

The principal causes of the financial convulsion in 1857 were: (1) Wild speculation in lands; (2) excessive building of railroads; (3) overproduction in most lines of manufactured goods; (4) inflated prices on the general articles of necessity and on many articles of luxury. These were the immediate causes. The ultimate cause was the discovery of gold in California.

The finding of the California gold fields was one of the great events of the first half of the nineteenth century. It stimulated trade not only in the United States but in every civilized land, and exerted an influence on the commerce, industry and social life of the world which was felt for many years. Its first effect, however, in this country was far from beneficent. It started an insane speculation and led to the general trade excesses pointed out in the preceding paragraph, which, in the reaction that was inevitable, resulted in disaster in 1857 and 1858. Everybody supposed he was going to get rich in a hurry, and consequently he put highly exaggerated prices on everything he had to sell, and the same hopeful feeling led him to pay without a murmur excessive prices for the things he had to buy. Lands were bought with the expectation of being sold next day at a large increase. Railroads were constructed on the assumption that the tremendous expansion in population and wealth hoped for would enable them to pay immense dividends at once, while in reality many of these roads were beyond the needs of the country for the next dozen years. The same buoyant spirit led to the overproduction of all kinds of goods. Everybody was going to be wealthy, anyhow, and, therefore, everything which was made would find ready purchasers at high prices. The awakening from this dream was rude, but it was salutary, and business as well as men's plans and expectations eventually adjusted itself to the normal conditions.

THE PANIC OF 1869.

This panic, known as "Black Friday," was short and intense, but it hardly extended beyond Wall street. It has become historic and is worth more than a passing mention. The panic was caused by an effort of Fisk & Gould to corner the gold market and force gold up to 180.

Gold was then a commodity, and was bought and sold like ordinary merchandise or like stocks. It was at a premium in our currency and remained so until Jan. 1, 1879, when specie payments were resumed by the government. The conspirators controlled, or imagined they controlled, nearly all the gold held in private hands, and got it at about 131. By manipulation they at once sent it up to 150. This is the price at which it stood on the morning of that fateful Friday, Sept. 24, 1869—"Black Friday."

Everybody felt that the corner could not be broken unless the government sold gold, while the clique boasted that the government was on its side. The prices, which started at 150 on this memorable Friday, were slowly but steadily forced up to 162, while bulletins posted in every city in the country showed the advance. Such excitement was never seen in the country at any other time as was shown on that day.

But the culminating point was reached when the quotation touched 162. Unknown to the conspirators the treasury had come to the rescue. At the 162 bid \$1,000,000 was sold to the clique and the price went down to 161. At this rate and at 160 other sums were sold, and all by the same individual. Consternation seized the clique, and they, as well as the onlookers, began to realize that this individual, who stood calm in the midst of this confusion, must have measureless resources at his back. Suddenly his identity was divined. Like lightning word went through the exchange: "The treasury is selling." Scores of operators rushed to sell, and in a few minutes the quotation had dropped to 135. The gold bubble had burst and "Black Friday" passed into history.

THE PANIC OF 1873.

Next on the list of the country's financial convulsions was that of 1873. Early in that year a general feeling of insecurity began to be felt in business circles. Banks curtailed their loans and exercised greater discrimination in bestowing their favors. Shrewd business men, too, shortened their periods of credit. The knowing ones on all sides began to prepare for the financial tornado which they felt to be impending. And yet, when the storm did come, it may be said to have taken the country by surprise.

During the last two months of 1872 the American market had been in an unsatisfactory condition and rates of discount were large, reaching a rate of one-quarter of 1 per cent a day, which rate continued until May of 1873. The month of April was one of great depression and uncertainty, which in May reached the panic stage. The outbreak was prevented until September, when the crash came.

On the 8th day of that month the New York Security and Warehouse company sunk under its load of Missouri, Kansas & Texas. On the 13th Daniel Drew's firm went down with Canada Southern, and on the 17th, the fateful 17th of September, the great banking house of Jay Cooke & Co. was buried under the weight of Northern Pacific and the panic of 1873 was "on." Then banking and business concerns on all sides collapsed and the New York stock exchange put up its shutters for the time being.

In the remainder of 1873 the scenes of calamity witnessed in 1837 and 1857 were repeated. Banks suspended payments temporarily throughout the greater part of the country and many of them were wrecked permanently. Factories suspended or reduced the hours of labor, large numbers of employes were thrown out of work and the distress was widespread and serious. The effects of the panic lasted until about the middle of 1877, or about a year and a half before the resumption by the government of specie payments, which had been suspended in the early part of the civil war.

The principal causes for the panic of 1873 may be broadly summarized thus: (1) The inflated and fluctuating currency; (2) large exports of gold; (3) excessive railway build-

ing; (4) heavy speculation in real estate and in other directions.

THE PANIC OF 1884.

The panic of 1884 was the most unexpected of any that has burst upon the country. There had been commercial disturbances since January, 1882, but the general outlook was not indicative of the panic that came on the 14th of May and lasted little over a month and a half. But there was during that time an enormous fall in prices and losses estimated at \$240,000,000, nearly all of which were sustained by the financiers and speculators, without injuring manufacturers and merchants. From 1876 to 1884 there was a period of gigantic railroad speculations, which reached its climax in 1880-1. The construction of new lines had increased competition and greatly reduced the value of railroad property. In May, 1884, the public was informed that certain heavy speculators in New York had used the funds of other persons in their speculations, among which were Ward of Grant & Ward; Fish of the Marine bank; Eno of the Second national bank, and some others.

The Marine bank suspended May 5, and the following week a large number of business houses failed. But by the 15th of May the Metropolitan bank was on its feet again and the losses of the Second national bank were made good by the father of its president and the board of directors. Several railroads went into the hands of receivers, among which was the New York & New England. The panic was the worst from the 3d to the 10th of May, and although it was general it was a panic of securities in the chief cities of the country, especially in New York. It is claimed that the panic was caused by the loss of gold, which was concealed under the assurance that there was a reserve of \$600,000,000 in Washington.

THE PANIC OF 1890.

In 1888 business was fairly good, but securities were heavy and depression was general. Money was easy and there was sharp speculation in railroad stocks. Crops were large and manufacturing was fairly profitable. There were many railroad consolidations and a number of foreclosures. There were large exports of gold and small returns, but while the net export of gold reached \$40,000,000 exports increased over imports. During 1889 bank circulation declined to \$126,000,000, while the specie reserve was reduced. When the year 1890 opened the demand for bank accommodations increased, but so great was the overtrading that the banks could not supply the demand. To meet the stringency in the money market the government threw \$1,000,000 a day for seventy days into the market for the purchase of bonds. This tided matters over until November, when the failures began with the going down on the 11th of Decker, Howell & Co.; Charles M. Whitney & Co., Gregory & Ballou and many others in New York failed, as did the Barings of London.

The prosperous condition of manufacturing was a strong check to the panic, which came to an end with the closing of the year.

THE PANIC OF 1893.

This, the last of our great panics, was the most disastrous, widespread and continuous of any that had preceded it. The causes that led to it have been the subject of much discussion and dispute. Some declare that it was inaugurated with the intent to scare the people and congress into a repeal of the

Sherman silver-purchasing bill, and that those who engineered it lost control of it and really suffered severely from it. Others charge it upon a contraction of the currency and low prices that followed the demonetization of silver, while others claim that it was due to business depression caused by a want of confidence in the new administration which came into power on the 4th of March, 1893. Whether it was any one or all of these combined that produced the panic, it cannot be denied that it has been the most disastrous to the people of the country of any convulsion in our financial history.

On the 28th of April the banks of New York began calling in their loans from operators on the stock exchange and refusing an extension of credits, and the flurry caused by this act produced intense excitement in the city. On the 9th of May a cordage factory in Brooklyn failed, and through May and June failures followed each other in too rapid succession to be recorded. Mills in Pennsylvania, factories in the New England states and shops of all kinds all over the country closed, throwing thousands of men out of employment. From

the 9th to the 30th of May—twenty-one days—sixty banks in fourteen different states closed. In June the record is still worse, and 112 banks closed their doors, besides business houses too numerous to mention. As an idea of the extent of the ruin wrought by this panic, the records show that "between April 27 and Dec. 31, 1893, a period of eight months, more than 15,000 bankruptcies and suspension of commercial and industrial concerns took place, and more than 600 banking institutions and banking firms were seriously injured or wholly ruined. The total amount involved in the bankruptcies and suspensions of all these firms, companies and institutions during these eight months was, roundly, \$750,000,000." It is reported that \$1,200,000,000 of railroad properties were forced into the hands of receivers and that 3,000,000 persons employed at lucrative labor were forced out of work into idleness.

The prostration of business that followed so severe a convulsion was fearful and of long continuation. The return to prosperous times has not yet begun, although there has been a more settled condition in business and some favorable indications.

STATE AND MUNICIPAL FINANCES.

The following table shows the bonded indebtedness of states and cities, without regard to sinking funds or floating debts, the assessed valuation of real, personal and other property (which varies from 50 to 75 per cent of its actual value), and the rate of taxation. In almost all cases the rate of taxation covers all the taxes, state, county, city and school.

These statistics are compiled from several reliable sources, chiefly from the Financial Chronicle and the Bond Buyer:

	Bonded debt.	Assessed valuation.	Tax rate per \$1,000
Alabama	\$9,299,400	\$135,535,792	\$7.50
Anniston	295,000	4,800,720	14.00
Birmingham	1,610,000	23,000,000	5.00
Birmingham	142,050	1,428,465	10.00
Florence	71,000	1,999,704	14.00
Huntsville	62,200	1,743,730	20.50
Mobile	2,264,192	14,556,427	13.50
Montgomery	1,044,050	12,136,459	21.25
Selma	440,000	5,008,545	22.25
Arizona	2,417,000	28,490,000	
Phoenix	40,000	2,621,454	
Prescott	88,000	3,000,000	37.50
Tucson	28,000	1,423,747	10.00
Arkansas	1,805,000	173,526,484	5.00
Little Rock	124,500	11,428,503	21.75
California	3,377,500	1,205,918,402	4.93
Alameda	175,750	12,019,795	9.50
Fresno	148,750	6,175,363	28.00
Los Angeles	1,578,350	47,427,020	12.00
Oakland	644,000	45,382,330	11.20
Pasadena	137,861	7,782,540	10.00
San Diego	331,000	14,406,189	10.00
San Francisco	599,000	327,845,342	22.50
San Jose	275,000	16,874,799	26.00
Santa Barbara	88,700	4,514,974	20.29
Santa Cruz	360,000	3,907,400	28.75
Santa Rosa	156,750	3,950,000	23.30
Stockton	315,945	13,164,968	16.20
Vallejo	282,000	1,982,107	20.70
Colorado	3,088,283	208,905,279	4.00
Boulder	152,771	1,037,435	60.80
Canon City	110,000	693,331	61.70
Colorado Sp'gs	695,650	5,867,225	
Denver	2,012,300	67,851,815	28.20
Highlands	86,000	3,410,910	32.20

	Bonded debt.	Assessed valuation.	Tax rate per \$1,000

THE COST OF BIG TUNNELS.

A recently published item relative to the comparative cost of the world's four great tunnels places the cost of the Hoosac tunnel in the United States, the oldest one of the lot, at \$76, or about \$380, a foot. The Mont Cenis tunnel, the next in date, cost, according to the same item, \$71, or about \$355, a foot; the St. Gothard cost \$46, or \$230, a foot, and the Arlberg, the latest in date, cost only \$31, or \$155, a foot. This rapid decrease in cost within comparatively few years is cited as a marked indication of the great progress in mechanical methods and improvement in rock-excavating tools. A still more striking result exists in the case of a tunnel through the Cascade mountains,

on the line of the Northern Pacific railroad, in the United States. This, unlike those named, which were excavated in old, settled countries, with the terminal easy of access, was in a peculiarly difficult location—so much so that it took months to convey the machinery to the spot. Rivers had to be turned aside, bridges built and material transported over improvised roads through nearly 100 miles of forest, mud and snow fields, yet the tunnel, which is 16½ feet wide, 22 feet high and 8,950 feet long, was bored through the mountain in twenty-two months, at the rate of 413 feet a month and at a cost for the completed tunnel of only \$24, or about \$120, a foot.

MEN OF THE YEAR.

WILLIAM M'KINLEY.

William McKinley, the republican president-elect, was born at Niles, Trumbull county, O., on the 29th of January, 1843.

William McKinley, the father, being then fairly well-to-do, the younger William was sent to a school at Niles. The family having removed to Poland, the boy was given such educational advantages as might be had at the Poland academy. William McKinley was to be sent to college—at 16 was matriculated in the Allegheny college of Meadville, Pa. His father having been just then somewhat restricted for means, it became necessary that the lad should give up his college career, and so he taught in a district school near Poland, receiving \$25 a month.

William McKinley was 18 when the war of the rebellion broke out. In June, 1861, he enlisted in company E of the 23d regiment of Ohio, and served as a private for over a year. For courage and ability when taking part in the West Virginia campaign he rose rapidly in the line of promotion. He was a second lieutenant Sept. 24, 1862; first lieutenant Feb. 7, 1863, and a captain July 25, 1864. His service was an extended one, for he was with Sheridan in the Shenandoah campaign; took part in the actions at Winchester, Kernstown, Floyd Mountain, Berryville, and in all the battles of the 23d regiment. He served on the staffs of Gens. Hancock, Hayes, Crook and Carroll. When the regiment he had joined was mustered out July 26, 1865, Captain and Brevet-Major William McKinley received an honorable discharge. Unquestionably, the man had through four years of arduous service shown his soldierlike qualities.

William McKinley was 22 years of age, and might have entered the regular service of the United States, but the young man's father was opposed to his son receiving a commission. William McKinley now studied law, and entered the office of Charles E. Glidden and David Wilson, then the leading practitioners of the Mahoning county bar. In 1867 he attended the legal course at Albany, N. Y., and was admitted to practice in 1867. Going to Canton, he entered into partnership with Judge Belden. In 1869 he was elected by the republicans as prosecuting attorney of Stark county, and this was probably William McKinley's debut in politics.

From that time on Mr. McKinley took an active part in political affairs. In 1876 he was announced as the candidate for the congressional nomination, and was elected. This was his first entrance into national politics. In 1878 he was again elected to the same position. In 1890 he became a conspicuous figure, as he ran in opposition to Lieut.-Gov. John W. Warwick. It was during this year that the tariff bill to which his name is attached became a national topic. The election resulted in the defeat of McKinley. This fight was an exceedingly bitter one, but brought the republican candidate markedly before the public.

In congress Mr. McKinley served on several committees—on the judiciary, revision of laws, postoffice expenditures, and rules. When Mr. Garfield accepted the presidential nomination Mr. McKinley took his place on the committee of ways and means,

and served continuously in that position. As its chairman he was in the front, in the contest over tariff revision, in pushing forward the act of 1890.

In 1891 Mr. McKinley was nominated for governor of Ohio, and was elected by a plurality of 21,511 votes. Running for the same office in 1893, he defeated the Hon. L. T. Neal by a majority of nearly 81,000 votes.

GARRET A. HOBART.

Garret A. Hobart, the republican vice-president-elect, was born at Long Branch, N. J., June 3, 1844. About thirty years ago Mr. Hobart went to Paterson as a law student, having been graduated from Rutgers in 1863. He studied for his profession in the office of Socrates Tuttle. By 1869 he had become a lawyer and married Mr. Tuttle's daughter. Two years more found him city counsel of Paterson. Then he was elected to the assembly, and he was made speaker in his second year. In 1876 his fellow-citizens of Passaic county sent him to the state senate, and in 1881 he was chosen president of that body. For eleven years he was chairman of the republican state committee, and since 1884 he has been New Jersey's representative on the national committee, being for most of the time vice-president and a member of the executive committee.

In business Mr. Hobart's experience has been even more extensive than in politics. His shingle had not been hanging out long before he began to promote enterprises of considerable importance. In all of these corporations he became a stockholder by virtue of his services, and usually he also served as counsel and director. Thus the foundation of his fortune was laid. When the hard times of the '70's came on his interests were already so numerous and so diverse that it required all his energy and judgment to carry them through, but he bore the burden manfully and made steady progress in power and in the estimation of his business associates.

He was first receiver, and then for a short time president, of the New Jersey Midland railroad, and also receiver of the Montclair railroad, the Jersey City & Albany railroad and the First national bank of Newark. He was selected last December as one of the three arbitrators to hear and settle all differences that might arise between the members of the Joint Traffic association.

At the date of his nomination for the vice-presidency he was connected with the following corporations: He was president of the Passaic Water company, of the Acquackanonk Water company, of the Morris County railroad and the Paterson Electric railway companies; a director of the New York, Susquehanna & Western railroad and the Lehigh and Hudson River railroad companies; of the First national bank of Paterson; of the Paterson Savings Institution, the Barbour Bros. company, the Barbour Flax-Spinning company, the Pioneer Silk company, the People's Gas-Light company, and the Paterson Electric-Light company.

He is counsel for the East Jersey Water company, the West Milford Water-Storage company, the Montclair Water company and other allied interests of the big water syndicate. He is a director in the Long Branch Water company and the Highland Water company, treasurer of the Cedar

Lawn Cemetery company and several land companies, and holds the position of president or director in a dozen other smaller corporations.

On Dec. 30 last he was selected one of three arbitrators by the thirty railroad presidents who represent the Joint Traffic association. These arbitrators are to finally hear and settle all differences that arise among the members. The association represents the greatest aggregation of railroad capital in the world. Mr. Hobart's busy commercial life has been a successful one. He is said to be worth more than \$1,000,000.

WILLIAM JENNINGS BRYAN.

William Jennings Bryan, nominated for president on July 10 by the democratic convention at Chicago, was born at Salem, Marion county, Ill., on March 19, 1860, and is therefore 36 years old. Mr. Bryan's father was Silas L. Bryan, who was born in Culpeper county, Virginia, and who went to Illinois when he was 18 years old. The father was elected state senator, and in 1860 was a circuit judge, and became a member of the constitutional convention of 1870. Mr. Bryan senior was a lawyer of distinction and a good public speaker. He died some seventeen years ago.

William Jennings Bryan when a child was sent to the public schools in his own town of Salem, and afterward to the Whipple academy at Jacksonville. When he was 15 he entered the freshman class of the Illinois college, and was graduated with distinction in 1881. Leaving Jacksonville, he studied law in the Union college of Chicago, and to acquire practical knowledge entered the office of Senator Lyman Trumbull. Having concluded his legal studies he returned to Jacksonville and began business as a lawyer. In 1887, some legal matters in Nebraska requiring Mr. Bryan's personal attention, he went there, and was so pleased with the state as to make up his mind to remain there. He then opened an office in Lincoln, the capital of Nebraska.

In 1888 Mr. Bryan may be said to have made his debut in politics. He became a delegate to the democratic state convention, which met at Omaha, and his duty was to select representatives to represent the party at the national convention at St. Louis. A speech of Mr. Bryan's at this time in opposition to the tariff attracted some notice. When the election took place Mr. Bryan entered heartily into the campaign and stumped the state.

In 1888 the democratic nominee had been defeated, and it was thought wise to introduce younger blood into the political arena. In 1890 Mr. Bryan was offered a nomination to congress, and through his own personal exertions, it is said, won his seat. From the overwhelming defeat of the prior democratic candidate, Bryan was elected by a majority of many thousands. When in Washington, during his first term of service, as a recognition of his services for tariff reform, Mr. Bryan was advanced to some prominence. Throughout the LIId congress, though the junior member in the house, Mr. Bryan was often to the front in his attacks on the tariff. When standing for election in the LIId congress political feeling had somewhat changed in the state, and he was elected by but a scant majority.

Then Mr. Bryan became a free-silver advocate, and joined Mr. Bland, and, perhaps, as a lieutenant, took the place of Mr. Pierce of Tennessee. In the prior congress Mr.

Bryan's silver proclivities, though evident, were not salient. Now he came somewhat more to the front. Tariff was a measure now of secondary consideration. When there was an endeavor to repeal the Sherman silver-coinage act Mr. Bryan's speech was in the strongest opposition to it. This speech certainly attracted attention, and was indorsed by the entire silver party.

After this second term Mr. Bryan seemed in a measure to have retired from official politics. He returned to Nebraska, reopened his office, and was apparently anxious to obtain business. Very soon after his return home he became the editor of the World-Herald of Omaha. The paper was a strong advocate of the free coinage of silver. Mr. Bryan was now distinctly in opposition to Mr. Cleveland. Mr. Bryan resigned his position on the paper in 1894 and devoted himself to his profession and to the advocacy of free silver. He was constantly on the wing, speaking in its favor, and some of his latest oratory on his favorite topic, previous to the convention, was in Alabama, in the iron district there.

In all his recent speeches and utterances Mr. Bryan has declared himself as opposed to any compromise on the silver question. It is the free, unlimited coinage of both gold and silver, 16 to 1, indifferent to the wants or the requirements of the rest of the world, that Mr. William Jennings Bryan advocates.

ARTHUR SEWALL.

Arthur Sewall, nominee of the democratic convention at Chicago for vice-president, was born at Bath, Me., Nov. 25, 1835. The first Sewall came from Coventry, in England, to the American colonies in 1634.

The Bath Sewalls have been identified with ships and ship-building since 1823. Arthur Sewall received a school education, and after an apprenticeship in the shipyard of his father, the late William D. Sewall, formed in 1854, with his brother Edward, the ship-building and commission firm of E. & A. Sewall. On the death of Edward Sewall, in 1879, the firm became the present house of Arthur Sewall & Co.

In all, ninety-seven wooden ships have been launched from the Sewall yard in seventy years, including the Roanoke, the largest wooden sailing ship afloat. Two years ago the firm began to equip its shipyard with a plant for making the modern type of steel vessels.

Mr. Sewall has been a director of the Maine Central railroad since 1875, and became its president, and president of the Portland, Mount Desert and Machias steamboat company, in 1884. He also has been largely interested in the Atchison, Topeka & Santa Fe system. He is the president of the Bath national bank.

In politics Mr. Sewall has been a democrat; but in 1895 he came out as an advocate of free silver. In 1893 he was a candidate for the United States senate. Mr. Sewall is supposed to be a man of large means, carrying on a lucrative business.

THOMAS E. WATSON.

Thomas E. Watson of Thomson, Ga., the people's party nominee for vice-president, was born in Columbia county, Georgia, Sept. 5, 1856. He received a common-school education, and was then sent to Mercer university, Macon, Ga. At the end of the sophomore year he left college for lack of funds and taught school two years.

He read law for a few weeks under Judge W. R. McLaws of Augusta, Ga., and was admitted to the bar, commencing the prac-

tice of the profession at Thomson, Ga., his old home, in November, 1876. He was a member of the Georgia legislature in 1882-3, was democratic elector for the state-at-large in 1888, and, besides the practice of law, has been and still is largely interested in farming.

He was elected to the LIId congress as a democrat, receiving 5,456 votes, against 597 votes for Anthony E. Williams, republican.

Mr. Watson served but one term in congress, being succeeded in the LIId by James C. C. Black, who was elected as a democrat, receiving 17,772, against 12,333 votes received by Mr. Watson, who ran as the candidate of the people's party. Mr. Watson also ran as a people's party candidate for the LIVth congress from the same district, but was again defeated by Mr. Black.

Watson's unique personality made him a conspicuous figure in the house of representatives. He was a fiery debater and took part in numerous hot parliamentary fights.

In personal appearance Watson is thin and angular, with a clean-shaven face of intellectual cast, and thick auburn hair.

JOSHUA LEVERING.

Joshua Levering, prohibition candidate for the presidency, was born in Baltimore Sept. 12, 1845, and was in school until 1866, when he became a partner in the firm of E. Levering & Co.

The public office ever held by Mr. Levering is that of manager of the House of Refuge, a reformatory for boys. He was first elected in February, 1879, and has for over seventeen years continuously served in that capacity. The institution is maintained by the state of Maryland and the city of Baltimore. It is controlled by a board of twenty-four managers. In March, 1886, Mr. Levering was elected president of the board, and since then has been unanimously re-elected each year. Though Mr. Levering is one of the busiest men in Baltimore, he is always ready, as the head of the board, to attend to anything pertaining to the reformatory, from the most important matter to the minutest detail. There are few days in the year, aside from the sabbath, that he is not called upon to attend to some business connected with the House of Refuge. In addition to this, he is a member, ex officio, of all standing committees, and is, when required, always prompt in attendance of meetings. He is likewise an active member of the purchasing and auditing and of the school and chapel committees.

Previous to 1884 Mr. Levering was classed as a democrat, though always independent in his political action. When the prohibition party in that year nominated John P. St. John of Kansas and William Daniel of Maryland as its national standard bearers, the question of political opposition to the licensed liquor traffic was projected into Maryland politics for the first time, and he immediately espoused its cause. He voted the prohibition party ticket then for its declaration against the legalized rum power alone, and has been its faithful and able advocate ever since, for the same reason. He persistently refused nomination for office, though holding a commanding place in the councils of the party, until 1891, when the nomination for state comptroller was laid upon him. The greatly increased vote of the party that year demonstrated the wisdom of the nomination and the great respect in which Mr. Levering was held by all parties. In 1892, when the national convention met at Cincinnati, his name was presented with-

out his consent in connection with the nomination for the vice-presidency, and was received with such demonstrations of approval and strength that at one time it was considered that he would be declared the nominee, but subsequently it was decided in favor of Dr. J. B. Cranfill of Texas. In 1895 he was nominated by acclamation for governor by the state convention, and, notwithstanding his declination, he was induced to take it under consideration, and, in order to save the party from the embarrassment of a resignation after the convention had adjourned, he accepted the trust and made an excellent and thorough canvass of the state, polling the largest vote ever given the party in Maryland, notwithstanding the successful efforts of a union of reformers, regardless of former political affiliation, to overthrow the democratic ring, in which a large percentage of good citizens, including many prohibitionists, took part.

HALE JOHNSON.

Hale Johnson, prohibition nominee for vice-president, was born on a farm near New Richmond, Montgomery county, Ind., on Aug. 21, 1847. His ancestors were originally from England, having settled on the eastern shore of Maryland about a century ago. His grandfather, who was a baptist clergyman, served in the war of 1812, and afterward removed to Fayette county, Ohio. His father was John B. Johnson, and his mother's maiden name Sarah A. Davison. Being strong abolitionists, the young son was named after that prince of reformers, John P. Hale, who was the free-soil candidate for president in 1852. The elder Johnson was a physician as well as a farmer, and served as assistant surgeon of the 72d regiment Indiana volunteers. The family lived in Tippecanoe county, Indiana, for awhile, but in 1855 they returned to Montgomery county and resided near Linden for ten years.

It was here that Hale received most of his education. The cabin home was his university and the log fire his study lamp. He was given one year at Ladoga academy, where he was a proficient student.

Mr. Johnson taught school during the winter of 1863-4, but the news from the battlefields stirred the young patriot's heart, and, although not yet 17, in May, 1864, he shouldered a musket and marched to the front as a private in company D, 135th Indiana volunteers. After the war the family moved to Marion county, Illinois, and for ten years Mr. Johnson taught school and managed a farm.

At the June term of the Illinois Supreme court, in 1875, Mr. Johnson was admitted to the bar, having studied law with W. R. Hubbard of Kimmunity. His first location was at Altamont, but he only remained there two years, removing to Newton, the county seat of Jasper county, in June, 1877, where he has since resided.

Politically Mr. Johnson was a republican until he became a prohibitionist in 1884. He was an ardent supporter of Fremont and Dayton; his first vote, however, was for Grant in 1868, and his last republican vote for Garfield in 1880. Mr. Johnson left the republican party in 1884, and in that year was nominated on the prohibition ticket in Illinois for attorney-general, running largely ahead of his ticket at the election. In April, 1896, he was nominated by his party for governor of Illinois, but withdrew on being nominated for the vice-presi-

CHARLES E. BENTLEY.

Charles Eugene Bentley, the presidential nominee of the national party for president, was born at Warner's, Onondaga county, N. Y., April 30, 1841.

Mr. Bentley's education was obtained in the schools of the state and in the seminary courses at Elbridge and Cazenovia, N. Y. He lived on the home farm until he reached manhood's estate and established a home of his own, and in 1866 removed permanently to the west, settling in Clinton, Iowa, where he engaged in active business life. During the twelve years' residence in Clinton Mr. Bentley was almost constantly in public service, holding for a period of years the position of city clerk and treasurer. He was also an assistant in the county treasurer's department of work, and secretary of the board of education until his removal to Nebraska in 1878. On removing to Nebraska Mr. Bentley returned to the farm, settling at Surprise, in Butler county, about fifty miles from the state capital.

In 1890 the family removed to Lincoln, that they might avail themselves of the superior educational advantages of the capital city.

In 1884 Mr. Bentley left the republicans and came out for St. John and the prohibition party. As was natural for a man of his ability, he was chosen chairman of the first prohibition party convention ever held in Nebraska—that of 1884.

His active political work as a reformer began at this time, and he has been unceasing in his efforts for the upbuilding of the prohibition party. He says: "Since becoming a party adherent in 1884 I have never voted for any person for any office who was not a prohibitionist."

In 1892 he was a candidate for governor, and polled 1,333 votes more than Gen. Bidwell received for president at the same election; and in 1894, when nominated as popular choice for United States senator to head the prohibition ticket and make the race against the Hon. W. J. Bryan, the free-silver democrat, Mr. Bentley canvassed the state and received 25,591 votes at the general election.

JAMES H. SOUTHGATE.

James H. Southgate, vice-presidential nominee of the national party, was born in Norfolk, Va., July 12, 1859; moved to North Carolina in 1861, and has lived in Franklin, Iredell, Orange and Durham counties in said state, in the last-mentioned twenty years. Was prepared for college by Maj. D. H. Hamilton of Hillsboro, and the Horner and Graves Military academy of the same place; was a student at the University of North Carolina during the years 1878-9 inclusive, and on leaving college studied the banking business; went in partnership with his father, James Southgate, in the general insurance business in 1882. He is an ex-president of the Young Men's Christian association convention of North Carolina, and is now a member of its state executive committee, and has been for a number of years; was secretary of the first state convention ever held in the interest of that order in North Carolina, in the year 1877; has been a member of the executive committee of the State Sunday-School association for nearly ten years, and is now the treasurer of that body, and a trustee and member of the executive board of Trinity college, Durham, N. C., and president of the Educator Publishing company, and di-

rector in the Morehead Banking company. He has been a member of the state executive committee of the prohibition party for nearly a decade, and was elected chairman of the state executive committee of that party in 1892, and was chairman of the North Carolina delegation to the prohibition convention in Cincinnati in 1892.

JOHN M. PALMER.

Gen. John McAuley Palmer, nominee for the presidency by the gold-standard democrats, was born on Eagle creek, Scott county, Kentucky, on Sept. 13, 1817. His boyhood was spent on his father's farm in Christian county, Kentucky, where he enjoyed the scanty advantages of the public schools of that period. In 1831 his father was compelled, in consequence of his anti-slavery sentiment, to leave Kentucky, and removed his family to Madison county, Illinois, and settled ten miles from Alton. Two years later Mrs. Palmer died, the home was broken up, and John entered Shurtleff college at Upper Alton, then conducted on the manual-labor plan. But within a year he was compelled to abandon his studies by a lack of funds, and he then entered on the struggle of life.

For five years he drifted around in a discouraging way, being first a peddler, then a cooper, and then a school-teacher. But in the meanwhile his ambition had been aroused, and he had devoted himself to the study of law, and in 1839 he was admitted as a student into the law office of John L. Greathouse, at Carlinville.

In 1841 he received a license to practice law. In 1843 he was elected probate judge of Macoupin county, in 1847 a member of the constitutional convention, and in 1849 county judge of Macoupin county. He was elected to the state senate in 1852, and re-elected in 1854. It was in the senate that he changed his political affiliations from the democratic party to the republican party. Being opposed to the Kansas-Nebraska bill, he refused to support the nominee of the democratic caucus for United States senator, and joined the republican members in the support of Judge Lyman Trumbull, this course bringing on him the fiercest denunciation of the democrats.

But he immediately became as successful in the republican as he had been in the democratic party. He presided over the republican state convention in 1856, and represented the party in the national convention in which John C. Fremont was nominated. He made an unsuccessful run for congress in 1859, and was chosen elector on the Lincoln ticket in 1860. In 1861 he was a state delegate to the peace congress in Washington.

He entered the army in 1861, and was first commissioned as the colonel of the 14th Illinois volunteer infantry on May 9, 1861, but was promoted on Nov. 5, 1861, to brigadier-general of volunteers. In March and April, 1862, he commanded a division under Gen. Pope in the operations against New Madrid and Island No. 10, and later in the operations against Corinth. He took part in the battle of Murfreesboro in December, 1862, and January, 1863, and was promoted to be major-general of volunteers.

He was engaged in the operations against Gen. Bragg on his retreat to Chattanooga; commanded a division in the battle of Chickamauga; was promoted to the command of the 14th army corps in October, 1863; took part in the operations around Chattanooga, including the battles of Look-

out Mountain and Missionary Ridge, in November, 1863; and in 1864 commanded the 14th corps in the Atlanta campaign.

In recognition of his services at Stone River he received the thanks of Gen. Rosecrans and his commission as major-general. On Aug. 4 Gen. Palmer was relieved at his own request, in consequence of Gen. Howard, a junior officer, being promoted over him to the command of the army of the Tennessee. He then closed his military career as commander of the military department of Kentucky from February, 1865, to May, 1866.

Gen. Palmer then settled in Springfield, Ill., and resumed his civil career. In 1868 he was elected the sixteenth governor of Illinois, and served four years from January, 1869. He delivered his inaugural address in person before the general assembly and criticised the railroad corporations, asserting the right of that body to control their franchises. During his term he vetoed the famous act of the legislature presenting the Illinois Central railroad company with the submerged lands in front of Chicago, though the bill was passed over his veto.

At the time of the great Chicago fire, when Mayor Mason appealed for the presence of United States troops, and Gen. Sherman sent four companies of the 8th regiment, under Gen. Sheridan, Gov. Palmer protested against it as a violation of law, inasmuch as he said he was amply able to afford protection. In 1872 he returned to the democratic fold and supported Greeley for president.

Gen. Palmer was one of the democratic visitors to Louisiana after the presidential election of 1876; was nominated by the democrats in the legislature in 1877 and twice afterward as their candidate for United States senator, without, however, being elected; was delegate-at-large to the national democratic convention in 1884, and was nominated by the democratic state convention for governor in 1888 and defeated. In 1890, by an innovation in politics, the democratic nomination for United States senator was made by the state convention, and fell upon Gen. Palmer. His term as senator will expire March 4, 1897.

SIMON B. BUCKNER.

Gen. Simon Bolivar Buckner, vice-presidential candidate on the gold democratic ticket, was born in Hart county, Kentucky, in 1823, and still lives in the log cabin in which he was born. This log cabin was built by the general's father over 100 years ago, and the only time that he has lived away from his birthplace was when he was governor of his native state. He was graduated from West Point military academy in 1844, in the class with Gen. Grant, and took part in the Mexican war and came out as a captain. He resigned from the army in 1855.

He was superintendent of the construction of the custom house at Chicago in that year and colonel of the volunteers raised in Illinois for the Utah expedition in that year, but was not mustered into service.

On Sept. 12, 1861, he issued, at Russellville, an address to the people of Kentucky calling on them to take up arms against the usurpation of Abraham Lincoln, after which he occupied the town of Bowling Green.

After the capture of Fort Henry Gen. Buckner evacuated Bowling Green and withdrew to Fort Donelson, where he commanded a brigade in the battles of Feb. 13, 14 and 15, 1862, and, after the escape of Pil-

low and Floyd, surrendered the fort to Grant on Feb. 16, with 16,000 prisoners and a vast quantity of stores. He was imprisoned at Fort Warren, Boston, until exchanged in August, 1862. He subsequently commanded the 1st division of Gen. Hardee's corps in Bragg's army in Tennessee. Later he was made a major-general and assigned to the 3d grand division, was in the battles of Murfreesboro and Chickamauga, and surrendered with Kirby Smith's army to Osterhaus, at Baton Rouge, May 26, 1865. He was elected governor of Kentucky in 1887.

After serving three years as governor Gen. Buckner retired in January, 1891, and returned to his farm in Hart county, where his log cabin is one of the most finely furnished houses in Kentucky.

CHARLES H. MATCHETT.

Charles H. Matchett, the socialist labor candidate for president, was born at Needham, Mass., in 1843, and attended the public schools of Boston until he was 16 years of age, when he went to sea. At the outbreak of the civil war, in 1861, he enlisted on the warship Isaac Smith, stationed in the south Atlantic blockading fleet, and was present at the storming of Port Royal, South Carolina, and of Fort Pulaski, at Savannah. During the next three years he made several voyages to Africa and South America, and then settled down to the grocery business. This not being to his taste, he became a carpenter, and finally a builder, and was wrecked in the commercial crisis of 1873. He then again took to the carpentering trade, in which he remained until 1886, when he became an employee of the New York and New Jersey telephone cable company.

In 1885 he joined labor assembly 1562, Knights of Labor, and did much good work as an agitator among his fellow-workmen. Although frequently disgusted at the apathy shown by many of these, their proneness to follow corrupt leaders, their internecine strifes, and their timidity to enter independently the field of political action, he ceaselessly continued his work of agitation and enlightenment, and everywhere inspired the despondent with hope through a higher conception of life and the noble, intrepid aims of socialism. When the nationalist movement started he was one of the charter members of the first nationalist club of Brooklyn, but subsequently, in 1890, he, together with the bulk of New York state nationalists, went into the socialist labor party, as the best way to bring his views into practice.

The socialist candidate lives in Brooklyn, but does not spend much of his time on politics. He earns a comfortable salary in the office of the New York and New Jersey telephone company.

MATTHEW MAGUIRE.

Mr. Maguire, the socialist labor nominee for vice-president, was born in New York in 1850. His parents settled in Paterson, N. J., and there Matthew was brought up, receiving his first education at the public school of the place, like so many others, in fact, the majority of the children of his class. His school and play days were shortened by the necessity of earning a living. At 14 he went to work in the factory. Seven years later he took up the machinists' trade, and in pursuit of this calling moved to Brooklyn.

Immediately thereupon he became active in the labor movement. In the Eight-Hour league he was representative of the machinists of the Columbian iron works, and he

was one of the committee appointed to obtain from President Grant the eight-hour day for government employes. He was the founder of the Machinists' and Blacksmiths' union and was chosen its first secretary. The crisis that then swept over the country destroyed the organization. All but ten members, among them Matthew, held together, and they joined the Knights of Labor as local assembly 1562.

Since 1889 Mr. Maguire has lived in Paterson. There he joined actively in the socialist agitation, and as soon as the socialist movement was set upon its present footing in New York, with the campaign of 1890, he worked in Paterson in the same direction. In the spring of 1894 he ran as the socialist candidate for alderman in the 8th ward. It was a forlorn hope, apparently, but the people had recognized an able advocate and Maguire was elected by a slender majority. His honesty and detestation of jobbery won the admiration of his constituents and he was rewarded with a return to the council chamber this year, 1896.

JUSTICE R. W. PECKHAM.

Justice Rufus W. Peckham was born in Albany, N. Y., fifty-eight years ago. He is the son of the late Justice Rufus W. Peckham, who was elevated to the appellate bench in 1870, after having served as district attorney of Albany county, as member of congress, and in 1859 having been elected justice of the Supreme court. The elder Justice Peckham, with his wife, was drowned at sea in the Ville de Havre accident in 1873.

Young Peckham passed through the Albany academy, and at the age of 18 he entered the office of Colt & Peckham, where, after three years of study, he was admitted to the bar. With the same assiduity that he displayed in his studies he pushed his advancement in the profession of his choice and soon obtained reputation and clients. Soon after his admission to practice he became a member of the firm of Peckham & Tremain, and continued in that connection until the death of Mr. Tremain, when the firm became Peckham & Rosendale.

As his father did before him, the younger Peckham began his ascent of the ladder of legal fame by means of the district attorneyship of Albany county, which he attained in 1869. He made a brilliant record as a prosecutor. He always took a deep interest in state and national politics, being active in the presidential conventions of 1876 and 1880, when he was leader of the Tilden forces. After serving as corporation counsel of Albany he was in 1883 elected a justice of the Supreme court for a term of fourteen years. His election to the Court of Appeals followed in 1886. His eloquent denunciation of the Onondaga county election frauds won for him the opposition of Gov. Hill, who procured the disastrous nomination of Maynard for chief justice of that court to prevent Judge Peckham's nomination for it. He was appointed and confirmed in 1895.

THE VENEZUELAN COMMISSION.

DAVID J. BREWER.

Judge Brewer is a republican. He was born in Smyrna, Asia Minor, June 20, 1837. His mother's maiden name was Field, a sister of David Dudley and Cyrus W. Field. His father was a missionary to the Greeks in Turkey.

Judge Brewer commenced his studies at Wesleyan university, Middletown, Conn.,

but removed to New Haven and was graduated at Yale college in 1856. On leaving Yale he entered the law office of his uncle, David Dudley Field, in New York city, in which he spent one year as a student, and completed his legal studies at the Albany Law school, from which he was graduated in the class of '58. In the fall of that year Mr. Brewer went west, and, after a residence of a few months in Kansas City, started up the Arkansas valley for Pike's peak and Denver. He returned to Kansas in June, 1859, and, after a short visit home, settled at Leavenworth Sept. 13, 1859, since which time he has been a resident of that city.

He was appointed United States commissioner in 1861, and later he was elected judge of the Probate and Criminal courts for Leavenworth county. He was elected judge of the First Judicial District court in 1864, and in 1868 he was chosen county attorney for his county. He was elected a justice of the Supreme court of Kansas in 1870.

Judge Brewer always took great interest in educational matters, and was for several years a member of the board of education of Leavenworth city. He served as president of the board and was superintendent of schools for the county for two years.

Justice Brewer was appointed associate justice of the United States Supreme court for the 8th circuit by Mr. Harrison in 1889, and in January, 1896, was selected by Mr. Cleveland as one of the Venezuelan commissioners.

RICHARD HENRY ALVEY.

Judge Alvey is chief justice of the Court of Appeals for the District of Columbia and is a democrat. He is a native of Maryland, and was on the judiciary committee of the constitutional convention of 1867, was elected chief judge of the 4th circuit under the new constitution, and was re-elected in 1882.

He was designated by Gov. Hamilton as chief justice of the Court of Appeals of Maryland to succeed Judge Bartol. This place he resigned in 1893 to accept the office of chief justice of the Federal Court of Appeals in the District of Columbia. This court had just been created by act of congress, and President Cleveland strongly urged Judge Alvey to take the place of chief judge and organize the new court.

Upon the death of Chief Justice Waite, during Mr. Cleveland's first term, some of the justices of the Supreme court, who had been impressed with the opinions delivered by Judge Alvey on the appellate bench of Maryland, urged the president to appoint him chief justice of the United States. This the president was disposed to do, but, it is understood, was deterred by the fact that Judge Alvey is a southern man, and it was feared that if that position should go to the south it might create animosities.

ANDREW DICKSON WHITE.

Andrew Dickson White was born at Homer, N. Y., Nov. 7, 1832, and lived there until he was 7 years old, when he went to Syracuse. His father, Horace White, was a banker and railway operator, who died in 1860, leaving two sons a princely estate. Andrew D. White studied a year at Hobart college, and then entered Yale, where he was graduated in the class of 1853. Then he went to Europe to study history at Paris and Berlin, and was for a time attache to the American legation at St. Petersburg.

On his return home in 1857 he was elected

professor of history and English literature in Michigan university, but, owing to failing health, he resigned in 1862. On his return to this country he was elected state senator from the Onondaga-Cortland district and served two terms, acting as the chairman of the committee on education. Mr. Cornell, the founder of the university at Ithaca which bears his name, was also a member of the New York senate at the same time, and his friendship for Mr. White had much to do in interesting him in the plans of the proposed university. Mr. White was one of the staunchest friends of the project in the legislature, and in 1866, when the university was organized, he was elected president. In the organization of this institution he endeavored to make the practical predominate, and the success which the university has attained is a proof of his skill and foresight.

In politics he was a warm supporter of Gen. Grant, and in 1871 he went to Santo Domingo as one of the commissioners sent by President Grant to report on the question of annexation. He supported Grant for reelection in 1872, was a delegate to the republican national convention that year, chairman of the jury of public instruction at the centennial exhibition in Philadelphia in 1876, and representative of the United States on the jury of appeals at the Paris exposition universelle in 1878.

President Hayes, March 26, 1879, appointed Mr. White to succeed the late Bayard Taylor as United States minister to Berlin. He assumed the duties of this post in the latter part of May, retaining it until Aug. 15, 1881. On his return home he resumed his duties as president of Cornell university, which post he finally resigned in June, 1885. He was one of the most prominent republicans opposed to the presidential aspirations of Blaine. He favored Edmunds at the republican national convention of 1884, but indorsed the nomination of Blaine.

After contributing about \$100,000 from his own resources to the equipment of Cornell university, in January, 1887, he endowed the new school of history and political science of that institution with his historical library, numbering 30,000 volumes, besides 10,000 pamphlets and manuscripts, including an incomparable collection of books and original documents on the French revolution. In February of that year President Cleveland tendered to him a place on the interstate commerce commission, which he declined.

He was appointed in 1889 minister to St. Petersburg by President Harrison, and represented the United States in Russia until succeeded by Mr. Breckinridge in 1893.

FREDERIC R. COUDERT.

Frederic Rene Coudert was born in New York city in 1832. He entered Columbia college when he was 14, and was graduated valedictorian and No. 1 in his class at the age of 18.

Beginning the study of the law as soon as he left college, Mr. Coudert was admitted to the bar in 1853, when he was 21 years old.

There have been but few celebrated cases, especially of recent years, with which he was not directly connected, or in which his counsel has not been sought by one side or by the other, and to-day the firm of which he is the head transacts a business vast in its volume and extent, and numbers among its clients half the governments of Europe.

Mr. Coudert wrote a brilliant reply to Alexandre Dumas' book on "Divorce" several years ago. He has delivered several entertaining and instructive lectures for charitable purposes on such subjects as "Manners and Morals," "Edmund Burke," "The Church and Bar," "Lying as a Fine Art" and "Curran."

He was appointed a delegate to represent the interests of American commerce in the international congress on the law of nations, held at Antwerp in 1877, and in 1882 he attended another session of that congress held at Liverpool.

Mr. Coudert has always been an interested actor in public events, and always a power in the democratic party, into which he was born. A remarkable fact, and one which, perhaps, makes his counsel frequently sought and readily acted upon, is that he has refused official positions.

He took an active part in the election of Mr. Tilden in 1876 and of Mr. Cleveland, both in 1884 and 1892. He might have had an important European mission after Mr. Cleveland first became president had he desired, but his legal business was so great that he was unable to leave the country. Several times he has declined a nomination to the bench of the Supreme court—a nomination which would have been equivalent to an election.

Mr. Coudert's life presents an instance rare enough, but particularly rare among lawyers—that of a man who has rather avoided public functions in his devotion to his profession, but who has been in a measure forced upon public notice until he is sought and renowned almost in spite of himself. For one who has never been accused of being magnetic, Mr. Coudert has a remarkable popularity and following.

Mr. Coudert is president of the Manhattan club. He also belongs to the Democratic and Reform clubs and other social organizations.

He was recently appointed chairman of the Supreme court commission to report upon the rapid-transit project.

DANIEL C. GILMAN.

Daniel C. Gilman, president of Johns Hopkins university, was born in Norwich, Conn., July 6, 1831, and was graduated from Yale in 1852. He continued his studies in New Haven, and later in Berlin, where he followed the lectures of Carl Ritter and Adolph Trendelenburg. He traveled extensively in Europe, and gave attention to the social, political and educational condition of the countries he visited, and also to their physical structure. On his return in 1855 he was invited to become librarian of Yale, and subsequently became professor or physical and political geography there, and secretary of the government board of the Sheffield Scientific school. He was for a short time superintendent of the public schools of New Haven, and afterward secretary of the state board of education. From his post in Yale he was invited, in 1870, to become the first president of the University of California. This invitation was not accepted, but two years later, when another call was given, he went to California and remained at the head of the state university till 1875. At that time he was selected first president of Johns Hopkins. He was one of the original trustees of the Slater fund for the education of freedmen, and the secretary of the board.

He has had printed a large number of addresses, reports and contributions to re-

views, among which may be mentioned his inaugural discourses in California and Maryland, and address as president of the American Social Science association; a discourse at the opening of Sibley college, in Cornell university, and another at the opening of Adelbert college, in Cleveland, O.; an address in Baltimore of the benefits which societies derive from universities, and an address before the Phi Beta Kappa society of Harvard on a kindred topic. His ideas on university and collegiate education have also been presented in articles contributed to the North American Review, to the Cyclopaedia of Political Science and other publications. He prepared a memoir of James Monroe for the American Statesmen Series (Boston, 1833), and he edited the writings of Francis Lieber and Joseph P. P. Thompson. He received the degree of LL. D. from Harvard in 1876, and from Columbia in 1887. He was a member of many scientific and historical societies. Mr. Gilman is said not to be affiliated with any political party, but his tendencies are inclined to the republican organization.

ARTHUR BROWN.

Arthur Brown, United States senator from Utah, is 53 years of age, a gentle, and one of the most prominent lawyers in the west. He was born on a farm in Kalamazoo county, Michigan. His parents moved to Yellow Springs, O., in 1856, where he attended Antioch college until he was graduated, in 1862. From there he went to Ann Arbor, Mich., where he took a higher academical course, studied law, received the second degree, A. M., and was admitted to the bar in 1864.

Mr. Brown then went back to Kalamazoo county and commenced practicing law. He remained there until 1879 and built up a large practice throughout western Michigan. He engaged much in political discussion and political work, being always a stalwart republican. In 1879 he removed to Salt Lake City and entered upon the practice of his profession. He was chosen to represent the new state of Utah in the United States senate in 1896, and his term will expire March 3, 1897.

FRANK J. CANNON.

Frank J. Cannon, senator from Utah, is 36 years old and a native of that state. He is a mormon and a son of George Q. Cannon, one of the presidents of the mormon church. Senator Cannon is a printer, and was for many years an editor.

In 1892 Mr. Cannon was a delegate to the republican national convention in Minneapolis, and in the fall of the same year was the nominee of his party for delegate to congress. His candidacy reduced the democratic majority from 8,000 to 3,000. He was elected to congress in 1894 by 2,000 majority. His term as delegate ended with the recent admission of the state. He was chosen to represent the new state in the United States senate, and his term will expire March 3, 1899.

GEORGE L. WELLINGTON.

George L. Wellington, senator-elect from Maryland, was born at Cumberland, Alleghany county, Md., Jan. 28, 1852; attended a German school for a brief period; otherwise self-educated; at the age of 12 began work in a canal store in Cumberland; in 1870 was appointed to a clerkship in the Second national bank of Cumberland; later became teller; was appointed treasurer of Alleghany county in 1882 and served until

1888; was again appointed in 1890; was delegate to the national republican conventions of 1884 and 1888; was nominated by the republican party for comptroller of Maryland in 1889 and was defeated after an active canvass, though he received the largest vote ever given a candidate of his party on the state ticket; was appointed by President Harrison assistant treasurer of the United States at Baltimore in July, 1890; was nominated for congress by the republicans of the 6th congressional district in 1892 and defeated by the Hon. W. McM. McKaig; was renominated in 1894 and elected to the LIVth congress as a republican. In 1896 he was elected to the senate to succeed Charles H. Gibson, and his term of service will expire March 4, 1903.

S. D. McENERY.

S. D. McEnery, senator-elect from Louisiana, is a native of that state, where he was born May 28, 1837, and received a common-school education until he was 14 years of age, when he was sent to Spring Hill college, near Mobile, Ala. In 1851 he was appointed a cadet midshipman at the United States naval academy at Annapolis, Md., where he remained three years. In 1855 he entered the collegiate department of the University of Virginia, from which he went to the State and National Law school at Poughkeepsie. After graduating he located at Maryville, Mo., but ill health compelled him to return to Louisiana. He entered the confederate army in 1861 and served throughout the war. After its close he studied civil law, and entered upon its practice at Monroe, La. In 1879 he was elected lieutenant-governor of the state. By the death of Gov. Wiltz in 1881 he became governor of Louisiana. He was elected governor in 1884 over Gen. Francis T. Nicholls. Later he was defeated by Nicholls for the nomination, and Gov. Nicholls appointed him to the state supreme bench. In 1892 he was nominated for governor against Murphy J. Foster, the anti-lottery candidate, and won at the white primaries, but was counted out by a democratic electoral commission, which threw out alleged fraudulent votes enough in New Orleans to give the nomination to Foster. Since then he has been engaged in the practice of his profession. He was elected to the senate to succeed Newton C. Blanchard, and his term will expire March 3, 1903.

JOSEPH B. FORAKER.

Joseph B. Foraker, senator-elect from Ohio, was born at Rainsborough, O., July 5, 1846, and worked on a farm until his 16th year, when he enlisted in the 89th Ohio regiment and served to the close of the war, with the rank of brevet captain at being mustered out. After the war he spent two years at Wesleyan university, and then entered Cornell university, from which he was graduated in 1869. In the same year he was admitted to the bar. In 1879 he was chosen judge of the Superior court of Cincinnati. He was nominated governor of Ohio in 1883 and defeated, again nominated in 1885 and elected. He was renominated in 1887 and again elected, and renominated in 1889, but defeated. He has since then been prominent in national politics, and a delegate to each national republican convention. His term will expire in 1903.

HERNANDO D. MONEY.

Hernando DeSoto Money, senator-elect from Mississippi, was born in Holmes county, Mississippi, Aug. 26, 1839. He is a

lawyer and a graduate of the state university in both departments. He was first elected to congress in 1875. When he was nominated it was thought he was leading a forlorn hope, but he was triumphantly elected. He has been a member of the XLIVth, XLVth, XLVith, XLVIIth, XLVIIIth, LIId and LIVth congresses. He is a hard political fighter and a fine organizer, and his friends claim that he has never lost a political battle. He was elected to the senate to succeed James Z. George, and will take his seat on March 4, 1899.

R. W. PETTUS.

Gen. Pettus, elected to succeed Mr. Pugh as United States senator from Alabama, was born in Littleton county, Alabama, in 1822, and therefore he is now 74 years of age, but is still vigorous mentally and physically. He was graduated from a Virginia college and practiced law in Tusculum, Carrollton and Cahaba. He was elected to a circuit judgeship, and when the war broke out enlisted at once, serving gallantly throughout the entire struggle, and with especial distinction at the siege of Vicksburg, coming out of the war a brigadier-general.

When the democrats defeated the republicans in 1874 and had control of the house of representatives and senate of Alabama Gen. Pettus was offered the United States senatorship, but declined. He practiced law in Selma, and was at one time a partner of Senator Morgan, and built up a very large and remunerative practice. He has steadfastly refused all offices of every nature. He has been chairman of the committee on resolutions at every state convention and has written every democratic platform since the war. He is an ardent free-silver man and an old-line Jacksonian democrat.

ALEXANDER STEPHENS CLAY.

"Steve" Clay, as the new senator-to-be is known throughout Georgia, as a boy worked on a farm and secured an education by his own efforts. He studied law, was admitted to the bar, and made his appearance in politics in the later '70s, when he was returned from Cobb county as a member of the legislature. He served some years, and the third term, in 1889, was elected speaker of the house, at the same time when F. G. Dubignon was president of the senate.

He presided over the house with dignity, and was very popular among the members. At the next session of the general assembly he was elected a senator from the 35th district, and was elected president of the senate without opposition. He was a factor in much important legislation, and often took the floor to favor measures of merit.

In the convention which nominated Gov. Northern in 1890 there was a contest for the position of attorney-general between the late George N. Lester, a one-armed ex-confederate soldier, and Col. Clifford Anderson, the profound and brilliant attorney-general of preceding administrations. Perhaps the most thrilling speech ever made in the Georgia capitol in nominating a candidate for office was made by Mr. Clay in nominating Lester. It carried the members off their feet, and Lester swept the convention.

When Gov. Atkinson became the democratic nominee in 1894 he was succeeded as chairman of the state executive committee by Mr. Clay. In the campaign recently closed he held the same position. He is young, active, vigorous and of commanding physique.

GEN. CHARLES G. SAWTELLE.

Gen. Sawtelle, the new quartermaster-general of the United States army, was graduated from the military academy in July, 1854, and for some time served on frontier duty at Fort Ripley, Minnesota. In 1855 he was engaged in the Sioux expedition. From February, 1857, to May, 1861, he acted as quartermaster of the 6th infantry, and during that time helped to quell the Kansas disturbances and took part in the expedition to Utah. When the rebellion broke out he was in charge of the quartermaster depot at Perryville, Md., and in the Virginia peninsular campaign he superintended the disembarking and forwarding of troops and supplies for the army of the Potomac from Fortress Monroe. He was chief quartermaster of the 2d corps in the Rappahannock campaign, and was present at the battle of Fredericksburg as chief quartermaster of the right grand division. As chief quartermaster of cavalry he was engaged in Stoneman's raid toward Richmond in May, 1863, and thereafter he was in continuous service as chief quartermaster to the end of the war, and received brevet promotions up to the rank of brigadier-general for meritorious services in his department. Since the war he has served as chief quartermaster in various military districts, and in 1881 he became deputy quartermaster-general.

REV. DR. CHARLES C. McCABE.

Dr. McCabe, one of the bishops of the methodist episcopal church, elected at Cleveland, was born at Athens, O., on Oct. 11, 1836. He was educated at Ohio Wesleyan university, entering in 1853 and remaining four years. He always desired to be a methodist minister, which was the one and only ambition of his life.

July 5, 1860, he entered the ministry, joining the Ohio conference. His first charge was Putnam, O., where he remained for a year, and then entered the army as chaplain of the 122d Ohio infantry, and followed the fortunes of that regiment until June, 1863, when, during the raid of Lee into Pennsylvania, while with his regiment in defense of Winchester, he was captured by Gen. Early with others and sent to Libby prison, where he remained four months. He was exchanged Oct. 28, 1863, while yet suffering from the effects of his imprisonment and looking more like a galvanized skeleton than a living man.

At the request of George H. Stuart of Philadelphia he delivered many addresses in behalf of the Christian commission, an organization that accomplished untold good in behalf of the sick and suffering. Over \$100,000 was raised for the commission by the efforts of Chaplain McCabe.

In the autumn of 1868 his superior talent as a financial agent was called into requisition in a national enterprise for the extension of the church, and for the placing of the society for that purpose on a solid basis. This position he held for nearly seventeen years, with headquarters at Chicago, and traveling not less than 25,000 miles annually in the discharge of his duties.

He is noted as the man who has cleared more church debts than any other man living or dead. In 1884 he was elected corresponding secretary of the Missionary society, which was then receiving about \$750,000 per annum. He at once raised the cry, "A million for missions!" and in two years saw his dream realized in a total income of \$1,044,000, which has been swelled since to over \$1,250,000.

As a lecturer on popular subjects he has few superiors, and he is an accomplished vocalist. In the army he was given the title of "the singing chaplain," and many a time the old walls of Libby prison fairly trembled with the reverberation of the national songs being rendered under his leadership.

REV. DR. EARL CRANSTON.

Rev. Dr. Earl Cranston, the soldier-priest who has been elevated to the dignity of a bishop of the methodist church by the Cleveland conference, has lived a life of intense religious work and has traveled widely as a dispenser of the gospel. He was born at Athens, O., June 27, 1840. It was at the age of 12 that he felt impelled toward methodism, and from the moment of his conversion he set to work to fit himself for the purpose to which his life has been undividedly devoted. In 1861 he had just come out of the Ohio university with his first degree, when President Lincoln's call to arms made him a volunteer in the army of his country. From private he rose by gallant and meritorious work on the field of battle to the rank of captain. In 1864 he returned to the university to have conferred upon him the degree of master of arts, and two years later he was preaching to a methodist charge at Middleport, O. Until 1870 Dr. Cranston served the Ohio conference, preaching to many congregations. In that year he was transferred to Winona, Minn., and there he built a church, which was left behind him as a monument to his energy when, at his own request, he was transferred to Jacksonville. In that city his wife died. Dr. Cranston stayed his full term there, and Jacksonville has Grace church as a result of his labors. Evansville, Ind., had him a short time, and then his duties called him to Cincinnati and later to Denver, Col. For four years he was presiding elder of the southern Colorado conference, and his energetic work in that district won for him the admiration of all who saw it. In 1884 he was sent to Cincinnati as the representative of the Western Book Concern, a position he held when he went to the conference at Cleveland that widened the scope of his work by making him a bishop.

MAJ. T. S. CLARKSON.

Maj. Thaddeus S. Clarkson, the new commander-in-chief of the Grand Army of the Republic, is a native of Illinois, and, though he is on the other side of 50 in years, time has dealt kindly with him, and from his

actions he would be considered thirty years younger.

He hardly had his growth when the civil war began, and when the news of President Lincoln's first call for troops was telegraphed over the country on that early April morning he promptly enlisted as a private in the first body of troops in his native state—battery A, 1st Illinois artillery. Less than a week afterward he saw active service. As soon as the battery was given its full quota of men it was hurriedly dispatched to Cairo.

Already many steamboats laden with clothing and munitions of war were being sent to the south by northern men who sympathized with the secession movement, and it was to stop and seize these that the battery was sent to the junction of the Ohio and Mississippi rivers. They captured thousands of dollars' worth of contraband goods within the first three months of the war.

In December, 1861, Maj. Clarkson was promoted to the position of adjutant of the 13th Illinois cavalry, and was afterward attached to the staff of Gen. J. W. Davidson. In that position he participated in the campaign through southeastern Missouri and Arkansas, in which some of the most desperate struggles of the war, considering the numbers engaged, were fought. Part of the time he was in command of battery K, 2d Missouri artillery, and in November, 1863, assisted in raising a regiment of local Arkansians, being made the major of the regiment.

Later in the same year he was commissioned major of the 3d Arkansas cavalry, and upon the removal by death of the colonel Maj. Clarkson assumed command, remaining in that position until the close of the war. Returning to his home in Illinois, he moved to Nebraska shortly afterward, and has resided in that state almost ever since.

As a member of the Grand Army of the Republic his record has been almost as brilliant as it was in the regular service. Joining the order in 1879, he was soon afterward made commander of his post. In 1890 he was elected department commander of Nebraska. Four times he has been a member of the national council of administration and three times a member of the executive committee of that body. In 1890 he was chosen junior vice-commander-in-chief. Maj. Clarkson was appointed postmaster of Omaha by President Harrison in 1890, and he served until March, 1895. At present he is engaged in the real-estate business.

THE AMERICAN JEWISH CULT.

The Jews of the United States comprise 1,200,000 (or about one-seventieth) of the population. They are largely domiciled in the principal cities and are chiefly devoted to commerce, manufacturing, industrial enterprises, banking and the professions of law, medicine and theology. During the last ten years some 20,000 Russian expatriated Jews have immigrated to the United States. Through Baron de Hirsch agricultural colonies were established for their maintenance. An agricultural college is now being opened at Doyleston, N. J., under the Rev. Dr. Joseph Krauskopf's supervision, for Jewish husbandmen. Jews of the United States may be classified

into three sections, to wit: The orthodox, conservative and radical cults. A union of fifty-three Jewish congregations has been in vogue whose seat of government is in Cincinnati. Under its auspices the Hebrew Union college for educating rabbis is one of the features. Aside from this quasi-reform institution, which has graduated some forty-four rabbis, who are now officiating in large communities throughout the United States, another Jewish theological college was established five years ago at New York, which is maintained as an orthodox school. The Jews of the United States are foremost in maintaining hospitals, homes for the aged and orphans, manual training schools, relief

associations, libraries, palatial clubs, free dispensaries, a publication society, a national woman's Jewish conference, Jewish benevolent orders with insurance features, sabbath-school unions, labor bureaus for the unemployed, and sewing societies. The oldest order established in this country is the Independent Order of B'nai Brith, which has some 25,000 members; next follows the Independent Order of the Free Sons of Israel, with 20,000 members, next following the Kesher Shel Barzel (iron chain), with 10,000 members. Aside from this is the Order of the Sons of Benjamin and a host of little chevras in Russian ghettos, whose chief aim is for local works of aiding and relieving their poor and immediate neighbors. The leading hospital in New York is the Mount Sinai, with a capacity of 500 patients. At New Orleans the Judah Tauro hospital ranks foremost. At Chicago the Michael Reese hospital is prominent. In all American metropolitan cities similar hospitals are maintained by Jewish individual subscriptions. The Jewish Orphans' home at Cleveland contains some 490 children, and is wholly maintained by the several lodges of western and northern states of the B'nai Briths. The Kesher Shel Barzel order is maintaining the Home for Aged Jews at Cleveland. At Atlanta, Ga., the Jewish Orphan home has 250 children, and is also maintained by the B'nai Briths. The literary field of Jewish newspapers comprises some twenty weeklies and four monthlies. Three daily Russo-Polish journals are issued in Hebrew letters in the jargon dialect. Two monthlies are in the Hebrew language. During the last year the Jewish ladies of Chicago established an industrial school for indigent women, who are taught the cutting and making of garments, the household duties and other wage-earning trades, which is designed to ameliorate the poorer Russo-Polish denizens in the ghettos. The Jewish Training school, at Wilson and Judd streets, under Prof. Bamberger, contains some 800 children. It was founded by Mr. Leon Mandel with a fund of \$20,000. The same ladies, with the aid of the United Hebrew Relief association, have likewise established a creche and free dispensary. The Jewish Orphans' home of Chicago contains thirty-five children, under the direc-

tion of the Rev. A. A. Lowenheim. Mr. Siegel of Siegel, Cooper & Co. has endowed this institution with a fund of \$20,000. The Home for Aged Jews, at Drexel boulevard and 62d street, was founded by Mr. H. Swimmer of Waverly, Iowa, he having donated the sum of \$50,000. It contains some thirty inmates. The professions are liberally represented in all principal cities. The city of New York contains some 300 attorneys, Philadelphia has upward of 200, Baltimore has about 100, Chicago has some 150 members of the bar. The medical profession is likewise in the lead, compared with other denominations. Of theologians the Jews of America are blessed with a large contingent, many of whom hold prominent chairs in universities, notably in Columbia college, Johns Hopkins and Chicago universities. The Jews of the United States are, in a political sense, divided, but are sure to use their best means and efforts to frustrate any anti-Semitic attempts. In all large communities the young people form themselves into societies and associations, who, during the fall and winter season, devise either a grand fair, concert or ball, to which they issue tickets at from \$5 to \$10. Thus the Purim association of New York city has annually realized from \$50,000 to \$75,000, which sum, over expenses, is given to the several benevolent and charitable institutions in their localities. The Young Men's Hebrew Charity association of Chicago has for fourteen years past given annual balls. In 1895 its proceeds were \$24,000. This amount, after expenses being paid, was divided among all charities of Jews and non-Jews. Among the exiled Russo-Polish Jews in all metropolitan cities self-educational societies have been instituted. Instructors and lecturers are secured who aid them. Among the more recent organizations is the National Council of Jewish Women, which has already acquired a wide dissemination throughout this country. Its design is chiefly directed to the maintenance of the Jewish religion, education and altruistic objects. Sections have been organized in all large cities. Its first triennial conference was held in November, 1896, in Tuxedo hall, New York city. It was originated in Chicago in 1894.

THE PENSION OFFICE.

NUMBER OF PENSIONERS ON THE ROLLS JUNE 30, 1896.

And the amount paid for pensions during the fiscal year 1895 in each state and territory and each foreign country:

*Gold the nominal standard. Silver practically the standard.

†Silver the nominal standard. Paper the actual currency, the depreciation of which is measured by the gold standard.

‡The "British dollar" has the same legal value as the Mexican dollar in Hong Kong, the Straits settlements and Labuan.

§The law of February 11, 1895, introduced the gold standard, with an ideal gold peso weighing .599 grams as the monetary unit.

INDIAN SCHOOLS.

The advance in Indian school work during the year 1896 is encouraging, as shown by a resume of the work for the year 1896 and for the four years previous, as follows:

KIND OF SCHOOL.	ENROLLED.					AVERAGE ATTENDANCE.				
	1892.	1893.	1894.	1895.	1896.	1892.	1893.	1894.	1895.	1896.

RESERVATION GOVERNMENT BOARDING SCHOOLS.

Location, capacity, and date of opening of 77 Government reservation boarding schools.

LOCATION.	Capacity.	Date of opening.	Remarks.
Arizona—Colorado River.....	80	Mar. —, 1879	
Keams Canyon.....	90	— —, 1887	
Navajo Agency.....	120	Dec. —, 1881	
Pima.....	150	Sept. —, 1881	
San Carlos.....	100	Oct. —, 1880	
White Mountain Apache.....	65	Feb. —, 1894	
California—Fort Yuma.....	250	Apr. —, 1884	
Hoopa Valley.....	120	Jan. 21, 1893	
Round Valley.....	70	Aug. 15, 1881	Suspended after July, 1883, by burning of building.
		Sept. 12, 1893	
Idaho—Fort Hall.....	150	— —, 1874	
Fort Lapwai.....	250	Sept. —, 1886	
Lemhi.....	40	Sept. —, 1885	
Indian Territory—Quapaw.....	90	Sept. —, 1872	
Seneca, Shawnee and Wyandotte	140	June —, 1872	Begun by Friends as orphan asylum in 1867 under contract with tribe.
Kansas—Kickapoo.....	30	Oct. —, 1871	
Pottawatomie.....	80	— —, 1873	
Sac and Fox and Iowa.....	40	— —, 1871	Iowa.
		Sept. —, 1875	Sac and Fox.
Minnesota—Leech Lake.....	50	Nov. —, 1867	
Pine Point.....	100	Mar. —, 1892	Prior to this date a contract school opened in November, 1888.
Red Lake.....	60	Nov. —, 1877	
White Earth.....	100	— —, 1871	Building burned in February, 1895.
Wild Rice River.....	65	Mar. —, 1892	Prior to this date a contract school opened in November, 1888.
Montana—Blackfeet.....	125	Jan. —, 1883	
Crow.....	100	Oct. —, 1884	
Montana Industrial.....	60	July 1, 1895	Prior to this date a contract school opened in 1886.
Fort Belknap.....	112	Aug. —, 1891	
Fort Peck.....	160	Aug. —, 1881	
Nebraska—Omaha.....	75	— —, 1881	
Santee.....	60	Apr. —, 1874	
Winnebago.....	105	Oct. —, 1874	
Nevada—Pyramid Lake.....	90	Nov. —, 1882	
Western Shoshone.....	50	Feb. 11, 1893	Previously a semi-boarding school.
New Mexico—Mescalero.....	76	Apr. —, 1884	
North Dakota—Fort Berthold.....	60	Nov. 21, 1894	
Fort Totten.....	350	— —, 1874	At agency.
		Jan. —, 1891	At Fort Totten.
Standing Rock, agency.....	110	May —, 1877	
Standing Rock, agricultural.....	100	— —, 1878	
Standing Rock, Grand River.....	70	Nov. 20, 1893	
North Carolina—East. Cherokee..	135	Jan. 1, 1893	Prior to this date a contract school opened in 1885.
Oklahoma—Absentee Shawnee...	70	May —, 1872	
Arapaho.....	150	Dec. —, 1872	
Cheyenne.....	200	— —, 1879	
Fort Sill.....	125	Aug. —, 1891	
Kaw.....	60	Dec. —, 1869	In Kansas.
		Aug. —, 1874	In Indian Territory.
Osage.....	180	Feb. —, 1874	
Otoe.....	75	Oct. —, 1875	In Nebraska.
		— —, 1865	In Nebraska.
Pawnee.....	125	— —, 1873	In Indian Territory.
Ponca.....	100	Jan. —, 1883	
Rainy Mountain.....	50	Sept. —, 1893	
Riverside (Wichita).....	100	Sept. —, 1871	
		— —, 1868	In Kansas.
Sac and Fox.....	120	Apr. —, 1872	In Indian Territory.
Seger.....	125	Jan. 11, 1893	
Washita (Kiowa).....	120	Feb. —, 1871	At Fort Sill. Transferred with the agency to the Washita in 1873.
Oregon—Grande Ronde.....	100	Apr. —, 1874	
Klamath.....	125	Feb. —, 1874	
Siletz.....	65	Oct. —, 1873	
Umatilla.....	100	Jan. —, 1883	
Yainax.....	100	Nov. —, 1882	
South Dakota—Cheyenne River...	130	Apr. 1, 1893	At new agency. At old agency school for girls opened in 1874 under missionary auspices in government buildings; school for boys opened in 1880.

THE LEGAL HOLIDAYS.

Jan. 1—New Year's day: In all the states except Arkansas, Massachusetts, Mississippi, New Hampshire and Rhode Island.

Jan. 8—Anniversary of the battle of New Orleans: In Louisiana.

Jan. 19—Lee's birthday: In Florida, Alabama, Georgia, North Carolina and Virginia.

Feb. 6—Mardi-Gras, Shrove Tuesday, the day before Ash Wednesday, the first day of Lent: In Alabama and Louisiana.

Feb. 12—Lincoln's birthday: In Illinois, Minnesota, New Jersey, New York, Washington.

Feb. 22—Washington's birthday: In all the states except Arkansas, Iowa and Mississippi.

March 2—Anniversary of Texan independence: In Texas.

March 4—Firemen's anniversary: In New Orleans, La.

March—Good Friday (the Friday before Easter): In Alabama, Louisiana, Maryland, Pennsylvania and Tennessee.

April (first Wednesday)—State election day: In Rhode Island.

April 19—Patriots' day: In Massachusetts.

April 21—Anniversary of the battle of San Jacinto: In Texas.

April 26—Memorial day: In Alabama and Georgia.

May 10—Memorial day: In North Carolina.

May 20—Anniversary of the signing of the Mecklenburg Declaration of Independence: In North Carolina.

May 30—Decoration day: In Arizona, California, Colorado, Connecticut, Delaware, Iowa, Illinois, Indiana, Kansas, Maine, Maryland, Massachusetts, Michigan, Minnesota, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, Tennessee, Utah, Vermont, Wisconsin, Washington and Wyoming.

June 3—Jefferson Davis' birthday: In Florida.

July 4—Independence day: In all the states.

July 24—Pioneers' day: In Utah.

*September (first Monday)—Labor day: In California, Colorado, Connecticut, Delaware, Georgia, Illinois, Indiana, Iowa, Kansas,

Maine, Massachusetts, Michigan, Montana, Nebraska, New Hampshire, New Jersey, New York, Ohio, Oregon, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia and Washington.

Sept. 9—Admission day: In California.

Sept. 12—Labor day: In Florida.

Oct. 31—Admission in the Union day: Nevada.

November (generally the Tuesday after the first Monday)—General election day: In

Arizona, California, Florida, Idaho, Indiana, Kansas, Maryland, Minnesota, Missouri, Montana, Nevada, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oregon, Pennsylvania, South Dakota, South Carolina, Tennessee, Texas, West Virginia, Washington, Wisconsin and Wyoming.

November, the last Thursday in—Thanksgiving day: It is observed in all the states, although in some it is not a statutory holiday.

Nov. 25—Labor day: In Louisiana.

Dec. 25—Christmas day: In all states, and in South Carolina the two succeeding days in addition.

Sundays and fast days (whenever appointed) are legal holidays in nearly all the states.

Arbor day is a legal holiday in Kansas, Rhode Island and Wyoming, the day being set by the governor.—In Nebraska, April 22; California, Sept. 9; Colorado, on the third Friday in April; Montana, third Tuesday in April; Utah, first Saturday in April; and Idaho, on Friday after May 1.

Every Saturday after 12 o'clock noon is a legal holiday in New York, New Jersey, Pennsylvania and Maryland, and the city of New Orleans, and June 1 to Sept. 30 in Newcastle county, Delaware.

*Labor day was made a national holiday by congress. It is the only strictly national holiday we have, not excepting the Fourth of July. Congress has at various times appointed special holidays, and has recognized the existence of certain days as holidays, but there is no general statute on the subject. The proclamation of the president designating a day of thanksgiving only makes such day a holiday in those states which provide for it by law.

QUALIFICATIONS FOR SUFFRAGE.

STATE.	Requirements as to citizenship.	PREVIOUS RESIDENCE REQUIRED.				Registration.	Ballot reform.	Excluded from voting.
		State.	County.	Town.	Precinct.			
Alabama....	Citizens, or alien who has declared his intentions; must exhibit poll-tax receipt.	1 y.	3 m	30 d	30 d	Yes.	Yes.	If convicted of treason, embezzlement of public funds, malfeasance in office or other penitentiary offenses. Idiots or insane.
Arkansas.....	Like Alabama.....	1 y.	6 m		30 d	No..	Yes.	Idiots or insane, convicts until pardoned.
California....	Citizens by nativity; naturalized for 90 days or treaty of Queretaro.	1 y.	90 d		30 d	Yes.	Yes.	Chinese, insane, embezzlers of public moneys, convicts.

Pennsylvania	Citizens at least 1 month, and if 22 years old must have paid tax within 2 yrs.	1 y.		2 m		Yes.	Yes.	Persons convicted of some offense forfeiting right of suffrage, non-taxpayers.
Rhode Island	Citizens.....	2 y.		6 m	2 m	(e)	Yes.	Paupers, lunatics, idiots, convicted of bribery or infamous crime until restored.
S. Carolina...	Citizens.....	1 y.	60 d	60 d		Yes.	No.	Paupers, insane, idiots, convicted of treason, dueling or other infamous crime.
S. Dakota....	Citizens, or aliens who have declared intention and been 1 year in U. S.; limited woman suffrage.	6 m	30 d		10 d	(f)	Yes.	Persons under guardian, idiots, insane, convicted of treason or felony unless pardoned.
Tennessee...	Citizens.....	1 y.	6 m			(g)	Yes.	Convicted of bribery or other infamous crime, failure to pay poll tax.
Texas.....	Citizens; limited woman suffrage.	1 y.	6 m	6 m		(h)	Yes.	Idiots, lunatics, paupers, convicts, U. S. soldiers and sailors.

(a) In cities of 100,000 population or over. (b) In all cities. (c) In cities of 3,000 population or over. (d) In cities of not less than 9,000 inhabitants. (e) Non-taxpayers must register yearly before Dec. 31. (f) In towns having 1,000 voters and counties where registration has been adopted by popular vote. (g) All counties having 50,000 inhabitants or over. (h) In cities of 10,000 or over.

QUALIFICATIONS FOR SUFFRAGE.—CONTINUED.

STATE.	Requirements as to citizenship.	PREVIOUS RESIDENCE REQUIRED.				Registration.	Ballot reform.	Excluded from voting.
		State.	County.	Town.	Precinct.			
Vermont.....	Citizens; women may vote at school elections.	1 y.	3 m	3 m		Yes.	Yes.	Unpardoned convicts, deserters from U. S. service during the war, ex-confeds, idiots, lunatics, convicts unless pardoned by the legislature.
Virginia.....	Citizens.....	1 y.	3 m	3 m	30 d	Yes.	No..	Indians not taxed.
Washington..	Citizens; limited woman suffrage.	1 y.	30 d	30 d	30 d		Yes.	Paupers, idiots, lunatics, convicts, bribery, U. S. soldiers and sailors.
W. Virginia..	Citizens.....	1 y.	60 d			No..	Yes.	Insane, under guardian, convicts unless pardoned.
Wisconsin....	Citizens, or alien who has declared intention; women may vote on school matters only.	1 y.			10 d	(a)	Yes.	Idiots, insane, felons, unable to read the state constitution.
Wyoming.....	Citizens, male or female....	1 y.	60 d			Yes.	Yes.	

(a) In cities of 3,000 population or over.

In a more or less limited form, relating to taxation and school matters, woman suffrage exists in Arizona, California, Delaware, Idaho, Illinois, Indiana, Kansas, Kentucky, Massachusetts, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Vermont, Washington and Wisconsin.

THE SMALLEST REPUBLICS.

Goust, the smallest republic as to area, is not more than one-third as large as Tavolara, though it maintains 130 souls. It is an older republic than the United States, having existed since 1648, and is recognized by both Spain and France. Goust, with its area of a mile, is on the flat top of a mountain in the Pyrenees and has a president selected by its council of twelve. The president is tax collector, assessor and judge. Goust has no church, clergymen or cemetery. The people worship in a church beyond the limits of their own country, and when any one dies the body is slid down to a cemetery in the valley below, where all the baptisms and marriages are performed.

The smallest of all the small republics in the world in point of population is twelve miles northeast of Sardinia—Tavolara, an island five miles long by a half-mile wide. There are fifty-five men, women and children living on it. The women go to the polls with the men and elect every year a president and council of six, all serving without pay. The republic has no army and no navy and the inhabitants make a living by fishing and raising fruit and vegetables.

The republic of Princeville is an island east of Australia about eighty-five miles in area, with a population of 550, only forty of whom are whites. The government is in the hands of the white men, who are elected by whites and blacks, the women also voting.

Not many people know that there is practically a republic located in North Carolina, independent of state and national government and tacitly acknowledged by the latter. It is the home of about 1,000 of the

eastern branch of the Cherokee Indians and is known as the Qualla reserve, a tract of 50,000 acres. The president is elected every four years, receives \$500 a year and when in Washington on business gets \$4 a day extra.

In the eastern spurs of the Apennine mountains, spreading over a territory of thirty-nine square miles, is the odd Italian republic of San Marino, with a population of 6,000, who make delicious cheese and wine. Sixty men are elected for life to govern the land. An army of 950 men is maintained, chiefly for police duties. The city of San Marino is one of the queerest old towns in the world, not having changed in 500 years. The people still wear the style of clothes in fashion when Columbus sailed away, and the streets are just the same. There are no shops within the limits.

Mausuet, a republic covering four square miles, is tucked away between Aix-la-Chapelle, Belgium, and Vermus. There are but 3,000 people in the place, but they are proud of their government. It has an army of three soldiers, who act as policemen when not engaged in military duties.

The republic of Andorra, which is under the suzerainty of France and the bishop of Urgel, has an area of 175 square miles and a population of about 6,000. It is governed by a council of twenty-four members, elected for four years by four heads of families in each parish. The council elects a first and second syndic to preside. The executive power is vested in the first syndic, while the judicial power is exercised by a civil judge and two vicars. The republic lies in the mountains between France and Spain.

Farmers' Organizations.

THE NATIONAL GRANGE.

OFFICERS, 1895-7.

Master—J. H. Brigham, Delta, O.

Overseer—Aaron Jones, South Bend, Ind.
 Lecturer—Alpha Messer, Rochester, Va.
 Steward—John T. Cox, Readington, N. J.
 Assistant Steward—J. A. Newcomb, Golden, Col.

Chaplain—O. H. Hale, North Stockholm, N. Y.
 Treasurer—Mrs. Eva S. McDowell, Penn Yan, N. Y.

Secretary—John Trimble, Washington, D. C.

Gate-Keeper—W. E. Harbaugh, Liberty, Mo.

Ceres—Mrs. Lucy G. Smith, Delaware, O.

Pomona—Mrs. Sarah G. Baird, Edina Mills, Minn.

Flora—Mrs. E. L. A. Wigginn, Maysville Center, Me.

L. A. Steward—Mrs. S. G. Knott, Moler's, W. Va.

EXECUTIVE COMMITTEE.

Chairman—Leonard Rhone, Center Hall, Center county, Pa.

Secretary—J. J. Woodman, Paw Paw, Van Buren county, Mich.

N. J. Bachelder, East Andover, Merrimac county, N. H.

J. H. Brigham, *ex-officio*, Delta, Fulton county, O.

ADDRESS OF THE FISCAL AGENCY.

The Farmers' Loan and Trust Co., 22 William Street, New York city.

Religious.

STATISTICS OF THE CHURCHES.

[From the New York Independent.]

The following tables give for each denomination the number of ministers, churches and communicants in the United States, according to the census of 1890 and the returns of 1894 and 1895.

It is necessary, in order to the proper understanding of these tables, to give attention to these explanations:

1. The census gives returns for the United States only; those for 1894-5 are, therefore, also confined to our own country. In separate tables an attempt is made to give statistics for Canada, Europe and other countries for our leading denominations.

2. The figures for 1895 represent the latest obtainable returns. No pains was spared to get reports for 1895. But this was not possible in many cases; for example, of the Regular Baptists, north, south and colored, of the Methodist Episcopal Church South, and of the Catholics. The statistics of these denominations will not be ready until later in the year.

3. A number of denominations publish no statistics. For some of them careful estimates, made by the most competent persons, are given. In other cases, where there is no reason to believe there has been any change since 1890, or intelligent estimates cannot be given, the figures of the census are carried over into the columns for 1895.

4. In some instances, as the German Evangelical Synod, part of the returns for 1895 are smaller than those for 1890. This is attributable to the fact that the later reports are not so full as those of the census.

5. The reports for the Regular Baptists are not at hand for 1895. The increase of the year must have been considerable. The increase since 1890 is not the full increase. The denominational reports are not nearly so complete as those of the census. There are scores of associations from which the denominational statistician fails to get returns. The Baptist increase for 1894, including northern, southern and colored Regular Baptists, was 1,737 ministers, 1,069 churches and 140,433 members.

6. Most of the denominations give returns for congregations or churches, but the Methodist bodies usually report church edifices. The census return of edifices is, therefore, given in the column headed "churches," instead of congregations. According to the census returns all Methodist bodies had, in 1890, 51,489 congregations or organizations and 46,138 church edifices, a difference of about 5,000.

7. The figures in the column of communicants for the Roman Catholic church for 1894 were obtained by taking 85 per cent of the latest returns (1894) for Catholic population. This is the Catholic rule.

MINISTERS, CHURCHES AND COMMUNICANTS IN 1894 AND 1895.

*The returns are for 1893. †The returns are for 1894. ‡It is not likely that there has been any decrease in the number of members or of churches since 1890. Doubtless the census got fuller returns than the Universalist Register obtains.

INTERNATIONAL SUNDAY SCHOOL UNION.

LIST OF OFFICERS—1896-9.

President—Hon. S. B. Capen, Boston, Mass.

Vice-Presidents—R. M. Scruggs, St. Louis, Mo.; F. W. Kelley, Montreal, Quebec; John M. Green, Atlanta, Ga.

Secretary—M. D. Beyers, Atwood Building, Chicago, Ill.

Assistant Secretary—Miss Mamie F. Huber, Louisville, Ky.

Chairman Finance Committee—G. W. Bailey, 308 Walnut street, Philadelphia, Pa.

Treasurer—W. K. Crosby, Wilmington, Del.

FIELD WORKERS.

Field Superintendent—William Reynolds, Peoria, Ill.

Rev. H. M. Hamill, Jacksonville, Ill.

Hugh Cork (Northwest), 218 W. 26th street, Minneapolis, Minn.

Rev. L. B. Maxwell (Colored), Savannah, Ga.

EXECUTIVE COMMITTEE.

Chairman—B. F. Jacobs, Atwood Building, Chicago, Ill.

First Vice-Chairman—D. R. Wolfe, St. Louis, Mo.

State. Member and residence.

Alabama.....W. E. Holloway, Montgomery.

Alaska.....Rev. S. Jackson, D. D., Sitka.

Arizona.....M. W. Messenger, Phoenix.

Arkansas.....Vacant.

California.....H. Morton, San Jose.

Colorado.....Vacant.

Connecticut.....Cullen B. Foote, New Haven.

Delaware.....Prof. H. S. Goldoy, Wilmington.

Dist. of Col.Pierson H. Bristow, Washington.

Florida.....H. C. Groves, Ocala.

Georgia.....Asa G. Candler, Atlanta.

Idaho.....Walter S. Bruce, Boise City.

Illinois.....B. F. Jacobs, Chicago.

Indiana.....Charles D. Meigs, Indianapolis.

Iowa.....Rev. W. H. Blanche, Davenport.

Kansas.....J. F. Drake, Topeka.

Kentucky.....Hon. John Stites, Louisville.

Louisiana.....E. P. Mackie, New Orleans.

Maine.....Albert W. Butler, Rockland.

Maryland.....Frank Woods, Baltimore.

Massachu'ts.....William N. Hartshorn, Boston.

Michigan.....E. A. Hough, Jackson.

Minnesota.....Rev. G. R. Merrill, D. D., Minneap's.

Mississippi.....Hon. B. T. Kimbrough, Oxford.

Missouri.....D. R. Wolfe, St. Louis.

Montana.....Eben Sharpe, Helena.

Nebraska.....Rev. W. H. Trueblood, Kearney.

Nevada.....Vacant.

N. Hampsh'g.....Prof. G. W. Bingham, Derry.

New Jersey.....George W. Bailey, Wenonah.

Second Vice-Chairman—W. N. Hartshorn, Boston, Mass.

Secretary—Frank Woods, 812 Equitable Building, Baltimore, Md.

State. Member and residence.

New Mexico.....Rev. T. C. Battle, Albuquerque.

New York.....W. A. Duncan, Ph. D., Syracuse.

N. Carolina.....Vacant.

N. Dakota.....J. M. Wylie, Drayton.

Ohio.....W. A. Budaly, Cincinnati.

Oklahoma.....Rev. J. E. Platt, Guthrie.

Oregon.....Rev. G. E. Hawes, Portland.

Pennsylvania.....Hon. J. Wanmaker, Philadelp'a.

R. Island.....A. B. McCrillis, Providence.

S. Carolina.....C. H. Carlisle, Spartanburg.

S. Dakota.....Col. C. E. Baker, Sioux Falls.

Tennessee.....J. R. Pepper, Memphis.

Texas.....J. H. Banton, Waco.

Utah.....C. H. Parsons, Salt Lake City.

Vermont.....Rev. J. H. Babbitt, W. Brattleboro.

Virginia.....A. Lee Knowles, Staunton.

Washington.....George F. Whittle, Spokane.

W. Virginia.....Prof. T. C. Miller, Morgantown.

Wisconsin.....Vacant.

Wyoming.....Vacant.

Alberta.....Rev. John Fernie, Lacombe.

Assiniboia.....J. W. Smith, Regina.

B. Columbia.....W. C. Coatham, N. Westminster.

Manitoba.....F. W. Adams, Brandon.

N. Brunsw'k.....Thomas S. Simms, St. John.

N'found'nd.....Charles P. Ayre, St. Johns.

Nova Scotia.....Charles H. Longard, Halifax.

Ontario.....John J. Maclaren, Toronto.

P. E. Island.....Rev. D. Sutherland, Charlottetown.

Quebec.....Seth P. Leet, Montreal.

* (—) Loss. † Total loss in United States, 13,702. ‡ Total loss in Canada, 2,831. § Total loss in the United States and British American Provinces, 16,644.

The apparent decrease in membership in the District of Columbia is because the reports to previous conventions have been estimated and included Catholics, while the report this year is made up from the actual returns and does not include the Catholics.

The loss reported in New Jersey is due to a mistake in the report made to the St. Louis convention. The fact is that they have gained 154 Sunday schools and 46,163 in membership in the last three years.

The loss reported from Prince Edward Is-

land is on account of incorrect report made to the St. Louis convention.

The apparent loss in Rhode Island is also on account of the incomplete report made to the St. Louis convention.

The report shows we have gained over nine Sunday schools every weekday and eleven every Sunday for the last three years, and that we have gathered into these schools 1,150 officers, teachers and scholars every day for the last three years.

UNITED SOCIETY OF CHRISTIAN ENDEAVOR.

Office, 646 Washington street, Boston, Mass., U. S. A.

THE EPWORTH LEAGUE.

The Epworth League of the Methodist Episcopal church was organized at Cleveland, O., May 15, 1889, by a union of five young people's societies then existing in the Methodist church. It was formally indorsed by the general conference and became a department of the church in 1892. Its government is vested in a board of control, which meets once in two years. The officers consist of a president, who is appointed by the board of bishops from their own number, four vice-presidents, a general secretary and a treasurer, who, together with the editor of the Epworth Herald and the German assistant secretary, constitute the general cabinet. The executive officer of the Epworth League is the general secretary. The central office is located at 57 Washington street, Chicago. The present enrollment of the Epworth League is 17,000 regular and 5,000 junior chapters, with a total membership of 1,500,000. The Epworth Herald, the organ of the Epworth League, has a circulation of 100,000. Following is a list of the cabinet of the Epworth League, the board of control and the enrollment by states:

GENERAL CABINET OF EPWORTH LEAGUE.

President—Bishop W. X. Ninde, D. D., Detroit, Mich.

First Vice-President—W. W. Cooper, Kenosha, Wis.

Second Vice-President—Rev. W. I. Haven, Brookline, Mass.

Third Vice-President—R. R. Doherty, New York City.

YOUNG PEOPLE'S CHRISTIAN UNION.

The young people's organization of the United Brethren in Christ organized June 5, 1890. It is a union of all forms of young people's societies within the church, uniting them for the purpose of denominational direction. There are now in this union 1,770 societies, of which 86 are junior societies. The total membership is 70,554. A mission church has been built in Los Angeles, Cal., to which over \$6,000

has been paid. The principal officers are: President, Prof. J. P. Landis, D. D., Ph. D., Dayton, O.; corresponding secretary, Rev. H. F. Shupe, Dayton, O.; recording secretary, Miss Lizzie Sheets, Vermilion, Ill.; treasurer, Mr. Z. W. Barnard, Dayton, O. The Young People's Watchword is the organ of the union. The next biennial convention will be held in 1898.

ROMAN CATHOLIC CHURCH OF THE UNITED STATES.

Apostolic Delegate—Most-Rev. Mgr. Martinelli, Washington, D. C.
Cardinal—James Gibbons, Baltimore, Md.

Military Societies of the United States.

SOCIETY OF THE CINCINNATI.

General Officers.

President-General—William Wayne, Pa.
Vice-President-General—Winslow Warren, Mass.
Treasurer-General—Richard M. McSherry, Md.
Secretary-General—Hon. Asa Bird Gardiner, L.L.D., of Rhode Island, Garden City, N. Y.
Assistant Secretary-General—Nich. Fish, N. Y.

State Societies.

Massachusetts—Organized June 9, 1783; Winslow Warren, president.
New York—Organized June 9, 1778; Hon. John Cochrane, president, New York city.
Pennsylvania—Organized Oct. 4, 1783; Hon. William Wayne, president, Paoli, Chester county, Pa.
Maryland—Organized Nov. 21, 1783; Hon. Robert M. McLane, president, Baltimore, Md.
Rhode Island—Organized June 24, 1783; Hon. Nathaniel Greene, president, Newport, R. I.
New Jersey—Organized June 11, 1783; William S. Stryker, president, Mount Holly, N. J.
Connecticut (revived 1893)—George B. Sanford, acting president.
South Carolina—Organized Aug. 29, 1783; Rev. Charles Coatesworth Pinckney, D. D., president, Charleston, S. C.
Virginia—John Cropper, president.
France—Organized at Paris Jan. 7, 1784; re-instituted July 1, 1887; Marquis de Rochambeau, president, 51 Rue de Naples, Paris.

The historic and patriotic Order of the Cincinnati was founded by the American and French officers at the cantonments of the continental army on the Hudson at the close of hostilities in the war of the revolution for American independence in May, 1783.

In forming the society it was declared that "to perpetuate, therefore, as well the remembrance of this vast event as the mutual friendships which have been formed under the pressure of common danger, and, in many instances, cemented by the blood of the parties, the officers of the American army do hereby, in the most solemn manner, associate, constitute and combine themselves into one society of friends, to endure as long as they shall endure, or any of their eldest male posterity,

and in failure thereof the collateral branches who may be judged worthy of becoming its supporters and members."

For convenience, thirteen state societies were formed, and one in France under the direct patronage of Louis XVI. Upon the roll of original members appeared the names of all the great historic military and naval characters of the revolution, and upon the roll of honorary members, elected for their own lives only, appeared many of the signers of the declaration of independence.

Several state societies became dormant because the members had to emigrate to the lands given them for their services, west of the Alleghenies, and with broken health and ruined fortunes begin life anew in failure of congress to keep its promises as to half-pay.

There now remain nine state societies—viz., those of Massachusetts, Rhode Island, Connecticut (revived 1893), New York, New Jersey, Pennsylvania, Maryland, Virginia and South Carolina, and the one in France, which was dispersed at the reign of terror in 1793, has been re-established under the acting presidency of M. le Marquis de Rochambeau.

Membership descends to the eldest lineal male descendant, if judged worthy, and, in failure of direct male descent, to male descendants through intervening female descendants.

The general society is composed of the general officers and five delegates from each state society, and meets triennially. In 1854 it ruled that proper descendants of revolutionary officers who were entitled to original membership, but who never could avail themselves of it, are qualified for hereditary membership, if found worthy, on due application.

The last triennial meeting of the general society was held in Philadelphia, Pa., in May, 1896.

The number of living members of the Society of the Cincinnati, as reported at the triennial meeting May, 1893, was 499. President Cleveland and Maj.-Gen. Howard, U. S. A., are honorary members in the New York state society; ex-President Harrison is an honorary member of the Pennsylvania state society, and Gen. John M. Schofield is an honorary member of the New Jersey state society.

SOCIETY OF COLONIAL WARS.

Officers of the General Society.

Governor-General—Frederick J. de Peyster, New York.
Deputy Governors-General—Charles H. Murray, for New York; James Mifflin, for Pennsylvania; Gen. Joseph L. Brent, for Maryland; Gen. William F. Draper, for Massachusetts; Rear-Admiral Francis A. Roe, U. S. N., for the District of Columbia; Malcolm Macdonald, for New Jersey; William Hammersley, for Connecticut; Col. E. B. Chittenden, for Vermont; Henry Cadle, for Missouri; J. L. Lombard, for Illinois; Henry O. Kent, for New Hampshire, and R. T. W. Duke, for Virginia.
Secretary-General—Howland Pell, 4 Warren street, New York.
Deputy Secretary-General—Edward Trenchard, 55 Wall street, New York.
Treasurer-General—Satterlee Swartwout, Stamford, Conn.
Deputy Treasurer-General—S. Victor Constant, New York.
Registrar-General—George Norbury Mackenzie, Baltimore, Md.

Historian-General—Dr. Francis E. Abbott, Cambridge, Mass.

Chaplain-General—Rev C. Ellis Stevens, L.L.D., D. C. L., Philadelphia, Pa.

Surgeon-General—Samuel Clagett Chew, M. D., Baltimore, Md.

The Society of Colonial Wars was instituted in 1892 to "perpetuate the memory of these events and of the men who, in military, naval and civil positions of high trust and responsibility, by their acts of counsel assisted in the establishment, defense and preservation of the American colonies, and were in truth the founders of this nation. With this end in view it seeks to collect and preserve manuscripts, rolls and records; to provide suitable commemorations or memorials relating to the American colonial period, and to inspire in its members the paternal and patriotic spirit of their forefathers, and in the community respect and reverence for those whose public services made our freedom and unity possible." Eligibility is confined to an adult male descendant of an ancestor who fought in battle under colonial authority, from the settle-

ment of Jamestown, Va., in 1607, to the battle of Lexington, in 1775, or who served as governor, deputy-governor, lieutenant-governor, member of the council, or as a military, naval or marine officer in the service of the colonies or under the banner of Great Britain, or was conspicuous in military, official or legis-

lative life during that period. The New York society was the original society, and state societies have also been organized in Pennsylvania, Maryland, Massachusetts, New Jersey, New Hampshire, Connecticut, Vermont, Missouri, Illinois, Virginia and the District of Columbia.

SONS OF THE REVOLUTION.

[Organized 1875.]

General Officers.

General President—John Lee Carroll, Maryland.
General Vice-President—G. D. W. Vroom, New Jersey.
Second Vice-President—Col. J. Screven, Georgia.
General Treasurer—R. M. Cadwalader, Pennsylvania.
General Secretary—J. M. Montgomery, New York.
General Asst. Secretary—W. H. Harris, Maryland.
General Register—John Woolf, Pennsylvania.
General Historian—T. B. M. Mason, U. S. A.
General Chaplain—Rev. H. B. Whipple, Minn.

State Societies.

Alabama—J. E. Webb, president, Birmingham.
California—H. O. Collins, president, Los Angeles.
Colorado—J. B. Grant, president, Denver.
Connecticut—M. G. Bulkeley, president.
District of Columbia—J. G. Walker, president, Washington.
Florida—Geo. T. Maxwell, president.
Georgia—John Screven, president, Savannah.
Illinois—H. W. Dudley, president, Chicago.
Iowa—W. S. Perry, president, Davenport.
Kentucky—Leslie Combs, president.
Maryland—J. L. Carroll, president, Ellicott City.
Massachusetts—C. K. Fay, president.
Minnesota—C. P. Noyes, president, St. Paul.
Missouri—D. S. Tuttle, president, St. Louis.
Montana—C. H. Benton, president.

New Hampshire—H. E. Hovey, president, Portsmouth.
New Jersey—S. M. Dickinson, president, Trenton.
New York—F. S. Tallmadge, president, New York.
North Carolina—Elias Carr, president, Raleigh.
Ohio—G. E. Pomeroy, president, Cincinnati.
Pennsylvania—William Wayne, president, Paoli.
South Carolina—C. S. Gadsden, president.
Tennessee—W. P. Washburn, president.
Texas—H. M. Aubery, president.
Virginia—J. A. Cabel, president.
West Virginia—J. M. Hagans, president, Morgantown.

Washington—Josiah Collins, president, Seattle.
 The two societies (Sons of the American Revolution and Sons of the Revolution) are alike in their aims and objects. These are fostering among themselves and their descendants the patriotic spirit of the men who in the naval, military or civil service of the colonies assisted in advancing the independence of the United States, and to collect and preserve the history of the revolutionary war and to promote intercourse and fraternal feeling among the members. Eligibility to membership in each is confined to male descendants from an ancestor who as a soldier, sailor or civil official assisted in establishing American independence during the war of the revolution. The society has a membership of 5,330.

MILITARY ORDER OF FOREIGN WARS.

[Instituted Dec. 27, 1894.]

General Officers of the National Commandery.

Commander-General—Brevet-Major-General Alexander Stewart Webb, late U. S. A.
Vice-Commanders-General—Rear-Admiral Bancroft Gherardi, U. S. N., New York; Rear-Admiral Richard W. Meade, U. S. N., Pennsylvania; A. Floyd Delafield, Connecticut.
Secretary-General—James Henry Morgan, New York.
Treasurer-General—Edward S. Sayres, Philadelphia, Pa.
Registrar-General—Rev. Henry N. Wayne, New Britain, Conn.
Historian-General—Capt. Henry Hobart Bellas, U. S. A.
Judge-Advocate General—Frank Montgomery Avery.
Chaplain-General—Rev. C. Ellis Stevens, LL.D., D. C. L.

Recorder-General—Frederick J. Huntington.

Officers of State Commanderies.

New York—David Banks, commander.
Pennsylvania—Rev. C. E. Stevens, commander.
District of Columbia—Gen. David S. Stanley, U. S. A., commander.
Ohio—Gen. T. J. Wood, U. S. A., commander.
Georgia—Capt. J. E. P. Stevens, U. S. A., commander.
Maine—Gen. F. Fessenden, U. S. A., commander.
Mississippi—Henry St. L. Capper, commander.
Vermont—E. A. Chittenden, commander.
California—E. S. Holden, commander.
Illinois—S. E. Gross, commander.
Florida—Lt. J. H. Bull, U. S. N., commander.
Tennessee—Capt. J. Biddle, U. S. A., commander.

SOCIETY OF THE SONS OF THE AMERICAN REVOLUTION.

[Organized June 29, 1876.]

General Officers.

Elected April 30, 1894.

President-General—Gen. Horace Porter, LL.D., 15 Broad street, New York city.
Vice-Presidents-General—Edwin S. Barrett, Col. T. M. Anderson, U. S. A.; John Whitehead, William R. Griffiths, William W. Henry.

Secretary-General—Franklin Murphy, Newark, N. J.
Treasurer-General—C. W. Haskins, 2 Nassau street, New York city.
Registrar-General—A. Howard Clarke, Washington city.
Historian-General—Henry Hall, New York city.
Chaplain-General—The Rt. Rev. Charles Edward Cheney, D. D., Chicago, Ill.

State Societies and Officers.

Arkansas—S. W. Williams, president, Little Rock.
California—E. W. McKinstry, president, San Francisco.
Connecticut—Jonathan Trumbull, president, Norwich.
Delaware—Hon. Thos. F. Bayard, president, Wilmington.
District of Columbia—Vacant.
Illinois—S. E. Gross, president, Chicago.
Indiana—S. B. Brown, president, Fort Wayne.
Iowa—A. U. Swalm, president, Oskaloosa.
Kansas—George D. Hale, president, Topeka.
Kentucky—Lewis Buckner, president, Louisville.
Louisiana—Edwin H. Farrer, president, New Orleans.
Maine—E. A. Butler, president, Rockland.
Maryland—W. R. Griffith, president, Rockville.
Massachusetts—E. S. Barrett, president, Concord.
Michigan—H. B. Ledyard, president, Detroit.
Minnesota—S. J. R. McMillan, president, St. Paul.
Missouri—G. E. Leighton, president, St. Louis.
Montana—D. S. Wade, president, Helena.
Nebraska—W. H. Alexander, president, Omaha.

New Hampshire—W. W. Bailey, president, Nashua.
New Jersey—John Whitehead, president, Morristown.
New York—Chauncey M. Depew, president, New York city.
Ohio—John F. Follett, president, Cincinnati.
Oregon and Washington—Col. Thomas M. Anderson, president, Vancouver Barracks, Wash.
Pennsylvania—W. A. Herron, president, Pittsburg.
Rhode Island—W. M. Green, president, Providence.
South Carolina—T. W. Woodward, president.
Tennessee—D. C. Kelly, president, Nashville.
Utah—N. W. Brigham, president, Salt Lake City.
Vermont—D. W. Robinson, president, Burlington.
Virginia—W. W. Henry, president, Richmond.
West Virginia—Robert White, vice-president, Wheeling.
Wisconsin—Don J. Whittemore, president, Milwaukee.
 The membership of the society was 7,783 at the annual meeting in Richmond, Va., April 30, 1896.

MILITARY ORDER OF THE LOYAL LEGION OF THE UNITED STATES.

[Instituted 1865.]

Commander-in-Chief—Rear-Admiral Bancroft Gherardi, U. S. N., New York city.
Senior Vice-Commander-in-Chief—Brig-Gen. Selden Connor, U. S. V., Portland, Me.
Junior Vice-Commander-in-Chief—Bvt. Maj-Gen. John R. Brooke, U. S. A., St. Paul, Minn.
Recorder-in-Chief—Bvt. Lieut.-Col. J. P. Nicholson, U. S. V., Philadelphia, Pa.

Commanderies.

Pennsylvania—Bvt. Maj-Gen. D. McM. Gregg, U. S. V., commander; Bvt. Lieut.-Col. John P. Nicholson, U. S. V., recorder, Philadelphia.
New York—Bvt. Brig-Gen. Horace Porter, U. S. A., commander; Paymaster A. Noel Blakeman, U. S. N., recorder, New York.
Maine—Paym. William H. Anderson, U. S. N., commander; Bvt. Maj. Henry S. Burrage, U. S. V., recorder, Portland.
Massachusetts—Acting Vol. Lieut. Charles P. Clark, U. S. N., commander; Col. Arnold A. Rand, U. S. V., recorder, Boston.
California—Bvt. Brig-Gen. S. B. M. Young, U. S. V., commander; Bvt. Lieut.-Col. William R. Smedberg, U. S. A., recorder, San Francisco.
Wisconsin—Bvt. Maj. Charles H. Ross, U. S. V., commander; Capt. A. Ross Houston, U. S. V., recorder, Milwaukee.
Illinois—Bvt. Brig-Gen. John C. Black, U. S. V., commander; Capt. Roswell H. Mason, U. S. V., recorder, Chicago.
District of Columbia—Col. George A. Woodward, U. S. A., commander; Bvt. Maj. William P. Huxford, U. S. A., recorder, Washington.

Ohio—Bvt. Brig-Gen. A. Hickenlooper, U. S. V., commander; Maj. W. H. Chamberlin, U. S. V., recorder, Cincinnati.
Michigan—Lieut.-Col. Henry S. Dean, U. S. V., commander; Bvt. Col. James T. Sterling, U. S. V., recorder, Detroit.
Minnesota—Bvt. Maj-Gen. John R. Brooke, U. S. A., commander; Bvt. Maj. George Q. White, U. S. A., recorder, St. Paul.
Oregon—Capt. G. E. Calkin, U. S. V., commander; Maj. William M. Calkin, U. S. V., recorder, Portland.
Missouri—Capt. Charles G. Warner, U. S. V., commander; Capt. William R. Hodges, U. S. V., recorder, St. Louis.
Nebraska—Lieut. J. H. McClay, U. S. V., commander; Maj. T. S. Clarkson, U. S. V., recorder, Omaha.
Kansas—Lieut.-Col. J. L. Abernathy, U. S. V., commander; Capt. Eben Swift, U. S. A., recorder, Fort Leavenworth.
Iowa—Capt. E. B. Soper, U. S. V., commander; Lieut. Joseph W. Muffly, U. S. V., recorder, Des Moines.
Colorado—Capt. E. T. Wells, U. S. V., commander; Bvt. Capt. James R. Saville, U. S. V., recorder, Denver.
Indiana—Maj-Gen. Lew Wallace, U. S. V., commander; Capt. Will W. Dougherty, U. S. A., recorder, Indianapolis.
Washington—Adj. A. B. Case, U. S. V., commander; Lieut.-Comdr. J. E. Noel, U. S. N., recorder, Tacoma.
Vermont—Maj-Gen. Oliver O. Howard, U. S. A., commander; First Lieut. William L. Greenleaf, U. S. V., recorder, Burlington.

GRAND ARMY OF THE REPUBLIC.

Commander-in-Chief—Thaddeus S. Clarkson, Omaha, Neb.
Senior Vice-Commander-in-Chief—John H. Mulen, Wabasha, Minn.
Junior Vice-Commander-in-Chief—Charles W. Buckley, Montgomery, Ala.
Surgeon-General—Dr. A. E. Johnson, Washington, D. C.
Chaplain-in-Chief—Rev. Mark B. Taylor, Canton, Mass.

Official Staff.

Adjutant-General—Charles E. Burmester, Omaha, Neb.
Quartermaster-General—A. J. Burbank, Chicago, Ill.
Inspector-General—Chas. A. Suydam, Philadelphia, Pa.
Judge-Advocate General—Albert Clarke, Wellesley Hills, Mass.
 The national council of administration has forty-five members, each department being represented by one member.

G'd total. 316,651,861 283,388,810 600,040,671
This aggregate is exclusive of Ohio, Indiana and Illinois, in which, if any public land remains, it consists of a few small, isolated tracts. It is exclusive of Alaska, containing 577,390 square miles, or 369,529,600 acres. It is also exclusive of military and Indian reservations, reservoir-site and timber reservations, and tracts covered by selections, filings, railroad grants and claims as yet unadjudicated, a part of which may in the future be added to the public domain.

THE PATENT OFFICE.

The patent office was created July 4, 1836, and placed under the direction of the secretary of state, under whom it remained until it was transferred to the department of the interior by the act of March 3, 1849.

The report of the commissioner of patents upon the business of the patent office for the fiscal year ended June 30, 1896, shows that there were received within that year 41,660 applications for patents, 1,641 applications for designs, 84 applications for reissues, 2,460 caveats, 2,064 applications for trade-marks, and

171 applications for labels. There were 22,791 patents granted, including reissues and designs; 1,782 trade-marks registered, and 11 prints registered. The number of patents which expired was 11,466. The number of allowed applications which were by operation of law forfeited for nonpayment of the final fees was 4,014. The total receipts were \$1,307,000.30; the receipts over expenditures were \$209,721.45, and the total receipts over expenditures to the credit of the patent office in the treasury of the United States amount to \$4,776,479.18.

RATES OF POSTAGE.

DOMESTIC.

FIRST CLASS.—Letters and all written matter, whether sealed or unsealed, and all other matter sealed, nailed, sewed, tied or fastened in any manner so that it cannot be easily examined, 2 cents per ounce or fraction thereof. A "special delivery" 10-cent stamp when attached to a letter, in addition to the lawful postage, shall entitle the letter to immediate delivery at or within one mile of any postoffice.

Postal cards, 1 cent each.

SECOND CLASS.—All regular newspapers, magazines and other periodicals issued at intervals not exceeding three months; the postage is 1 cent for each pound. A special rate of 1 cent for four ounces is made for all second-class matter mailed by other than publishers or newsdealers.

THIRD CLASS.—Embraces printed books, pamphlets, circulars, engravings, lithographs, proof-sheets and manuscript accompanying the same, and all matter of the same general character, and not having the character of personal correspondence. Circulars produced by hektograph or similar process, or by electric pen, are rated as third class. The limit of weight for mail matter of the third class is four pounds, except in the case of single books exceeding that weight. The rate of postage on mail matter of the third class is 1 cent for each two ounces or fraction thereof.

FOURTH CLASS.—All mailable matter, like merchandise, not included in the three preceding classes, which is so prepared for mailing as to be easily taken from the wrapper and examined. Rate, 1 cent per ounce or fraction thereof, except seeds, roots, cuttings, bulbs, plants and scions, which are 1 cent per two ounces. Limit of weight, four pounds. Full prepayment compulsory. Liquids and other like injurious matter, not admitted, except some under conditions which may be learned at any postoffice.

SUGGESTIONS.—Direct your mail matter to a postoffice, writing the name of the state plainly; and if to a city, add the street and number or postoffice box of the person addressed. Matter not addressed to a postoffice cannot be forwarded. Write or print your name and address, and the contents, if a package, upon the upper left-hand corner of all mail matter. This will insure its immediate return to you for correction, if improperly addressed or insufficiently paid; and if it is not called for at destination, it can be returned to you without going to the dead-letter office. If a letter, it will be returned free. Register all valuable letters and packages. Registry fee, 8 cents, which, with the postage, must be fully prepaid.

MONEY-ORDER FEES.—For money orders in denominations of \$100 or less, the following fees are charged:

For orders for sums not exceeding \$2.50.....	3c
For over \$2.50 and not exceeding \$5.....	5c
For over \$5 and not exceeding \$10.....	8c
For over \$10 and not exceeding \$20.....	10c
For over \$20 and not exceeding \$30.....	12c
For over \$30 and not exceeding \$40.....	15c
For over \$40 and not exceeding \$50.....	18c
For over \$50 and not exceeding \$60.....	20c
For over \$60 and not exceeding \$75.....	25c
For over \$75 and not exceeding \$100.....	30c

FOREIGN.

To all parts of the Universal Postal Union, embracing Argentine Republic, Australia, Austria-Hungary, Belgium, Bolivia, Brazil, Bulgaria, Ceylon, China via Hong Kong, Chile, Cuba, Denmark and Danish colonies, Ecuador, Egypt, Falkland Islands, France and French colonies, Germany, Great Britain and British West Indies, Greece, Greenland, Guatemala, Haiti, Holland or Netherlands and Nether-

land colonies, Honduras, Hong Kong, India (British), Ireland, Italy, Japan, Liberia, Luxemburg, Malacca, Mauritius, Montenegro, Natal, Newfoundland, Norway, Paraguay, Patagonia, Penang, Persia, Peru, Portugal and Portuguese colonies, Roumania, Russia, St. Bartholomew, Salvador, Serbia, Siam, Singapore, Spain and Spanish colonies, Straits settlements, Sweden, Switzerland, Transvaal, Trinidad, Turkey, United States of Colombia, Uruguay, Venezuela:

ON LETTERS.—Five cents for each half ounce or fraction thereof—prepayment optional. Double rates are collected on delivery of unpaid or short paid letters.

On newspapers, books, pamphlets, photographs, sheet music, maps, engravings and similar printed matter, 1 cent for each two ounces or fraction thereof.

TO CANADA.—(Including Nova Scotia, New Brunswick, Manitoba and Prince Edward Island): Letters, 2 cents for each ounce or fraction thereof; books, circulars and similar printed matter, 1 cent for each two ounces or fraction thereof; second-class matter, same as in the United States; samples and merchandise, 1 cent per ounce. Packages must not exceed four pounds six ounce in weight—prepayment compulsory.

TO MEXICO.—Letters, postal cards, and printed matter, same rates as in the United States; samples, 1 cent per ounce; merchandise other than samples can only be sent by parcel post.

TO AUSTRALIA.—(Except New South Wales, Queensland and Victoria) via San Francisco: On letters, 5 cents for each half ounce or fraction thereof; to places excepted above, 12 cents for each half ounce; on newspapers, 2 cents each—prepayment compulsory.

LIMITS OF SIZE AND WEIGHT.—Packages of samples of merchandise to the countries named above (except Great Britain, France, Belgium, and Switzerland) must not exceed eight and three-fourths ounces, nor measure more than eight inches in length, four in breadth and two in depth; and packages of printed matter must not exceed four pounds six ounces. Packages of merchandise samples to Great Britain, France, Belgium, Switzerland, and Argentine Republic are limited to twelve ounces in weight, twelve inches in length, eight in width and four in depth. Packages of printed matter to Germany and Great Britain are limited to two feet in length and one foot in each other dimension.

INTERNATIONAL MONEY-ORDER FEES.

On Algeria, Belgium, British India, Cape Colony, Constantinople, Denmark, Dominion of Canada, Egypt, England, France, German empire, Hong Kong, Ireland, Italy, Jamaica, Japan, Newfoundland, New South Wales, New Zealand, Portugal, Sandwich Islands, Scotland, Shanghai, Sweden, Switzerland, Tasmania, Victoria:

For sums not exceeding \$10.....	10c
Over \$10 and not exceeding \$20.....	20c
Over \$20 and not exceeding \$30.....	30c
Over \$30 and not exceeding \$40.....	40c
Over \$40 and not exceeding \$50.....	50c
Over \$50 and not exceeding \$60.....	60c
Over \$60 and not exceeding \$70.....	70c
Over \$70 and not exceeding \$80.....	80c
Over \$80 and not exceeding \$90.....	90c
Over \$90 and not exceeding \$100.....	\$1

Orders can also be obtained on Austria and East Indies, by remittance through the postal department of Switzerland, subject to the rates of the Swiss department to those countries. Also on Norway and the Netherlands, through the postal department of the German empire, subject to the rates of the German department to those countries.

United States Diplomatic and Consular Service.

SEPT. 11, 1896.

Explanation—A. E. and P., Ambassador Extraordinary and Plenipotentiary; E. E. and M. P., Envoy Extraordinary and Minister Plenipotentiary; M. R., Minister Resident; M. R. and C. G., Minister Resident and Consul-General.

Party Platforms.

NATIONAL PARTY PLATFORMS OF 1896.

THE REPUBLICANS.

[Adopted at St. Louis June 18.]

The republicans of the United States, assembled by their representatives in national convention, appealing for the popular and historical justification of their claims to the matchless achievements of thirty years of republican rule, earnestly and confidently address themselves to the awakened intelligence, experience and conscience of their countrymen in the following declaration of facts and principles:

For the first time since the civil war the American people have witnessed the calamitous consequences of full and unrestricted democratic control of the government. It has been a record of unparalleled incapacity, dishonor and disaster. In administrative management it has ruthlessly sacrificed indispensable revenue, entailed an unceasing deficit, eked out ordinary current expenses with borrowed money, piled up the public debt by \$262,000,000 in time of peace, forced an adverse balance of trade, kept a perpetual menace hanging over the redemption fund, pawned American credit to alien syndicates and reversed all the measures and results of successful republican rule. In the broad effect of its policy it has precipitated panic, blighted industry and trade with prolonged depression, closed factories, reduced work and wages, halted enterprise and crippled American production, while stimulating foreign production for the American market. Every consideration of public safety and individual interest demands that the government shall be rescued from the hands of those who have shown themselves incapable to conduct it without disaster at home and dishonor abroad, and shall be restored to the party which for thirty years administered it with unequalled success and prosperity, and in this connection we heartily indorse the wisdom, patriotism and success of the administration of President Harrison.

THE TARIFF.

We renew and emphasize our allegiance to the policy of protection as the bulwark of American industrial independence and the foundation of American development and prosperity. This true American policy taxes foreign products and encourages home industry; it puts the burden of revenue on foreign goods; it secures the American market for the American producer; it upholds the American standard of wages for the American workman; it puts the factory by the side of the farm and makes the American farmer less dependent on foreign demand and price; it diffuses general thrift and founds the strength of all on the strength of each. In its reasonable application it is just, fair and impartial, equally opposed to foreign control and domestic monopoly, to sectional discrimination and individual favoritism. We denounce the democratic tariff as sectional, injurious to the public credit and destructive to business enterprise. We demand such an equitable tariff on foreign imports which come into competition with American products as will not only furnish adequate revenue for the necessary expenses of the government but will protect American labor from degradation to the wage level of other lands. We are not pledged to any particular schedules. The question of rates

is a practical question, to be governed by the conditions of the time and of production; the ruling and uncompromising principle is the protection and development of American labor and industry. The country demands a right settlement and then it wants rest.

RECIPROCITY.

We believe the repeal of the reciprocity arrangements negotiated by the last republican administration was a national calamity, and we demand their renewal and extension on such terms as will equalize our trade with other nations, remove the restrictions which now obstruct the sale of American products in the ports of other countries and secure enlarged markets for the products of our farms, forests and factories. Protection and reciprocity are twin measures of republican policy and go hand in hand. Democratic rule has recklessly struck down both, and both must be re-established—protection for what we produce; free admission for the necessities of life which we do not produce; reciprocal agreements of mutual interests which gain open markets for us in return for our open market to others. Protection builds up domestic industry and trade and secures our own market for ourselves; reciprocity builds up foreign trade and finds an outlet for our surplus.

SUGAR.

We condemn the present administration for not keeping faith with the sugar producers of this country. The republican party favors such protection as will lead to the production on American soil of all the sugar which the American people use and for which they pay other countries more than \$100,000,000 annually.

WOOL AND WOOLENS.

To all our products—to those of the mine and the field as well as to those of the shop and the factory, to hemp, to wool, the product of the great industry of sheep husbandry, as well as to the finished woolens of the mill—we promise the most ample protection.

MERCHANT MARINE.

We favor restoring the early American policy of discriminating duties for the upbuilding of our merchant marine and the protection of our shipping in the foreign carrying trade, so that American ships—the product of American labor, employed in American shipyards, sailing under the stars and stripes and manned, officered and owned by Americans—may regain the carrying of our foreign commerce.

THE CURRENCY.

The republican party is unreservedly for sound money. It caused the enactment of the law providing for the resumption of specie payments in 1879. Since then every dollar has been as good as gold. We are unalterably opposed to every measure calculated to debase our currency or impair the credit of our country. We are therefore opposed to the free coinage of silver except by international agreement with the leading commercial nations of the world, which we pledge ourselves to promote; and until such agreement can be obtained the existing gold standard must be preserved. All our silver and paper currency must be maintained at

parity with gold, and we favor all measures designed to maintain inviolably the obligations of the United States and all our money, whether coin or paper, at the present standard, the standard of the most enlightened nations of the earth.

PENSIONS.

The veterans of the union army deserve and should receive fair treatment and generous recognition. Whenever practicable they should be given the preference in the matter of employment, and they are entitled to the enactment of such laws as are best calculated to secure the fulfillment of the pledges made to them in the dark days of the country's peril. We denounce the practice in the pension bureau, so recklessly and unjustly carried on by the present administration, of reducing pensions and arbitrarily dropping names from the rolls as deserving the severest condemnation of the American people.

FOREIGN RELATIONS.

Our foreign policy should be at all times firm, vigorous and dignified, and all our interests in the western hemisphere carefully watched and guarded. The Hawaiian Islands should be controlled by the United States, and no foreign power should be permitted to interfere with them; the Nicaraguan canal should be built, owned and operated by the United States; and by the purchase of the Danish Islands we should secure a proper and much-needed naval station in the West Indies.

ARMENIAN MASSACRES.

The massacres of Armenians have aroused the deep sympathy and just indignation of the American people, and we believe that the United States should exercise all the influence it can properly exert to bring these atrocities to an end. In Turkey American residents have been exposed to the gravest dangers and American property destroyed. There and everywhere American citizens and American property must be absolutely protected at all hazards and at any cost.

THE MONROE DOCTRINE.

We reassert the Monroe doctrine in its full extent, and we reaffirm the right of the United States to give the doctrine effect by responding to the appeals of any American state for friendly intervention in case of European encroachment. We have not interfered and shall not interfere with the existing possessions of any European power in this hemisphere, but those possessions must not, on any pretext, be extended. We hopefully look forward to the eventual withdrawal of the European powers from this hemisphere and to the ultimate union of all English-speaking parts of the continent by the free consent of its inhabitants.

CUBA.

From the hour of achieving their own independence the people of the United States have regarded with sympathy the struggles of other American peoples to free themselves from European domination. We watch with deep and abiding interest the heroic battle of the Cuban patriots against cruelty and oppression, and our best hopes go out for the full success of their determined contest for liberty. The government of Spain having lost control of Cuba and being unable to protect the property or lives of resident American citizens or to comply with its treaty obligations, we believe that the government of the United States should actively use its influence and good offices to

restore peace and give independence to the island.

THE NAVY.

The peace and security of the republic and the maintenance of its rightful influence among the nations of the earth demand a naval power commensurate with its position and responsibility. We therefore favor the continued enlargement of the navy and a complete system of harbor and seacoast defenses.

FOREIGN IMMIGRATION.

For the protection of the quality of our American citizenship and of the wages of our workmen against the fatal competition of low-priced labor, we demand that the immigration laws be thoroughly enforced and so extended as to exclude from entrance to the United States those who can neither read nor write.

THE CIVIL SERVICE

The civil-service law was placed on the statute book by the republican party, which has always sustained it, and we renew our repeated declarations that it shall be thoroughly and honestly enforced and extended wherever practicable.

FREE BALLOT.

We demand that every citizen of the United States shall be allowed to cast one free and unrestricted ballot and that such ballot shall be counted and returned as cast.

LYNCHINGS.

We proclaim our unqualified condemnation of the uncivilized and barbarous practice well known as lynching or killing of human beings suspected or charged with crime without process of law.

NATIONAL ARBITRATION.

We favor the creation of a national board of arbitration to settle and adjust differences which may arise between employers and employees engaged in interstate commerce.

HOMESTEADS.

We believe in an immediate return to the free-homestead policy of the republican party and urge the passage by congress of the satisfactory free-homestead measure which has already passed the house and is now pending in the senate.

THE TERRITORIES.

We favor the admission of the remaining territories at the earliest practicable date, having due regard to the interests of the people of the territories and of the United States. All the federal officers appointed for the territories should be selected from bona-fide residents thereof and the right of self-government should be accorded as far as practicable.

ALASKA.

We believe the citizens of Alaska should have representation in the congress of the United States, to the end that needful legislation may be intelligently enacted.

TEMPERANCE.

We sympathize with all wise and legitimate efforts to lessen and prevent the evils of intemperance and promote morality.

RIGHTS OF WOMEN.

The republican party is mindful of the rights and interests of women. Protection of American industries includes equal opportunities, equal pay for equal work and protection to the home. We favor the ad-

mission of women to wider spheres of usefulness and welcome their co-operation in rescuing the country from democratic and populist mismanagement and misrule.

Such are the principles and policies of the republican party. By these principles we will abide and these policies we will put into execution. We ask for them the considerate judgment of the American people. Confident alike in the history of our great party and in the justice of our cause, we present our platform and our candidates in the full assurance that the election will bring victory to the republican party and prosperity to the people of the United States.

[The nominees were: For president, William McKinley of Ohio; for vice-president, Garret A. Hobart of New Jersey.]

THE DEMOCRATS.

[Adopted at Chicago July 9.]

We, the democrats of the United States, in national convention assembled, do reaffirm our allegiance to those great essential principles of justice and liberty upon which our institutions are founded and which the democratic party has advocated from Jefferson's time to our own—freedom of speech, freedom of the press, freedom of conscience, the preservation of personal rights, the equality of all citizens before the law and the faithful observance of constitutional limitations.

During all these years the democratic party has resisted the tendency of selfish interests to the centralization of governmental power and steadfastly maintained the integrity of the dual scheme of government established by the founders of this republic of republics. Under its guidance and teachings the great principle of local self-government has found its best expression in the maintenance of the rights of the states and in its assertion of the necessity of confining the general government to the exercise of powers granted by the constitution of the United States.

The constitution of the United States guarantees to every citizen the rights of civil and religious liberty. The democratic party has always been the exponent of political liberty and religious freedom and it renews its obligations and reaffirms its devotion to these fundamental principles of the constitution.

THE MONEY PLANK.

Recognizing that the money question is paramount to all others at this time, we invite attention to the fact that the constitution named silver and gold together as the money metals of the United States and that the first coinage law passed by congress under the constitution made the silver dollar the money unit and admitted gold to free coinage at a ratio based upon the silver-dollar unit.

We declare that the act of 1873 demonetizing silver without the knowledge or approval of the American people has resulted in the appreciation of gold and a corresponding fall in the prices of commodities produced by the people; a heavy increase in the burden of taxation and of all debts, public and private; the enrichment of the money-lending class at home and abroad; the prostration of industry and impoverishment of the people.

We are unalterably opposed to monometallism, which has locked fast the prosperity of an industrial people in the paralysis of hard times. Gold monometallism is

a British policy and its adoption has brought other nations into financial servitude to London. It is not only un-American but anti-American, and it can be fastened on the United States only by the stifling of that spirit and love of liberty which proclaimed our political independence in 1776 and won it in the war of the revolution.

We demand the free and unlimited coinage of both silver and gold at the present legal ratio of 16 to 1 without waiting for the aid or consent of any other nation. We demand that the standard silver dollar shall be a full legal tender equally with gold for all debts, public and private, and we favor such legislation as will prevent for the future the demonetization of any kind of legal-tender money by private contract.

We are opposed to the policy and practice of surrendering to the holders of the obligations of the United States the option reserved by law to the government of redeeming such obligations in either silver coin or gold coin.

INTEREST-BEARING BONDS.

We are opposed to the issuing of interest-bearing bonds of the United States in time of peace and condemn the trafficking with banking syndicates which, in exchange for bonds and at an enormous profit to themselves, supply the federal treasury with gold to maintain the policy of gold monometallism.

NATIONAL BANKS.

Congress alone has the power to coin and issue money and President Jackson declared that this power could not be delegated to corporations or individuals. We therefore denounce the issuance of notes intended to circulate as money by national banks as in derogation of the constitution, and we demand that all paper which is made a legal tender for public and private debts or which is receivable for duties to the United States shall be issued by the government of the United States and shall be redeemable in coin.

TARIFF RESOLUTION.

We hold that tariff duties should be levied for purposes of revenue, such duties to be so adjusted as to operate equally throughout the country and not discriminate between class or section, and that taxation should be limited by the needs of the government, honestly and economically administered. We denounce as disturbing to business the republican threat to restore the McKinley law, which has twice been condemned by the people in national elections, and which, enacted under the false plea of protection to home industry, proved a prolific breeder of trusts and monopolies, enriched the few at the expense of the many, restricted trade and deprived the producers of the great American staples of access to their natural markets.

Until the money question is settled, we are opposed to any agitation for further changes in our tariff laws, except such as are necessary to meet the deficit in revenue caused by the adverse decision of the Supreme court on the income tax. But for this decision by the Supreme court there would be no deficit in the revenue under the law passed by the democratic congress in strict pursuance of the uniform decisions of that court for nearly 100 years, that court having in that decision sustained constitutional objections to its enactment which had previously been overruled by the ablest judges who have ever sat on that bench. We declare that it is the duty of congress to use

all the constitutional power which remains after that decision, or which may come from its reversal by the court as it may hereafter be constituted, so that the burdens of taxation may be equally and impartially laid, to the end that wealth may bear its due proportion of the expenses of the government.

IMMIGRATION AND ARBITRATION.

We hold that the most efficient way of protecting American labor is to prevent the importation of foreign pauper labor to compete with it in the home market, and that the value of the home market to our American farmers and artisans is greatly reduced by a vicious monetary system which depresses the prices of their products below the cost of production, and thus deprives them of the means of purchasing the products of our home manufactures; and, as labor creates the wealth of the country, we demand the passage of such laws as may be necessary to protect it in all its rights.

We are in favor of the arbitration of differences between employers engaged in interstate commerce and their employees, and recommend such legislation as is necessary to carry out this principle.

TRUSTS AND POOLS.

The absorption of wealth by the few, the consolidation of our leading railroad systems, and the formation of trusts and pools require a stricter control by the federal government of those arteries of commerce. We demand the enlargement of the powers of the interstate commerce commission, and such restrictions and guaranties in the control of railroads as will protect the people from robbery and oppression.

DECLARE FOR ECONOMY.

We denounce the profligate waste of the money wrung from the people by oppressive taxation, and the lavish appropriations of recent republican congresses, which have kept taxes high, while the labor that pays them is unemployed, and the products of the people's toil are depressed in price till they no longer repay the cost of production. We demand a return to that simplicity and economy which befits a democratic government, and a reduction in the number of useless offices, the salaries of which drain the substance of the people.

FEDERAL INTERFERENCE IN LOCAL AFFAIRS.

We denounce arbitrary interference by federal authorities in local affairs as a violation of the constitution of the United States, and a crime against free institutions, and we especially object to government by injunction as a new and highly dangerous form of oppression by which federal judges, in contempt of the laws of the states and rights of citizens, become at once legislators, judges and executioners, and we approve the bill passed at the last session of the United States senate, and now pending in the house of representatives, relative to contempts in federal courts, and providing for trials by jury in certain cases of contempt.

PACIFIC RAILROADS.

No discrimination should be indulged by the government of the United States in favor of any of its debtors. We approve of the refusal of the LIIRD congress to pass the Pacific railroad funding bill, and denounce the efforts of the present republican congress to enact a similar measure.

PENSIONS.

Recognizing the just claims of deserving union soldiers, we heartily indorse the rule of the present commissioner of pensions that no names shall be arbitrarily dropped from the pension roll; and the fact of enlistment and service shall be deemed conclusive evidence against disease and disability before enlistment.

ADMISSION OF TERRITORIES.

We favor the admission of the territories of New Mexico, Oklahoma and Arizona into the union as states, and we favor the early admission of all the territories having the necessary population and resource to entitle them to statehood, and while they remain territories we hold that the officials appointed to administer the government of any territory, together with the District of Columbia and Alaska, should be bona fide residents of the territory or district in which the duties are to be performed. The democratic party believes in home rule, and that all public lands of the United States should be appropriated to the establishment of free homes for American citizens.

We recommend that the territory of Alaska be granted a delegate in congress, and that the general land and timber laws of the United States be extended to said territory.

SYMPATHY FOR CUBA.

The Monroe doctrine, as originally declared, and as interpreted by succeeding presidents, is a permanent part of the foreign policy of the United States, and must at all times be maintained.

We extend our sympathy to the people of Cuba in their heroic struggle for liberty and independence.

CIVIL-SERVICE LAWS.

We are opposed to life tenure in the public service. We favor appointments based upon merit, fixed terms of office, and such an administration of the civil-service laws as will afford equal opportunities to all citizens of ascertained fitness.

THIRD-TERM RESOLUTIONS.

We declare it to be the unwritten law of this republic, established by custom and usage of 100 years, and sanctioned by the examples of the greatest and wisest of those who founded and have maintained our government, that no man should be eligible for a third term of the presidential office.

IMPROVEMENT OF WATERWAYS.

The federal government should care for and improve the Mississippi river and other great waterways of the republic so as to secure for the interior states easy and cheap transportation to tide water. When any waterway of the republic is of sufficient importance to demand aid of the government, such aid should be extended upon a definite plan of continuous work until permanent improvement is secured.

Confiding in the justice of our cause and the necessity of its success at the polls, we submit the foregoing declarations of principles and purposes to the considerate judgment of the American people. We invite the support of all citizens who approve them and who desire to have them made effective through legislation for the relief of the people, and the restoration of the country's prosperity.

[The nominees were: For president, William J. Bryan of Nebraska; for vice-president, Arthur Sewall of Maine.]

PEOPLE'S PARTY.

[Adopted St. Louis, July 24.]

The people's party, assembled in national convention, reaffirms its allegiance to the principles declared by the founders of the republic, and also to the fundamental principles of just government as enunciated in the platform of the party in 1892. We recognize that, through the connivance of the present and preceding administrations, the country has reached a crisis in its national life, as predicted in our declaration four years ago, and that prompt and patriotic action is the supreme duty of the hour. We realize that, while we have political independence, our financial and industrial independence is yet to be attained by restoring to our country the constitutional control and exercise of the functions necessary to a people's government, which functions have been basely surrendered by our public servants to corporate monopolies.

The influence of European money-changers has been more potent in shaping legislation than the voice of the American people. Executive power and patronage have been used to corrupt our legislatures and defeat the will of the people, and plutocracy has thereby been enthroned upon the ruins of democracy.

DECLARATIONS ON FINANCE.

To restore the government intended by the fathers, and for the welfare and prosperity of this and future generations, we demand the establishment of an economic and financial system which shall make us masters of our own affairs and independent of European control by the adoption of the following declaration of principles:

1. We demand a national money, safe and sound, issued by the general government only, without the intervention of banks of issue, to be a full legal tender for all debts, public and private; a just, equitable and efficient means of distribution direct to the people, and through the lawful disbursements of the government.

2. We demand the free and unrestricted coinage of silver and gold at the present legal ratio of 16 to 1, without waiting for the consent of foreign nations.

3. We demand the volume of circulating medium be speedily increased to an amount sufficient to meet the demands of the business and population of this country, and to restore the just level of prices of labor and production.

4. We denounce the sale of bonds and the increase of the public interest-bearing debt made by the present administration as unnecessary and without authority of law, and that no more bonds be issued except by specific act of congress.

5. We demand such legislation as will prevent the demonetization of the lawful money of the United States by private contract.

6. We demand that the government, in payment of its obligations, shall use its option as to the kind of lawful money in which they are to be paid, and we denounce the present and preceding administrations for surrendering this option to the holders of government obligations.

7. We demand a graduated income tax, to the end that aggregated wealth shall bear its just proportion of taxation, and we regard the recent decision of the Supreme court relative to the income-tax law as a misinterpretation of the constitution and an invasion of the rightful powers of congress over the subject of taxation.

8. We demand that postal savings banks

be established by the government for the safe deposit of the savings of the people and to facilitate exchange.

FOR GOVERNMENT OWNERSHIP.

Transportation being a means of exchange and a public necessity, the government should own and operate the railroads in the interest of the people, and on a non-partisan basis, to the end that all may be accorded the same treatment in transportation, and that the tyranny and political power now exercised by the great railroad corporations, which result in the impairment if not the destruction of the political rights and personal liberties of the citizen, may be destroyed. Such ownership is to be accomplished gradually, in a manner consistent with sound public policy.

The interest of the United States in the public highways built with public moneys and the proceeds of extensive grants of land to the Pacific railroads should never be alienated, mortgaged or sold, but guarded and protected for the general welfare, as provided by the laws organizing such railroads. The foreclosure of existing liens of the United States on these roads should at once follow default in the payment of the debt of the companies, and at the foreclosure sales of said roads the government shall purchase the same if it becomes necessary to protect its interest therein, or if they can be purchased at a reasonable price; and the government should operate said railroads as public highways for the benefit of the whole people, and not in the interest of the few, under suitable provisions for protection of life and property, giving to all transportation interests equal privileges and equal rates for fares and freight.

We denounce the present infamous schemes for refunding these debts, and demand that the laws now applicable thereto be executed and administered according to their true intent and spirit.

The telegraph, like the postoffice system, being a necessity for the transmission of news, should be owned and operated by the government in the interests of the people.

RECLAMATION OF LAND.

The true policy demands that the national and state legislation shall be such as will ultimately enable every prudent and industrious citizen to secure a home, and therefore the land should not be monopolized for speculative purposes. All lands now held by railroads and other corporations in excess of their actual needs should, by lawful means, be reclaimed by the government and held for actual settlers only, and private land monopolies, as well as alien ownership, should be prohibited.

We condemn the frauds by which the land grants to the Pacific railroad companies have, through the connivance of the interior department, robbed multitudes of actual, bona-fide settlers of their homes and miners of their claims, and we demand legislation by congress which will enforce the exemption of mineral land from such grants after as well as before patent.

We demand that bona-fide settlers on all public lands be granted free homes, as provided in the national homestead law, and that no exception be made in the case of Indian reservations when opened for settlement, and that all lands not now patented come under this demand.

We favor a system of direct legislation through the initiative and referendum, under proper constitutional safeguards.

We demand the election of president, vice-

president and United States senators by a direct vote of the people.

FOR CUBAN INDEPENDENCE.

We tender to the patriotic people of Cuba our deepest sympathy in their heroic struggle for political freedom and independence, and we believe the time has come when the United States, the great republic of the world, should recognize that Cuba is and of right ought to be a free and independent state.

We favor home rule in the territories and the District of Columbia, and the early admission of the territories as states.

All public salaries should be made to correspond to the price of labor and its products.

In times of great industrial depression idle labor should be employed on public works as far as practicable.

The arbitrary course of the courts in assuming to imprison citizens for indirect contempt and ruling by injunction should be prevented by proper legislation.

We favor just pensions for our disabled union soldiers.

Believing that the elective franchise and untrammelled ballot are essential to a government of, for and by the people, the people's party condemns the wholesale system of disfranchisement adopted in some of the states as unrepudican and undemocratic, and we declare it to be the duty of the several state legislatures to take such action as will secure a full, free and fair ballot and an honest count.

While the foregoing propositions constitute the platform upon which our party stands, and for the vindication of which its organization will be maintained, we recognize that the great and pressing issue of the pending campaign upon which the present presidential election will turn is the financial question, and upon this great and specific issue between the parties we cordially invite the aid and co-operation of all organizations and citizens agreeing with us upon this vital question.

[The nominees were: For president, William J. Bryan of Nebraska; for vice-president, Thomas E. Watson of Georgia.]

NATIONAL SILVER.

[Adopted St. Louis, July 24.]

The national silver party, in convention assembled, hereby adopts the following declaration of principles:

THE MONEY QUESTION.

The paramount issue at this time in the United States is indisputably the money question. It is between the gold standard, gold bonds and bank currency on the one side, and the bimetallic standard, no bonds and government currency on the other. On this issue we declare ourselves to be in favor of a distinctively American financial system. We are unalterably opposed to the single gold standard, and demand the immediate return to the constitutional standard of gold and silver by the restoration by this government, independent of any foreign power, of the unrestricted coinage of both gold and silver into standard money at the ratio of 16 to 1, and upon terms of exact equality as they existed prior to 1873; the silver coin to be a full legal tender equally with gold for all debts and dues, public and private, and we favor such legislation as will prevent for the future the demonetization of any kind of legal-tender money by private contract.

We hold that the power to control and

regulate a paper currency is inseparable from the power to coin money, and hence that all currency intended to circulate as money should be issued and its volume controlled by the general government only, and should be legal tender.

BOND ISSUES.

We are unalterably opposed to the issue by the United States of interest-bearing bonds in time of peace, and we denounce as a blunder worse than a crime the present treasury policy, concurred in by a republican house, of plunging the country into debt by hundreds of millions in the vain attempt to maintain the gold standard by borrowing gold; and we demand the payment of all coin obligations of the United States, as provided by existing laws, in either gold or silver coin, at the option of the government, and not at the option of the creditor.

DEMONETIZATION OF SILVER.

The demonetization of silver in 1873 enormously increased the demand for gold, enhancing its purchasing power and lowering all prices measured by that standard, and since that unjust and indefensible act the prices of American products have fallen upon an average nearly 50 per cent, carrying down with them proportionately the money value of all other forms of property. Such fall of prices has destroyed the profits of legitimate industry, injuring the producer for the benefit of the non-producer, increasing the burden of the debtor, swelling the gains of the creditor, paralyzing the productive energies of the American people, relegating to idleness vast numbers of willing workers, sending the shadows of despair into the home of the honest toiler, filling the land with tramps and paupers and building up colossal fortunes at the money centers.

THE GOLD STANDARD.

In the effort to maintain the gold standard the country has within the last two years, in a time of profound peace and plenty, been loaded down with \$262,000,000 of additional interest-bearing debt under such circumstances as to allow a syndicate of native and foreign bankers to realize a new profit of millions on a single deal. It stands confessed that the gold standard can only be upheld by so depleting our paper currency as to force the prices of our products below the European, and even below the Asiatic, level, to enable us to sell in foreign markets, thus aggravating the very evils of which our people so bitterly complain, degrading American labor and striking at the foundations of our civilization itself. The advocates of the gold standard persistently claim that the cause of our distress is overproduction—that we have produced so much that it has made us poor—which implies that the true remedy is to close the factory, abandon the farm and throw a multitude of people out of employment, a doctrine that leaves us unnerved and disheartened and absolutely without hope for the future. We affirm it to be unquestioned that there can be no such economic paradox as overproduction, and at the same time tens of thousands of our fellow-citizens remaining half-clothed and half-fed, and who are piteously clamoring for the common necessities of life.

BIMETALLISM.

Over and above all other questions of policy, we are in favor of restoring to the people of the United States the time-hon-

ored money of the constitution—gold and silver; not one, but both—the money of Washington and Hamilton and Jefferson and Monroe and Jackson and Lincoln, to the end that the American people may receive honest pay for an honest product; that the American debtor may pay his just obligations in an honest standard, and not in a standard that has appreciated 100 per cent above all the great staples of our country, and to the end further that silver-standard countries may be deprived of the unjust advantage they now enjoy in the difference in exchange between gold and silver—an advantage which tariff legislation alone cannot overcome.

We therefore appeal to the people of the United States to leave in abeyance for the moment all other questions, however important and even momentous they may appear, to sunder, if need be, all former party ties and affiliations, and unite in one supreme effort to free themselves and their children from the domination of the money power—a power more destructive than any which has ever been fastened upon the civilized men of any race or in any age. And upon the consummation of our desires and efforts we invoke the gracious favor of divine Providence.

Inasmuch as the patriotic majority of the Chicago convention embodied in the financial plank of its platform the principles enunciated in the platform of the American bimetallic party, promulgated at Washington, D. C., Jan. 22, 1896, and herein reiterated, which is not only the paramount but the only real issue in the pending campaign, therefore, recognizing that their nominees embody these patriotic principles, we recommend that this convention nominate William J. Bryan of Nebraska for president and Arthur Sewall of Maine for vice-president.

NATIONAL.

[Adopted Pittsburg, May 29.]

The national party, recognizing God as the author of all just power in government, presents the following declaration of principles, which we pledge ourselves to enact into effective legislation when given the power to do so:

THE LIQUOR TRAFFIC.

1. The suppression of the manufacture and sale, importation, exportation and transportation of intoxicating liquors for beverage purposes. We utterly reject all plans for regulating or compromising with this traffic, whether such plans be local option, taxation, license or public control. The sale of liquors for medicinal and other legitimate uses should be controlled by the state, without profit, and with such regulations as will prevent fraud or evasion.

2. No citizen should be denied the right to vote on account of sex.

THE FINANCES.

3. All money should be issued by the general government only, and without the intervention of any private citizen, corporation or banking institution. It should be based upon the wealth, stability and integrity of the nation. It should be a full legal tender for all debts, public and private, and should be of sufficient volume to meet the demands of the country. And for the purpose of honestly liquidating our own outstanding coin obligations we demand the full and unlimited coinage of both silver and gold at the ratio of 16 to 1, without consulting any one other nation.

4. The initiative and referendum and pro-

portional representation should be adopted.

PUBLIC LANDS.

5. Free land is the common heritage of the people, and should be preserved from monopoly and speculation. All unearned grants of land, subject to forfeiture, should be retained by the government, and no portion of the public domain should hereafter be granted except to actual settlers, continuous use being essential to tenure.

OWNERSHIP OF RAILROADS, ETC.

6. Railroads, telegraphs and other natural monopolies should be owned and operated by the government, giving to the people the benefit of service and protecting them from all cost.

TAXATION.

7. The national constitution should be so amended as to allow the national revenues to be raised by equitable adjustment of taxation on the properties and incomes of the people, and importation duties should be levied as a means of securing equitable commercial relations with other nations.

8. The contract convict labor system, through which speculators are enriched at the expense of the state, should be abolished.

SUNDAY LAWS.

9. All citizens should be protected by law in their right to one day of rest in seven, without oppressing any who conscientiously observe any other than the first day of the week.

10. The American public schools, taught in the English language, should be maintained, and no public fund should be appropriated for sectarian institutions.

ELECTION OF PRESIDENT.

11. The president, vice-president and United States senators should be elected by direct vote of the people.

12. Ex soldiers and sailors of the United States army and navy, their widows and minor children, should receive liberal pensions, graded on disability and time of service, not merely as a debt of gratitude, but for service rendered in the preservation of the union.

IMMIGRATION.

13. The immigration laws should be so secure as to exclude paupers and criminals. None but citizens of the United States should be allowed to vote in any state, and naturalized citizens should not vote until one year after naturalization papers have been issued.

14. Having herein presented our principles and purposes, we invite the co-operation and support of all citizens who are with us substantially agreed.

Charles E. Bentley of Nebraska was nominated for president, and James H. Southgate of North Carolina for vice-president.

PROHIBITION.

Adopted Pittsburg, May 27.

We, the members of the prohibition party, in national convention assembled, renewing our declaration of allegiance to Almighty God as the rightful ruler of the universe, lay down the following as our declaration of political purpose:

The prohibition party, in national convention assembled, declares its firm conviction that the manufacture, exportation, importation and sale of alcoholic beverages has produced such commercial, industrial, social and political wrongs, and is now so threatening the perpetuity of all our social and

political institutions, that the suppression of the same by a national party organized therefore is the greatest object to be accomplished by the voters of our country, and is of such importance as that it of right ought to control the political action of all our patriotic citizens until such suppression is accomplished. The urgency of this cause demands the union without further delay of all citizens who desire the prohibition of the liquor traffic. Therefore, be it resolved, that we favor the legal prohibition, by state and national legislation, of the exportation, interstate transportation and sale of alcoholic beverages; that we declare our purpose to organize and unite all the friends of prohibition into one party, and in order to accomplish this end we deem it but right to leave every prohibitionist the freedom of his own convictions upon all other political questions, and trust our representatives to legislate upon other political questions as the changes occasioned by prohibition and the welfare of the whole people shall demand.

Joshua Levering of Maryland was nominated for president and Hale Johnson of Illinois for vice-president.

SOCIALISTIC LABOR.

[Adopted New York, July 9.]

The socialistic labor party of the United States, in convention assembled, reasserts the inalienable right of all men to life, liberty and the pursuit of happiness.

SOCIAL CONDITIONS.

With the founders of the American republic, we hold that the purpose of government is to secure every citizen in the enjoyment of this right; but, in the light of our social conditions, we hold, furthermore, that no such right can be exercised under a system of economic inequality essentially destructive of life, of liberty and of happiness.

With the founders of this republic, we hold that the true theory of politics is that the machinery of government must be owned and controlled by the whole people; but, in the light of our industrial development, we hold, furthermore, that the true theory of economics is that the machinery of production must likewise belong to the people in common.

To the obvious fact that our despotic system of economics is the direct opposite of our democratic system of politics can plainly be traced the existence of a privileged class, the corruption of government by that class, the alienation of public property, public franchises and public functions to that class, and the abject dependence of the mightiest of nations upon that class.

PERVERSION OF DEMOCRACY.

Again, through the perversion of democracy to the ends of plutocracy, labor is robbed of the wealth which it alone produces, is denied the means of self-employment, and, by the compulsory idleness in wage slavery, is even deprived of the necessities of life.

Human power and natural forces are thus wasted, that the plutocracy may rule.

Ignorance and misery, with all their concomitant evils, are perpetuated, that the people may be kept in bondage.

Science and invention are diverted from their humane purpose to the enslavement of women and children.

Against such a system the socialistic labor party once more enters its protest. Once more it reiterates its fundamental declaration that private property in the natural

sources of production and in the instruments of labor is the obvious cause of all economic servitude and political dependence; and,

Whereas, The time is fast coming when, in the natural course of social evolution, this system, through the destructive action of its failures and crises on the one hand, and the constructive tendencies of its trusts and other capitalistic combinations on the other hand, shall have worked out its own downfall; therefore, be it

Resolved, That we call upon the people to organize with a view to the substitution of the co-operative commonwealth for the present state of planless production, industrial war and social disorder; a commonwealth in which every worker shall have the free exercise and full benefit of his faculties, multiplied by all the modern factors of civilization.

We call upon them to unite with us in a mighty effort to gain by all practicable means the political power.

[The nominees of the convention were: For president, Charles H. Matchett of New York; for vice-president, Matthew Maguire of New Jersey.]

NATIONAL (GOLD) DEMOCRATS.

[Adopted Indianapolis, Sept. 3.]

This convention has assembled to uphold the principles upon which depend the honor and welfare of the American people, in order that democrats throughout the union may unite their patriotic effort to avert disaster from their country and ruin from their party.

The democratic party is pledged to equal and exact justice to all men of every creed and condition; to the largest freedom of the individual consistent with good government; to the preservation of the federal government in its constitutional vigor and to the support of the states in all their just rights; to economy in the public expenditures; to the maintenance of the public faith and sound money, and it is opposed to paternalism and all class legislation.

The declarations of the Chicago convention attack individual freedom, the right of private contract, the independence of the judiciary and the authority of the president to enforce federal laws. They advocate a reckless attempt to increase the price of silver by legislation, to the debasement of our monetary standard, and threaten unlimited issues of paper money by the government. They abandon for republican allies the democratic cause of tariff reform to court the favor of protectionists to their fiscal injury.

In view of these and other grave departures from democratic principles, we cannot support the candidate of the convention nor be bound by its acts. The democratic party has survived many defeats, but could not survive a victory won in behalf of the doctrine and policy proclaimed in its name at Chicago.

The conditions, however, which make possible such utterances from a national convention are the direct result of class legislation by the republican party. It still proclaims, as it has for years, the power and duty of government to raise and maintain prices by law, and it proposes no remedy for existing evils except oppression and unjust taxation.

The national democracy here convened therefore renews its declaration of a faith in democratic principles especially as applicable to the conditions of the times.

FOR TARIFF FOR REVENUE ONLY.

Taxation, tariff, excise or direct, is rightfully imposed for public purposes, and not for private gain. Its amount is justly measured by public expenditures, which should be limited by scrupulous economy. The sum derived by the treasury from tariff and excise levies is affected by the state of trade and of consumption. The amount required by the treasury is determined by the appropriations made by congress. The demand of the republican party for an increase in tariff tax has its pretext in the deficiency of revenue, which has its causes in the stagnation of trade and reduced consumption, due entirely to the loss of confidence that has followed the populist threat of free coinage and depreciation of our money and the republican practice of extravagant appropriations beyond the needs of good government.

We arraign and condemn the populist conventions of Chicago and St. Louis for their co-operation with the republican party in increasing these conditions, which are pleaded in justification of a heavy increase of burdens of the people and a further resort to protection.

We therefore denounce protection and its ally, free coinage of silver, as schemes for the personal profit of a few at the expense of the many, and oppose the two parties which stand for these schemes as hostile to the people of the republic, whose food and shelter, comfort and property are attacked by higher taxes and depreciated money.

In fine, we reaffirm the historic democratic doctrine of tariff for revenue only.

TO DEVELOP AMERICAN SHIPPING.

We demand that henceforth modern and liberal policies toward American shipping shall take the place of our imitation of the restricted statutes of the eighteenth century, which were abandoned by every maritime power but the United States, and which, to the nation's humiliation, have driven American capital and enterprise to the use of alien flags and alien crews, have made the stars and stripes an almost unknown emblem in foreign countries and have virtually extinguished the race of American seamen.

We oppose the pretense that discriminating duties will promote shipping. That scheme is an invitation to commercial warfare upon the United States, un-American in the light of our great commercial treaties, offering no gain whatever to American shipping, while greatly increasing ocean freights on our agricultural and manufactured products.

GOLD STANDARD IS UPHELD.

The experience of mankind has shown that, by reason of their natural qualities, gold is the necessary money of the large affairs of commerce and business, while silver is conveniently adapted to minor transactions, and the most beneficial use of both together can be insured only by the adoption of the former as a standard of monetary measure and the maintenance of silver at a parity with gold by its limited coinage under such safeguards of law.

Thus is the largest possible enjoyment of both metals gained, with the value universally accepted throughout the world, which constitutes the only practical currency, assuring the most stable standard, and especially the best and safest money for all who earn a livelihood by labor or the produce of husbandry. They cannot suffer when paid in the best money known to man, but are

the peculiar and most defenseless victims of a debased and fluctuating currency, which offers continued profits to the money-changer at their cost.

Realizing these truths, demonstrated by long public inconvenience and loss, the democratic party, in the interests of the masses and of equal justice to all, practically established, by the legislation of 1834 and 1853, the gold standard of monetary measurement, and likewise entirely divorced the government from banking and currency issues.

To this long-established democratic policy we adhere, and insist upon the maintenance of the gold standard and the parity therewith of every dollar issued by the government, and are firmly opposed to the free and unlimited coinage of silver and to the compulsory purchase of silver bullion. But we denounce, also, the further maintenance of the present costly patchwork system of national paper currency as a constant source of injury and peril.

We assert the necessity of such intelligent currency reform as will confine the government to its legitimate functions, completely separated from the banking business, and afford to all sections of our country a uniform, safe and elastic bank currency under government supervision, measured in volume by the needs of business.

PRAISE FOR MR. CLEVELAND.

The patriotism, fidelity and courage with which President Cleveland has fulfilled his great public trust, the high character of his administration, its wisdom and energy in the maintenance of civil order and the enforcement of the laws, its equal regard for the rights of every class and every section, its firm and dignified conduct of foreign affairs, and its sturdy persistence in upholding the credit and honor of the nation, are fully recognized by the democratic party, and will secure to him a place in history beside the fathers of the republic.

We also commend the administration for the great progress made in the reform of the public service, and we indorse its efforts to extend the merit system still further. We demand that no backward step be taken, but that the reform be supported and advanced until the undemocratic spoils system of appointments shall be eradicated.

INTERNATIONAL ARBITRATION.

We demand strict economy in the appropriations and in the administration of the government.

We favor arbitration for the settlement of international disputes.

We favor a liberal policy of pensions to deserving soldiers and sailors of the United States.

The Supreme court of the United States was wisely established by the framers of our constitution as one of the three co-ordinate branches of the government. Its independence and authority to interpret the law of the land without fear or favor must be maintained. We condemn all efforts to defame the tribunal or impair the confidence and respect which it has deservedly had.

The democratic party ever has maintained and ever will maintain the supremacy of law, the independence of its judicial administration, the inviolability of contract and the obligation of all good citizens to resist every illegal trust, combination and attempt against the just rights of property and the good order of society, in which are bound up the peace and happiness of our people.

Believing these principles to be essential

to the well-being of the republic, we submit them to the consideration of the American people.

The nominees were: For president, John M. Palmer of Illinois, and for vice-president, Simon B. Buckner of Kentucky.

ILLINOIS PARTY PLATFORMS.

ILLINOIS REPUBLICANS.

[Adopted Springfield, April 30.]

The republicans of Illinois, in convention assembled, again announce the fundamental principles of the party which have inspired it from its birth to the present and given it so many signal victories in its contests for the rights of men. The people of the nation have learned by sad experience during the last three years of democratic maladministration that the democratic party is prolific in promises when out of power, and even more prolific of failures when in power; that instead of bringing the blessings which it promises it brings disasters, financial and business derangements, and panics which even democrats dream not of.

The present administration of Grover Cleveland, by the bad administration of good republican laws and the enactment of bad democratic laws, has demonstrated that the democratic party is constitutionally incapable of managing the affairs of this great nation.

Resolved, That we, the republicans of Illinois, are unyielding and emphatic in our demands for honest money. We are opposed, as we ever have been, to any and every scheme that will give to this country a currency in any way depreciated or debased, or in any respect inferior to the money of the most advanced and intelligent nations of the earth. We favor the use of silver as currency to the extent only and under such restrictions that its parity with gold can be maintained.

The republican party, from the day of Lincoln, has been devoted irrevocably to the doctrine of protection to home industries, and we hereby renew and reaffirm our faith in this fundamental principle. We believe in a tariff that will produce revenue sufficient to meet the wants of the government, honestly and economically administered, and high enough to insure to home labor regular and remunerative employment.

We advocate the unrestricted exchange of non-competitive articles. We believe in reciprocity—the reciprocity of James G. Blaine—re-enforced by experience and an earnest wish to extend our foreign commerce to the fullest extent consistent to the control of our own markets in the sale of articles that can be profitably produced at home.

We believe in the exercise of a genuine American spirit in all our intercourse with foreign nations, and are opposed to the extension of monarchical institutions upon any part of American soil. We condemn the vacillating and un-American policy of the present democratic administration, and advocate a firm, vigorous and dignified policy toward all nations, and to that end we recommend the further strengthening of our coast defenses and such an enlargement of our navy as shall command the respect of other governments and more effectually tend to promote our peaceful relations with all the world.

We believe that the sympathy of this nation should be extended to all people who have been driven by oppression and wrong to take up arms in behalf of self-government, and we therefore express our

sympathy for the people of Cuba in their struggle for independence, and we trust that their efforts may establish a republic based upon the intelligence and patriotism of a free people.

The general assembly, at its last session, passed a resolution submitting to the voters of the state at the general election to be held on Nov. 3, 1896, an amendment permitting amendments to three articles at a time, thus allowing the voters an opportunity of correcting administrative abuses or deficiencies, without interfering with the general structure of the constitution, by adopting beneficial changes and rejecting those that are detrimental. Therefore, be it

Resolved, That this convention recommends to the people of this state that they vote affirmatively on said proposed amendment.

We believe that the care of all insane persons should devolve upon the state at large. We recommend that the legislature enact a law providing for the care and treatment of all adjudged insane persons in the state asylum.

We condemn Gov. Altgeld for failing to enforce laws in perilous times. We condemn his management of the state institutions as extravagant, inefficient and partisan. We arraign him for his failure to keep his ante-election promise to prevent the competition of convict with free labor.

We favor the submission to the people by the next general assembly of an amendment to the constitution providing that the legislature shall enact suitable laws to regulate contracts and contentions that may from time to time arise between employers and their employees.

Your committee recommends that there be only two committeemen-at-large, and that they be selected by the state central committee.

We believe that the present revenue system of the state of Illinois is inadequate to secure equality in taxation and economy and dispatch in the levy and collection of general and special taxes within the city of Chicago. This system, though satisfactory in smaller cities, is obsolete and burdensome and vicious in a metropolis of nearly 2,000,000 inhabitants, representing taxable property of an actual value of more than \$2,000,000,000.

To correct the existing evil, we recommend that the next general assembly amend the present revenue law so as to provide for the consolidation of the several townships within the limits of the city of Chicago, and to further provide for creating a board of three assessors, to be elected for terms of six years, in such a manner that one shall be elected every two years, and to further provide that all general taxes within the limits of the city of Chicago be collected by the county collector.

We also recommend that a more efficient, just and equitable method of levying and collecting special assessments for public improvements be provided.

ILLINOIS DEMOCRATS.

[Adopted Peoria, June 23.]

We favor the soundest and safest money known to man, and as experience has shown

that this consists of both gold and silver, with equal rights of coinage and full legal-tender power, we demand the repeal of that republican plutocratic legislation which demonetized silver and reduced it to the basis of token money, destroying by one-half the stock of real money, and, by doubling the work to be done by gold, doubled its purchasing power, so that the farmers and producers had to give twice as much work to get a dollar as they formerly had, and found it hard to meet their debts, interests, taxes and fixed charges, which were not lowered. In this way the market for those things which the mechanic and laborer made was destroyed and the factories had to shut down.

By thus taking out of the commercial world one-half of its blood, industry and trade have been paralyzed and idleness and misery have been spread over the civilized world. With the richest natural resources, with the most industrious, frugal and enterprising population, and with the most abundant harvests, our people are in distress. Three per cent of our population own over one-half of the wealth of this republic, and almost the only men who prosper are the bond sharks and the men who fatten off the misery of the country.

These are conditions under which republican institutions cannot long endure. We believe in the greatness and patriotism of the American people; in their energy, industry and thrift, and that such a people, with the unlimited resources of our land, are strong enough to sustain a monetary system without the aid of foreign governments.

We believe that the benefits of the independence which we gained a hundred years ago—the war for which was initiated upon a matter of tribute—should not be lost by yielding vassalage to a monetary system preferred by other governments.

We believe that bimetalism, which has done the work of the world since the dawn of civilization, and which was made the basis of our monetary system by Hamilton and Jefferson, is absolutely necessary at present to the prosperity of mankind, and that its re-establishment will check the present business paralysis, will give to the country a safe and honest currency of adequate volume, will restore prices of agricultural commodities, will encourage enterprises and give our people steady and profitable employment.

Having learned through bitter experience that Wall street has controlled financial legislation at Washington, and knowing that every effort will be made to defeat the will of the people, we deem it proper to be explicit in our declarations.

Actuated by the foregoing principles, and desiring the prosperity of the people, we demand the immediate restoration of the free and unlimited coinage of both gold and silver as standard money, at the ratio of 16 ounces of silver to 1 ounce of gold of equal fineness, with full legal-tender power to each metal, without waiting for or depending on any other nation on earth; and the delegates from this convention to the national democratic convention are instructed to use all honorable means to secure a similar declaration by said national convention, and to support only such men for the presidency as are in full and pronounced sympathy with these principles.

We are also opposed to the contraction of the currency by the retirement of any part of the present outstanding treasury notes.

We favor a tariff for revenue only, and declare that the government should collect no more taxes than are necessary to defray the expenses of the government, honestly and economically administered.

We are unalterably opposed to the revival of any such monstrosity legislation as that act of congress which was known as the McKinley law, which for the fiscal year ended June 30, 1894, produced a deficit in the United States treasury of \$70,000,000, under which wages were greatly lowered, and which gave proprietors a monopoly while it permitted them to fill their shops with the cheapest of cheap labor, brought from all parts of the earth.

We demand the abolition of government by injunction—that new form of oppression and weapon of the money power never before heard of among men, whereby a federal judge at once becomes legislator, judge and executioner. It is absolutely destructive of republican institutions. It robs the American citizen of the right of trial by jury and of all the protection granted by the constitution.

The arbitrary interference on the part of the federal government in local affairs, by ignoring the local lawful authorities, is not only a violation of the constitution of the United States but a crime against free government, and is destructive of the very foundations of democratic and republican institutions.

We cordially indorse the administration of Gov. Altgeld, and commend him for his able, economical and business-like administration of state affairs; for the reforms introduced in the management of state institutions, by means of which thousands of dollars have been annually saved to the people and taxpayers of the state; for his fearless attack on legislative boodlesism; for his vigorous exposure and timely veto of the "monopoly" bills passed by the last general assembly, which had been worked through the general assembly and were about to be carried into effect by the most flagrant use of bribery and corruption.

We call attention to the fact that the national republican convention, recently in session at St. Louis, was absolutely dominated by those men who devour the substance of others, and those influences which have been so prolific of corruption in all branches of the public service. That convention yielded to the iron hand of the barons of monopoly, and nominated as president the author of the most iniquitous tariff bill ever enacted, and, bowing down to the money power, declared in favor of a single gold standard.

The revenue system of Illinois is a monstrosity, shielding the very rich and throwing the burden on the farmer and small property-holder, and we denounce the republican legislature for refusing, at both the general and special sessions, to give the people relief; and we especially condemn it for supinely adjourning and running away at the dictation of the boss of the republican machine, who is now the candidate of the machine for governor, and we declare that the course pursued by that legislature and by that candidate shows plainly that the people can expect no relief and no reform from that source, and that the restoration to power of these men means to turn the state over to the control of the trusts of the country. And we demand such legislation as will require all the property not exempt and all men to pay their fair share of taxes, and we favor a

constitutional amendment which will allow local taxation for local purposes.

We condemn the last general assembly for so crippling the industrial arbitration law as to almost destroy its value, and also for refusing to pass the necessary law to prevent the lives of children from being destroyed in factories, and we demand such legislation as will make the arbitration law effective and put an end to that form of child labor which disgraces our state.

The so-called flag law is an attempt to make patriots by legislation. It degrades our glorious flag by making it an object of force, and not of love and veneration. This law is the child of the same mother that gave birth to the arbitrary education law and other measures of a similar character. We believe this flag law to be meddling, unconstitutional, unpatriotic and unwise, and we demand its repeal.

Having successfully abolished the corrupt and degrading contract system in our penitentiaries, we favor such further legislation as will remove it practically from all competition with outside free labor.

Nearly all laws passed for the protection of the miners of this state have been nullified by the Supreme court. We demand such new legislation as will protect these people, and, if none is feasible, then we favor an amendment to the constitution which will insure it.

Resolved, That the democratic party of the state of Illinois, in convention assembled, instruct the next general assembly of the state to legislate in behalf of good and substantial roads.

We favor the adoption of the constitutional amendment permitting three articles of amendment to be voted on at the same time.

The delegates from this convention to the national democratic convention are instructed to support only such men for the presidency as are in full and pronounced sympathy with the declarations of this platform, and the delegates to the national convention are instructed to vote upon all matters, including nominations for candidates, as a unit.

We favor an amendment to the federal constitution permitting the levying and collection of an income tax.

ILLINOIS PROHIBITION.

[Adopted Springfield, April 8.]

We, the prohibitionists of the state of Illinois, in convention assembled, believing the prohibition of the liquor traffic is the most important issue in American politics, invite all who are opposed to the continued legalization of this traffic to join us in opposition to its further continuance. We adopt the following platform as a declaration of our principles:

1. The manufacture, sale, importation, exportation and transportation of alcoholic liquors for beverage purposes should be prohibited by state and federal legislation, and the manufacture and sale for other purposes be controlled by the state.

2. No citizen should be denied the right to vote on account of sex.

3. We favor the extension of the civil-service reform system to all grades of the public service to which it is applicable. Fitness, and not party service, should be the essential test, and fidelity and efficiency should be the only sure tenure of office.

4. Our school laws should guarantee to every child between the ages of 8 and 14 years the benefit of at least four months'

attendance in each year in some school where the common-school branches are taught in the English language.

5. All men should be protected by law in their right to one day of rest in seven.

6. We declare that money should consist of gold, silver and paper, and be issued by the government directly to the people, without the intervention of any private individual or corporation, to be full legal tender for all debts, both public and private. The government should not discriminate in favor of gold as against silver, and its mints should be open upon equal terms to both at the ratio now established by law. We oppose the issuing of government bonds in times of peace.

7. We deprecate the calamitous results caused by the frequent partisan agitation of the tariff question, and favor a tariff commission, representing all national political parties as nearly equal as practicable, whose duty it shall be to annually recommend to congress such changes in tariff laws as may be necessary to properly adjust the revenues to the needs of the government and to enable our workmen to receive fair wages for their labor.

We favor the election of United States senators by the vote of the people.

All combinations designed to enrich the few at the expense of the many should be suppressed.

We favor arbitration as a means of settling disagreements between employers and employees.

We are opposed to alien ownership of land.

All means of transportation and communication should be controlled by the government for the benefit of all the people.

ILLINOIS PEOPLE'S PARTY.

[Adopted Springfield, Aug. 12.]

We heartily indorse the platform of the people's party adopted in St. Louis, July 22, 1896, as a statement of our political principles relating to national questions, especially emphasizing that part of said platform which designates the issuance of money by the national government without the intervention of banks, and the free coinage of silver and gold at the ratio of 16 to 1, as the predominant issue of the pending presidential campaign, and we are in favor of all honorable ways and means by which a union of all citizens who agree with us upon this issue may be effected.

We recognize the present system of taxation in the state of Illinois, and its practical application, as a gross injustice to the great mass of the people, and we demand of our next legislature that they devise a more equitable system, and we favor local option in taxation as a measure to that end.

We favor the submission of an amendment to the state constitution giving the legislature power to enact laws and provide for their enforcement regulating contracts and conditions that may arise from time to time between corporations and their employees; and we also favor the adoption of the amendment to the constitution, which is to be voted upon at the next general election, which provides that the legislature may submit three amendments to be voted upon at the same general election.

We favor such legislation as will prevent the product of convict labor of our state coming into competition with the product of free labor.

We recognize the fact that there are various questions relating to state issues and local government not covered in the above resolutions, and as to such issues we call

attention to the fact that our national platform declares for direct legislation by the initiative and referendum, and we are in favor of the adoption of a system of direct legislation, under proper restrictions, in dealing with our state and local affairs, by which all of said questions may be duly considered and voted upon by the people.

The administration of Gov. Altgeld deserves unstinted praise for its earnest and able devotion to the rights of the people, and its fearless efforts to correct public abuses and bring under control public depredators should have the unqualified approval of all law-abiding citizens.

ILLINOIS GOLD DEMOCRATS.

[Adopted Chicago, Aug. 25.]

The democrats of Illinois, in convention assembled, cherishing the principles and the traditions of the great party of freedom and equality made illustrious through four generations of democratic patriots and statesmen, do declare:

1. That the democratic party is primarily and solemnly pledged to liberty regulated by law; to equal and exact justice to all men of whatsoever condition or persuasion, religious or political; to economy in the public expense; to peace, commerce and honest friendship with all nations, and entangling alliances with none; to the support of the state governments in all their rights; to the preservation of the federal government in its whole constitutional vigor; to the payment of debts in honest money, and to the maintenance of the public faith; that it is opposed to class legislation, strife of section against section; that it proclaims anew with all the impressiveness that recent events make necessary that fundamental of democracy, "equal rights for all and special privileges for none," and that it indorses every act, executive, legislative or judicial, of the present democratic national administration which has tended to sustain these elements of the democratic faith and to maintain the integrity of the law, to uphold the dignity of the republic abroad, to preserve the credit of the nation, and to resist the spirit of monopoly, foreign adventure and oppression on the one hand, and of disorder, repudiation and dishonor on the other.

2. That the gold dollar is now, and for more than sixty years has been, the American standard of value, fixed by democratic statesmen who were opposed to a debased and fluctuating currency, and that it is the measure upon which private and public faith has rested and now rests; that it is the dollar which labor honestly earns, and with which labor must be honestly paid, and that we unreservedly declare in favor of maintaining that standard. And we refuse to make concessions of any character to the element which would substitute therefor the monetary standard of the least enlightened nations and races of the world.

3. That we favor the use of silver as currency, and the coinage and circulation of such quantities thereof as can be kept at parity with gold coin, but we are opposed to the free and unlimited coinage of silver by the United States government as a measure certain to impair contracts, disturb business, diminish the purchasing power of the wages of labor, inflict irreparable injury upon commerce and industry, and fasten an ineffaceable stigma upon the financial honor of the American people.

4. That we demand the retirement of the United States government from the banking

business, and the gradual redemption and cancellation of all United States and treasury notes under such legislative provisions as will prevent undesirable contraction, to the end that the pretended republican resumption of specie payment in 1879 shall become a genuine resumption and redemption in fact.

5. That the panic and depression of 1893 and succeeding years were the direct result of the operations of the monstrous McKinley tariff and the McKinley-Sherman silver-purchase act, neither of which could have passed a log-rolling and money-wasting congress without the other; that the greed of the protected interests as expressed in the McKinley law was only equaled by the greed of the silver interests as expressed in the McKinley-Sherman law; that, while the one oppressed honest industry and commerce by unjust taxation, the other paralyzed credit and undermined confidence in the selfish interest of a class; and that we again denounce republican protection, whether of manufacturers or of silver-mine owners, as a fraud, a robbery of a great majority of the American people for the benefit of a few, and declare it to be a fundamental principle of democracy that the government of the United States has no constitutional power to impose and collect public taxes for the benefit of private individuals, and that all tariff taxation should be for revenue only.

6. That the republican national convention in June was dominated by the intriguing attorneys of favored interests, and was actuated solely by a conspiracy of the few who have become rich and powerful through oppressive protective tariffs bearing heavily upon the whole people; that the so-called democratic national convention in July was controlled by the agents of the silver-mining interests, many of them republicans, by various agitators, sectionalists and demagogues, who do not pretend to be democrats, and by emissaries from a senatorial syndicate who afterward completed in St. Louis the work of betrayal that was born in Chicago; and that we recognize in the shameful demand of that convention for a debased dollar with which to pay debts and wages a movement which, if successful, would, when coupled with the tariff brigandage of the republican party, impoverish labor, unsettle values, destroy confidence and inflict upon the republic evils so insupportable that the people would not recover from them for many years to come; and in its reckless attack upon the courts, upon the sanctity of contracts and upon civil-service reform, a spirit hostile to democracy and subversive of the best interests of the country.

7. That the democrats of Illinois commend the honesty, economy, courage and fidelity of the present democratic national administration of Grover Cleveland, holding that in its stanch maintenance of public credit, in its attempt to rescue the people from the thralldom of unjust taxation, in the dignity and justice of its foreign policy, and in its enforcement of law, it has justified the faith of the electors who gave it power, and exemplified the best impulses of American democracy, and that all those democratic members of the house of representatives and of the United States senate who, in spite of the treachery of pretended democrats, remained steadfast in their support of democratic ideas of tariff reform are entitled to the thanks of democrats everywhere.

8. That we are uncompromisingly in favor of the constitutional independence of the United States Supreme court as one of the three co-ordinate powers in this government. We believe in the appointment of the ablest representatives of the bench and bar to this tribunal, irrespective of their political views or personal influences. We maintain the right of this court as guaranteed by the constitution to interpret the law of the land without fear or favor. We deprecate all efforts made by partisans to assure in advance by appointments to the judiciary the declaration of constitutionality in favor of pet measures or theories of government. We especially commend President Cleveland for his impartiality in the selection of the members of this, the highest court of the land, on whose bench to-day sits as chief justice one of the honored sons of Illinois.

9. Holding these ideas to be among the basic principles of American democracy which cannot be departed from with safety, and believing that the democratic party, always necessary to the preservation of the republic, is more than ever indispensable at this time, when years of republican misrule and corruption have brought forth the inevitable harvest of sectionalism, class hatred, distress and despair, we appeal to all good citizens who have the welfare of their country at heart to assist us in rebuking the avaricious, restraining the lawless and protecting the peace, happiness and virtue of the people.

ILLINOIS SOCIALISTIC LABOR.

[Adopted at Chicago, May 30.]

The socialistic labor party of Illinois, in convention assembled, readopts the platform of the socialistic labor party of the United States, and pledges its earnest support to the national ticket which is to be nominated in New York on the Fourth of July, and to the state ticket nominated by this convention, and we shall work earnestly for the election of our ticket, with a view of realizing the conditions enumerated in our platform.

We demand the total abolition of the sweating system by the enactment and en-

forcement of a stringent law prohibiting the manufacture of goods for sale in dwelling apartments. We emphatically protest against the employment of such labor in competition with free labor, and we demand that these unfortunates be accorded humane treatment, for in most instances they are but victims of the hellish conditions created by capitalism.

Resolved, That we, the socialistic labor party, with a view to realizing conditions under which men can live as men, call upon the working people to go to the polls as individuals determined upon the abolition of classes.

Resolved, That the state convention of Illinois indorses the crusade undertaken by the people against the old labor unions and in favor of the new trades and labor alliance, and urges upon it a continuation of this policy.

Whereas, The money question is one of the democratic questions agitating the public mind to-day; and,

Whereas, The other political parties, in accordance with their time-honored custom of dodging, refuse to come out squarely on this issue, the socialistic labor party, ever faithful to the interests of the people, does hereby make known in plain and unequivocal language its stand on this important point:

1. The economic evils from which the people suffer are not caused by the gold standard.

2. The free coinage of silver at 16 to 1 or at any other ratio can in no way better their condition.

3. Money as existing to-day is simply a means whereby the workers are defrauded of the fruits of their labor.

4. That legislation on money, be it in favor of the gold standard, free silver coinage at any ratio, or fiat money, can in no way bring relief to the workers while wage slavery exists.

5. That the only way to put an end to the economic evils which are upon the people is to destroy the money power by establishing a co-operative commonwealth, determined upon the abolition of classes.

TRANS-MISSISSIPPI AND INTERNATIONAL EXPOSITION.

The Trans-Mississippi and International exposition, to be held at Omaha June 1 to Nov. 1, 1898, is intended to exhibit particularly the products, resources, industries and civilization of the states and territories west of the Mississippi river, embracing two-thirds of the area, one-third of the population and one-half the wealth of the United States, and, incidentally, the products, resources and industries of the other states lying east of the Mississippi river and of foreign countries.

The Trans-Mississippi and International exposition is a corporation organized under the laws of Nebraska, with an authorized capital stock of \$1,000,000. The articles of incorporation require a board of fifty directors, by whom the enterprise will be conducted. It is also provided that there shall be a vice-president for the exposition in each of the trans-Mississippi states and territories, who will have a share in the management and direction of the interests of the exposition, each vice-president to have particularly under his charge the interests and representation of his own state.

Four hundred thousand dollars of the capital stock has now been subscribed by Omaha citizens, and the work of the exposition will very shortly be taken up on a broad and liberal plan.

The United States congress at its last session passed an act recognizing and indorsing the exposition and providing for an appropriation of \$200,000 for a United States government building and exhibit. It is believed that at the present session of congress a further appropriation of \$300,000 will be granted, in order that the United States building and exhibit may be fairly representative of the interests of the trans-

Mississippi states and territories as a part of the nation.

The state of Iowa at the late session of its legislature made a preliminary appropriation for its representation at the exposition, and at the adjourned session to be held in January, 1897, it is promised that further provision will be made, so that Iowa's participation in the exposition will be at least equal to that of any other state.

California citizens are greatly interested in this exposition and steps have already been taken looking to an appropriation of \$75,000 by the legislature of the state to provide for the fullest representation of the products, industries, etc., of that great state at the exposition.

The state of Louisiana, at its session closing July 9, 1896, passed a concurrent resolution instructing the state board of agriculture to arrange for and provide fitting representation for the state and pledging the expenses therefor.

Utah, Wyoming and Colorado have pledged their states to large and full representation at the exposition and it is practically assured that twenty states and territories will be represented. States east of the Mississippi river and foreign countries have been cordially requested to participate.

Omaha was selected as the place for holding the exposition because of its central location, which makes it convenient of access from all parts of the whole country.

The officers of the exposition company are: Gurdon W. Wattles, president; Jacob E. Markel, vice-president; Herman Kountze, treasurer; John A. Wakefield, secretary. Directors—Gurdon W. Wattles, Jacob E. Markel, William R. Bennett, John H. Evans, Dudley Smith, Dan Farrell, Jr., George H. Payne, Charles Metz, Isaac W. Carpenter, Henry A. Thompson, Carroll S. Montgomery.

THE PRESIDENT'S MESSAGE.

To the Congress of the United States: As representatives of the people in the legislative branch of their government you have assembled at a time when the strength and excellence of our free institutions and the fitness of our citizens to enjoy popular rule have been again made manifest. A political contest involving momentous consequences fraught with apprehension and creating aggressiveness so intense as to approach bitterness and passion has been waged throughout our land and determined by the decree of free and independent suffrage, without disturbances of our tranquillity or the least sign of weakness in our national structure.

When we consider these incidents and contemplate the peaceful obedience and manly submission which have succeeded a heated clash of political opinions we discover abundant evidence of a determination on the part of our countrymen to abide by every verdict of the popular will and to be controlled at all times by an abiding faith in the agencies established for the direction of the affairs of their government. Thus our people exhibit a patriotic disposition which entitles them to demand of those who undertake to make and execute their laws such faithful and unselfish service in their behalf as can only be prompted by a serious appreciation of the trust and confidence which the acceptance of public duty invites.

In obedience to a constitutional requirement I herein submit to the congress certain information concerning national affairs, with the suggestion of such legislation as in my judgment is necessary and expedient. To secure brevity and avoid tiresome narration I shall omit many details concerning matters within federal control, which, though by no means unimportant, are more profitably discussed in departmental reports. I shall also further curtail this communication by omitting a minute recital of many minor incidents connected with our foreign relations which have heretofore found a place in executive messages, but are now contained in a report of the secretary of state, which is herewith submitted.

THE ATROCITIES IN TURKEY.

At the outset of a reference to the more important matters affecting our relations with foreign powers it would afford me satisfaction if I could assure the congress that the disturbed condition in Asiatic Turkey had during the last year assumed a less hideous aspect, and that, either as a consequence of the awakening of the Turkish government to the demand of humane civilization or as the result of decisive action on the part of the great nations having the right by treaty to interfere for the protection of those exposed to the rage of mad bigotry and cruel fanaticism, the shocking features of the situation had been mitigated. Instead, however, of welcoming a softened disposition of protective intervention we have been afflicted by continued and not unfrequent reports of the wanton destruction of homes and the bloody butchery of men, women and children, made martyrs to their profession of Christian faith.

While none of our citizens in Turkey have thus far been killed or wounded, though often in the midst of dreadful scenes of danger, their safety in the future is by no means assured. Our government at home

and our minister at Constantinople have left nothing undone to protect our missionaries in Ottoman territory, who constitute nearly all the individuals residing there who have a right to claim our protection on the score of American citizenship.

Our efforts in this direction will not be relaxed, but the deep feeling and sympathy that have been aroused among our people ought not to so far blind their reason and judgment as to lead them to demand impossible things.

The outbreaks of blind fury which lead to murder and pillage in Turkey occur suddenly and without notice, and an attempt on our part to force such a hostile presence there as might be effective for prevention or protection would not only be resisted by the Ottoman government, but would be regarded as an interruption of their plans by the great nations which assert their exclusive right to intervene in their own time and method for the security of life and property in Turkey.

Several naval vessels are stationed in the Mediterranean as a measure of caution and to furnish all possible relief and refuge in case of emergency. We have made claims against the Turkish government for the pillage and destruction of missionary property at Karpoot and Marash during uprisings at those places. Thus far the validity of these demands has not been admitted, though our minister, prior to such outrages and in anticipation of danger, demanded protection for the persons and property of our missionary citizens in the localities mentioned; and, notwithstanding that strong evidence exists of actual complicity of Turkish soldiers in the work of destruction and robbery, the facts as they now appear do not permit us to doubt the justice of these claims, and nothing will be omitted to bring about their prompt settlement.

A number of Armenian refugees having arrived at our ports, an order has lately been obtained from the Turkish government permitting the wives and children of such refugees to join them here. It is hoped that hereafter no obstacle will be interposed to prevent the escape of all those who seek to avoid the perils which threaten them in Turkish dominions.

Our recently appointed consul to Erzeroum is at his post and discharging the duties of his office, though for some unaccountable reason his formal exequatur from the sultan has not been issued.

I do not believe that the present somber prospect in Turkey will be long permitted to offend the sight of Christendom. It so mars the humane and enlightened civilization that belongs to the close of the nineteenth century that it seems hardly possible that the earnest demand of good people throughout the Christian world for its corrective treatment will remain unanswered.

THE CONDITIONS IN CUBA.

The insurrection in Cuba still continues, with all its perplexities. It is difficult to perceive that any progress has thus far been made toward the pacification of the island, or that the situation of affairs as depicted in my last annual message has in the least improved. If Spain still holds Havana and the seaports and all the considerable towns, the insurgents still roam at will over at least two-thirds of the inland country. If the determination of Spain to

put down the insurrection seems—but to strengthen with the lapse of time, as is evinced by her unhesitating devotion of largely increased military and naval forces to the task, there is much reason to believe that the insurgents have gained in point of numbers and character and resources, and are none the less inflexible in their resolve not to succumb without practically securing the great objects for which they took up arms. If Spain has not yet re-established her authority, neither have the insurgents yet made good their title to be regarded as an independent state. Indeed, as the contest has gone on, the pretense that civil government exists on the island, except so far as Spain is able to maintain it, has been practically abandoned. Spain does keep on foot such a government, more or less imperfectly, in the large towns and their immediate suburbs; but, that exception being made, the entire country is either given over to anarchy or is subject to the military occupation of one or the other party. It is reported, indeed, on reliable authority, that at the demand of the commander-in-chief of the insurgent army the putative Cuban government has now given up all attempt to exercise its functions, leaving that government confessedly (what there is the best reason for supposing it always to have been in fact) a government merely on paper.

Were the Spanish armies able to meet their antagonists in the open or in pitched battle, prompt and decisive results might be looked for, and the immense superiority of the Spanish forces in numbers, discipline and equipment could hardly fail to tell greatly to their advantage. But they are called upon to face a foe that shuns general engagements; that can choose, and does choose, its own ground; that from the nature of the country is visible or invisible at pleasure, and that fights only from ambuscades and when all the advantages of position and numbers are on its side.

In a country where all that is indispensable to life in the way of food, clothing and shelter is so easily obtainable, especially by those born and bred on the soil, it is obvious that there is hardly a limit to the time during which hostilities of this sort may be prolonged.

Meanwhile, as in all cases of protracted civil strife, the passions of the combatants grow more and more inflamed, and excesses on both sides become more frequent and more deplorable. They are also participated in by bands of marauders, who, now in the name of one party and now in the name of the other, as may best suit the occasion, harry the country at will and plunder its wretched inhabitants for their own advantage. Such a condition of things would inevitably entail immense destruction of property, even if it were the policy of both parties to prevent it so far as practicable. But, while such seemed to be the original policy of the Spanish government, it has now apparently abandoned it, and is acting upon the same theory as the insurgents—namely, that the exigencies of the contest require wholesale annihilation of property, that it may not prove of use and advantage to the enemy.

It is to the same end that, in pursuance of general orders, Spanish garrisons are now being withdrawn from plantations and the rural population required to concentrate itself in the towns. The sure result would seem to be that the industrial value of the island is fast diminishing, and that unless there is a speedy and radical change in

existing conditions it will soon disappear altogether. That value consists very largely, of course, in its capacity to produce sugar—a capacity already much reduced by the interruptions to tillage which have taken place during the last two years. It is reliably asserted that should these interruptions continue during the current year, and practically extend, as is now threatened, to the entire sugar-producing territory of the island, so much time and so much money will be required to restore the land to its normal productiveness that it is extremely doubtful if capital can be induced even to make the attempt.

The spectacle of the utter ruin of an adjoining country, by nature one of the most fertile and charming on the globe, would engage the serious attention of the government and the people of the United States in any circumstances. In point of fact, they have a concern with it which is by no means of a wholly sentimental or philanthropic character. It lies so near to us as to be hardly separated from our territory. Our actual pecuniary interest in it is second only to that of the people and government of Spain. It is reasonably estimated that at least from \$30,000,000 to \$50,000,000 of American capital is invested in plantations and in railroad, mining and other business enterprises on the island. The volume of trade between the United States and Cuba, which in 1889 amounted to about \$64,000,000, rose in 1893 to about \$103,000,000, and in 1894, the year before the present insurrection broke out, amounted to nearly \$96,000,000.

Besides this large pecuniary stake in the fortunes of Cuba, the United States finds itself inextricably involved in the present contest in other ways, both vexatious and costly. Many Cubans reside in this country and indirectly promote the insurrection through the press, by public meetings, by the purchase and shipment of arms, by the raising of funds, and by other means which the spirit of our institutions and the tenor of our laws do not permit to be made the subject of criminal prosecutions. Some of them, though Cubans at heart and in all their feelings and interests, have taken out papers as naturalized citizens of the United States, a proceeding resorted to with a view to possible protection by this government, and not unnaturally regarded with much indignation by the country of their origin.

The insurgents are undoubtedly encouraged and supported by the widespread sympathy the people of this country always and instinctively feel for every struggle for better and freer government, and which, in the case of the more adventurous and restless elements of our population, leads in only too many instances to active participation in the contest.

The result is that this government is constantly called upon to protect American citizens, to claim damages for injuries to persons and property now estimated at many millions of dollars, and to ask explanations and apologies for the acts of Spanish officials whose zeal for the repression of rebellion sometimes blinds them to the immunities belonging to the unoffending citizens of a friendly power. It follows from the same causes that the United States is compelled to actively police a long line of seacoast against expeditions the escape of which the utmost vigilance will not always suffice to prevent.

These inevitable entanglements of the United States with the rebellion in Cuba, the large American property interests af-

lected, and considerations of philanthropy and humanity in general, have led to a vehement demand in various quarters for some sort of positive intervention on the part of the United States. It was at first proposed that belligerent rights should be accorded to the insurgents—a proposition no longer urged, because untimely, and in practical operation clearly perilous and injurious to our own interests. It has since been and is now sometimes contended that the independence of the insurgents should be recognized. But, imperfect and restricted as the Spanish government of the island may be, no other exists there—unless the will of the military officer in temporary command of a particular district can be dignified as a species of government. It is now also suggested that the United States should buy the island—a suggestion possibly worthy of consideration if there were any evidence of a desire or willingness on the part of Spain to entertain such a proposal. It is urged, finally, that, all other methods failing, the existing internecine strife in Cuba should be terminated by our intervention, even at the cost of war between the United States and Spain—a war which its advocates confidently prophesy could be neither large in its proportions nor doubtful in its issue.

The correctness of this forecast need be neither affirmed nor denied.

The United States has, nevertheless, a character to maintain as a nation which plainly dictates that right, and not might, should be the rule of its conduct.

Further, though the United States is not a nation to which peace is a necessity, it is in truth the most pacific of powers, and desires nothing so much as to live in amity with all the world. Its own ample and diversified domains satisfy all possible longings for territory, preclude all dreams of conquest, and prevent any casting of covetous eyes upon neighboring regions, however attractive. That our conduct toward Spain and her dominions has constituted no exception to this national disposition is made manifest by the course of our government, not only thus far during the present insurrection, but during the ten years that followed the rising at Yara in 1868. No other great power, it may safely be said, under circumstances of similar perplexity, would have manifested the same restraint and the same patient endurance.

THE NATION'S REGARD FOR SPAIN.

It may also be said that this persistent attitude of the United States toward Spain in connection with Cuba unquestionably evinces no slight respect and regard for Spain on the part of the American people. They, in truth, do not forget her connection with the discovery of the western hemisphere, nor do they underestimate the great qualities of the Spanish people, nor fail to fully recognize their splendid patriotism and their chivalrous devotion to the national honor. They view with wonder and admiration the cheerful resolution with which vast bodies of men are sent across thousands of miles of ocean and an enormous debt accumulated that the costly possession of the Gem of the Antilles may still hold its place in the Spanish crown. And neither the government nor the people of the United States have shut their eyes to the course of events in Cuba and have failed to realize the existence of conceded grievances which have led to the present revolt from the authority of Spain—grievances recognized by the queen regent and

by the cortes, voiced by the most patriotic and enlightened of Spanish statesmen, without regard to party, and demonstrated by reforms proposed by the executive and approved by the legislative branch of the Spanish government.

It is in the assumed temper and disposition of the Spanish government to remedy these grievances, fortified by indications of influential public opinion in Spain, that this government has hoped to discover the most promising and effective means of composing the present strife with honor and advantage to Spain and with the achievement of all the reasonable objects of the insurrection.

It would seem that if Spain should offer to Cuba genuine autonomy—a measure of home rule, which, while preserving the sovereignty of Spain, would satisfy all rational requirements of her Spanish subjects—there should be no just reason why the pacification of the island might not be effected on that basis.

Such a result would appear to be in the true interest of all concerned. It would at once stop the conflict which is now consuming the resources of the island and making it worthless for whichever party may ultimately prevail. It would keep intact the possessions of Spain without touching her honor, which will be consulted rather than impugned by the adequate redress of admitted grievances. It would put the prosperity of the island and the fortunes of its inhabitants within their own control without severing the natural and ancient ties which bind them to the mother country, and would yet enable them to test their capacity for self-government under the most favorable conditions.

But the reasonableness of the requirement by Spain of unconditional surrender on the part of the insurgent Cubans before their autonomy is conceded is not altogether apparent. It ignores important features of the situation—the stability two years' duration has given to the insurrection; the feasibility of its indefinite prolongation in the nature of things, and as shown by past experience; the utter and imminent ruin of the island unless the present strife is speedily composed; above all, the rank abuses which all parties in Spain, all branches of her government and all her leading public men concede to exist and profess a desire to remove. Facing such circumstances, to withhold the proffer of needed reforms until the parties demanding them put themselves at mercy by throwing down their arms has the appearance of neglecting the gravest of perils and inviting suspicion as to the sincerity of any professed willingness to grant reforms.

The objection on behalf of the insurgents—that promised reforms cannot be relied upon—must of course be considered, though we have no right to assume and no reason for assuming that anything Spain undertakes to do for the relief of Cuba will not be done according to both the spirit and the letter of the undertaking.

Nevertheless, realizing that suspicions and precautions on the part of the weaker of the two combatants are always natural and not altogether unjustifiable—being sincerely desirous in the interest of both, as well as on its own account, that the Cuban problem should be solved with the least possible delay—it was intimated by this government to the government of Spain some months ago that if a satisfactory measure of home rule were tendered the Cuban insurgents and would be accepted

by them upon a guaranty of its execution, the United States would endeavor to find a way not objectionable to Spain of furnishing such guaranty.

While no definite response to this intimation has yet been received from the Spanish government, it is believed to be not altogether unwelcome, while, as already suggested, no reason is perceived why it should not be approved by the insurgents.

Neither party can fail to see the importance of early action, and both must realize that to prolong the present state of things for even a short period will add enormously to the time and labor and expenditure necessary to bring about the industrial recuperation of the island.

It is therefore fervently hoped on all grounds that earnest efforts for healing the breach between Spain and the insurgent Cubans upon the lines above indicated may be at once inaugurated and hurried to an immediate and successful issue.

The friendly offices of the United States, either in the manner above outlined or in any other way consistent with our constitution and laws, will always be at the disposal of either party.

Whatever circumstances may arise, our policy and our interest would constrain us to object to the acquisition of the island or an interference with its control by any other power.

It should be added that it cannot be reasonably assumed that the hitherto expectant attitude of the United States will be indefinitely maintained. While we are anxious to accord all due respect to the sovereignty of Spain, we cannot view the pending conflict in all its features and properly apprehend our inevitably close relation to it and its possible results without considering that by the course of events we may be drawn into such an unusual and unprecedented condition as will fix a limit to our patient waiting for Spain to end the contest, either alone and in her own way, or with our friendly co-operation.

When the inability of Spain to deal successfully with the insurgents has become manifest, and it is demonstrated that her sovereignty is extinct in Cuba for all purposes of its rightful existence, and when a hopeless struggle for its re-establishment has degenerated into a strife which means nothing more than the useless sacrifice of human life and the utter destruction of the very subject matter of the conflict, a situation will be presented in which our obligations to the sovereignty of Spain will be superseded by higher obligations, which we can hardly hesitate to recognize and discharge.

Deferring the choice of ways and methods until the time for action arrives, we should make them depend upon the precise conditions then existing, and they should not be determined upon without giving careful heed to every consideration involving our honor and interest or the international duty we owe to Spain.

Until we face the contingencies suggested, or the situation is by other incidents imperatively changed, we should continue in the line of conduct heretofore pursued, thus in all circumstances exhibiting our obedience to the requirements of public law and our regard for the duty enjoined upon us by the position we occupy in the family of nations. A contemplation of emergencies that may arise should plainly lead us to avoid their creation, either through a careless disregard of present duty

or even an undue stimulation and ill-timed expression of feeling.

But I have deemed it not amiss to remind the congress that a time may arise when a correct policy and care for our interests, as well as a regard for the interests of other nations and their citizens, joined by considerations of humanity and a desire to see a rich and fertile country, intimately related to us, saved from complete devastation, will constrain our government to such action as will subserve the interests thus involved, and at the same time promise to Cuba and its inhabitants an opportunity to enjoy the blessings of peace.

SETTLEMENT OF THE VENEZUELA AFFAIR.

The Venezuelan boundary question has ceased to be a matter of difference between Great Britain and the United States, their respective governments having agreed upon the substantial provisions of a treaty between Great Britain and Venezuela, submitting the whole controversy to arbitration. The provisions of the treaty are so eminently just and fair that the assent of Venezuela thereto may confidently be anticipated.

Negotiations for a treaty of general arbitration for all differences between Great Britain and the United States are far advanced and promise to reach a successful termination at an early date.

CONSULAR EXAMINATIONS APPROVED.

The scheme of examining applicants for certain consular positions, to test their competency and fitness, adopted under an executive order on Sept. 20, 1895, has fully demonstrated the usefulness of this innovation. In connection with this plan of examination promotions and transfers of deserving incumbents have been quite extensively made with excellent results. During the last year thirty-five appointments have been made in the consular service, twenty-seven of which were made to refill vacancies by death or resignation or to supply newly created posts, two to succeed incumbents removed for cause, two for the purpose of displacing alien consular officials by American citizens and four merely changing the official title of incumbent from commercial agent to consul. Twelve of these appointments were transfers or promotions from other positions under the department of state, four of those appointed had rendered previous service under the department, eight were made of persons who passed a satisfactory examination, seven were appointed to places not included in the order of Sept. 20, 1895, and four appointments, as above stated, involved no change of incumbency.

The inspection of consular offices provided for by an appropriation for that purpose at the last session of the congress has been productive of such wholesome effects that I hope this important work will in the future be continued. I know of nothing that can be done with the same slight expense so improving to the service.

I desire to repeat the recommendation contained in my last annual message in favor of providing at public expense official residences for our ambassadors and ministers at foreign capitals. The reasons supporting this recommendation are strongly stated in the report of the secretary of state, and the subject seems of such importance that I hope it may receive the early attention of the congress.

THE PRESERVATION OF SEAL.

We have during the last year labored faithfully, and against unfavorable conditions, to secure better preservation of seal life in the Bering sea. Both the United States and Great Britain have lately dispatched commissioners to these waters to study the habits and condition of the seal herd and the causes of their rapid decrease. Upon the reports of these commissioners, soon to be submitted, and with the exercise of patience and good sense on the part of all interested parties, it is earnestly hoped that hearty co-operation may be secured for the protection against threatened extinction of seal life in the northern Pacific and Bering sea.

THE TREASURY DEFICIT.

The secretary of the treasury reports that during the fiscal year ended June 30, 1896, the receipts of the government from all sources amounted to \$409,475,408.78. During the same period its expenditures were \$434,678,654.48, the excess of expenditures over receipts thus amounting to \$25,203,245.70. The ordinary expenses during the year were \$4,015,852.21 less than during the preceding fiscal year. Of the receipts mentioned there was derived from customs the sum of \$180,021,751.67 and from internal revenue \$146,830,615.66. The receipts from customs show an increase of \$7,863,154.22 over those from the same source for the fiscal year ended June 30, 1895, and the receipts from internal revenue an increase of \$3,584,537.91.

The value of our imported dutiable merchandise during the last fiscal year was \$369,757,470, and the value of free goods imported \$409,967,470, being an increase of \$6,523,675 in the value of dutiable goods and \$41,231,034 in the value of free goods over the preceding year. Our exports of merchandise, foreign and domestic, amounted in value to \$882,606,938, being an increase over the preceding year of \$75,063,773. The average ad valorem duty paid on dutiable goods imported during the year was 39.94 per cent and on free and dutiable goods taken together 20.55 per cent.

The cost of collecting our internal revenue was 2.78 per cent, as against 2.81 per cent for the fiscal year ended June 30, 1895. The total production of distilled spirits, exclusive of fruit brandies, was 86,588,763 taxable gallons, being an increase of 6,639,108 gallons over the preceding year. There was also an increase of 1,443,676 gallons of spirits produced from fruit as compared with the preceding year. The number of barrels of beer produced was 35,859,250, as against 33,589,784 produced in the preceding fiscal year, being an increase of 2,269,466 barrels.

EXPORTS OF GOLD AND SILVER.

The total amount of gold exported during the last fiscal year was \$12,409,947 and of silver \$60,541,670, being an increase of \$45,941,466 of gold and \$13,246,384 of silver over the exportations of the preceding fiscal year. The imports of gold were \$33,525,065 and of silver \$28,777,186, being \$2,859,695 less of gold and \$8,566,007 more of silver than during the preceding year.

The total stock of metallic money in the United States at the close of the last fiscal year ended the 30th day of June, 1896, was \$1,228,326,035, of which \$599,597,964 was in gold and \$628,728,071 in silver.

On the 1st day of November, 1896, the total stock of money of all kinds in the

country was \$2,285,410,590, and the amount in circulation, not including that in the treasury holdings, was \$1,627,055,641, being \$22.63 per capita upon an estimated population of 71,902,000.

The production of the precious metals in the United States during the calendar year 1895 is estimated to have been 2,254,760 fine ounces of gold, of the value of \$46,610,000, and 55,727,000 fine ounces of silver, of the commercial value of \$36,445,000 and the coinage value of \$72,051,000. The estimated production of these metals throughout the world during the same period was 9,688,821 fine ounces of gold, amounting to \$200,285,700 in value, and 169,189,249 fine ounces of silver, of the commercial value of \$110,654,000 and of the coinage value of \$218,738,100 according to our ratio.

The coinage of these metals in the various countries of the world during the same calendar year amounted to \$232,701,438 in gold and \$121,995,219 in silver. The total coinage at the mints of the United States during the fiscal year ended June 30, 1896, amounted to \$71,188,468.52, of which \$58,878,490 was in gold coins and \$12,309,978.52 in standard silver dollars, subsidiary coins and minor coins.

NATIONAL BANKS AND CIRCULATION.

The number of national banks organized from the time the law authorizing their creation was passed up to Oct. 31, 1896, was 5,051; of this number 3,679 were at the date last mentioned in active operation, having authorized capital stock of \$650,014,895, held by 288,902 shareholders, and circulating notes amounting to \$21,412,620. The total outstanding circulating notes of all national banks Oct. 31, 1896, amounted to \$234,553,807, including unredeemed but fully secured notes of banks insolvent and in process of liquidation. The increase in national bank circulation during the year ended on that day was \$21,099,429. Oct. 6, 1896, when the condition of national banks was last reported, the total resources of the 3,679 active institutions was \$3,263,685,313.83, which included \$1,593,258,839.31 in loans and discounts and \$362,165,733.85 in money of all kinds on hand. Of their liabilities \$1,597,891,058.03 was due to individual depositors and \$209,944,019 consisted of outstanding circulating notes.

There were organized during the year preceding the date last mentioned twenty-eight national banks, located in fifteen different states, of which twelve were organized in the eastern states with a capital of \$1,180,000, six in the western states with a capital of \$875,000 and ten in the southern states with a capital of \$1,190,000. During the year, however, thirty-seven banks voluntarily abandoned their franchises under the national law, and in the case of twenty-seven others it was found necessary to appoint receivers. Therefore, as compared with the year preceding, there was a decrease of thirty-six in the number of active banks.

The number of existing banks organized under state laws is 5,708.

THE INCREASE IN IMMIGRATION.

The number of immigrants arriving in the United States during the fiscal year was 343,267, of whom 340,168 were permitted to land and 2,799 were debarred on various grounds prescribed by law and returned to the countries whence they came, at the expense of the steamship companies by which they were brought in. The in-

crease of immigration over the preceding year amounted to 84,731. It is reported that with some exceptions the immigrants of the last year were of a hardy laboring class, accustomed and able to earn a support for themselves, and it is estimated that the money brought with them amounted to at least \$5,000,000, though it was probably much in excess of that sum since only those having less than \$30 are required to disclose the exact amount, and it is known that many brought considerable sums of money to buy land and build homes.

Including all the immigrants arriving who were over 14 years of age, 23.63 per cent were illiterate, as against 20.37 per cent of those of that age arriving during the preceding fiscal year. The number of immigrants over 14 years old, the countries from which they came and the percentage of illiterates among them were as follows: Italy, 57,515, with 54.59 per cent; Ireland, 37,496, with 7 per cent; Russia, 35,188, with 41.14 per cent; Austria-Hungary and provinces, 57,053, with 38.92 per cent; Germany, 25,334, with 2.96 per cent; Sweden, 18,821, with 1.16 per cent, while from Portugal there came 2,067, of whom 77.69 per cent were illiterate. There arrived from Japan during the year only 1,110 immigrants, and it is the opinion of the immigration authorities that the apprehension heretofore existing to some extent of a large emigration from Japan to the United States is without any substantial foundation.

THE LIFE-SAVING SERVICE.

From the life-saving service it is reported that the number of disasters to documented vessels within the limits of its operations during the year was 437. These vessels had on board 4,608 persons, of whom 4,595 were saved and 13 lost. The value of such vessels is estimated at \$8,880,140, and of their cargoes \$3,846,380, making the total value of property imperiled \$12,726,520. Of this amount \$11,292,707 was saved and \$1,432,750 was lost. Sixty-seven of the vessels were totally wrecked. There were besides 243 casualties to small undocumented craft, on board of which there were 594 persons, of whom 587 were saved and 7 were lost. The value of the property involved in these latter casualties is estimated at \$119,265, of which \$114,915 was saved and \$4,350 was lost. The life-saving crews during the year also rescued or assisted numerous other vessels and warned many from danger by signals, both by day and night.

The number of disasters during the year exceeded that of any previous year in the history of the service, but the saving of both life and property was greater than ever before in proportion to the value of the property involved and to the number of persons imperiled.

The operations of the marine hospital service, the revenue cutter service, the steamboat inspection service, the light-house service, the bureau of navigation and other branches of public work attached to the treasury department, together with various recommendations concerning their support and improvement, are fully stated in the report of the secretary of the treasury, to which the attention of the congress is especially invited.

CONDITION OF THE ARMY.

The report of the secretary of war exhibits satisfactory conditions in the sev-

eral branches of the public service intrusted to his charge. The limit of our military force as fixed by law is constantly and readily maintained. The present discipline and morale of our army are excellent, and marked progress and efficiency are apparent throughout its entire organization. With the exception of delicate duties in the suppression of slight Indian disturbances along our southwestern boundary, in which the Mexican troops co-operated, and the compulsory but peaceful return, with the consent of Great Britain, of a band of Cree Indians from Montana to the British possessions, no active operations have been required of the army during the year past.

Changes in methods of administration, the abandonment of unnecessary posts and consequent concentration of troops, and the exercise of care and vigilance by the various officers charged with the responsibility in the expenditure of the appropriations, have resulted in reducing to a minimum the cost of maintenance of our military establishment. During the last year the work of constructing permanent infantry and cavalry posts has been continued at the places heretofore designated. The secretary of war repeats his recommendation that appropriations for barracks and quarters should more strictly conform to the needs of the service as judged by the department, rather than respond to the wishes and importunities of localities. It is imperative that much of the money provided for such construction should now be allotted to the erection of necessary quarters for the garrisons assigned to the coast defenses, where many men will be needed to properly care for and operate modern guns. It is essential, too, that early provisions be made to supply the necessary force of artillery to meet the demands of this service.

The entire army has now been equipped with the new magazine arms, and wise policy demands that all available public and private resources should be so employed as to provide within a reasonable time a sufficient number to supply the state militia with these modern weapons and provide an ample reserve for any emergency.

THE NATIONAL GUARD.

The organized militia numbers 112,879 men. The appropriations for its support by the several states approximate \$2,800,000 annually and \$400,000 is contributed by the general government.

Investigation shows these troops to be usually well drilled and inspired with much military interest, but in many instances they are so deficient in proper arms and equipment that a sudden call to active duty would find them inadequately prepared for field service.

I therefore recommend that prompt measures be taken to remedy this condition, and that every encouragement be given to this deserving body of unpaid and voluntary citizen soldiers, upon whose assistance we must largely rely in time of trouble.

PROGRESS IN SEACOAST DEFENSES.

During the last year rapid progress has been made toward the completion of the scheme adopted for the erection and armament of fortifications along our seacoast, while equal progress has been made in providing the material for submarine defense in connection with these works. It is peculiarly gratifying at this time to note the great advance that has been made in this

important undertaking since the date of my annual message to the LIII^d congress at the opening of its second session, in December, 1893. At that time I informed the congress of the approaching completion of nine twelve-inch, twenty ten-inch and thirty-four eight-inch high-power steel guns, and seventy-five twelve-inch rifled mortars. This total then seemed insignificant when compared with the great work remaining to be done. Yet it was none the less a source of satisfaction to every citizen when he reflected that it represented the first installment of the new ordnance of American design and American manufacture, and demonstrated our ability to supply from our own resources guns of unexcelled power and accuracy. At that date, however, there were practically no carriages upon which to mount these guns, and only thirty-one emplacements for guns and sixty-four for mortars. Nor were all these emplacements in condition to receive their armament. Only one high-power gun was at that time in position for the defense of the entire coast.

Since that time the number of guns actually completed has been increased to a total of twenty-one twelve-inch, fifty-six ten-inch, sixty-one eight-inch high-power breech-loading steel guns, ten rapid-fire guns and eighty twelve-inch rifled mortars. In addition there are in process of construction one sixteen-inch type gun, fifty twelve-inch, fifty-six ten-inch, twenty-seven eight-inch high-power guns, and sixty-six twelve-inch rifled mortars; in all, 428 guns and mortars.

During the same year immediately preceding the message referred to the first modern gun carriage had been completed and eleven more were in process of construction. All but one were of the non-disappearing type. These, however, were not such as to secure necessary cover for the artillery gunners against the intense fire of modern machine rapid-firing and high-power guns. The inventive genius of ordnance and civilian experts has been taxed in designing carriages that would obviate this fault, resulting, it is believed, in the solution of this difficult problem. Since 1893 the number of gun carriages constructed or building has been raised to a total of 129, of which ninety are on the disappearing principle, and the number of mortar carriages to 152, while the ninety-five emplacements which were provided for prior to that time have been increased to 280 built and building.

This improved situation is largely due to the recent generous response of congress to the recommendations of the war department. Thus we shall soon have complete about one-fifth of the comprehensive system the first step in which was noted in my message to the congress of Dec. 4, 1893. When it is understood that a masonry emplacement not only furnishes a platform for the heavy modern high-power gun, but also in every particular serves the purpose and takes the place of the fort of former days, the importance of the work accomplished is better comprehended.

In the hope that the work will be prosecuted with no less vigor in the future, the secretary of war has submitted an estimate by which, if allowed, there will be provided and either built or building by the end of the next fiscal year such additional guns, mortars, gun carriages and emplacements as will represent not far from one-third of the total work to be done un-

der the plan adopted for our coast defenses—thus affording a prospect that the entire work will be substantially completed within six years. In less time than that, however, we shall have attained a marked degree of security. The experience and results of the last year demonstrate that with a continuation of present careful methods the cost of the remaining work will be much less than the original estimate.

We should always keep in mind that of all forms of military preparation coast defense alone is essentially pacific in its nature. While it gives the sense of security due to a consciousness of strength, it is neither the purpose nor the effect of such permanent fortifications to involve us in foreign complications, but rather to guarantee us against them. They are not temptation to war, but security against it.

Thus they are thoroughly in accord with all the traditions of our national diplomacy.

UNITED STATES PENITENTIARIES.

The attorney-general presents a detailed and interesting statement of the important work done under his supervision during the last fiscal year. The ownership and management by the government of penitentiaries for the confinement of those convicted in United States courts of violations of federal laws, which for many years have been a subject of executive recommendation, have at last, to a slight extent, been realized by the utilization of the abandoned military prison at Fort Leavenworth as a United States penitentiary. This is certainly a movement in the right direction; but it ought to be at once supplemented by the rebuilding or extensive enlargement of this improvised prison, and the construction of at least one more, to be located in the southern states. The capacity of the Leavenworth penitentiary is so limited that the expense of its maintenance, calculated at a per capita rate upon the number of prisoners it can accommodate, does not make as economical an exhibit as it would if it were larger and better adapted to prison purposes; but I am thoroughly convinced that economy, humanity and a proper sense of responsibility and duty toward those whom we punish for violations of federal law dictate that the federal government should have the entire control and management of the penitentiaries where convicted violators are confined.

It appears that since the transfer of Fort Leavenworth military prison to its new uses the work previously done by prisoners confined there and for which expensive machinery has been provided has been discontinued. This work consisted of the manufacture of articles for army use now done elsewhere. On all grounds it is exceedingly desirable that the convicts confined in this penitentiary be allowed to resume work of this description.

It is most gratifying to note the satisfactory results that have followed the inauguration of the new system provided for by the act of May 28, 1896, under which certain federal officials are compensated by salaries instead of fees. The new plan was put in operation on July 1, 1896, and already the great economy it enforces, its prevention of abuses, and its tendency to a better enforcement of the laws, are strikingly apparent. Detailed evidence of the usefulness of this long-delayed but now happily accomplished reform will be found clearly set forth in the attorney-general's report.

SUGGESTIONS FOR THE POSTAL SERVICE.

Our postoffice department is in good condition, and the exhibit made of its operations during the fiscal year ended June 30, 1896, if allowance is made for imperfections in the laws applicable to it, is very satisfactory. The total receipts during the year were \$82,499,208.40. The total expenditures were \$90,626,296.84, exclusive of \$1,559,898.27, which was earned by the Pacific railroad for transportation and credited on their debt to the government. There was an increase of receipts over the previous year of \$5,510,080.21, or 7.1 per cent, and an increase of expenditures of \$3,836,124.02, or 4.42 per cent. The deficit was \$1,679,956.19 less than that of the preceding year. The chief expenditures of the postal service are regulated by law and are not in the control of the postmaster-general. All that he can accomplish by the most watchful administration and economy is to enforce prompt and thorough collection and accounting for public moneys and such minor savings in small expenditures and in letting those contracts for postoffice supplies and star service which are not regulated by statute.

An effective co-operation between the auditor's office and the postoffice department, and the making and enforcement of orders by the department requiring immediate notification to their sureties of all delinquencies on the part of postmasters and compelling such postmasters to make more frequent deposits of postal funds, have resulted in a prompter auditing of their accounts and much less default to the government than heretofore.

The year's report shows large extensions of both star route service and railway mail service, with increased postal facilities. Much higher accuracy in handling mails has also been reached, as appears by the decrease of errors in the railway mail service and the reduction of mail matter returned to the dead letter office.

The deficit of the last year, although much less than that of preceding years, emphasizes the necessity for legislation to correct the growing abuse of second-class rates, to which the deficiency is mainly attributable.

The transmission at the rate of 1 cent a pound of serial libraries, advertising sheets, "house organs" (periodicals advertising some particular "house" or institution), sample copies, and the like, ought certainly to be discontinued. A glance at the revenues received for the work done last year will show more plainly than any other statement the gross abuse of the postal service and the growing waste of its earnings. The free matter carried in the mails for the department, offices, etc., of the government, and for congress, in pounds, amounted to 94,480,189. If this is offset against buildings for postoffices and stations, the rental of which would more than compensate for such free postal service, we have this exhibit:

Weight of mail matter (other than above) transmitted through the mails for the year ended June 30, 1896:

Class.	Weight, lbs	Revenue.
1. Domestic and foreign letters and postal cards, etc.....	65,337,343	\$60,624,464
2. Newspapers and periodicals, 1 cent per pound	348,988,968	2,996,403
3. Books, seeds, etc., 8 cents per pound.....	78,701,148	10,324,069

Class.	Weight, lbs.	Revenue.
4. Parcels, etc., 16 cents a pound.....	19,950,187	\$3,129,321

Total.....512,977,646 \$77,074,257
The remainder of our postal revenue, amounting to something more than \$5,000,000, was derived from box rents, registry fees, money-order business and other similar items.

The entire expenditures of the department, including pay for transportation credited to the Pacific railroads, was \$92,186,195.11, which may be considered as the cost of receiving, carrying and delivering the above mail matter. It thus appears that, though the second-class matter constituted more than two-thirds of the total that was carried, the revenue derived from it was less than one-thirtieth of the total expense.

The average revenue from each pound of first-class matter was 93 cents. From each pound of second-class, 8½ mills. (Of the second-class 52,348,297 was counted free matter.) From each pound of third-class, 13.1 cents. From each pound of fourth-class, 15.4 cents. The growth of weight of second-class matter has been from 299,000,000 pounds in 1894 to 312,000,000 in 1895, and to almost 349,000,000 in 1896, and it is quite evident this increasing drawback is far outstripping any possible growth of postal revenue.

Our mail service should of course be such as to meet the wants and even the conveniences of our people at a direct charge upon them so light as perhaps to exclude the idea of our postoffice department being a moneymaking concern; but in the face of a constantly recurring deficiency in its revenues, and in view of the fact that we supply the best mail service in the world, it seems to me it is quite time to correct the abuses that swell enormously our annual deficit.

If we concede the public policy of carrying weekly newspapers free in the county of publication, and even the policy of carrying at less than one-tenth of their cost other bona fide newspapers and periodicals, there can be no excuse for subjecting the service to the further immense and increasing loss involved in carrying at the nominal rate of 1 cent a pound the serial libraries, sometimes including trashy and even harmful literature, and other matter, which, under the loose interpretation of a loose statute, has been gradually given second-class rates, thus absorbing all profitable returns derived from first-class matter, which pays three or four times more than its cost, and producing a large annual loss to be paid by general taxation. If such second-class matter paid merely the cost of its handling, our deficit would disappear, and a surplus result which might be used to give the people still better mail facilities or a cheaper rate of letter postage.

I recommend that legislation be at once enacted to correct these abuses and introduce better business ideas in the regulation of our postal rates. Experience and observation have demonstrated that certain improvements in the organization of the postoffice department must be secured before we can gain the full benefit of the immense sums expended in its administration. This involves the following reforms, which I earnestly recommend:

There should be a small addition to the existing inspector service, to be employed in the supervision of the carrier force, which now numbers 13,000 men and per-

forms its service practically without the surveillance exercised over all other branches of the postal or public service. Of course such a lack of supervision and freedom from wholesome disciplinary restraints must inevitably lead to imperfect service. There should also be appointed a few inspectors who could assist the central office in necessary investigation concerning matters of postoffice leases, postoffice sites, allowances for rent, fuel and lights, and in organizing and securing the best results from the work of the 14,000 clerks now employed in first and second class offices. I am convinced that the small expense attending the inauguration of these reforms would actually be a profitable investment.

I especially recommend such a recasting of the appropriations by congress for the postoffice department as will permit the postmaster-general to proceed with the work of consolidating postoffices.

This work has already been entered upon sufficiently to fully demonstrate, by experiment and experience, that such consolidation is productive of better service, larger revenue and less expenditures, to say nothing of the further advantage of gradually withdrawing postoffices from the spoils system.

The Universal Postal union, which now embraces all the civilized world, and whose delegates will represent 1,000,000,000 people, will hold its fifth congress in the city of Washington in May, 1897. The United States may be said to have taken the initiative which led to the first meeting of this congress at Berne, in 1874, and the formation of the Universal Postal union, which brings the postal service of all countries to every man's neighborhood and has wrought marvels in cheapening postal rates and securing absolutely safe mail communication throughout the world. Previous congresses have met in Berne, Paris, Lisbon and Vienna, and the respective countries in which they have assembled have made generous provision for their accommodation and the reception and entertainment of the delegates. In view of the importance of this assemblage and its deliberations, and of the honors and hospitalities accorded to our representatives by other countries on similar occasions, I earnestly hope that such an appropriation will be made for the expenses necessarily attendant upon the coming meeting in our capital city as will be worthy of our national hospitality and indicative of our appreciation of the event.

CONSTRUCTION OF THE NEW NAVY.

The work of the navy department and its present condition are fully exhibited in the report of the secretary. The construction of vessels for our new navy has been energetically prosecuted by the present administration upon the general lines previously adopted, the department having seen no necessity for radical changes in prior methods under which the work was found to be progressing in a manner highly satisfactory.

It has been decided, however, to provide in every ship-building contract that the builder should pay all trial expenses, and it has also been determined to pay no speed premiums in future contracts. The premiums recently earned, and some yet to be decided, are features of the contracts made before this conclusion was reached.

On March 4, 1893, there were in commission but two armored vessels—the double-turreted Miantonomoh and Monterey. Since that date of vessels theretofore authorized there have been placed in their first com-

mission three first-class and two second-class battleships, two armored cruisers, one harbor-defense ram and five double-turreted monitors, including the Maine and the Puritan, just completed. Eight new unarmored cruisers and two new gunboats have also been commissioned. The Iowa, another battleship, will be completed about March 1, and at least four more gunboats will be ready for sea in the early spring.

It is gratifying to state that our ships and their outfits are believed to be equal to the best that can be manufactured elsewhere, and that such notable reductions have been made in their cost as to justify the statement that quite a number of vessels are now being constructed at rates as low as those that prevail in European ship-yards.

Our manufacturing facilities are at this time ample for all possible naval contingencies. Three of our government navy-yards (those at Mare Island, Cal., Norfolk, Va., and Brooklyn, N. Y.), are equipped for ship-building; our ordnance plant in Washington is equal to any in the world, and at the torpedo station we are successfully making the highest grades of smokeless powder. Three first-class private ship-yards—at Newport News, Philadelphia and San Francisco—are building battleships; eleven contractors, situated in the states of Maine, Rhode Island, Pennsylvania, New Jersey, Maryland, Virginia and the state of Washington, are constructing gunboats or torpedo boats. Two plants are manufacturing large quantities of first-class armor, and American factories are producing automobile torpedoes, powder, projectiles, rapid-fire guns, and everything else necessary for the complete outfit of naval vessels.

There have been authorized by congress since March, 1893, five battleships, six light-draught gunboats, sixteen torpedo boats and one submarine torpedo boat. Contracts for the building of all of them have been let. The secretary expresses the opinion that we have for the present a sufficient supply of cruisers and gunboats, and that hereafter the construction of battleships and torpedo boats will supply our needs.

Much attention has been given to the methods of carrying on departmental business. Important modifications in the regulations have been made, tending to unify the control of ship-building, so far as may be, under the bureau of construction and repair, and also to improve the mode of purchasing supplies for the navy by the bureau of supplies and accounts. The establishment under recent acts of congress of a supply fund with which to purchase these supplies in large quantities, and other modifications of methods, have tended materially to their cheapening and better quality.

The war college has developed into an institution which, it is believed, will be of great value to the navy in teaching the science of war as well as in stimulating professional zeal in the navy, and it will be especially useful in the devising of plans for the utilization in case of necessity of all the naval resources of the United States.

The secretary has persistently adhered to the plan he found in operation for securing labor at navy-yards through boards of labor employment, and has done much to make it more complete and efficient. The naval officers who are familiar with this system and its operation express the decided opinion that its results have been to vastly improve the character of the work done at our yards, and greatly reduce its cost.

Discipline among the officers and men of the navy has been maintained at a high standard, and the percentage of American citizens enlisted has been very much increased.

The secretary is considering, and will formulate during the coming winter, a plan for laying up ships in reserve, thereby largely reducing the cost of maintaining our vessels afloat. This plan contemplates that battleships, torpedo boats and such of the cruisers as are not needed for active service at sea shall be kept in reserve, with skeleton crews on board to keep them in condition, cruising only enough to insure the efficiency of the ships and their crews in time of activity. The economy to result from this system is too obvious to need comment.

SUCCESS OF THE NAVAL MILITIA.

The naval militia, which was authorized a few years ago as an experiment, has now developed into a body of enterprising young men, active and energetic in the discharge of their duties, and promising great usefulness.

This establishment has nearly the same relation to our navy as the national guard in the different states bears to our army; and it constitutes a source of supply for our naval forces the importance of which is immediately apparent.

RESTRICTION OF LAND GRANTS.

The report of the secretary of the interior presents a comprehensive and interesting exhibit of the numerous and important affairs committed to his supervision. It is impossible in this communication to do more than than briefly refer to a few of the subjects concerning which the secretary gives full and instructive information. The money appropriated on account of this department, and for its disbursement for the fiscal year ended June 30, 1896, amounted to more than \$157,000,000, or a greater sum than was appropriated for the entire maintenance of the government for the two fiscal years ended June 30, 1861. Our public lands, originally amounting to 1,840,000,000 acres, have been so reduced that only about 600,000,000 acres still remain in government control, excluding Alaska. The remainder being by far the most valuable portion, has been given away to settlers, to new states and to railroads, or sold at a comparatively nominal sum. The patenting of land in execution of railroad grants has progressed rapidly during the year, and since March 4, 1893, about 25,000,000 acres have thus been conveyed to these corporations.

I agree with the secretary that the remainder of our public lands should be more carefully dealt with, and their alienation guarded by better economy and greater prudence.

The commission appointed from the membership of the National Academy of Sciences, provided for by an act of congress, to formulate plans for a national forestry system, will, it is hoped, soon be prepared to present the result of thorough and intelligent examination of this important subject.

The total Indian population of the United States is 177,235, according to a census made in 1895, exclusive of those within the state of New York and those comprising the five civilized tribes. Of this number there are approximately 38,000 children of school age. During the year 23,393 of these were enrolled in schools. The progress which has attended recent efforts to extend Indian

school facilities, and the anticipation of continued liberal appropriations to that end, cannot fail to afford the utmost satisfaction to those who believe that the education of Indian children is a prime factor in the accomplishment of Indian civilization. It may be said in general terms that in every particular the improvement of the Indians under government care has been most marked and encouraging.

The secretary, the commissioner of Indian affairs, and the agents having charge of Indians to whom allotments have been made, strongly urge the passage of a law prohibiting the sale of liquor to allottees who have taken their lands in severalty. I earnestly join in this recommendation, and venture to express the hope that the Indian may be speedily protected against this greatest of all obstacles to his well-being and advancement.

The condition of affairs among the five civilized tribes, who occupy large tracts of land in the Indian territory and who have governments of their own, has assumed such an aspect as to render it almost indispensable that there should be an entire change in the relations of these Indians to the general government. This seems to be necessary in furtherance of their own interests, as well as for the protection of non-Indian residents in their territory. A commission organized and empowered under several recent laws is now negotiating with these Indians for the relinquishment and the division of their common lands in severalty, and are aiding in the settlement of the troublesome question of tribal membership. The reception of their first proffers of negotiation was not encouraging, but through patience and such conduct on their part as demonstrated that their intentions were friendly and in the interest of the tribes the prospect of success has become more promising. The effort should be to save these Indians from the consequences of their own mistakes and improvidence, and to secure to the real Indian his rights as against intruders and professed friends who profit by his retrogression. A change is also needed to protect life and property through the operation of courts conducted according to strict justice and strong enough to enforce their mandates.

As a sincere friend of the Indian, I am exceedingly anxious that these reforms should be accomplished with the consent and aid of the tribes, and that no necessity may be presented for radical or drastic legislation. I hope, therefore, that the commission now conducting negotiations will soon be able to report that progress has been made toward a friendly adjustment of existing difficulties.

It appears that a very valuable deposit of gilsonite or asphaltum has been found on the reservation in Utah occupied by the Uncompahgre Ute Indians. Every consideration of care for the public interest and every sensible business reason dictate such management or disposal of this important source of public revenue as will except it from the general rules and incidents attending the ordinary disposition of public lands, and secure to the government a fair share, at least, of its advantages, in place of its transfer for a nominal sum to interested individuals.

I indorse the recommendation made by the present secretary of the interior, as well as his predecessor, that a permanent commission, consisting of three members, one of whom shall be an army officer, be created to perform the duties now devolv-

ing upon the commissioner and assistant commissioner of Indian affairs. The management of the bureau involves such numerous and diverse details, and the advantages of an uninterrupted policy are so apparent, that I hope the change suggested will meet the approval of the congress.

VIEWS ON PENSION AFFAIRS.

The diminution of our enormous pension roll, and the decrease of pension expenditure, which have been so often confidently foretold, still fail in material realization. The number of pensioners on the rolls at the close of the fiscal year ended June 30, 1896, was 970,673. This is the largest number ever reported. The amount paid exclusively for the pensions during the year was \$138,214,761.94, a slight decrease from that of the preceding year, while the total expenditures on account of pensions, including the cost of maintaining the department and expenses attending the pension distribution, amounted to \$142,206,550.59, or within a very small fraction of one-third of the entire expense of supporting the government during the same year.

The number of new pension certificates issued was 90,640. Of these, 40,374 represent original allowances of claims, and 15,878 increases of existing pensions. The number of persons receiving pensions from the United States but residing in foreign countries at the close of the last fiscal year was 3,781, and the amount paid to them during the year was \$582,735.38. The sum appropriated for the payment of pensions for the current fiscal year ending June 30, 1897, is \$140,000,000, and for the succeeding year it is estimated that the same amount will be necessary.

The commissioner of pensions reports that during the last fiscal year 339 indictments were found against violators of the pension laws. Upon these indictments 167 convictions resulted. In my opinion, based upon such statements as these and much other information and observation, the abuses which have been allowed to creep into our pension system have done incalculable harm in demoralizing our people and undermining good citizenship.

I have endeavored within my sphere of official duty to protect our pension roll and make it what it should be—a roll of honor, containing the names of those disabled in their country's service, and worthy of their country's affectionate remembrance.

When I have seen those who pose as the soldiers' friends active and alert in urging greater laxity and more reckless pension expenditure, while nursing selfish schemes, I have deprecated the approach of a situation where necessary retrenchment and enforced economy may lead to an attack upon the pension abuses so determined as to overlook the discrimination due to those who, worthy of a nation's care, ought to live and die under the protection of a nation's gratitude.

THE PACIFIC RAILROADS.

The secretary calls attention to the public interests involved in an adjustment of the obligations of the Pacific railroads to the government. I deem it to be an important duty to especially present this subject to the consideration of congress. Jan. 1, 1897, with the amount already matured, more than \$13,000,000 of the principal of the subsidy bonds issued by the United States in aid of the construction of the Union Pacific railway, including its Kansas line, and more than \$6,000,000 of like bonds issued in

aid of the Central Pacific railroad, including those issued to the Western Pacific railroad company, will have fallen due and been paid or must on that day be paid by the government. Without any reference to the application of the sinking fund now in the treasury, this will create such a default on the part of these companies to the government as will give it the right to at once institute proceedings to foreclose its mortgage lien. In addition to this indebtedness, which will be due Jan. 1, 1897, there will mature between that date and Jan. 1, 1899, the remaining principal of such subsidy bonds, which must also be met by the government. These amount to more than \$20,000,000 on account of the Union Pacific lines and exceed \$21,000,000 on account of the Central Pacific lines.

The situation of these roads and the condition of their indebtedness to the government have been fully set forth in the reports of various committees to the present and prior congresses; and as early as 1887 they were thoroughly examined by a special commission appointed pursuant to an act of congress. The considerations requiring an adjustment of the government's relations to the companies have been clearly presented, and the conclusion reached with practical uniformity that if these relations are not terminated they should be revised upon a basis securing their safe continuance.

Under section 4 of the act of congress passed March 3, 1887, the president is charged with the duty, in the event that any mortgage or other incumbrance paramount to the interest of the United States in the property of the Pacific railroads shall exist and be lawfully liable to be enforced, to direct the action of the departments of the treasury and of justice in the protection of the interest of the United States by redemption or through judicial proceedings, including foreclosures of the government liens.

In view of the fact that the congress has for a number of years almost constantly had under consideration various plans for dealing with the conditions existing between these roads and the government, I have thus far felt justified in withholding action under the statute above mentioned. In the case of the Union Pacific company, however, the situation has become especially and immediately urgent. Proceedings have been instituted to foreclose a first mortgage upon those aided parts of the main lines upon which the government holds a second and subordinate mortgage lien. In consequence of those proceedings and increasing complications, added to the default occurring the 1st day of January, 1897, a condition will be presented at that date, so far as this company is concerned, that must emphasize the mandate of the act of 1887 and give to executive duty under its provisions a more imperative aspect. Therefore, unless congress shall otherwise direct, or shall have previously determined upon a different solution of the problem, there will hardly appear to exist any reason for delaying beyond the date of the default above mentioned such executive action as will promise to subserve the public interests and save the government from the loss threatened by further inaction.

THE AGRICULTURAL DEPARTMENT.

The department of agriculture is so intimately related to the welfare of our people and the prosperity of our nation that it

should constantly receive the care and encouragement of the government. From small beginnings it has grown to be the center of agricultural intelligence and the source of aid and encouragement to agricultural efforts. Large sums of money are annually appropriated for the maintenance of this department, and it must be confessed that the legislation relating to it has not always been directly in the interest of practical farming or properly guarded against waste and extravagance. So far, however, as the public money has been appropriated fairly and sensibly to help those who actually till the soil no expenditure has been more profitably made or more generally approved by the people.

Under the present management of the department its usefulness has been enhanced in every direction, and at the same time strict economy has been enforced to the utmost extent permitted by congressional action. From the report of the secretary it appears that through careful and prudent financial management he has annually saved a large sum from his appropriations, aggregating during his incumbency and up to the close of the present fiscal year nearly one-fifth of the entire amount appropriated. These results have been accomplished by a conscientious study of the real needs of the farmer and such a regard for economy as the genuine farmer ought to appreciate, supplemented by a rigid adherence to civil-service methods in a department which should be conducted in the interest of agriculture instead of partisan politics.

The secretary reports that the value of our exports of farm produce during the last fiscal year amounted to \$570,000,000, an increase of \$17,000,000 over those of the year immediately preceding.

This statement is not the less welcome because of the fact that, notwithstanding such increase, the proportion of exported agricultural products to our total exports of all descriptions fell during the year. The benefits of an increase in agricultural exports being assured, the decrease in its proportion to our total exports is the more gratifying when we consider that it is owing to the fact that such total exports for the year increased more than \$75,000,000.

The large and increasing exportation of our agricultural products suggests the great usefulness of the organization lately established in the department for the purpose of giving to those engaged in farming pursuits reliable information concerning the condition, needs and advantages of different foreign markets. Inasmuch as the success of the farmer depends upon the advantageous sale of his products, and inasmuch as foreign markets must largely be the destination of such products, it is quite apparent that a knowledge of the conditions and wants that affect those markets ought to result in sowing more intelligently and reaping with a better promise of profit. Such information points out the way to a prudent foresight in the selection and cultivation of crops and to a release from the bondage of unreasoning monotony of production a glutted and depressed market and constantly recurring unprofitable toil.

In my opinion the gratuitous distribution of seeds by the department, as at present conducted, ought to be discontinued. No one can read the statement of the secretary on this subject and doubt the extravagance and questionable results of this practice.

The professed friends of the farmer, and

certainly the farmers themselves, are naturally expected to be willing to rid a department devoted to the promotion of farming interests of a feature which tends so much to its discredit.

The weather bureau, now attached to the department of agriculture, has continued to extend its sphere of usefulness, and by an uninterrupted improvement in the accuracy of its forecasts has greatly increased its efficiency as an aid and protection to all whose occupations are related to weather conditions.

Omitting further reference to the operations of the department, I commend the secretary's report and the suggestions it contains to the careful consideration of the congress.

PROGRESS OF CIVIL-SERVICE REFORM.

The progress made in civil-service reform furnishes a cause for the utmost congratulation. It has survived the doubts of its friends, as well as the rancor of its enemies, and has gained a permanent place among the agencies destined to cleanse our politics and to improve, economize and elevate the public service.

There are now in the competitive classified service upward of 84,000 places. More than half of these have been included from time to time since March 4, 1893. A most radical and sweeping extension was made by executive order dated the 6th day of May, 1896, and if fourth-class postmaster-ships be not included in the statement it may be said that practically all positions contemplated by the civil-service law are now classified. Abundant reasons exist for including these postmaster-ships, based upon economy, improved service and the peace and quiet of neighborhoods. If, however, obstacles prevent such action at present, I earnestly hope that congress will, without increasing postoffice appropriations, so adjust them as to permit in proper cases a consolidation of these postoffices, to the end that through this process the result desired may to a limited extent be accomplished.

The civil-service rules, as amended during the last year, provide for a sensible and uniform method of promotion, basing eligibility to better positions upon demonstrated efficiency and faithfulness. The absence of fixed rules on this subject has been an infirmity in the system more and more apparent as its other benefits have been better appreciated. The advantage of civil-service methods in their business aspects are too well understood to require argument. Their application has become a necessity to the executive work of the government. But those who gain positions through the operation of these methods should be made to understand that the non-partisan scheme through which they receive their appointments demands from them, by way of reciprocity, non-partisan and faithful performance of duty under every administration and cheerful fidelity to every chief.

While they should be encouraged to decently exercise their rights of citizenship and to support through their suffrages the political beliefs they honestly profess, the noisy, pestilent and partisan employee, who loves political turmoil and contention, or who renders lax and grudging service to an administration not representing his political views, should be promptly and fearlessly dealt with in such a way as to furnish a warning to others who may be likewise disposed.

The annual report of the commissioners will be duly transmitted, and I commend the important matter they have in charge to the careful consideration of the congress.

REVISION OF INTERSTATE LAW.

The interstate-commerce commission has during the last year supplied abundant evidence of its usefulness and the importance of the work committed to its charge. Public transportation is a universal necessity, and the question of just and reasonable charges therefor has become of vital importance, not only to shippers and carriers, but also to the vast multitude of producers and consumers. The justice and equity of the principles embodied in the existing law passed for the purpose of regulating these charges are everywhere conceded, and there appears to be no question that the policy thus entered upon has a permanent place in our legislation.

As the present statute when enacted was, in the nature of the case, more or less tentative and experimental, it was hardly expected to supply a complete and adequate system. While its wholesome effects are manifest and have amply justified its enactment, it is evident that all desired reforms in transportation methods have not been fully accomplished. In view of the judicial interpretation which some provisions of this statute have received, and the defects disclosed by the efforts made for its enforcement, its revision and amendment appear to be essential, to the end that it may more effectually reach the evils designed to be corrected. I hope the recommendations of the commission upon this subject will be promptly and favorably considered by the congress.

THE PRESENT TARIFF LAW.

I desire to recur to the statements elsewhere made concerning the government's receipts and expenditures for the purpose of venturing upon some suggestions touching our present tariff law and its operation. This statute took effect on the 28th day of August, 1894. Whatever may be its shortcomings as a complete measure of tariff reform, it must be conceded that it has opened the way to a freer and greater exchange of commodities between us and other countries, and thus furnished a wider market for our products and manufacturing. The only entire fiscal year during which this law has been in force ended the 30th day of June, 1896. In that year our imports increased over those of the previous year more than \$6,500,000, while the value of the domestic products we exported and which found markets abroad was nearly \$70,000,000 more than during the preceding year.

Those who insist that the cost to our people of articles coming to them from abroad for their needful use should only be increased through tariff charges to an extent necessary to meet the expenses of the government, as well as those who claim that tariff charges may be laid upon such articles beyond the necessities of government revenue and with the additional purpose of so increasing their price in our markets as to give American manufacturers and producers better and more profitable opportunities, must agree that our tariff laws are only primarily justified as sources of revenue to enable the government to meet the necessary expenses of its maintenance.

Considered as to its sufficiency in this respect the law can by no means fall under just condemnation. During the only complete fiscal year of its operation it has yielded nearly \$8,000,000 more revenue than

was received from tariff duties in the preceding year. There was, nevertheless, a deficit between our receipts and expenditures of a little more than \$25,000,000. This, however, was not unexpected.

The situation was such in December last, seven months before the close of the fiscal year, that the secretary of the treasury foretold a deficiency of \$17,000,000. The great and increasing apprehension and timidity in business circles and the depression in all activities intervening since that time, resulting from causes perfectly well understood and entirely disconnected with our tariff law or its operation, seriously checked the imports we would have otherwise received and readily account for the difference between this estimate of the secretary and the actual deficiency, as well as for a continued deficit. Indeed, it must be confessed that we could hardly have had a more unfavorable period than the last two years for the collection of tariff revenue.

We cannot reasonably hope that our recuperation from this business depression will be sudden, but it has already set in, with a promise of acceleration and continuance.

I believe our present tariff law, if allowed a fair opportunity, will in the near future yield a revenue which, with reasonably economic expenditures, will overcome all deficiencies. Meantime no deficit that has occurred or may occur need excite or disturb us. To meet any such deficit we have in the treasury, in addition to a gold reserve of \$100,000,000, a surplus of more than \$128,000,000 applicable to the payment of the expenses of the government, and which must, unless expended for that purpose, remain a useless hoard, or, if not extravagantly wasted, must in any event be perverted from the purpose of its exaction from our people. The payment, therefore, of any deficiency in the revenue from this fund is nothing more than its proper and legitimate use.

The government thus applying a surplus fortunately in its treasury to the payment of expenses not met by its current revenues is not at all to be likened to a man living beyond his income and thus incurring debt or encroaching on his principal. It is not one of the functions of our government to accumulate and make additions to a fund not needed for immediate expenditure. With individuals it is the chief object of struggle and effort. The application of an accumulated fund by the government to the payment of its running expenses is a duty. An individual living beyond his income and embarrassing himself with debt or drawing upon his accumulated fund of principal is either unfortunate or improvident. The distinction is between a government charged with the duty of expending for the benefit of the people and for proper purposes all the money it receives from any source and the individual who is expected to manifest a natural desire to avoid debt or to accumulate as much as possible and to live within the income derived from such accumulations, to the end that they may be increased, or at least remain unimpaired, for the future use and enjoyment of himself or the objects of his love and affection who may survive him.

It is immeasurably better to appropriate our surplus to the payment of justifiable expenses than to allow it to become an invitation to reckless appropriations and extravagant expenditures. I suppose it will not be denied that under the present law our people obtain the necessities of a comfort-

able existence at a cheaper rate than formerly. This is a matter of supreme importance, since it is the palpable duty of every just government to make the burdens of taxation as light as possible. The people should not be required to relinquish this privilege of cheap living except under the stress of their government's necessity made plainly manifest.

RETIREMENT OF GREENBACKS.

This reference to the condition and prospects of our revenues naturally suggests an allusion to the weakness and vices of our financial methods. They have been frequently pressed upon the attention of congress in previous executive communications and the inevitable danger of their continued toleration pointed out.

Without now repeating these details I cannot refrain from again earnestly presenting the necessity of the prompt reform of a system opposed to every rule of sound finance and shown by experience to be fraught with the gravest peril and perplexity. The terrible civil war which shook the foundations of our government more than thirty years ago brought in its train the destruction of property, the wasting of our country's substance and the estrangement of brethren. These are now past and forgotten. Even the distressing loss of life the conflict entailed is but a sacred memory, which fosters patriotic sentiment and keeps alive a tender regard for those who nobly died. And yet there remains with us to-day in full strength and activity as an incident of that tremendous struggle a feature of its financial necessities not only unsuited to our present circumstances but manifestly a disturbing menace to business security and an ever-present agent of monetary distress. Because we may be enjoying a temporary relief from its depressing influence this should not lull us into a false security nor lead us to forget the suddenness of past visitations.

I am more convinced than ever that we can have no assured financial peace and safety until the government currency obligations upon which gold may be demanded are withdrawn from circulation and canceled.

This might be done, as has been heretofore recommended, by their exchange for long-term bonds bearing a low rate of interest or by their redemption with the proceeds of such bonds. Even if only the United States notes known as greenbacks were thus retired it is probable that the treasury notes issued in payment of silver purchases under the act of July 14, 1890, now paid in gold when demanded, would not create much disturbance, as they might from time to time, when received in the treasury by redemption in gold or otherwise, be gradually and prudently replaced by silver coin.

This plan of issuing bonds for the purpose of redemption certainly appears to be the most effective and direct path to the needed reform. In default of this, however, it would be a step in the right direction if currency obligations redeemable in gold, whenever so redeemed, should be canceled instead of being reissued. This operation would be a slow remedy, but it would improve present conditions.

National banks should redeem their own notes. They should be allowed to issue circulation to the par value of bonds deposited as security for its redemption, and the tax on their circulation should be reduced to one-fourth of 1 per cent.

In considering projects for the retirement of United States notes and treasury notes issued under the law of 1890, I am of the opinion that we have placed too much stress upon the danger of contracting the currency and have calculated too little upon the gold that would be added to our circulation if invited to us by better and safer financial methods. It is not so much a contraction of our currency that should be avoided as such unequal distribution. This might be obviated and any fear of harmful contraction at the same time removed by allowing the organization of smaller banks and in less populous communities than are now permitted, and authorizing banks to establish branches in small communities under proper restrictions.

The entire case may be presented by the statement that the day of sensible and sound financial methods will not dawn upon us until our government abandons the banking business and the accumulation of funds and confines its monetary operations to the receipt of the money contributed by the people for its support and to the expenditure of such money for the people's benefit.

Our business interests and all good citizens long for rest from feverish agitation and the inauguration by the government of a reformed financial policy which will encourage enterprise and make certain the rewards of labor and industry.

THE PEOPLE AND THE TRUSTS.

Another topic in which our people rightfully take a deep interest may here be briefly considered. I refer to the existence of trusts and other huge aggregations of capital the object of which is to secure the monopoly of some particular branch of trade, industry or commerce and so stifle wholesome competition. When these are defended it is usually on the ground that though they increase profits they also reduce prices and thus may benefit the public. It must be remembered, however, that a reduction of prices to the people is not one of the real objects of these organizations, nor is their tendency necessarily in that direction. If it occurs in a particular case it is only because it accords with the purpose or interest of those managing the scheme. Such occasional results fall far short of compensating the palpable evils charged to the account of trusts and monopolies. Their tendency is to crush out individual independence and to hinder or prevent the free use of human faculties and the full development of human character. Through them the farmer, the artisan and the small trader is in danger of dislodgment from the proud position of being his own master, watchful of all that touches his country's prosperity, in which he has an individual lot, and interested in all that affects the advantages of business, of which he is a factor, to be relegated to the level of a mere appurtenance to a great machine, with little free will, with no duty but of passive obedience, and with little hope or opportunity of rising in the scale of responsible and helpful citizenship.

To the instinctive belief that such is the inevitable trend of trusts and monopolies is due the widespread and deep-seated popular aversion in which they are held, and the not unreasonable insistence that, whatever may be their incidental economic advantages, their general effect upon personal character, prospects and usefulness cannot be otherwise than injurious.

Though congress has attempted to deal with this matter by legislation, the laws

passed for that purpose thus far have proved ineffective, not because of any lack of disposition or attempt to enforce them, but simply because the laws themselves, as interpreted by the courts, do not reach the difficulty. If the insufficiencies of existing laws can be remedied by further legislation it should be done.

The fact must be recognized, however, that all federal legislation on this subject may fall short of its purpose because of inherent obstacles, and also because of the complex character of our governmental system, which, while making the federal authority supreme in its sphere, has carefully limited that sphere by metes and bounds which cannot be transgressed. The decision of our highest court on this precise question renders it doubtful whether the evils of trusts and monopolies can be adequately treated through federal action—unless they seek directly and purposely to include in their objects transportation or intercourse between states, or between the United States and foreign countries.

It does not follow, however, that this is the limit of the remedy that may be applied. Even though it may be found that

federal authority is not broad enough to fully reach the case, there can be no doubt of the power of the several states to act effectively in the premises, and there should be no reason to doubt their willingness to judiciously exercise such power.

In concluding this communication its last words shall be an appeal to the congress for the most rigid economy in the expenditure of the money it holds in trust for the people. The way to perplexing extravagance is easy, but a return to frugality is difficult. When, however, it is considered that those who bear the burdens of taxation have no guaranty of honest care save in the fidelity of their public servants the duty of all possible retrenchment is plainly manifest.

When our differences are forgotten and our contests of political opinion are no longer remembered, nothing in the retrospect of our public service will be as fortunate and comforting as the recollection of official duty well performed and the memory of a constant devotion to the interests of our confiding fellow-countrymen.

GROVER CLEVELAND.

Executive Mansion, Dec. 7, 1896.

The only authorized material standard of customary length is the Troughton scale belonging to this office, whose length at 59° .62 Fahr. conforms to the British standard. The yard in use in the United States is therefore equal to the British yard.

The only authorized material standard of customary weight is the troy pound of the Mint. It is of brass of unknown density, and therefore not suitable for a standard of mass. It was derived from the British standard troy pound of 1758 by direct comparison. The British avoirdupois pound was also derived

from the latter, and contains 7,000 grains troy.

The grain troy is therefore the same as the grain avoirdupois, and the pound avoirdupois in use in the United States is equal to the British pound avoirdupois.

The British gallon = 4.54346 litres.

The British bushel = 36.3477 litres.

The length of the nautical mile given above and adopted by the United States Coast and Geodetic Survey many years ago is defined as that of a minute of arc of a great circle of a sphere whose surface equals that of the earth (Clarke's Spheroid of 1866),

By the concurrent action of the principal governments of the world an International Bureau of Weights and Measures has been established near Paris. Under the direction of the International Committee two ingots were cast of pure platinum-iridium in the proportion of 9 parts of the former to 1 of the latter metal. From one of these a certain number of kilogrammes were prepared, from the other a definite number of metre bars. These standards of weight and length were inter-compared, without preference, and certain ones were selected as international prototype standards. The others were distributed by lot, in September, 1889, to the different governments and are called national prototype standards. Those apportioned to the United States were received in 1890 and are in the keeping of this office.

The metric system was legalized in the United States in 1866.

The international standard metre is derived from the metre des archives, and its length is defined by the distance between two lines at 0° centigrade, on a platinum-iridium bar deposited at the International Bureau of Weights and Measures.

The international standard kilogramme is a mass of platinum-iridium deposited at the same place, and its weight in vacuo is the same as that of the kilogramme des archives.

The litre is equal to a cubic decimetre, and it is measured by the quantity of distilled water which, at its maximum density, will counterpoise the standard kilogramme in a vacuum, the volume of such a quantity of water being, as nearly as has been ascertained, equal to a cubic decimetre.

The Supreme Court.

The Supreme court consists of seven judges, elected for a term of nine years, one from each of the seven districts into which the state is divided. The election is held in June of the year in which any term expires.

The state is divided into three grand divisions—southern, central and northern—in which the terms of the court are held. One clerk for each of the three grand divisions is elected for a term of six years.

The court sits at Mount Vernon, Springfield and Ottawa.

Dist.	(Salary \$5,000.)	Term Expires
1. David J. Baker	Cairo.	June, 1897

*Includes scattering, blank and defective votes.

In calculating pluralities in this and the following tables the Bryan-Sewall, the Bryan-Watson and the middle-of-the-road vote are combined for the Bryan vote. There was fusion on the electoral ticket of the democrats and populists, and in some states silver republicans, in the following states: Arkansas, California, Colorado, Connecticut, Idaho, Illinois, Iowa, Kansas, Kentucky, Louisiana, Michigan, Minnesota, Missouri, Montana, Nebraska, New Jersey, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, South Dakota, Utah, Washington, West Virginia, Wisconsin and Wyoming. In some of the states, like Illinois and Kansas, there were Bryan-Watson tickets run by the middle-of-the-road populists.

It has been impossible to separate the populist from the democratic vote in the states in which there was a fusion of those parties. In some of the states, like Illinois, in which the two parties voted for the same electors, but upon separate tickets, county officers, in making returns to the secretaries of state, have combined the votes on electors and it is impossible to say how the vote should be divided. In such cases the vote classed under the head "Bryan-Watson" is no indication of the strength of the people's party, while at the same time it gives too large a vote to the democrats. There is no way of giving, even approximately, the vote of the two parties on presidential electors.

Vote of States and Territories by Counties.

The certificate of the vote of Charlton county was lost and the vote was not included in the official canvass.

For governor in 1896 W. T. Atkinson, Dem., received 120827; Seaborn Wright, Pop., 85832; Atkinson's majority, 34995.

For secretary of state A. D. Candler, Dem., received 132184; J. A. Parsons, Pop., 76453; Candler's majority, 55731.

Other candidates for state offices received substantially the same vote as that cast for secretary of state.

Of the scattering vote for president in 1896 Levering, Pro., had 5613.

VOTE FOR GOVERNOR, 1896.

W. T. Atkinson, Dem.....	120,827
Seaborn Wright, Pop.....	85,832

OTHER STATE OFFICERS ELECTED, 1896

Secretary of State—Allen D. Candler, Dem.

*The vote was for McKinley and Hobart electors, Bryan and Sewall electors, Bryan and Watson electors, Palmer and Buckner electors and Levering and Johnson electors.

†Three state tickets were voted—headed respectively by Charles A. Culberson, Dem., Jerome C. Kearby, Pop.-Rep., and Randolph Clark, Pro., for governor. Fusion was not generally regarded by the populists and republicans, many thousand colored voters supporting Culberson on account of dissatisfaction with the school provision in the platform of the populists who nominated Kearby.

‡Two republican electoral tickets were voted—the “regular” and the “lily white.”

In 1896 Palmer, Nat. Dem., received 5046 and Levering, Pro., 1786 votes for president.

Counties for which no returns are given are unorganized and held no elections.

OTHER STATE OFFICERS ELECTED, 1896

Lieut.-Gov.—George T. Jester, Dem.
 Attorney-General—M. M. Crane, Dem.
 Comptroller—R. W. Finley, Dem.
 Treasurer—W. B. Wortham, Dem.

Events of the Year 1896.

JANUARY.

2. A score or more lives lost in St. Louis by the collapse of a building, due to a series of explosions.
4. The Venezuela boundary commission held its first meeting at Washington.
6. The state officers of the new state of Utah sworn in and assumed their offices. The Stone-Cutters' union, having 800 members in twenty stone yards in Chicago, strike against the use of stone-cutting machines.
9. The convention held in Oklahoma to further the admission of the territory as a state broke up in a row over the question of the location of the state capital.
12. The International Migration society chartered a steamer to carry 400 negroes from Savannah, Ga., to Liberia.
14. Commander Booth of the salvation army received an order recalling him to England. A Chicago jury decided that baseball might be played on Sunday.
17. The engagement of ex-President Harrison and Mrs. Dimmick formally announced. A terrific storm raged on the Pacific coast.
21. The second annual convention of cotton-growers at Memphis urges reduction of cotton acreage and the growing of hay and corn for home consumption.
22. Several members of the Ohio legislature indicted for bribery. Miss Clara Barton and her assistants sailed from New York for Armenia.
24. The attorney-general of Illinois begins quo-warranto proceedings against the Illinois Steel company under the anti-trust laws.
25. At a municipal-reform meeting in Chicago a plan was adopted for the appointment of a committee of 100 to act independently of the old parties in carrying on the movement to divorce politics from municipal affairs. A public meeting was held in Albany to further the plan for removing Union college from Schenectady to that city.
27. The World's Fair medals to the number of 23,857 were received in Washington for distribution. The steamer Hawkins, having on board a party of Cubans intending to join the insurgent army, goes down near Barnegat, with a large quantity of ammunition on board, and six lives are lost. The first tow of coal from the Warrior coalfields, Alabama, passes through the new government locks above Tuscaloosa, and down the Warrior, Tombigbee and Mobile rivers to Mobile.
28. Judge Payne of the Superior court of Chicago openly accuses a county commissioner of having accepted more than \$1,000 for the purpose of influencing the grand jury in the case of a man charged with murder.
29. The mayor and eight aldermen in Dubuque, Iowa, indicted on the charge growing out of the passage of an ordinance increasing their own salaries.

FEBRUARY.

1. The coinage of silver dollars resumed at the United States' mints. Col. A. B. Coit, who was in command of a militia company that fired on a mob of lynchers at Washington Court House, O., in Octo-

DOMESTIC.

- ber, 1894, and who was indicted for murder of the persons killed, acquitted at Columbus.
2. Fire in Philadelphia destroys the Haseltine building and the American Baptist Publishing house, causing a loss of \$1,000,000.
9. Judge Grosscup in the United States court at Chicago sentenced Joseph R. Dunlop, editor and proprietor of the Dispatch, to a fine of \$2,000 and two years in the penitentiary for sending obscene matter through the mails.
10. The Joliet mills of the Illinois Steel company resume work after a two months' suspension.
14. The Chicago committee of safety has issued an appeal to men of all parties to join in correcting the evils that exist in the city.
15. William Bailey, an imitator of Schlatter, a preacher, was tarred and feathered at North Platte, Neb., and ordered to leave town.
18. Fifty lives were lost in a coal mine explosion at New Castle, Col.
21. The Fitzsimmons-Maher prize-fight took place in Mexico, opposite Langtry, Tex., and Fitzsimmons won in ninety-five seconds.
23. Fire in the house of J. R. Armiger, in Baltimore, causes the loss of seven lives.
25. Miss Flagler, daughter of the chief of ordinance of the United States army, was sentenced to three hours in jail and a fine of \$500 for shooting a colored boy who was stealing fruit on her father's grounds last August.
26. Two bank robbers at Wichita Falls, Tex., who killed the cashier, taken from jail and lynched in front of the bank.
27. The New York Yacht club, by a vote of 39 to 1, expels Lord Dunraven.
28. By a vote of 49 to 44 the Iowa senate defeated a woman-suffrage bill.
29. The Atlas line steamer Ailsa is sunk in New York bay by the French Liner La Bourgogne.

MARCH.

1. The Chicago grand jury indicted 532 persons accused of conducting bucket-shops in the city.
2. A wheat elevator in Minneapolis, containing 700,000 bushels of grain, burned.
3. Two mills at Manchester, N. H., closed by reason of floods.
5. The Northwestern Normal school at Stanbury, Mo., burned.
8. The king of Spain hanged in effigy by the students of Northwestern university at Evanston, Ill.
9. Proceedings against E. V. Debs and others, growing out of the Chicago strike and riots, were nolle prossed.
11. The unseating of a democrat by the republican house in Kentucky precipitated a riot and the unseating of two republicans by the democratic senate.
12. A bicycle manufactory in Boston burned, destroying 1,800 wheels and involving a loss of \$125,000.
13. Tailors and cutters to the number of 13,000 struck in Chicago. Judge A. C. Cox of the United States District court decides that natural gas, piped from Canada under Niagara river, is a crude mineral product, and is, therefore, exempt from duty.
15. Gov. Bradley of Kentucky ordered a

- company of militia to Frankfort to preserve the peace in the state legislature.
16. The case of the United States versus the state of Texas, involving the ownership of Greer county and 1,500,000 acres of land, was decided in favor of the government.
 21. Fire in the Pennsylvania Salt Manufacturing company's works at Natrona, causes a loss of \$1,000,000.
 22. Fire in Washington, D. C., destroys some of the records of the census bureau.
 23. Thirteen men killed by a gas explosion in a mine at Dubois, Pa.
 25. The Ohio house passed a bill prohibiting wearing of big hats in theaters.
 26. The Champaign county (Illinois) grand jury indicted Gov. Algeld and the entire board of trustees of the state university for not complying with the state law requiring the display of the United States flag on the university buildings.
 28. Two distillery warehouses at Louisville, Ky., burned; loss, \$500,000.
 29. In Ybor City, Fla., Cuban and American cigarmakers burned Gen. Weyler in effigy and destroyed a Spanish flag.
 31. A blizzard raged in Minnesota, South Dakota and Nebraska, and eight inches of snow fell in Denver. The corpse of a man found in a packing-case in Chicago, identified as that of Oliver Pike, who disappeared from Seattle, Wash., in July, 1892.

APRIL.

2. A severe blizzard prevailed throughout the lake region.
4. The Washington artillery is sent from New Orleans to St. Laundry parish to put down disorder arising from the attempt of white "regulators" to prevent the registration of negroes.
5. Twenty-two valuable horses burned at the Buffalo Driving park.
6. Ex-President Harrison and Mrs. Mary Scott Dimmick married in St. Thomas' church in New York.
8. The Ohio legislature passes an anti-lynching law making the counties in which lynchings take place liable to the family of the person lynched.
9. The Rev. D. P. Morgan of the Church of the Heavenly Rest is accused of plagiarism, and practically admits the charge.
13. Both Mayor Strong of New York and Mayor Wurster of Brooklyn veto the Greater New York bill.
14. Annual convention of mine-workers assembled at Columbus, O., a hundred delegates being present.
16. The baseball season began.
17. The Appellate division of the Supreme court at New York decided that "the contention cannot be maintained that racing horses for a stake is a lottery."
18. At New York the thermometer registers 90 degrees, the highest temperature for April ever recorded. The old Pennsylvania railway station at Philadelphia burned; two firemen were killed and thirty-eight passenger cars were destroyed, making the total loss about \$350,000.
20. A tornado in Ohio kills several persons and destroys much property.
21. The steel ship, Charles E. Flint, burned at sea.
22. The legislature of New York passed the Greater New York bill over the vetoes of the mayors of New York and Brooklyn by a vote of 73 to 69.
23. A fight took place in the hall of representatives in Washington, between

Money of Mississippi and Hull of Missouri, in which the former was cut in the head with an inkstand.

25. Fire at Cripple Creek, Col., destroys the business portion of the town, the loss being estimated at \$1,000,000.
26. A severe tornado devastates a portion of Kansas.
29. Cripple Creek again visited by a terrible conflagration and destroyed.
30. The recent conference of Indiana coal-miners, at which it was decided to reduce the scale of wages to 55 cents a ton, resulted in a strike, and about 4,000 miners quit work.

MAY.

2. Judge Horton of Chicago decided that bucket-shops were as legitimate as the board of trade, and quashed all indictments against all bucket-shop proprietors and employes.
6. The president issued an order placing 30,000 government employes under civil-service rules.
7. The grand jury of New York indicted J. B. Duke, president of the American Tobacco company (the cigarette trust), charged with conspiracy and violation of the law in reference to acts injurious to trade and commerce.
9. The Rev. Dr. Johnson, colored, "bishop of the Kansas district of the Mount Zion church," was arrested at Fort Scott upon the charge of making false pension affidavits.
10. Severe fire in the lumber district of Ashland, Wis., destroyed property valued at \$500,000.
12. The Illinois Supreme court decided that the Cody law, closing barber-shops on Sunday, was unconstitutional. At Brattleboro, Vt., Rudyard Kipling and his brother-in-law, Beatty Belestier, were put under bonds to keep the peace.
15. A tornado covering a path 150 yards wide swept over Grayson and Denton counties, Texas, and into the Indian Territory, killing 250 people and destroying property valued at \$1,000,000.
17. Windstorms, with heavy rains and hail, caused great damage in Kansas, Missouri, Kentucky and Illinois.
22. Bishop Ryan of Alton, Ill., indicted, with others, on the charge of not displaying the American flag on school buildings, as required by law. Thirteen prominent residents of Astoria, Ore., including two ex-mayors of the city, indicted for complicity in the fraudulent introduction of Chinese into the country from British Columbia.
24. A cyclone swept across Polk county and into the eastern edge of Jasper county, Iowa; twenty persons killed and as many more seriously injured; the path of the storm was nearly twenty miles long and forty to eighty rods wide, and everything in its way was destroyed; at some places the people had timely warning, and were able to seek safety in caves and cellars. The towns of Ortonville and Thomas, in Michigan, were visited by a cyclone and partially destroyed; sixteen lives were lost. At Mount Clemens fifty houses were destroyed and six persons killed. In Illinois, near Chicago, a gale caused great destruction.
26. Eleven persons drowned by the capsizing of a ferryboat at Cairo, Ill.
27. A destructive tornado passed over St. Louis; 427 lives were lost; property destroyed valued at \$10,000,000.

28. The original copy of the constitution of the republic of Cuba was stolen from the Cuban fair in New York city, and a reward of \$3,000 was offered for its recovery. A storm, disastrous in its effects, swept through many of the counties of Pennsylvania.
30. A tornado at Sedalia, Mo., caused the loss of twenty lives.

JUNE.

1. Two negroes lynched at Columbus, Ga.
3. Fitzhugh Lee, the new consul-general of the United States to Cuba, reaches Havana.
5. The American line steamer St. Paul broke the record, making the trip in six days, five hours and thirty-two minutes.
7. The United States and Mexico entered into an agreement permitting the troops of either to cross the boundary in pursuit of hostile Indians.
8. A mob of union molders at Cleveland, O., attacked foundries and compelled the molders to stop work; their object was to prevent any work being done for the Brown Hoisting and Conveying company, "in which concern there is a lock-out."
11. A fire at the American horse exchange in New York caused the death of over 100 horses and the loss of more than \$300,000 in property. Three negroes, charged with assault on a woman, were hanged by a mob at Bryan, Tex.
13. At Albuquerque, N. M., Judge Collier ordered the receiver of the Atlantic & Pacific railroad hereafter not to blacklist any member of the American Railway union.
16. The national republican convention met at St. Louis.
23. A mob from Weakly county, Tennessee, went to Trenton, in Gibson county, and, taking from the jail a negro charged with a criminal assault in the former county, lynched him.
27. Joseph Cocking, awaiting trial for the murder of his wife and his sister-in-law, was taken from the jail at Port Tobacco, Md., and lynched by a mob.
28. Judge Wright, in the Circuit court at Champaign, Ill., decided that the state law requiring the national flag to be displayed over every schoolhouse in the state during school hours was unconstitutional and void. All but six of the Kentucky distillers signed an agreement to suspend operations for eighteen months from July 1; "the warehouses are filled with whisky, which is now almost a drug on the market, owing to overproduction." Nearly sixty miners were intombed by a cave-in at the Twin shaft at Pittston, Pa.
11. The president received a letter from the emperor of Japan, thanking him for the attitude of the United States in the Japan-China war. Thirty-one persons were killed and thirty-nine injured near Logan, Iowa, in a collision between an excursion and a freight train. A severe fire in Nashville, Tenn., burned a block of large buildings; loss, \$500,000.
12. The grand jury at Meridian, Miss., found six indictments against thirty-five insurance companies doing business in that state, under a statute which forbids combinations or trusts. Two prominent politicians in Ohio were sent to the penitentiary for two years upon conviction of corrupt solicitation. An excursion train on the Wisconsin Central ran into an open switch at Altenheim, a suburb of Chicago, killing five people and injuring about twenty.
15. The Kansas Court of Appeals declared ineffective a portion of the law under which divorces have been granted in that state for twenty-five years.
17. Three thousand miners in the Indiana coal region reported to be idle.
18. The car barns of the Chicago City railway company burned, with 554 cars, involving a loss of \$500,000. The business portion of Malvern, Ark., burned by incendiaries.
20. The first convention of the National Federation of Afro-American Women began at Washington, D. C., with Mrs. Booker T. Washington in the chair.
21. A cloudburst in Franklin county, Kentucky, causes the death of nine persons.
22. The populist and free-silver parties hold their conventions at St. Louis. A statue to the memory of John Brown unveiled at North Elba, N. Y.
24. Twenty-nine persons were drowned by a cloudburst near Denver, Col. Floods in Ohio do much damage.
25. The Union Pacific railroad was sold to the reorganized company at auction, under an order of court, at West Superior, Wis., for \$10,000,000. The Northern Pacific railroad was bought in by the reorganization committee at the foreclosure sale in Superior, Wis., for \$13,075,000. The Chesapeake & Ohio Southwestern road was sold at auction, under foreclosure proceedings, to the Illinois Central for \$1,500,000.
30. Severe storms visited Pennsylvania and Indiana. A collision between an express train and an excursion train near Atlantic City, N. J., kills forty-four persons and seriously injures forty-three others.
31. Grass Valley, Cal., was partially destroyed by an incendiary fire.

AUGUST.

1. Deputy sheriffs had a fight with strikers who were attempting to prevent new men from taking their places at the Berea stone quarries at Westview, O.
2. There was a strike riot at Cleveland, O., in which one man was killed; troops were called out to preserve the peace. The corner-stone of a monument to the memory of Jefferson Davis was laid at Richmond, Va.
5. The national convention of the socialist labor party met at New York.
6. Several persons were drowned and considerable property destroyed by a cloudburst in West Virginia and Ohio.
7. The democratic national convention assembled at Chicago.
2. Serious fire in the Cramp ship yards at Philadelphia.
4. The Chicago stock exchange was closed because of the failure of the Moore Bros., promoters of the Diamond Match and New York Biscuit companies, their liabilities being placed at \$5,000,000.
7. The St. Louis of the American line lowered the westward record, making the trip in six days two hours and eight minutes.
8. A period of intense heat, lasting to the 14th, general over the whole country. Three Italian murderers lynched at Hohnville, La.
10. Six persons killed and sixty-two injured by an electric-railway accident near Columbia, Pa.

11. The body of A. H. Pile, secretary of the national silver committee, found floating in the Potomac river.
12. Excessive heat in the city of New York caused 171 deaths.
14. The American liner St. Paul reduced the ocean record, crossing in six day and thirty-one minutes.
18. In a battle between the Yaqui Indians and the 7th United States cavalry three soldiers were killed; thirty Indians were captured.
23. Hoke Smith, secretary of the interior, resigned; Gov. Francis of Missouri succeeded him.
26. Two thousand people were made homeless by a fire in Ontonagon, Mich., and property valued at \$1,500,000 was destroyed.
28. Li Hung Chang, the Chinese statesman, arrived in New York from Europe.
29. Li Hung Chang was received by the president at the home of Mr. Whitney in New York.

SEPTEMBER.

1. The president placed 10,000 employees of the war department in the classified civil service.
3. The national (gold) democrats held their nominating convention at Indianapolis. The thirtieth annual encampment of the Grand Army of the Republic opened at St. Paul.
6. Eleven firemen were killed and several injured in a fire at Benton Harbor, Mich.
7. The letter-carriers' national convention met at Grand Rapids, Mich.
12. Miss Clara Barton and staff arrived in New York from Constantinople.
13. The Delaware oil works at Chester, Pa., were burned; loss, \$150,000.
16. The battleship Texas ran aground in Newport harbor.
18. A pay car on the Cincinnati, Hamilton & Dayton railroad was wrecked near Connersville, O., by running into a wild engine, and five persons were killed and four injured. Ogden, Utah, was visited by a violent storm, doing damage to the extent of \$200,000.
19. Severe storms swept parts of New England.
21. Locked-out men attacked the miners at Leadville, Col., with dynamite, and the entire militia force of the state was called out.
24. Seventy-three miles of road between Grand Junction and New Castle, Col., on the Rio Grande railway, flooded and traffic suspended; there were over fifty washouts.
27. Mount Holyoke college was almost totally destroyed by fire.
29. The West Indian hurricane which struck Savannah, Ga., damaged nearly every building in the city, and the property loss was largely above \$1,000,000; the lives lost numbered eleven. In Brunswick the damage to property was \$500,000. In Washington the destruction of public and private property was \$500,000. In Baltimore great damage was sustained. The storm demolished Cedar Keys, Fla.; loss of life about thirty.
30. The celebration of the semi-centennial of Iowa's admission as a state began at Burlington; Vice-President Stevenson, Gov. Drake and other officials were in attendance.

OCTOBER.

1. Fierce forest fires raged along the line of the Northern Pacific road in Minnesota.
4. A boiler explosion on the Santa Fe road

- at Osage City, Kas., kills seven persons.
9. Chicago day, the anniversary of the great fire, was observed in that city with political parades and a number of political meetings. There were 50,000 men in line, and the procession was six hours in passing a given point.
20. The sesqui-centennial celebration of Princeton (N. J.) college began.
22. The Florida law making it criminal to teach negroes and whites together has been held to be unconstitutional by Judge Rhydon M. Call of Jacksonville.
23. The report of the committee on education of the Illinois Baptist association indorsing the divinity school of the University of Chicago, was defeated by a vote of 72 to 22; many of the ministers claim that President Harper's theology is "not sound."
25. Eight persons were killed and twenty-one were injured in a collision of trains on the St. Louis & San Francisco railroad, at Windsor station, thirteen miles from St. Louis.
26. Two large grain elevators of the Chicago and Pacific elevator company, at Chicago, were destroyed by fire, together with over 1,000,000 bushels of wheat and other grain; the loss is estimated at \$1,200,000.
29. An explosion of gas at a colliery of the Lehigh and Wilkes Barre Coal company, at Wilkes Barre, caused a number of deaths; six bodies taken from the colliery.

NOVEMBER.

4. Capt. Hatfield, the leader of the famous Hatfield-McCoy feud, killed two men and wounded others at Matewan, W. Va.
5. The Chicago stock exchange was reopened, after being closed since Aug. 3. The Globe theater in St. Louis burned.
7. Thirty-five hundred miners struck in Jackson county, Ohio, against a reduction in the price of mining from 61 cents to 45 cents.
9. The battleship Texas sunk in the mud at the Brooklyn Navy yard.
10. J. S. Coxey of commonweal-army fame, has called a convention to meet at St. Louis to declare in favor of the demonetization of both gold and silver and substitute treasury notes therefor.
14. The Indiana republican congressmen-elect have decided to refer all applications for postoffice appointments to the patrons of the offices to be filled, and elections will be held in every city and town in the state after March 4.
16. Serious floods in Washington interfered with railroad traffic.
17. Frances E. Willard was re-elected president of the Woman's Christian Temperance union.
21. The wire-nail trust broke up, and will wind up its affairs.
22. Miss Clara Barton and her associates compiled their report relative to the Red Cross expedition to Asia Minor, showing an expenditure of \$116,326, of which about 6 per cent was for administration.
23. A bill to prohibit wearing of bloomer costumes introduced into the Alabama legislature.
24. A Concord, N. H., dispatch gives a list of twenty-two savings banks that have failed within eighteen months, with deposits of over \$17,000,000, the loss to depositors being \$4,500,000.
26. Blizzards raged in several of the north-western states.

27. A cyclone swept through portions of Texas and Mississippi.

DECEMBER.

1. Floods and ice gorges are creating great damage in northern Wisconsin, along the Chippewa river and other streams. A shock of an earthquake was felt in Cairo, Ill. In the final decision of the ecclesiastical court in the case of Bishop Bonaeum of Nebraska against Fathers Murphy and Fitzgerald is against the bishop.
3. The president issued a proclamation imposing a tonnage tax on German shipping in retaliation for taxes levied upon American vessels in German ports.
7. Congress assembled.
8. Six persons killed by a boiler explosion at Seville, Ga.
10. Ex-Queen Liliuokalani arrived in San

Francisco from Honolulu, en route to Washington.

11. The National Bank of Commerce at Duluth, Minn., closed its doors.
14. Nine inches of rain in eleven days, following previous floods, caused the highest water ever known in southern Washington, and much property and many lives were lost.
15. Charges of fraud and bribery are made against a number of Minneapolis city officials.
18. At Russellville, Ky., three brothers in jail on charge of murder were killed by a mob.
21. The National Bank of Illinois, at Chicago, failed, the failure being followed by that of E. S. Dreyer & Co. and Wasmansdorff & Heinemann. The Roseland bank of Roseland, Ill., failed. Two large demonstrations were held in New York in favor of Cuba.

FOREIGN.

JANUARY.

5. Seven ministers of the dominion cabinet resigned.
6. Cecil Rhodes resigns as premier of Cape Colony, and Sir J. Gordon Spriggs appointed to succeed him.
9. Two severe earthquakes in the Klalkhal district of Persia cause the loss of 1,100 lives.
10. Evidences of a revolt discovered in Havana and thirty arrests were made.
14. The heat in Australia reached the highest point on record in Sidney, and there were many deaths from sunstroke. The government of Brazil concludes a contract for the immigration of 100,000 foreigners, excluding Italians.
15. The Canadian ministers who recently resigned, resumed their offices.
16. The Anglo-French agreement fixing the boundary of Siam at the Mekong river, was signed.
20. Terrible fire in a theater at Ekaterinoslav, Russia, causes great loss of life.
23. Jacques Antole elected to membership in the French academy, to fill the vacancy caused by the death of De Lesseps.
25. The sultan consents to permit any person recommended by the United States minister to distribute relief funds in Armenia.
27. The Canadian house of commons rejected a resolution seeking reciprocity with the United States, on the ground that the manufactories of this country "would succeed in wiping out Canadian industries."
29. Clara Barton and her assistants arrive in England.

FEBRUARY.

1. An indemnity of \$100,000 demanded of the Turkish government for the destruction of American mission property in Armenia.
2. Eight persons killed and sixty injured by the collapse of a church in Maulevrier, France.
5. A severe earthquake was felt in eastern Cuba.
7. Gov. Maxwell of the Gold Coast colony proclaims a British protectorate over Ashantee.

Bonnell's Inks USED BY

The Illustrated American.

MESSRS. J. HARPER BONNELL CO.,
11-13 Vandewater Street, New York.

Dear Sirs: We have now used your ink for about six months and it has proved entirely satisfactory to us. We recommend it for its brilliancy and also for its fine drying qualities. When we have used it on our Gallery of Players, which is printed on a coated paper, we have gotten results which equal the very highest-priced inks we have ever purchased. Yours truly,

THE ILLUSTRATED AMERICAN.

Bonnell's Inks USED BY

The Inter Ocean.

J. HARPER BONNELL, ESQ.,
New York City.

THE INTER OCEAN, Chicago.

Dear Sir: The Inter Ocean has used your ink for a long time and we have recommended it to our friends. It has been very satisfactory to us and we have had fewer complaints from our press room on account of it than any ink we have ever used. If you keep it up to its present high standard we hope always to be able to use it. Yours truly,

WM. PENN NIXON, Publisher.

Bonnell's Inks USED BY

"Frank Leslie's."

Frank Leslie's Illustrated Weekly.

Frank Leslie's Illustrierte Zeitung.

Arkell Weekly Company, Proprietors.

Judge Building, Cor. Fifth Avenue and 16th Street, New York.

MR. J. HARPER BONNELL,
New York City.

Dear Sir: On March 17, 1892, we printed the following:

"Mr. J. Harper Bonnell has furnished all the ink for Frank Leslie's Illustrated Weekly for many years, to the entire satisfaction of the publishers, and since the formation of his new company he has excelled himself. The inks made by the J. Harper Bonnell Company are especially adapted for fine engraving and half-tone printing. This week's paper is a sample of the kind of work these inks can do, and give us the utmost satisfaction."

We can repeat same in stronger words, if possible.

Yours very truly,

W. J. ARKELL.

1888—Elkwood, 5yrs, 119lbs, 2:07½; \$6,812.
1889—Raceland, 4yrs, 120lbs, 2:09 4-5; \$6,900.

Science, Industry, Electricity

These Three.

Almost every reader of a daily or weekly newspaper has some vital interest in the above topics. The object of my syndicate service is to present the newest discoveries and inventions in Science, Industry and Electricity in a form which, while technically accurate, is comprehended by and made entertaining to the ordinary newspaper reader.

I conduct the oldest and most successful Bureau furnishing original columns of matter relating to the latest things in each field. Many papers of national reputation are my steady customers. I supply also special columns and special stories.

I restrict my work to these three departments, with which I am in close, daily touch. I have personal acquaintance with and access to the leading workers and inventors in all directions.

I shall be glad to enter into correspondence with any daily or weekly paper as to syndicate matter at very reasonable rates.

GEORGE H. GUY, 203 Broadway, New York City.

NORTHWESTERN LIFE ASSURANCE COMPANY

Founded 1874.

OF CHICAGO.

Founded 1874.

Its pre-eminent characteristics are

Security and Economy.

It has assets of \$266 for every \$100 of liability and has promptly paid death claims aggregating

\$18,500,000.00

New ideas, and provisions of great value to the insured are embodied in its

Latest Policy Forms

Making them the most liberal and desirable contracts extant, and its *safety clause* enables the company to quote

The Lowest Practicable, Stable Rates.

 1894—Ladas, by Hampton, 2:45 4-5.
 1895—Sir Visto, 2:43 2-5.
 1896—Persimmon, 2:42.

TURF ITEMS OF INTEREST.

Richest American stake ever run was the Futurity of 1890, won by August Belmont's Potomac; total value of the stake, \$77,700, divided between first, second and third horses.

The largest amount ever won by an American 2-year-old, \$184,000, by Domino, owned by J. R. and F. P. Keene, 1893.

Greatest winning 3-year-old, Hanover, by Hindoo; won twenty races and \$89,827.

Highest price ever paid for a horse, \$150,000; paid by W. O. MacDonough of San Francisco for Ormonde, b. s., by Bend Or-Lilly Agnes, October, 1892.

Highest price ever paid for a trotter, \$125,000, by J. Malcolm Forbes of Boston to Leland Stanford, Palo Alto stock farm, California, in 1892, for Arion, b. c., 2-year-old record 2:10¾, by Electioneer-Manette.

Prince of Wales' entry won the English Derby two successive seasons—1895 and 1896.

Pedestrianism.

RUNNING.

Amateur performances designated by an *.

- 20 yards—*2 4-5s., E. B. Bloss, Boston, Mass., Feb. 22, 1892.

| 1883..... | 23       | 2        | 1893..... | 6              | 0        |
| 1884..... | 52       | 0        | 1894..... | 12             |          |

Highest score—England: 17 goals to 0, Nottingham Foresters, match, Derbyshire, March 30, 1881. America: 158 points to 0, Harvard college, match with Exeter, Exeter, Mass., Nov. 3, 1886.

H. A. F. Chambers dribbled the ball around the hurdle forming the 120yds. hurdle course in 44 $\frac{1}{2}$ s., Finchley, England, May 18, 1878.

Place kick, with a run—200ft. 8in., William P. Chadwick, Exeter, N. H., Nov. 29, 1886. \*187ft. 10in., R. Young, Glasgow, Scotland, July 2, 1881. 174ft., S. Pritchard, Brisbane, Australia, October, 1882; S. Brutton, aged 14 years, placed 13 goals out of 14 attempts, Leatherhead, England, March, 1884.

Drop kick—172ft. 8in., F. Hardgrave, Queen's Park, Brisbane, Australia, October, 1882. \*161 ft. 9in., M. Cooper, Cambridge university, Cambridge, England, Nov. 21, 1881. \*168ft. 7 $\frac{1}{2}$ in., J. E. Duffy, Ann Arbor, Mich., May 22, 1886.

#### Miscellaneous.

##### TYPEWRITING.

Charles H. McGurrian, memorized sentences, 208 correct words in one minute before the London Press club, London England, on No. 2 Remington, Sept. 15, 1892.

John S. Cass, memorized sentences, 145 words in one minute; same, blindfolded, 136 words in one minute; new matter from dictator, 136 words per minute; on Remington typewriter; accurate work; at Illinois state fair, Peoria, Sept. 29, 1892.

Miss Mae E. Orr, writing five minutes each on legal testimony and ordinary correspondence, wrote 987 words, averaging nearly 99 words per minute; Toronto, Canada, Aug. 13, 1888.

8,709 words in 1h. 30m.; 4,294, or 95.55 per minute from dictation, and 4,15, or 98.11 per minute from copy, 45 m. each; Frank E. McGurrian, Cincinnati, O., July 25, 1888.

At St. Louis June 12, 1896, Curtis St. John wrote 1,080 words, dictated from a newspaper, in ten minutes.

##### SHORTHAND.

Isaac S. Dement, writing one minute on new matter, at Clear Lake, Iowa, on July 22, 1890, 309 words and read his notes accurately.

Same conditions, at Dayton, O., Aug. 26, 1890, 315 words.

In a private test at same place and same conditions, on Aug. 29, 1891, 347 words with perfect accuracy.

Same conditions at Chicago, Oct. 4, 1891, 350 words.

##### Billiards.

Best run, 3-ball straight-rail game, 2,572; Harvey McKenna, Boston, Mass., Dec. 21, 1887; average, 416 $\frac{1}{2}$ . At San Francisco in 1893 Jacob Schaefer ran 3,000 at straight-rail game on 4 $\times$ 9 table. Best run, 4-ball carom game, 1,433; J. McDevitt, New York, Jan. 8, 1888. Best at champions' game, 3-ball carom, 14x28 lines—398, George Slosson, Paris, France, February, 1882; in America, 351, J. R. Heiser, New York, Feb. 14, 1884. English spot stroke game, 3,304; W. J. Peall, London, England, Nov. 3 to 8, 1890. Fourteen-inch balk-line game, 566, Jacob Schaefer, in a match with Frank Ives and

George Slosson, New York, Dec. 16, 1893; 456, Frank Ives, in a match with Jacob Schaefer, Chicago, Nov. 24, 1893. Both these runs made with the "anchor nurse"; 359, Frank C. Ives, Chicago, match with Jacob Schaefer, Dec. 6, 1894, "anchor nurse" barred. Cushion-carom game—Best run by Frank C. Ives at Boston, April 14, 1896, 85.

#### Ocean Steamships.

No records were broken in 1895. The Cunarder *Lucania* still holds the record from Queenstown to New York—5d., 7h., 23m.; average speed per hour, 22.01 knots; greatest day's run, 560 knots, or average speed per day, 25.57 miles; greatest day's run, 645 miles. The *Lucania* also holds the record from New York to Queenstown—5d., 8h. and 48m. Both runs were made in 1894.

The best trips for 1895 are: Umbria—Fastest trip westward from Liverpool, 5d., 22h., 7m.; Etruria—Fastest trip eastward from New York, 6d., 40m. Both belong to the Cunard line.

#### THE TRANSATLANTIC RECORD BY YEARS.

## QUADRUPLE NEWSPAPER PERFECTING PRESS.

Prints, and delivers folded, four, six or eight page papers at the rate of 48,000 per hour; ten, twelve, fourteen or sixteen page papers at 24,000 per hour, and twenty or twenty-four page papers at 12,000 per hour.

We Also Manufacture and Supply  
**Printing Presses of Every Description,  
 Printers' and Lithographers' Materials,**

Including

Wrought-Iron Chases.  
 Stereotype Blocks.  
 Gallies.  
 Cabinets and Stands.  
 Case Racks.  
 Rubber and Cloth Blanketing.  
 Tape.  
 Moleskin, Molleton and Flannel for Rollers.  
 Roller Skins.  
 Card and Paper Cutters.

Labor-Saving Furniture.  
 Lead and Rule Cutters.  
 Miter Machines.  
 Imposing Tables with Letter Boards.  
 Composition Kettles.  
 Proof Presses.  
 Card and Ticket Presses.  
 Brass Rules and Dashes.  
 Composing Sticks.  
 Counters.

Electrotyping and Stereotyping Machinery.  
 Hydraulic Presses and Pumps.  
 Circular Saws.  
 Copying Presses, &c., &c.

**504 Grand Street, = = = = New York.**

Also:

**Mansfield Street, Borough Road, London, England.**

Salt Lake, Utah, Aug. 30, 1888. \*8:41, pair-oared shell, straightaway, J. H. Clegg and F. D. Standish, Excelsior Boat club, Lachine, Canada, Aug. 19, 1882.

2 miles—\*9:43½, eight oars, straightaway, Columbia college crew, New London, Conn., June 26, 1884. \*12:16, double-scutt, turn, F. E. Yates and C. E. Courtney, Saratoga, N. Y., Aug. 8, 1876. \*12:20¾, pair-oar, straightaway, J. H. Riley and J. A. Kennedy, Greenwood lake, N. Y., Oct. 9, 1876. \*13:21¼, single scull, turn, J. H. Riley Saratoga, Aug. 9, 1876.

2½ miles—\*12:57, eight oars, straightaway, Yale university crew, New London, Conn., June 29, 1888.

3 miles—\*15:25, eight oars, straightaway, Yale university crew, New London, Conn., June 29, 1888. \*15:37¼, four oars, straightaway, Argonaut R. A. Kill von Kull, N. J., Sept. 8, 1875. \*16:32 4-5, six oars, straightaway, Amherst university, G. E. Brewer, B. L. Brown, L. Bradley, Jr., F. M. Wilkins, A. J. Benedict, W. Negley, Springfield, Mass., July 24, 1872. \*17:34¾, eight oars, straightaway, Cornell university crew, Owasco lake, N. Y., July 17, 1878.

#### RECORD OF AMERICA CUP RACES.

1851—Aug. 22, around the Isle of Wight: America, 10:37:00; Aurora second.

1870—Aug. 8, New York Yacht club course: Magic, 3:58:21; Cambria, 4:37:33.

1871—Oct. 16, New York Yacht club course: Columbia, 6:19:41; Livonia, 6:46:45. Oct. 18, 20 miles to windward off Sandy Hook and return: Columbia, 3:07:41¾; Livonia, 3:18:15½. Columbia disabled in third race Oct. 19. Oct. 21, 20 miles to windward off Sandy Hook and return: Sappho, 5:39:02; Livonia, 6:09:23. Oct. 23, New York Yacht club course: Sappho, 4:16:17; Livonia, 5:11:35.

1876—Aug. 11, New York Yacht club course: Madeleine, 5:23:54; Countess of Dufferin, 5:34:53. Aug. 12, 20 miles to windward off Sandy Hook and return: Madeleine, 7:18:46; Countess of Dufferin, 7:46:00.

1881—Nov. 9, New York Yacht club course: Mischief, 4:17:00; Atalanta, 4:45:39¾. Nov. 10, 16 miles to leeward off Sandy Hook and return: Mischief, 4:54:53; Atalanta, 5:33:47.

1885—Sept. 14, New York Yacht club course: Puritan, 6:06:05; Genesta, 6:22:24. Sept. 16, 20 miles to leeward off Sandy Hook light and return: Puritan, 5:03:14; Genesta, 5:04:52.

1886—Sept. 9, New York Yacht club course: Mayflower, 5:26:41; Galatea, 5:35:43. Sept. 11, 20 miles to leeward off Sandy Hook light and return: Mayflower, 6:49:10; Galatea, 7:18:09.

1887—Sept. 27, New York Yacht club course: Volunteer, 4:53:18; Thistle, 5:12:41¾. Sept. 30, 20 miles to windward off Scotland light and return: Volunteer, 5:42:56¾; Thistle, 5:54:45.

1893—Oct. 7, 15 miles to windward off Sandy Hook light and return: Vigilant, 4:05:47; Valkyrie, 4:11:35. Oct. 9, triangular 30-mile course, first leg to windward: Vigilant, 3:25:01; Valkyrie, 3:35:36. Oct. 13, 15 miles to windward off Sandy Hook light and return: Vigilant, 3:24:39; Valkyrie, 3:25:19.

1895—Sept. 7, 15 miles to windward and return, east by south off Point Seabright, N. J.: Defender, 4:57:55; Valkyrie III, 5:08:44. Sept. 11, triangular course, 10 miles in each leg, Valkyrie, 3:55:09; Defender, 3:55:56; won by Defender on a foul. Sept. 13, Defender sailed over course and claimed cup and race; claim allowed.

#### YALE RACES AT HENLEY.

The Yale crew visited the Henley regatta during 1896, and on July 7 was defeated by the Leander crew. Yale's crew probably will make it an annual trip.

#### Railroading.

All long-distance railway runs were broken in 1895 by both the Lake Shore and New York Central systems. The following table shows the best runs made in America and Europe. It can be seen that the best run was made by the Lake Shore:

|                                                              | Lake Shore & Mich. South'n | N. Y. Central & H. R. R. R. | West Coast Route. |
|--------------------------------------------------------------|----------------------------|-----------------------------|-------------------|
|                                                              | 1895.                      | 1895.                       | 1895.             |
| Date.....                                                    | Oct. 24.                   | Sept. 11.                   | Aug. 22-3.        |
| Number of cars.....                                          | 3                          | 3                           | 3                 |
| Weight of cars.....                                          | 304,500 lbs.               | 361,310 lbs.                | 150,080 lbs.      |
| Starting point.....                                          | 100th st., Chicago.        | New York. East.             | London.           |
| Finish.....                                                  | Buffalo Creek.             | Buffalo.                    | Aberdeen.         |
| Total dist. in miles.....                                    | 510.1                      | 496.32                      | 539.75            |
| Total time in minutes and seconds.....                       | 481m. 7s.                  | 411m. 56s.                  | 512m.             |
| Average speed in miles per hour.....                         | 63.61                      | 63.54                       | 63.24             |
| Total time in motion.....                                    | 470m. 20s.                 | 407m. 41s.                  | 505m.             |
| Average speed, deducting stops.....                          | 65.07                      | 64.22                       | 63.93             |
| Length of div'n on which fastest average speed was made..... | 86 miles.                  | 145.6 miles.                | 141.25 miles.     |
| Average speed on said division.....                          | 72.92 miles.               | 65.75 miles.                | 67.50 miles.      |

Some of the remarkable features of the Lake Shore run are as follows:

|                                                       | Miles per hour. |
|-------------------------------------------------------|-----------------|
| 1 mile at the rate of.....                            | 92.30           |
| 8 miles (Ripley to Westfield) at the rate of.....     | 85.44           |
| 33 miles (Moorehead to Van Buren) at the rate of..... | 80.06           |

Prior to this the best runs were as follows:

May 9, 1893, the Empire State express on the New York Central & Hudson River rail road, consisting of engine 999, three coaches and a Wagner drawing-room car, made a run of 102 miles in 1h.

May 10, 1893, the same train ran 1 mile in 32s., a rate of 112½ miles in 1h.

The "Exposition Flyer," an engine and four Wagner coaches, repeatedly made the run from New York to Chicago, 976 miles, in 20h. The record noted on May 10—a mile in 32s.—has been questioned by some railroad men.

1 mile—37s., Philadelphia & Reading railroad. Nov. 20, 1892; engine had 6½-foot drivers; train, one combination car, two day coaches and a Pullman car.

2 miles—1m. 15s., same train; second mile in 38s.

3 miles—1m. 54s., same train; third mile in 39s.

5 miles—3m., 25s., same train, five consecutive miles, an average of 57.8 miles an hour; this

## THE COMIC SKETCH CLUB,

Cartoons to Order.

Magazine Illustrations.

Syndicate Sketches, Etc.

- train also ran five miles on a section having a heavy grade in 4m., an average of 75 miles an hour.
- 1 mile—39 4-5s., Philadelphia & Reading railroad, Aug. 27, 1891; 50 1/4s., during run of special train from West Philadelphia to Jersey City, Sept. 4, 1879.
- 2.1 miles—1m. 30s., engine 366 and an ordinary day coach, P. & R. R. R., Yardley to Trenton Junction, N. J., March 10, 1890.
- 2.9 miles—2m., engine 366 and an ordinary day coach, P. & R. R. R., Somerton to Neshoay Falls, N. J., March 10, 1890.
- 3.1 miles—2m., engine, two parlor cars and dining-room car, P. R. R., Aberdeen to Perryman's, N. J., March 10, 1890.
- 4.1 miles—3m., engine 366 and an ordinary day coach, P. & R. R. R., Skillman to Belle Mead, N. J., March 10, 1890.
- 6.1 miles—4m. 30s., engine 366 and an ordinary day coach, P. & R. R. R., Bethayres to Neshoay Falls, N. J., March 10, 1890.
- 10 miles—8m. 3s., Skillman to Weston, N. J., engine 366 and one ordinary day coach, P. & R. R. R., March 10, 1890.
- 14 miles—11m., locomotive Hamilton Davis and six cars, N. Y. Central R. R., 1885.
- 18 miles—15m., special train conveying the duke of Wellington, Paddington to Slough, England.
- 27.1 miles—26m., special extra 953 and two cars, Pennsylvania R. R., Morrisville to Germantown Junction, Pa., May 6, 1885.
- 36.7 miles—34m., special extra 953 and two cars, Pennsylvania R. R., Rahway to Trenton, N. J., May 6, 1885.
- 44 miles—43m. 30s., special train conveying newspaper correspondents, last 16 1/4 miles in 14m., Washington Junction to Washington, D. C., June 10, 1884.
- 53 1/4 miles—47m., broad-gauge engine Great Britain, four carriages and vans, Paddington to Didcot, England, May 11, 1848.
- 54.9 miles—49m. 30s., engine 366 and one ordinary day coach, P. & R. R. R., Wayne Junction, Pa., to Bound Brook, N. J., March 10, 1890.
- 59.2 miles—56m., engine 366 and one ordinary day coach, P. & R. R. R., Philadelphia (9th and Green streets) to Bound Brook, N. J., March 10, 1890.
- 89.4 miles—91m. (actual running time 85m.), special train, engine 366 and one ordinary day coach, P. & R. R. R., 9th and Green streets, Philadelphia, to Jersey City, N. J., March 10, 1890.
- 90 miles—1h. 37m. (actual running time 90m.), special extra 953 and two cars, Pennsylvania R. R., Jersey City to Broad street station, Philadelphia, May 6, 1885; 1h. 47m., train 19, engine 733 and six cars, two regular stops, Jersey City, N. J., to Broad street, Philadelphia, Feb. 12, 1889.
- 111 miles—98m., Fontaine engine and two coaches, Amherstburg to St. Thomas, Canada, May 5, 1881; 109m., locomotive, baggage car, one coach and one Pullman palace car, St. Thomas to Amherstburg, Sept. 13, 1877.
- 118 miles—120m., engine No. 10, special palace car; 17 miles (Welland to Victoria) in 14 1/2m.; St. Thomas to Victoria, Canada, 153 miles, Fontaine engine and two coaches, in 25 1/2m., May 5, 1881. The schedule time from London to Bristol, England, 118 1/2m., by the train known as "The Flying Dutchman," is 120m.
- 157.74 miles—165m., special train, Niagara Falls to Syracuse, N. Y., March 1, 1876. 158 miles in 178m., West Coast Flyer, London to Crewe, England, Aug. 6, 1888.
- 180.1 miles—188m., exclusive of stops (no time given including stops), Chicago & Northwestern, Clarence, Iowa, to West Fortieth street, Chicago, April 22, 1891.
- 228 miles—A Pennsylvania railway train consisting of one Pullman combination car, a parlor car and an observation car made the run from New York to Washington, Nov. 28, 1891, in 4h. 11m. The 11m. was consumed in stops and changing locomotives, making the actual running time 4h., an average of 57 miles an hour.
- 228.9 miles—4h. 18m., including stops, A. M. Palmer's special theater train, two parlor cars and a Pullman dining car, Pennsylvania R. R., Jersey City to Washington, D. C., March 10, 1890. Made return trip same day in 4h. 19m.
- 400 miles—7h. 25m., West Coast Flyer, London to Edinburgh, Scotland, Aug. 6, 1888.
- 436 1/4 miles—New York to Buffalo, New York Central & Hudson River railroad (actual running time), 7h. 49m., Sept. 14, 1891. The train consisted of engine No. 870, weight 100 tons; private car No. 347, weight 88,500 lbs.; Wagner Palace Car company's private cars Traveler, weight 77,500 lbs., and Marigutta, weight 93,600 lbs. Total weight of train, 230 tons, about equal to that of an ordinary passenger train of five cars. The run from New York to Albany, 143 miles, which was made without stop, occupied 140m.; the distance from Albany to Syracuse, 148 miles, was covered in 146m., and that from Syracuse to East Buffalo, 146 miles, in 147m. 44s. The change of engines at Albany required 3m. 28s., the change at Syracuse 2m. 58s., and a hot journal at Fairport occasioned a delay of 7m. 50s. The gross time of the trip from New York to East Buffalo, 436 1/4 miles, was 439 1/2m (7h. 49m.), including all stops, while the actual running time, exclusive of all stops, was 425m. 44s. (7h. 41m. 10s.) for the 436 1/4 miles. An accurate schedule of the time between stations was kept by a disinterested party. The 4.08 miles between Kirkville and Chittenango were made in 3m. 34s., or at the rate of 68.63 miles an hour. The 5.37 miles between West Batavia and Corfu were made in 4m. 20s., a speed of 74.35 miles an hour. The run from Forks to East Buffalo, 3.25 miles was made in 2m. 36s., a rate of 75 miles an hour.
- 486.7 miles—Council Bluffs to Chicago, April 22, 1891, Jay Gould's special train, including baggage car, one ordinary passenger coach, and Mr. Gould's private car. The entire distance was made in a little less than ten hours, including stops, an average of 49.6 miles per hour; actual running time averaged 52.9 miles per hour.
- 813 miles—23h. (actual running time 19h. 30m.), special train conveying Washington newspaper correspondents from convention, Chicago, Ill., to Washington, D. C., June 7 and 8, 1884.
- Jersey City to San Francisco, Cal., 83h. 39 m. 16s. Jarrett & Palmer's train, combination passenger mail and baggage car and Pullman hotel car, June 1 to 4, 1876. No stop between Jersey City and Pittsburg, Pa.
- Notable performances in 1896 were:
- 185 miles—206m., including stops, 184m. exclusive of stops, Chicago & Alton, Chicago to Springfield, April 30, 1896.
- 181 miles—221m., including stops, 210m. exclusive of stops, Chicago, Rock Island & Pacific, Rock Island to Chicago, Nov. 8, 1896.

## TRADE, COMMERCE AND MANUFACTURES IN 1896.

Following are brief reviews of the general conditions prevailing in various important lines of business in 1896:

## FINANCIAL REVIEW.

The year 1896 was one of great vicissitudes and far from satisfactory from a financial point of view. The severe depression caused by the Venezuelan message of President Cleveland had almost reached a condition of panic when 1896 was ushered in. Bank deposits were low and steadily declining, gold exportations were in active progress, and the gold redemption fund of the government was suffering rapid depletion. A rupture with England was imminent and war probable. American securities found no market abroad and brought only panic prices at home. A realization of what would result from an armed conflict between the two great English-speaking nations served to paralyze business, destroy values and fill the hearts of all with direst apprehension. In the midst of the financial storm which was then sweeping over the country the secretary of the treasury was compelled to offer for sale by popular subscription \$100,000,000 of United States 4 per cent bonds, in order to maintain the redemption of the government notes in gold. A failure of the loan would have involved degradation of the monetary standard, grave impairment of public and private credit and national dishonor. And yet, during the entire month intervening between the offering of the bonds and the opening of the bids its success was involved in the gravest doubts.

On the 5th day of February the bids were opened and a gratifying success was disclosed. It was found that the bids greatly exceeded the offerings in amount and the price realized was unexpectedly satisfactory. At once the waning credit of the government was re-established and returning hope and courage filled the hearts of the people. From that day until midsummer there was noted a gradual improvement in the business conditions of the country.

Diplomacy succeeded in dispelling the war cloud which had hung over us, the return of our securities gradually ceased and the exportation of gold fell to insignificant proportions. Bank deposits gradually increased, interest rates declined, production became normal, labor found employment and the expectation of an abundant harvest gave promise of returning prosperity. Such continued to be the prevailing conditions until the Chicago convention in July made the free and unlimited coinage of silver at the ratio of 16 to 1 the chief issue of the campaign. The political contest was carried on with great activity on both sides and for four months the country was in a state of turmoil and uncertainty.

In the midst of a fertile land, blest with a bounteous harvest, with unequaled manufacturing and commercial facilities and every element and evidence of material wealth, depression, stagnation and paralysis of all commercial interests were visible. Business in all lines was limited to the production and distribution of a minimum volume of the absolute necessities of life. The money market was characterized by extreme stringency and failures were unusually numerous. The relief experienced by the business interests of the country as

soon as the result of the election became known was instantaneous. Manufacturing establishments long idle immediately started their machinery, the distribution of commodities was conspicuously accelerated and again bank deposits increased and interest rates declined. During the early fall months prices of cereals rapidly advanced and the large exportations of farm products so greatly exceeded our restricted importations that the balance of trade in our favor resulted in large importations of gold from Europe and Australia.

We therefore close the year with confidence in the future. The integrity of our monetary standard is delivered from peril and needed currency reforms are probable; tariff changes are to be made, but conservatively and with a view to the fuller employment of our own labor and capital; unusually abundant harvests have been gathered and our entire surplus is needed abroad at a much higher price than has prevailed for several years; the stocks of merchants are cheap and scanty, with a reasonable certainty that larger consumption will result in increased production and higher prices; several years of depression and panic have eliminated by failure and liquidation the weak and improperly managed business houses which have heretofore, by illegitimate competition, made impossible the fair profits by which alone prosperity can be assured.

For these and other reasons unnamed we enter upon the new year confident that the groundwork for a business revival has been securely laid.

E. S. LACEY.

## LIVE STOCK.

In point of volume the aggregate receipts of live stock in Chicago in 1896 were not the largest in the history of the trade but were large enough to be highly satisfactory to both shippers and producers when all the circumstances are taken into consideration. The supply footed up 2,600,000 cattle, 7,700,000 hogs and 3,600,000 sheep, which, compared with 1895, shows a gain of 12,000 cattle, a loss of 185,000 hogs and a gain of 200,000 sheep. Stated in money it represents a valuation of \$200,000,000—a figure almost incomprehensible and large enough to easily place it in the front rank of Chicago's great enterprises. Prices, however, were not altogether satisfactory. The year was marked with a good deal of indifference on the part of buyers and business moved in a sluggish fashion. The outlet was not up to expectations, hard times having thrown many persons out of employment and so lessening the general consumption of meats.

When the year opened native beef cattle were selling at \$3.15 to \$4.60. The range at the close was \$3.50 to \$5.50. There was a continuous but not very pronounced decline in prices up to July, when a decrease in receipts of this class caused values to strengthen a little, but there was no notable advance until in September. From that time until the Christmas season choice cattle sold very well and prices reached the highest point in December, when \$5.90 was paid. This was 40 cents higher than the top price for Christmas cattle in 1895, though in March that year \$6.60 was reached. The quality was hardly up to the standard. Farmers and stock-raisers were in many cases hard pressed for money and were

obliged to send their cattle to market prematurely to meet pecuniary obligations. The ranges throughout the west were not in the best condition for maturing cattle to good advantage and the general condition of the stock was the poorest in years. Prices naturally ruled low and ranchmen were not very well pleased with the season's business.

In the export line business was good. With low prices in Chicago and good prices in London the margin for the exporter was broad and trading was stimulated to considerable activity. In the course of the year 243,000 cattle were shipped abroad alive.

The year 1896 will go on record as being the lowest in hog prices of any time since 1879. This was not brought about by excessive supplies but by a lack of demand on the part of packers. The price of provisions not only reached the lowest point in many years but remained so low all year that packers could not operate except at low prices. They had to depend largely on the fresh-meat demand, which was not overly promising at any time. January's trade opened with sales at \$3.40 to \$3.70 and in the month reached \$3.95 to \$4.30, but from that time declined, reaching the low point Aug. 1, when the range stood at \$2.55 to \$3.40. The crop of hogs usually marketed in November and December came in September and October and receipts during the closing months were very disappointing. More spirited competition was therefore engendered and the tendency of the trade was upward. Hog cholera had much to do with the lessening of receipts.

The receipts of sheep were the largest on record. Almost without interruption there has been a steady increase in the supply of sheep for twenty years. Formerly they were raised chiefly for wool but now the demand is as pronounced for mutton as for beef or pork. This has caused not only an increase in supply but in a better quality and more well-bred sheep were noticed than ever before. Prices in a general way were quite satisfactory, ruling low for inferior grades and high for the best. The year opened with sheep at \$1.50 to \$4, lambs \$2.50 to \$5. The highest price was paid in June, when sheep sold at \$4.60 and lambs up to \$6.60. The year closed with exactly the same prices as a year ago.

#### WOOL.

The course of the wool trade in 1896 was marked by disappointment from start to finish. The season opened fairly well. The Dingley bill, placing a duty of 6.6 cents per pound on wool, had passed the house and it was generally believed might pass the senate and become operative at once. This stimulated demand materially. Manufacturers having taken orders for goods were anxious to cover and purchased good lines of raw material in anticipation of a still further advance, while many dealers, being of the same opinion, declined to sell at going prices. The failure of the senate to pass the bill checked operations. The manufacturer having wool enough to fill his orders was out of the market, the consequence being that a large amount of wool was left in the hands of dealers, to be carried into the new clip. When the latter came on the market fully 70 per cent of the machinery of the country was idle. Thus, with diminished consumption and large stock on hand, values declined, until in August they had reached the lowest point

in the history of the trade. In October, the result of the election having been to a certain extent discounted, a marked improvement took place. Many manufacturers bought heavily in anticipation of a higher holding of wools and better prices were realized than for several months, or since the new clip came on the market. In the latter part of November and the first weeks in December the trade again fell off. Orders for goods were disappointing and while some machinery was started fully 50 per cent remained idle. The year closed with prices from 1 to 2 cents a pound lower than at the beginning.

#### LEATHER.

"Uncertainty," "hesitation" and "doubt" characterized the trade for the year. The price for the medium grades of leather reached the lowest point ever known in the history of the trade in January, 1895. Immediately after, in sympathy with a sharp advance in hides, leather of all kinds appreciated in price, until in the month of May the advance was fully 50 per cent and remained firm until October. A break then occurred and, with a declining market, January, 1896, opened with a depressed feeling and a dull trade, which continued for months. The demand was limited to actual necessities. There was no life in any department of business. Shoe factories east and west were running (if at all) on half time and the prospect was far from cheering. The outcome of one of the most exciting political campaigns in our nation's history was in doubt and not until after the election did the business show any revival. A spasmodic attempt was made in September to push up prices and it partially succeeded, but it seemed to be unwarranted and a decline followed. The market at the close of the year shows firmness, with prices fully 15 per cent higher than in January. It was a year of alternate hope and fear and when the account is closed it is extremely doubtful upon which side of the ledger the balance will be placed. Yet, with an abiding faith in the recuperative power of trade, the great leather industry looks forward with full confidence in the future.

In the leather-belting line the most noted feature of the year's business was overproduction. The demand for goods was small and prices were low. The trade was in consequence very much depressed, with no prospect of better conditions in the near future. Experts say the capacity of belt-making concerns in the country is probably twice what the demand is, the result being demoralization in prices and business methods.

#### SHOES.

A declining leather market confronted the shoe trade at the commencement of the year. The fluctuations through which the business had passed in 1895 had impressed lessons of extreme conservatism upon the trade and the demand for goods was reduced to actual pressing needs. Manufacturers and wholesale dealers found extreme difficulty in securing any large orders for goods. Retailers claimed to be overstocked and invariably declined to increase their indebtedness, and for the first six months of the year the shoe trade suffered almost a paralysis, which was not lifted until the assurance of the election of McKinley was felt, when trade revived and began to show some vitality. The business of the year was unique in some of its

# THE DAILY NEWS

Was started some twenty years ago. Its promoters were not overburdened with capital and they had to hustle in order to make both ends meet. Today the paper stands first in circulation and first in advertising, no American daily excepted. The point is that nearly all great newspapers are begun on small capital. Energy is the best capital.

# THE COUNTRY DAILY

May occupy the same field of usefulness in its own territory that the Daily News does in Chicago. Nearly all our smaller cities are in need of such a paper. The want can be supplied for small capital. Our Plate Service and Special Wire Report for Country Dailies is just the thing for such a project.

## INTERNATIONAL PRESS ASSOCIATION

characteristics. While trade in general was dull and profitless there were exceptional instances where an increased volume of business was done over previous years, notably by merchants who confined themselves to "specialties" carried in stock in all widths, styles and sizes and sold at factory prices. The tendency of the wholesale trade is toward concentration on a few select and popular lines, thereby giving the retailer a better opportunity of selecting his goods, with the assurance of replenishing his stock more readily than if he depended upon a house carrying a mixed stock. In the early fall many orders were placed contingent upon the election, and the first part of November showed an activity unequalled in any previous month of the year. The last few weeks of the year, however, were disappointing.

The outlook for 1897 seems promising. One of the favorable conditions is the increase in cash sales and the consequent abridgement of credit. Formerly boots and shoes were sold on four months' time and in many instances a much longer time was allowed. The demand for cheap goods was really responsible for this shortening of credits. Competition caused the different manufacturers to get out what are called leaders. Prices were cut on them and cash terms made to bring the production and sale cost down to the minimum.

That customers have bought cash goods and in larger volume than ever before is an indication of the inherent strength of the country to meet present or future adverse conditions.

The cash system has furnished the needed element of safety and while the abolition of long-time credits has curtailed profits it has diminished the risk of losses by bad debts.

#### APPLES.

The year 1896 opened up in the apple trade with fairly good stocks on hand at all the large centers and rather a light stock held by growers. The storage in the east was, however, comparatively light, as in that part of the country there had been an almost total failure of the crop in 1895. Trade opened with No. 1 eastern fruit, such as Baldwins and Greenings and western Ben Davis, bringing from \$2 to \$2.25 and the fancy varieties from 50 to 75 cents per barrel higher. A slow but steady advance in these prices was seen until about the first part of April: when fine eastern varieties were selling at \$3 to \$3.50 and Ben Davis from \$3.25 to \$3.50. Heavy arrivals for some time at this period, induced by the higher prices ruling, made a very weak market and in some cases cars of fine eastern fruit were sold down to \$2.50. This depression lasted for about a month and until the eastern fruit was about disposed of.

Perhaps the feature of the 1895 and 1896 apples was the change in the relative value of the eastern and western varieties. In the fall of 1895 the eastern varieties were the favorites and sold from 25 to 50 cents per barrel more than the standard western varieties but before the season was over, in May, 1896, this had not only been recovered but an additional 35 to 50 cents in favor of the western fruit was being obtained. The season which closed in May was a fairly profitable one for apple dealers.

The present season (fall of 1896) started in with prospects of an enormous crop in all the sections which had been light the year before, notably the northern and east-

ern sections, and rather light yields in the western and southern sections of the apple country. These prospects were fully materialized and that which had long been predicted came true—with a full crop in all sections of the country a large proportion of the apples could not or would not be marketed at any price. Hundreds of thousands of barrels which were supposed to have been marketed both abroad and in this country either brought their shippers nothing or almost nothing, and in many cases brought them actually in debt to the auction or commission men. In New England from 100,000 to 200,000 bushels of apples were donated to the poor and in Chicago the same thing might have been done with stock which simply went to waste.

At the close of the year fine Baldwins and Greenings sold at less than half what they were a year ago and about one-third what they were two years ago. Good fruit in carload lots sold at 75 to 90 cents. At retail from 15 to 25 cents more was paid. These prices were so much lower than any ever known before that the consumption was greatly increased, but it is not yet as large as it will be when the public gets the idea that the apple is the cheapest and best article of diet in the market.

As to the total quantity grown in the season of 1896 many estimates have been made, running all the way from 59,000,000 barrels to 200,000,000 barrels. In the nature of the case no reliable estimate can be made until well along in the spring, but considering that the export has been about 2,400,000 barrels, or five times that for the same period last year, and that the size of stocks east and west has been greatly increased it would seem that the crop of 1896 was from 160,000,000 to 180,000,000 barrels. Of this vast total perhaps one-fourth was wasted.

#### WHOLESALE CLOTHING.

The wholesale clothing trade for the year 1896 will show a decline computed in dollars of about 20 per cent. The volume of business so far as garments are concerned was about equal to that of 1895, but the goods handled were of a lower grade, so that business generally showed a shrinkage in the money aggregate. There was also a falling off in the price of the materials, though the price paid for labor in the manufacture of garments was not decreased. The demand from the country trade through the year was for lower-priced fabrics and merchants bought more sparingly. The number of failures was not greater than usual and payments were fairly met. The November election disturbed the trade very seriously and restricted purchases. After the election buyers became more confident and some improvement was noticed. The higher price obtained for wheat also helped things somewhat. It is expected that business will continue in 1897 on a conservative, cautious basis but free from the uncertainties of politics, which proved such a drawback in 1896.

#### PHOTOGRAPHIC SUPPLIES.

In photographic supplies the business done compared favorably with that in 1895. The prices remained about the same, with a downward tendency in some grades of goods. The demand was principally for the cheaper articles. Many and fairly good cameras ranging in price from \$5 to \$15 were thrown on the market to meet the demand of amateurs, the number of whom seems to be

constantly increasing. At the closing of the year the trade gave indications of an early and quick recovery from the effects of the long-continued stagnation.

#### PAPER.

From manufacturer to jobber the year's business in the paper trade was very unsatisfactory. The market was depressed in sympathy with the unfavorable conditions prevailing in other industrial lines and the outlook at the close of the season was not especially hopeful. Eastern manufacturers of print paper were at the close of the year trying to effect a combination, with fair prospects of success.

#### REAL ESTATE.

Real-estate business in 1896 did not come up to expectations. For a time early in the year it looked as though confidence was returning and a revival was at hand, but the financial issue came up in the national campaign and led to a renewal of distrust and disorder. Business came practically to a standstill, with no prospects of early improvement. However, the future is not altogether dark. The rate of interest which money commands is steadily growing lower; investments in real estate which heretofore were considered good when yielding 6 to 8 per cent will, it is thought, soon be sought after when yielding only 4 to 5 per cent. Building operations in Chicago and other large cities were very much restricted, owing to the general hard times and the consequent lack of the usual demand for office room, stores, etc.

#### BICYCLES.

From a trade standpoint bicycle affairs in America during 1896 were unsatisfactory. At the same time the cycle business in England never before knew such prosperity. The startling difference was probably due to the facts that the cycle business in England was not subjected to a condition of inflation in itself and that a stagnation of business in general did not exist. England has, in her proverbial manner, "gone slow," while the cycle manufacturers and dealers in this country have plunged. The consequence of overproduction by many of the makers and attending lack of capital, the rush to dispose of stocks and the precipitation of price-cutting as result of all created a panic in the bicycle business that, although it was incidental to the universal stringency, was serious enough to attract great attention.

In 1896 about 700 failures in the cycle trade in America were reported. This represented about \$2,500,000. The many instances of trouble in the cycle business are not to be considered in any degree prophetic of a lessened interest in the use of cycles by the people or even of a diminished traffic in the commodity. The bicycle trade was simply sifted of a great amount of chaff—although many strictly reputable concerns suffered loss or total failure—and the coming season promises as large and a far healthier trade. A greater number of conservative men and a lesser number of irresponsible youngsters will be observed at the heads of the cycle-making institutions.

More was learned last year about what constitutes the universal demand than ever before. That is, the freak idea as to weights and designs nearly saw the end of its prestige, and now the bicycle of general use is not too light to be safe, and it is of the type, as regards lines, that the riding

public, and not racing men, need. The cycle manufacturers knew this long before but the public did not. The cycle makers make what the public wants most. While the majority of cycle riders wanted a shell construction of frame, with thin tires and low-dropped handle bars the cycle makers provided that kind. But now the public wants a sensible outfit of medium weight, heavy-tread tires and an equipment that will be productive of comfort while riding.

During the year there arose a demand for larger tires and the consequence is that in 1897 the makers will provide "clearance" in the width of forks to permit of big tires when ordered. The gear-case idea was stirred energetically in certain quarters and the result is that provision has been made for the well-known English contrivance that protects the chain and sprockets from dust and mud, the makers providing more "clearance" between hub and frame to admit of attachment. High gears grew in favor and this season will see many very exalted multiplications in this respect. Many of the manufacturers and dealers gained the belief that lower crank brackets would be more conducive to speed, and so the crank bracket on a number of leading makes is slightly lower this year than last.

The experiences of riders in bad weather gave rise to great complaints as to the inability of the bearings to exclude dirt and water. Probably the bicycles that were otherwise constructed in accordance with best-known methods suffered more from this defect than from any other. The makers have given special attention to this branch of the subject, correcting, as nearly as possible, for 1897 the defects complained of.

Summed up, bicycle construction in 1896 saw a very healthy period, while of the trade itself it may be said that it went through a sort of seige of typhoid fever, emerging, as humans sometimes do, somewhat worse for the wear but thoroughly renovated in respect to system.

#### RAILROAD BUILDING.

Railroad building in 1896 was insignificant compared to that of most years in the last decade but was about the same as in 1895. Altogether 163 lines in the states and territories laid 1,802.39 miles of track. The total railway mileage of the United States is now about 182,800 miles.

#### GROCERIES.

The year was an eventful one in the sugar business. The market on January 1 was \$5.19 for granulated and very strong, having advanced fully  $\frac{1}{4}$  cent from the 1st of December. Owing to the war in Cuba the market continued to advance until the latter end of April, when the price of granulated reached \$5.87. The reaction then set in and continued, with a few small advances intervening, until the end of the year, when it closed at \$4.63.

The coffee market for the best grades fluctuated but little. The Brazil crop, being a large one, caused a decline in some grades of 2 to 4 cents a pound. The consumption of low-grade coffees is increasing, owing, doubtless, to the depression in business.

As to rice, in the early part of the year prices were low and these continued while the crop of 1895 lasted, but in August, when the new rice came in, it was found that the crop was much smaller than usual, and prices were at once advanced from 1 cent to 2 cents a pound. This stimulated the im-

portation of foreign goods, particularly from Japan.

Fruits of nearly all kinds were abundant and the ruling prices were low. The consumption of dried fruits, owing to the enormous quantities of the green fruit, fell below that of former years.

The imported Havana cigar has almost entirely disappeared from the market and, as no new leaf will be available for two years to come, prices are certain to advance. The supply in this country is concentrated in the hands of two large concerns—one in New York and one in Tampa.

The grocery business as a whole did not come up to expectations. There is, how-

ever, a better feeling and better things are looked for in 1897.

#### SHELF HARDWARE.

During the year the wholesale shelf hardware business was affected by the general depression prevailing throughout this country. The volume of business kept well up until the political excitement in the west considerably curtailed it. After the election business increased a little. The dismemberment of the nail "pool," the advances in the prices of farm products and the general feeling of confidence prevailing seem to point to an increased business and better profits in the coming year.

# Bonnell's Inks

USED BY

*Harper & Brothers.*

J. HARPER BONNELL CO.

HARPER BROTHERS,  
Franklin Square, New York.

GENTLEMEN: In response to your favor of the 7th inst. we have pleasure in saying that we are now using your various inks on our periodicals and miscellaneous books, and that such inks are, in general, highly satisfactory. We can, therefore, unhesitatingly commend their use to the trade generally, and to such in particular as aim at art work from the printer's standpoint.

Yours very truly,  
HARPER & BROTHERS.

Following is a list of the more important Chicago buildings begun or completed in 1896:

## MERRIMAC BUILDING.

The Merrimac office building, twelve stories and basement high, stands on the north-west corner of State and Washington

streets. It was erected by the Merrimac Building company, in which D. H. Burnham & Co., the George A. Fuller Construction company, R. A. Waller, H. H. Kohl-saat and others are interested. The building is in design after the French renaissance style of architecture. The basement and the first two stories are arranged for retail-

store purposes and the remainder to high-grade offices. The exterior material is enameled terra cotta of an olive-green shade for the first two stories and glazed terra cotta of a light cream color above, plate glass forming the principal part of the store fronts. The entrance is at the northeast corner of the lot, on State street, and this, as well as the cornices and the pilasters and arches of the three top stories, is elaborately finished in terra-cotta ornamentation of special artistic design. Aside from this, the entrance vestibule and the hall leading to the elevators are entirely finished in white marble and the elevators are inclosed in bronze work. The woodwork throughout is mahogany, and in the line of plumbing, heating and ventilation the most approved and elegant modern appliances have been used. All the halls have tile floors and marble wainscoting. The building, having two street fronts and an alley on the west line, is light and airy. It is so arranged that every suite of offices has outside light. The total cost is placed at \$600,000.

#### ILLINOIS TRUST AND SAVINGS BANK BUILDING.

The Illinois Trust and Savings Bank building, though not a skyscraper, will be when completed one of the most notable structures in the city. It stands at the corner of Jackson and LaSalle streets, on part of the site occupied by the old Grand Pacific hotel. The exterior will be done in severely classic style—an adaptation from the Roman classic. Upon LaSalle street will be an open colonnade with seven Corinthian pillars of dark granite thirty-eight feet in height. The building will have a frontage of 168 feet on LaSalle street and 173 feet on Jackson street. From the sidewalk to the cornice the height of the building will be fifty-eight feet, although in the center the glass roof over the court will be several feet higher. But two stories and a basement are included in the design. A solid stone parapet will crown the walls and the roof will be flat. There will be but one entrance to the building, and that will be placed in the center of the LaSalle street front. The great swinging doors will be of solid bronze, richly ornamented in bas-relief designs. Immediately in front of the entrance will be a grand monumental staircase done in bronze and marble. In the northwest corner will be another stairway leading to the safety-deposit vaults in the basement. On three sides of the first floor will be a hall twenty-eight feet in width for the use of the general public. The entire central portion of the interior will be occupied by a court, which extends up through the second story and is domed by an immense skylight. Between the public hall and the court there will be a double row of marble columns. Between the two rows will be the bank cages of bronze grille work. Marble wainscoting will be used throughout the building and the court will be a reproduction of the beautiful court in a famous Italian palace. At the rear of the building will be the bank vaults of solid masonry, with walls 25 by 35 feet and two stories high. The court on the first floor will be used for desks. On the second floor will be an open loggia. Offices will be placed on all four sides of the building. These will include private offices for the officers and directors and assembly-rooms. In the northeast corner provision is made for a spacious kitchen and dining-room. D. H. Burnham is the architect. The cost is placed at \$300,000.

#### TRUDE COMMERCIAL BUILDING.

The Trude Commercial building, at the southwest corner of Wabash avenue and Randolph street, has ground dimensions of 104 feet on the avenue and 50 feet on the street, but the twenty-five feet adjoining west on the latter are also owned by the Trude family. These twenty-five feet will be added to the building as soon as the leases now on the property have expired, which will be in three years. At the corner building there are twelve stories, with a total height of 154 feet. Steel skeleton fireproof construction of a very substantial character has been applied, because the building is calculated for commercial purposes, with a stock of goods on each floor. The two lower stories are intended for stores and have high ceilings and large store windows. Three passenger elevators and one freight lift have been provided. The two street elevations, designed in the French renaissance style of architecture, are largely of ornamental terra cotta of a soft gray color, and the main entrance, flanked on each side with polished granite pilasters with ornamental caps, is entirely of marble in the interior finish. The total cost is about \$250,000.

#### SILVERSMITH BUILDING.

The Silversmith building, 133 to 139 Wabash avenue, was designed by D. H. Burnham & Co. for a syndicate represented by Benjamin Allen of Chicago, a jeweler, and by the Gorham manufacturing company. The lot is 81½ by 130 feet and is leased at an annual rental of \$20,000. In accordance with the nature of the business of the leading lessees the new building is to be chiefly devoted to the interest of the wholesale jewelry trade, and in this respect will be a notable innovation in Chicago, if not in the country. The building is ten stories high and is absolutely fireproof, both the steel and masonry construction being materially heavier than in the usual class of buildings of this kind. The exterior is of green glazed terra cotta and plate glass for the first two floors and a dark-red pressed brick of the finest quality above. The building cost about \$250,000.

#### OLYMPIC THEATER.

The Olympic Theater building is an addition to the north end of the Ashland block and is similar to it in design and construction. It is ten stories high and occupies a lot 41 by 80 feet fronting on Clark street. One of the features of the structure is the fine entrance to the theater. It is twenty-five feet high and fitted with mirrors, marble and mosaic. Provision for extra stairways and elevator service has been made, but the elevators of the Ashland building will be used by tenants in the addition, for a time at least. The entire block, with the addition, is heated from apparatus established in the new part. The cost of the addition was \$150,000. It is entirely fireproof, of steel construction, with marble corridors. A banking-room has been arranged for the second floor. The addition was ready for occupancy early in the fall. R. A. Waller and Lucius Brodhead represent the owners of the building, the architect of which was John Arthur Rogers.

#### SCHLESINGER & MAYER BUILDING.

The Schlesinger & Mayer building, at 141 and 143 Wabash avenue, was designed by Louis H. Sullivan for the firm named. The lot on which it stands is 40 by 171 feet and is leased from John H. Barker and N. P.

# BONNELL'S INKS

USED BY

## THE CHICAGO DAILY NEWS AND RECORD.

The J. Harper Bonnell Company has been reawarded the order for supplying ink to the Chicago Daily News and Record. Mr. Lawson's order is perhaps the one most sought after by ink men generally, and Mr. Bonnell is receiving many congratulations accordingly.

Apart from the size of the contract, it is well known that these two papers are unexcelled in mechanical make-up, so that Mr. Lawson's preference for the Bonnell inks speaks volumes for their superiority

Rogers, trustees under the will of Cordelia E. Barker, for a term of ninety-nine years, at an annual rental of \$12,000. At present the building is only five stories high, but provision has been made for additional stories later on. The cost of the structure was about \$100,000. The materials of construction were iron, steel, brick, stone and plate glass.

### THE COLISEUM.

The Coliseum, 63d street and the Illinois Central railroad, was begun in the summer of 1895 and completed in the spring of 1896. Work was delayed for some weeks by the collapse of ten of the steel arches of the frame Aug. 21, 1895. It is a fireproof structure, built of brick, steel and glass. It is 676 feet long and 300 feet wide, with a clear

central space of 225 feet in width and 632 feet in length. This colossal permanent structure is particularly designed for mammoth exhibitions and great national conventions. One of the special features of the interior of the Coliseum is an adjustable amphitheater or auditorium, which is made in sections so as to accommodate an audience of from 5,000 to 15,000 people, comfortably, conveniently and safely, or it can be taken out of the building entirely, leaving the floor and gallery space free. The building was put up by the Chicago Coliseum Exhibition company, of which John T. Dickinson was president, Dr. A. R. Oughton secretary and J. O. Heyworth treasurer. S. S. Beman was the architect. The cost was about \$250,000.

### CHICAGO GRAIN AND PRODUCE STATISTICS.

The following shows the lowest and highest prices for grain and produce in the Chicago market for the last 30 years and the months in which extreme prices were reached:

## "WE'VE COME TO STAY."

**A**T A MEETING in connection with the opening of a new graveyard, the question of a suitable inscription for over the gateway was being discussed quite freely without any immediate prospect of settlement, when one of the Directors proposed that the selection be left to the old grave digger and the Board to abide by his decision, which was unanimously agreed to. Upon being asked the question, he, at once, proposed this: "WE'VE COME TO STAY."

The moral of this story is, if YOU WANT TO STAY you must

## INCREASE YOUR SUBSCRIPTION LIST!

If interested, write us at once for Circular Price-list and Samples of **THE M. J. LAWSON "SAFETY" COIN-MAILING CASE**, for mailing all sums in coin under \$1.00. Saves the inconvenience of Money Orders and Postage Stamps in the remitting or returning of small amounts. Used by Publishers and others for soliciting subscriptions, donations, or the purchase or sale of some article through the mails.

We make Coin-Mailing Cards to carry one or more coins.

**THE M. J. LAWSON MANUFACTURING CO.**

1535 COLUMBIA AVENUE, PHILADELPHIA, PA.

## ARRESTS AND FINES.

Arrests and amount of fines imposed each month during 1895:

| Months.        | Arrests. | Fines.             |
|----------------|----------|--------------------|
| January.....   | 5,421    | \$22,856           |
| February.....  | 4,795    | 20,275             |
| March.....     | 5,292    | 19,806             |
| April.....     | 6,017    | 19,927             |
| May.....       | 6,804    | 26,483             |
| June.....      | 7,984    | 28,039             |
| July.....      | 9,179    | 33,462             |
| August.....    | 9,515    | 21,600             |
| September..... | 8,074    | 27,229             |
| October.....   | 7,507    | 26,856             |
| November.....  | 6,590    | 25,336             |
| December.....  | 6,488    | 23,620             |
| Total.....     | 83,464   | 301,555            |
| Males.....     | 67,370   | Married.....23,617 |
| Females.....   | 16,094   | Single.....59,847  |
| Total.....     | 83,464   | Total.....83,464   |

## AGES OF PERSONS ARRESTED.

|                                 |        |
|---------------------------------|--------|
| Under 10 years of age.....      | 296    |
| From 10 to 20 years of age..... | 15,218 |
| From 20 to 30 years of age..... | 37,193 |
| From 30 to 40 years of age..... | 18,131 |
| From 40 to 50 years of age..... | 8,158  |
| From 50 to 60 years of age..... | 2,899  |
| From 60 to 70 years of age..... | 845    |
| From 70 to 80 years of age..... | 93     |
| From 80 to 90 years of age..... | 9      |

## COMPARATIVE STATEMENT.

Aggregate number of arrests, amount of fines imposed, value of property reported stolen value of stolen property recovered, expenditures of the department, etc., each year since 1879

| YEAR ENDED DEC. 31. | Numerical strength of the police force, officers & men. | Number of arrests. | Amount of fines imposed. | Value of property reported stolen. | Value of property recovered. | Expenses of police department. |
|---------------------|---------------------------------------------------------|--------------------|--------------------------|------------------------------------|------------------------------|--------------------------------|
| 1879.....           | 453                                                     | 27,388             | \$205,147.00             | \$106,084.71                       | \$93,370.76                  | \$445,195.42                   |
| 1880.....           | 473                                                     | 28,480             | 151,560.00               | 142,559.41                         | 125,509.35                   | 493,672.38                     |
| 1881.....           | 506                                                     | 31,713             | 163,937.00               | 147,444.36                         | 118,508.56                   | 377,037.77                     |

## Cash Prizes

Have been awarded by THE CHICAGO RECORD every week during the past year and a half for the best obtainable daily menus for breakfast, luncheon and dinner, for publication daily in THE RECORD under the heading, "Meals for a Day." The object aimed at was to provide seasonable bills of fare which would offer "good living" at small cost—the limit of expense allowed being \$500 a year for a family of five.

The undertaking proved popular and successful beyond all expectations. 10,000 manuscripts have been contributed to the contest by practical housewives in all parts of the country.

In response to popular demand the prize menus and recipes have been collected in book form under the title

## THE CHICAGO RECORD COOK BOOK,

A volume of 610 pages, giving bills of fare, with accompanying recipes, for every day in regular order from January 1 to December 31. Bound in art canvas, with prize design in 3 colors on front cover.

**Price, = = \$1.00**

Mailed postpaid on receipt of price by THE CHICAGO RECORD, 181 Madison Street, Chicago.

Trade supplied by A. C. McClurg & Co.

## CIRCULATION THE CHICAGO RECORD.

1881.
